ITX SERIES 6W SINGLE AND DUAL OUTPUT DC/DC CONVERTERS

NEW

RoHS Compliant Available

XP Power

- 2:1 Input range
- SIP-8 plastic case
- Single and dual outputs
- 1500VDC isolation
- Short circuit protection
- Three-year manufacturer's warranty

SPECIFICATIONS:	
Input Voltage Range:	5V (4.5-9VDC), 12V (9-18VDC), 24V (18-36VDC), 48V (36-75VDC)
Line Regulation:	±0.2% max
Load Regulation:	±1% max 0% to 10% load
Ripple & Noise:	75mV pk-pk max @ 20MHz bandwidth (measured using 0.1µF capacitor)
Isolation:	1500VDC Input-to-Output
Operating Temperature:	-40°C to +90°C (see datasheet for derating)
Dimensions:	21.85 x 11.1 x 9.2mm (0.86 x 0.44 x 0.36")
Emissions:	EN55022 Class A conducted and radiated

JCE SERIES 6W SINGLE AND DUAL OUTPUT DC/DC CONVERTERS

NEW

RoHS Compliant Available

XP Power

- 2:1 input range
- DIP-24 package, plastic case rated UL94V-0
- Single and dual outputs
- 1500VDC isolation
- Three-year manufacturer's warranty

SPECIFICATIONS:	
Input Voltage Range:	12V (9 - 18VDC) 24V (18 - 36VDC) 48V (36 - 75VDC)
Line Regulation:	±0.5% max.
Load Regulation:	±1.2% max.(single output), ±5% max.(dual output) from 10% to 100%
Isolation:	1500VDC input to output
Ripple & Noise:	80mV pk-pk, 100mV for D24 models, 20MHz bandwidth
Operating Temperature:	-40°C to +100°C
Dimensions:	1.25"W x 0.8"L x 0.4"H

JTF SERIES 8-15W SINGLE AND DUAL OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

XP Power

- High-power density
- Wide 4:1 input range
- Single and dual outputs
- Overload, overvoltage and short circuit protection
- Remote on/off control
- 1600VDC isolation
- Three-year manufacturer's warranty

SPECIFICATIONS:

Input Voltage Range:	24V (9 - 36VDC), 48V (18 - 75VDC)
Line Regulation:	±0.2% max single, ±0.5% dual
Load Regulation:	±0.5% max single, ±1.0% max dual
Isolation Voltage:	1600VDC Input to Output, 1600VDC Input to Case, 1600VDC Output to Case
Ripple & Noise:	75mV pk-pk, 20MHz bandwidth for JTF08, 85mV pk-pk, 20MHz bandwidth for JTF10 and JTF12, 60mV pk-pk 20MHz bandwidth for JTF15
MTBF:	>1MHrs. to MIL-HDBK-217F @ 25°C, GB
Operating Temp:	-40°C to +105°C, derate from 100% load at +60°C to no load at +105°C for 10W, 12W and 15W versions and from 100% load at +70°C to no load at +105°C for 8W version
Dimensions (H x W x D):	0.4 x 0.8 x 1.25"

JCA10 SERIES 10W SINGLE AND DUAL OUTPUT DC-DC CONVERTERS

NEW

RoHS Compliant Available

XP Power

- Compact 1" x 0.8" metal package
- Industry standard pin out
- 2:1 input range
- Single and dual outputs
- Overvoltage, overcurrent and short circuit protection
- 3-year manufacturer's warranty
- CE compliant

TÜV Rheinland

SPECIFICATIONS:

Input Voltage:	5V (4.5-9VDC), 12V (9-18VDC), 24V (18-36VDC), 48V (36-75VDC)
Line Regulation:	±0.3% max
Load Regulation:	±1%
Ripple & Noise:	50mV pk-pk, 20MHz bandwidth
Isolation Voltage:	1500VDC Input to Output, 500VDC Input to Case, 500VDC Output to Case
Operating Temperature:	-40°C to +100°C, derate from 100% load at +70°C linearly to 0% load at +100°C
Dimensions (H x W x D):	0.4" x 0.8" x 1" (10mm x 20.3mm x 25.4mm)

SINGLE OUTPUT

JHM SERIES 10W SINGLE AND DUAL OUTPUT MEDICAL DC/DC CONVERTERS

RoHS Compliant Available

XP Power

- International Medical Approvals
- 4000VAC reinforced insulation
- Meets IEC60601-1, 3rd Edition
- 2 uA Patient leakage current
- DIP24 package
- EN55011 Level A with no external components
- Three-year manufacturer's warranty

SPECIFICATIONS:

Input Voltage Range:	5V (4.5-9 VDC), 12V (9-18 VDC), 24V (18-36 VDC)
Line Regulation:	±0.3% max.
Load Regulation:	±2% max 0% to 10% load, ±1% max 10% to 100% load
Ripple & Noise:	1% pk-pk max at 20 MHz bandwidth
Isolation:	4000VAC for 1 min. double/reinforced with a working voltage of 250VAC. Meets 2 x MOPP per 3rd edition of IEC60601-1 5000 VAC for 10 ms in accordance with IEC60664-1
Operating Temperature:	-40°C to +80°C (see datasheet for derating)
Dimensions:	12.7 x 20.32 x 31.75mm (0.5 x 0.8 x 1.25")
Emissions:	EN55011 & EN55022 level A conducted & radiated with no external components
Safety Approvals:	ANSI/AMMI ES60601-1 3rd edition, CSA22.2 No. 60601-1:2008 IEC60601-1 3rd Edition

JTK SERIES 15-20W HIGH POWER DENSITY DC/DC CONVERTERS

RoHS Compliant Available

XP Power

- High power density
- Wide 4:1 input range
- Operating temperature -40°C to +100°C
- Single and dual outputs
- 1600VDC isolation
- High efficiency - up to 89%
- Three-year manufacturer's warranty

JTK series feature an input to output and input/output to case isolation of 1,600VDC for up to 1 minute and remote on/off signal. This can be used to control the output rails or to sequence start-up procedures. All units feature overvoltage and continuous short circuit protection. Ideal for use in a wide variety of mobile, portable and wireless products, and where designers are looking to reduce the size of their end product.

SPECIFICATIONS:

Input Voltage Range:	24V (9-36VDC), 48V (18-75VDC)
Line Regulation:	±0.2% max (**JTK15 series**), ±0.5% max (**JTK20 series**)
Load Regulation:	±0.5% max single, ±1.0% max dual
Isolation:	1600VDC Input to Output, 1600VDC Input to Case, 1600VDC Output to Case
Ripple & Noise:	100 mV pk-pk, 20 MHz bandwidth**
Operating Temperature:	-40°C to +100°C, derate from 100% load at +65°C to no load at +100°C (**JTK15 series**) -40°C to +100°C, derate from 100% load @ +55°C to no load @ +100°C (**JTK20 series**)
Dimensions:	1.00W x 1.00L x 0.39"H

JCM SERIES 15/20W SINGLE AND DUAL OUTPUT DC-DC CONVERTERS

RoHS Compliant Available

XP Power

- Very high power density - 1" x 1" package
- 2:1 input range
- Operating Temperature -40°C to +105°C
- Single and dual outputs
- High efficiency - up to 89%
- 1600VDC isolation
- Output trim
- Remote on/off
- Three-year manufacturer's warranty

JCM series ultra compact low power DC-DC converters come in a 1 x 1" (25.4 x 25.4mm) encapsulated metal package. These PCB mounted converters accommodate a wide 2:1 input voltage range, accepting either 9V to 18V, 18V to 36V or 36V to 75V , covering the nominal inputs of +12, +24 or +48VDC. Single output models provide +3.3, +5, +12 or +15VDC, while the duals offer +/-5, +/-12 or +/-15VDC. All units feature overvoltage and continuous short circuit protection.

SPECIFICATIONS:

Input Voltage:	12V (9-18VDC), 24V (18-36VDC), 48V (36-75VDC)
Line Regulation:	±0.2% max. (**JCM15 series**), ±0.5% max. (**JCM20 series**)
Load Regulation:	Single output models: ±0.5% max, Dual output models: ±1% max
Isolation Voltage:	1600VDC
Ripple & Noise:	100mV pk-pk, 20MHz bandwidth**
MTBF:	>560 KHrs to MIL-STD-217F at 25°C, GB

CE

- 72VDC and 110VDC input for railway applications
- Single and dual outputs
- 1500VDC basic isolation
- High power density
- High efficiency — up to 88%
- Remote On/Off
- Overvoltage, overload, overtemperture protection
- Short circuit protection
- Three-year manufacturer's warranty

SPECIFICATIONS:	
Input Voltage Range:	72V (36-140VDC), 110V (55-176VDC)
Line Regulation:	±0.2% max
Load Regulation:	Single output models ±0.5%; Dual output models ±1% (balanced outputs)
Ripple & Noise:	100mV or 1% pk-pk Single output models; 150mV or 1% pk-pk Dual output models , whichever is greater, @ 20MHz bandwidth (measured with 1µF ceramic capacitor in parallel with 10µF electrolytic capacitor across output rails)
Isolation:	1500VAC Input-to-Output, 1600VDC Input -to-Case and Output-to-Case
Operating Temperature:	-40°C to +85°C (see datasheet for derating)
Dimensions:	50.8 x 25.4 x 10.16mm (2 x 1 x 0.4")
EMC - Emissions:	EN50121-3-2, Railway applications - electromagnetic compatibility for rolling stock apparatus; Emissions: EN55011

JCK30 SERIES 30 WATT SINGLE AND DUAL OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

XP Power

- 2:1 input range
- High power density
- Single and dual outputs
- High efficiency - up to 92%
- Remote On/Off
- 1600VDC isolation
- Three-year manufacturer's warranty

JCK30 series 30 Watt ultra compact low power DC/DC converters come in a metal case that measures just 2" x 1". These encapsulated PCB mounted converters accommodate a wide 2:1 input voltage range, accepting either 9 – 18, 18 – 36 or 36 – 75 VDC, covering the nominal inputs of +12, +24 or +48 VDC. Single output models provide +3.3, +5, +12 or +15 VDC, while the duals offer +/-5, +/-12 or +/-15 VDC. All units feature overvoltage and continuous short circuit protection.

SPECIFICATIONS:	
Input Voltage Range:	12 V (9-18 VDC) 24 V (18-36 VDC) 48 V (36-75 VDC)
Line Regulation:	±0.5% max.
Load Regulation:	Single output models: ±0.5% max Dual output models: ±1% max balanced outputs
Isolation:	1600VDC Input to Output 1600VDC Input to Case 1600VDC Output to Case
Ripple & Noise:	100 mV or 1% pk-pk
Operating Temperature:	-40°C to +105°C, derate from 100% at +50°C to 0% at +105°C
Dimensions:	1.00W x 2.00L x 0.4"H

DIN RAIL POWER SUPPLIES

SDP-T SERIES DIN RAIL POWER SUPPLIES

RoHS Compliant Available

SOLA HD

- Low output noise
- PowerBoost™ industrial overload design
- -10°C to 60°C with no derating
- Ripple less than 50mVp-p
- Screw terminal connections
- Input Voltage: 85 to 264 VAC; 90 to 375** VDC (except where noted*)

High efficiency (85 to 88%) compact power supplies provide fast connection, short circuit, overload and underload protection. Each unit contains a DC indicator and front panel adjustment potentiometer.

SDN-C SERIES COMPACT DIN RAIL POWER SUPPLIES

RoHS Compliant Available

SOLA HD

- Compact packaging to save space on the DIN rail
- Visual diagnostic LED's for input/output status
- High MTBF means high reliability and long life
- Higher efficiency saves energy and lowers amount of heat generated in panel
- Powerboost™ overload capability to start high inrush loads
- Accepts universal voltage 85-264VAC, 50/60 Hz input
- Active Power Factor Correction
- Patented DIN rail mounting clip
- User adjustable output voltage accessible via front face
- Parallel capability standard
- Industrial grade design: -25° to 60°C operation without derating,
- Rugged metal housing; easy on/off DIN mounting
- Large, IP20-rated, screw terminals for #10 AWG/6mm2, for quick, easy installation
- Fully tested and burned in at the factory
- Highly efficient switching technology
- Five-year manufacturer's limited warranty
- UL listed - E61379, UL508, CSA C22.2 No. 107.1
- UL recognized - ITE, E137632; Haz. Loc., E234790
- CE compliant - IEC/EN60950-1, 2nd Edition
- Meets SEMI F47 Sag Immunity
- ATEX directive - EN60079-0, EN60079-15 on 5A,10A, 40A models

SDN-C series DIN rail power supplies are the next generation of the popular **SDN series**. These models combine high efficiency and compact size with new visual diagnostic LED's. Features include sag immunity, power factor correction, and universal voltage input. Wide temperature operating range and parallel operation capability make the new SDN-C units suitable to a variety of industrial applications.

SDN SERIES THREE PHASE DIN RAILS

RoHS Compliant Available

SOLA HD

- Easy to Mount and Connect
- High Efficiency (>90%)
- High MTBF and Reliability
- High Grade and Low Stress Design Components
- Short Circuit Protection
- Overvoltage and Over Temperature Protection
- Auto Select 115/230 VAC, 50/60 Hz Input
- Output voltage, 22.5-28.5V Adj.
- Ripple and noise, <50mVpp
- >20ms Hold-Up
- -25°C to 60°C With No Derating

PS6R SERIES DIN RAIL SWITCHING POWER SUPPLIES

NEW

RoHS Compliant Available

IDEC

DC-DC Converter Module with Branch Terminal Module Attached to 480W Power Supply

A Power Revolution — Highly Efficient, Space-Saving, and Easily Expandable

- Energy-saving 93% efficiency
- Power range: 120W, 240W, 480W
- Input voltage: 100 to 240V AC (voltage range: 85 to 264V AC/110 to 350V DC)
- Accommodates plug-in output modules, *ordered separately*, for additional 5V, 12V, 15V outputs
- Accepts plug-in branch terminal module, *ordered separately*, for two pair additional terminals
- Up to 70°C (158°F) operating temperature
- LED status indicators — low voltage and operation indication
- Captive spring-up screw terminals — use ring or fork terminals
- Finger-safe construction prevents electric shocks
- DIN rail or panel mount
- UL listed -- File No. E177168; UL508 CSA C22.2 No. 107.1
- TUV approved, CE complaint -- EN60950-1, EN50178, EN61204-3

Branch Terminal Module

DC-DC Converter Module

PS6R series switching power supplies offer a built-in expansion slot that allows the use of plug-in DC-DC converter modules, enabling users to add 5V, 12V and 15V outputs to the standard 24V version, or a plug-in branch terminal module that provides two additional pairs of output screw terminals (positive and negative) for more wiring capacity.

- Universal input: 7.5 to 75W: 85-264VAC/105-370VDC; 100W: 100-120VAC/200-240VAC, 240-370VDC (selectable); 120 to 240W: 85-264VAC/105-370VDC
- Unique spring-up, finger safe terminals (ideal for ring lug wire), IP20
- Power factor correction (75W,120W, & 240W models)
- Voltage adjustment: +/-10%
- Output capabilities in 5VDC, 12VDC, or 24VDC
- Overcurrent/overvoltage protection
- DIN rail or panel surface mount
- Parallel operation: 75W, 120W and 240W model
- Worldwide approvals

OMRON AUTOMATION & SAFETY

- Ultra-Compact, DIN Mount Package
- Status at a Glance with 7-Segment LED Display
- Incorporates a Maintenance Forecast and Run-Time Monitor
- Three Year Warranty
- Meets UL508

Maintenance forecast monitor displays remaining life of power supply. Run-time monitor displays how long the output has been "ON". 90W and higher models have two outputs: one for undervoltage output and the other for either of the monitoring functions.

DSP SERIES 7.5 TO 100 WATT DIN RAIL MOUNT POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- Low profile for building automation
- 5V to 24V outputs
- Wide range AC input
- UL1310 Class 2*
- Class II double insulation
- -25 to +71°C operation
- Convection cooled
- DIN rail or chassis mount
- Two-year manufacturer's warranty

DSP series low 2.2" profile fits into wall mounted cabinets. Wide range AC for global use with no input selector switches. Full power at 61°C no derating needed. Size (W x D x H): **DSP10**: 0.71 x 3.58 x 2.19"; **DSP30**: 2.09 x 3.58 x 2.19"; **DSP60**: 2.8 x 3.58 x 2.19"; **DSP100**: 3.54 x 3.58 x 2.19".

DRB-15-100 SERIES 15-100W, 5-48V OUTPUT DIN RAIL MOUNT AC/DC POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

NEW

- Space-saving compact size
- Input voltage 85 - 264VAC
- 5V, 12V, 24V or 48V outputs
- High efficiency (up to 91%)
- Low no load power draw
- Green LED indicates DC is OK
- Convection cooled
- Durable, flame-retardant polycarbonate case, rated UL94V-0
- ErP compliant design
- UL listed, CE compliant
- Three-year manufacturer's warranty

SPECIFICATIONS:

Mfg. Part No.	DRB15241	DRB30xxx	DRB50xxx	DRB100241

DPP120-240 SERIES 120W AND 240W DIN RAIL MOUNT POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- Low cost
- 12V, 24V or 48V outputs
- Auto-ranging input (no manual switching)
- Parallel function switch
- -25 to +71°C operation
- Convection cooled
- Two-year manufacturer's warranty

DPP120-240 series snaps onto DIN Rail TS35/7.5 or TS35/15; *go online or call.* No tools required.

SPECIFICATIONS:

Mfg. Part No.	DPP-120	DPP-240
AC Input Voltage Range:	90 - 132 /186- 264VAC, single phase. Auto select	
Input Frequency:	47 - 63Hz	
Ripple & Noise (20MHz BW):	50mV	100mV
Conducted & Radiated EMI:	EN55022 class B	EN55022 class A
Operating Temperature:	0 to +71°C, derate linearly to 2.5%/°C from 61°C to 71°C	
Safety Agency Approvals:	UL508 Listed, UL60950-1, EN60950-1, CE	
Dimensions:*	2.5W x 4.92H x 4.59"D	3.27W x4.92H x 4.57"D

TBL SERIES, 15 TO 150 WATT, INDUSTRIAL POWER SUPPLIES

RoHS Compliant Available

TRACO POWER

Features:

- Low profile case, module height only 55mm
- Fits into flat control panels used in building automation
- Universal input range 85 to 264 VAC
- Adjustable output voltage
- Short circuit and overload protection
- DC–OK indicator
- Easy snap-on mounting on DIN-rail
- Three-year manufacturer's warranty

Specifications:

- Output regulation: 1%
- Ripple & noise: <100 mVpk-pk
- Operating temperature range: –25°C to +70°C max.

TBL series ultra-compact, low profile, small DIN-rail mount power supplies fit in standardized wall mounted control panels used in the building automation industry. The power supplies can be operated at full load across an ambient temperature range of –25°C to +60°C without need of additional cooling. For commercial and residential applications requesting safety class II the product is approved to UL 1310. UL508 listed.

TCL SERIES, 24 TO 240 WATT, INDUSTRIAL POWER SUPPLIES

RoHS Compliant Available

TRACO POWER

Features:
- Ultracompact plastic housing
- Choice of connection: detachable screw terminal blocks or spring clamp terminals
- Reliable snap-on DIN rail mounting
- Bracket for wall mounting included
- Universal input 85 to 264 VAC, 50/60 Hz, 85 to 375 VDC
- Adjustable output voltage
- Overload and short-circuit protection
- Three-year manufacturer's warranty
- UL listed, UL recognized, CSA certified, CE compliant

Specifications:
- Output regulation: 2.5% (1% for **mfg. part no. TCL 60-112C**)
- Ripple and noise: <50 mVpk-pk
- Operating temperature range: –10°C to +70°C max.

TCL series compact, lightweight DIN-rail mount power supplies for industrial, office and residential applications. With tightly regulated output voltage and high immunity against electrical disturbances on the mains these supplies provide a reliable power source for sensitive loads in industrial process controls, machine tools and other equipment exposed to a difficult industrial environment.

TCL-DC SERIES, DIN-RAIL DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

Features:
- Compact, slim plastic housing
- Detachable screw terminal block
- Reliable snap-on DIN-rail mount
- Bracket for wall mounting included
- Wide input voltage range 18 to 75 VDC
- Adjustable output voltage
- Overload and short circuit protection
- Three-year manufacturer's warranty
- UL listed

Specifications:
- Regulation:
  Input variation Vin min. to Vin max.: 0.5% max.
  Load variation 0 - 100%: 0.5% max.
- Ripple and noise (20 MHz bandwidth): < 50 mV pk-pk
- I/O isolation 1500 VDC
- Operating temperature range: -10°C to +70°C max.

TCL-DC series DIN-rail DC/DC converters offer a wide 18-75 VDC input voltage range to operate from all popular DC supply voltage systems. Easy installation, just snaps onto DIN rails or mount on chassis or wall with supplied mounting bracket. With tightly regulated output voltage these converters provide a reliable power source for sensitive loads in industrial process controls, factory automation and other equipment exposed to a critical industrial environment.

DIN RAIL POWER SUPPLIES

TSP-3P SERIES, 240–960 WATT, INDUSTRIAL POWER SUPPLIES

RoHS Compliant Available

TRACO POWER

- Three-phase input 3AC 400V or 3AC 500V
- 200% boost power for up to 5 seconds
- Alternative to AC transformers
- Fully regulated 24 VDC output with 10 A, 20 A or 40 A
- Rugged metal case design qualified for harsh industrial environment
- High efficiency >92%
- Operating temperature range: –25°C to +60°C (full power)
- Overload and over temperature protection
- Industrial safety approvals
- Cost effective design
- Three-year manufacturer's warranty

Mfg. Part No.	Output Power Max.	Input Voltage	Output Voltage	Output Current (Max.)	Stock No.	Price Each 1-4

TIS SERIES, 50–600 WATT, INDUSTRIAL POWER SUPPLIES

RoHS Compliant Available

TRACO POWER

c UL us

- Switch mode power supplies for DIN-rail mount
- Six power ranges with 2, 3, 6, 12, 20 and 24 A output current (24 VDC models)
- Selectable 115/230 VAC input
- Very low ripple and noise
- EMI complies with EN 61000-6-3 and EN 61000-6-4
- Operating temperature range –25°C to +70°C
- Worldwide safety approvals incl. class I, div. 2 location
- Easy snap-on mount on DIN-rails or chassis mount
- Three-year manufacturer's warranty

PCB Mount

- Ultra compact, low profile plastic casing
- Fully encapsulated (pollution/dust)
- Single- and dual-output models
- Two package versions: Screw terminal block for chassis mount and Solder pins for direct PCB mount
- DIN-rail mount adaptor (optional)
- Universal input 85-264 VAC, 47-440 Hz
- Protection Class II
- IEC/EN/UL 60950-1 approval, CB-report
- Over-temperature protection
- Protection against short circuit and oveload
- Three-year manufacturer's warranty

EPSITRON® SWITCH-MODE DIN RAIL MOUNT POWER SUPPLY WITH CHARGER/ CONTROLLER FOR UPS

NEW

RoHS Compliant Available

WAGO

- Battery control technology for smooth charging and predictive maintenance applications
- Potential-free contacts provide function monitoring
- Buffer time can be set on site via rotary switch
- Parameter setting and monitoring via RS-232 interface
- Prepared for protection Class I equipment
- Natural convection cooling when horizontally mounted
- Enclosed for use in switchgear cabinets
- Electrically isolated output voltage (SELV) acc. to EN 60950-1/UL 60
- Dimensions: 60mmW x 127mmH x 135.5mmL
- Ambient operating temperature: -25° to +70°C

Mfg. part no. 787-1675 standard single-phase AC/DC switch-mode power supply unit and electronic charger- and controller are housed in the same unit, saving space and reducing cost. Provides an uninterruptible 24VDC voltage at a maximum load current of up to 5A in both an error-free AC power supply network and in the event of power failure when the buffer mode is activated without interruption delivering reliable sevice. *Order Epsitron® lead-acid absorbed glass mat (AGM) battery modules separately below.*

Mfg. Part No.	Input Voltage (VAC)	Output Voltage (VDC)	Output Current (A)	Power (W)	Efficiency (%)	Stock No.	Price Each 1-9

EPSITRON® ECO POWER SWITCH-MODE DIN RAIL MOUNT POWER SUPPLIES

NEW

RoHS Compliant Available

WAGO

- Nominal output voltage 24VDC; 22 to 28VDC adjustable
- Output currents of 2.5A, 5A or 10A
- Efficiency level to 82%
- Rugged flat, solid metal housing
- Maintenance-free Cage Clamp® connection terminations
- Front-panel adjustable output voltage
- LED status indication, variable voltage input
- Open circuit and short-circuit protected
- Mounts easily on DIN carrier rail
- Prepared for Class I equipment
- Natural convection cooling when horizontally mounted
- Enclosed for use in switchgear cabinets
- Parallel operation, series connection possible
- Electrically isolated output voltage (SELV) acc. to EN 60950-1/UL 60950

EPSITRON® ECO power supplies are an economical alternative for applications that simply require 24VDC without additional functions. Feature high load-carrying capacity that delivers 1.1 times the nominal rated current with lowered output voltage -- ideal for starting capacitive loads. These ECO power supplies provide a wide input voltage range making them tolerant of voltage fluctations and allowing operation on different power networks in Europe, America or Asia without additional conversion or adjustment.

Mfg. Part No.	Input Voltage (VAC)	Output Voltage (VDC)	Output Current (A)	Power (W)	Dimensions (mm) (W x H x L)	Stock No.	Price Each 1-24
● 787-712	85-264	24	2.5	60	50 x 92 x 136	76R4862	92.33

PRO ECO SERIES DIN RAIL SWITCH MODE AC/DC POWER SUPPLIES

RoHS Compliant Available

Weidmüller

NEW

- One-phase switch-mode power unit for DIN rail mounting
- Compact corrosion-resistance metal housing
- High efficiency, performance and flexibility
- Extremely easy to maintain
- Temperature and over-heating protection
- Short-circuit protection and overload resistance
- Remote monitoring via integrated status relay
- AC input range: 85 to 264VAC (derating @ 100VAC)
- DC input range: 80 to 370 VDC (derating @ 120VDC)
- Wide-range rated input: 100 to 240VAC
- Frequency range AC: 47 to 63Hz
- Screw terminal connections (input/output)
- Operating temperature: -25° to +70°C
- UL listed, CE compliant

Mfg. Part No.	Output Power (W)	Output Voltage (V)	Output Current (A)	Dimensions (mm) H x W x D	Stock No.	Price Each 1-24

PRO-M SERIES DIN RAIL SWITCH MODE POWER SUPPLIES

RoHS Compliant Available

Weidmüller

- Slim housings for space saving installation in the cabinet
- DIN-rail mountable without any gap (no clearance necessary)
- Operating temperature range of -25°C to +70°C
- Autoselect input for wide input range without any switch; for DC and AC voltages
- Power boost of 120% enables inductive and capacitive loads; additional starting capacity with up to a 2-minute boost
- Parallel connections allow simple power increase for up to five units without diode module
- MTBF > 500,000 Hours

24 VDC **PRO-M** power supplies all feature a solid ultra-slim metal housing, and are designed to mount on a DIN-rail with no ventilation gap required between multiple units. Available in single-phase versions from 70W to 1000W, making them particularly suited for use in many automation applications. The wide-ranging AC and DC inputs, broad operating temperature range and international approvals make the **PRO-M** supplies a strong choice.

Mfg. Part No.	Output Power	Output Voltage (V)	Output Current (A)	Dimensions (mm) H x W x D	Stock No.	Price Each 1-9

ECOLINE SERIES DIN RAIL SWITCH MODE POWER SUPPLIES

RoHS Compliant Available

Weidmüller

Switched-mode power unit in a compact metal housing for rail mounting in performance classes 70 to 1000W (single phase) and 250 to 1000W (three phase). The ECOLINE power supplies can be universally deployed because of their wide input range from 85VAC to 265VAC (single phase) and 340VAC to 575VAC (three phase) . A floating relay contact in the output circuit indicates short-circuits and overloads. A floating relay contact in the output circuit indicates short-circuits and overloads.

LCM300 SERIES 310W BULK FRONT END AC/DC POWER SUPPLY

NEW ARTESYN EMBEDDED TECHNOLOGIES

- Single 310W (350W peak) output power
- Dimensions: 1.61"H x 4"W x 7"L
- 7.1W per cubic inch
- Industrial/medical safety
- -40°C to +70°C (linear derating to 50% from 50 °C to 70 °C)
- High efficiency: 91% @ 230VAC
- Variable speed "Smart Fans"
- DSP controlled front end
- ±0.05% adjustment range
- Margin programming
- Integrated OR-ing FET
- Three-year manufacturer's warranty
- PMBus Compliant
- EMI Class B
- EN61000 Immunity
- UL listed: 60950-1 508/1598/1433 60601-1 Ed 3
- CSA certified: 60650-1
- VDE approved: 60650-1 60601

LCM300 series 310W AC/DC power supply does not require any derating at low line and provides the full power across the input range 90 to 264VAC. **Mfg. part no. LCM300Q-T-4** offers a 24V output, which can be trimmed to ±20% and features efficiency greater than 91% at full load, a typical power factor of 0.98, and a power density of 7.1W/in3. The compact 1U x 4"W x 7"L enclosed form factor includes a smart fan for self-contained cooling. Backed by a comprehensive set of industrial and medical safety approvals, **mfg. part no. LCM300Q-T-4** is ideal for industrial applications such as burn-in systems, test and measurement equipment, laser-carving machines, and factory automation; non-patient contact and non-patient critical medical, dental and laboratory applications; as well as for telecom and datacom equipment.

Mfg. Part No.	Input Range (VAC) Min.	Input Range (VAC) Max.	Output (VDC)	Adjustment Range (V)	Output Current Max.	Stock No.	Price Each 1-9
LCM300Q-T-4	90	264	24	19.2 - 28.8	12.5	**04X6326**	187.28

FRONT END POWER SUPPLIES

DS460S-3 SERIES FRONT END POWER SUPPLY

RoHS Compliant Available

ARTESYN EMBEDDED TECHNOLOGIES

- Active power factor correction
- EN61000-3-2 harmonic compliance
- Active AC inrush control
- 1U X 2U short form factor
- Hot plug operation
- N + 1 redundant
- High efficiency redundancy
- Active current sharing
- Built-in cooling fan
- I2C communication interface bus
- PMBus compliant
- EERPOM for FRU data

Mfg. part no. DS460S-3-002 is a high-efficiency bulk front-end power supply intended for systems that use distributed power architectures. Rated at 460 watts, it generates a main payload output of 12VDC and an auxiliary output of 12VDC for powering standby circuitry. This power supply is digitally programmable – equipped with an I2C interface and uses the industry-standard PMBus™ communications protocol. Intended primarily for use in rack-mounting server type applications, such as data centers. This power supply uses an advanced power conversion topology to maximize efficiency and has exceptionally compact form factors – a height of just 1.6″, makes it ideal for use in 1U high rack-mounting equipment.

Mfg. Part No.	Input Voltage Range	Output Voltage	Output Power (W)	Stock No.	Price Each 1-9
DS460S-3-002	90V to 264V	12.3V @36A	460	28W5359	185.80

LCM1500 SERIES 1500W BULK FRONT END AC/DC POWER SUPPLY

NEW

ARTESYN EMBEDDED TECHNOLOGIES

- Single 1500W output power
- Dimensions: 2.5"H x 5.2"W x 10"L
- 12W per cubic inch
- Industrial/medical safety
- -40°C to +70°C (linear derating to 50% from 50 °C to 70 °C)
- High efficiency: 91% typ. @ full load / 230VAC nom.
- Variable speed "Smart Fans"
- DSP controlled front end
- ±10% adjustment range
- Margin programming
- Integrated OR-ing FET
- Three-year manufacturer's warranty
- PMBus Compliant
- EMI Class A
- EN61000 Immunity
- UL recognized: ITE (UL60950-1); Medical (ANSI/AAMI ES60601-1)
- TUV approved: SuD ITE + Medical (EN60950-1, EN60601-1) BSMI CB Report
- CE compliant: LVD (EN60950-1 + RoHS)

LCM1500 series 1500W AC/DC power supply does not require any derating at low line and provides the full power across the input range 90 to 264 VAC. **Mfg part no. LCM1500Q-T-4** is rated for 24V single output, which can be trimmed to ±10 percent. A sophisticated digital control loop optimizes efficiency across a wide load range, giving this model efficiency greater than 91% at full load, a typical power factor of 0.99, and a power density of 12W/in3. Backed by a comprehensive set of industrial and medical safety approvals, **mfg part no. LCM1500Q-T-4** is ideal for industrial applications such as burn-in systems, test and measurement equipment, laser-carving machines, and factory automation; non-patient contact and non-patient critical medical, dental and laboratory applications; as well as for telecom and datacom equipment.

D1U86G-W-460-12-HxxDC SERIES 86MM 1U AC/DC FRONT END POWER SUPPLIES

RoHS Compliant Available

NEW

muRata Ps Murata Power Solutions

- 460W output power
- Exceeds 92% efficiency @ 50% load (230VAC Input)
- 12V main output
- 1U height: 3.4″ x 7.75″ x 1.57″
- 11.1 Watts per cubic inch density
- N+1 redundancy capable, including hot plugging (up to 8 in parallel)
- Droop current sharing on 12V main output, ORing FET
- Overvoltage, overcurrent, overtemperature protection
- Internal cooling fan (variable speed)
- PMBus™ / I²C interface with status indicators

D1U86G-W-460-12-HxxDC series bulk front end power supplies meet the needs of systems requiring high efficiency distributed power architectures. Output power is rated at 460W with one main and one standby output. Features high-efficiency performance, hot plug capability, and parallel operation with droop current sharing. Closed-loop internal fan cooling provides reliable long life operation. Industry standard PMBus™ communication protocol makes system integration seamless and straightforward. The low-profile design and dense packaging makes these supplies ideal for delivering reliable, efficient power to servers, workstations, storage devices and other distributed power systems. Choice of Back-to-front or front-to-back airflow models.

Mfg. Part No.	Power Output (W)	Output Main/Standby (VDC)	Airflow	Stock No.	Price Each 1-4

D1U54P-W-1200-12-HxxC SERIES 54MM 1U AC/DC FRONT END POWER SUPPLIES

RoHS Compliant Available

NEW

muRata Ps Murata Power Solutions

- 1200W output power
- 80 PLUS® Platinum efficiency
- 12V main output
- 3.3V standby output of 10W
- 1U height: 2.15″ x 12.65″ x 1.57″
- 28 Watts per cubic inch density
- N+1 redundancy capable, including hot plugging (up to 8 in parallel)
- Active current sharing on 12V main output; ORing FET
- Overvoltage, overcurrent, overtemperature protection
- Internal cooling fan (variable speed)
- PMBus™ / I²C interface with status indicators

D1U54P-W-1200-12-HxxxC series are 80 PLUS® Platinum efficiency 1200W, power factor corrected, front end power supplies with a 12V main output and a 3.3V (3A) standby. Feature active current sharing and up to 8 supplies may be operated in parallel. These supplies may be hot plugged, can recover from overtemperature faults, and have status LEDs on the front panel in addition to logic and PMBus™ status signals. Low profile 1U package and >28W/cubic inch power density make these supplies ideal for delivering reliable, efficient power to servers, workstations, storage systems and other 12V distributed power systems. Choice of Back-to-front or front-to-back airflow models.

SILVER LINE LINEAR POWER SUPPLIES

RoHS Compliant Available

SOLA HD

- Screw Terminal Connections
- Input Voltage: 100/120/220/230/240AC
- Input Frequency: 47-63Hz
- Line and Load Regulation Combined 0.1%
- Ripple 3.0mV Maximum Peak-to-Peak
- Automatic Current Limiting
- DC Output Adjustable 10% Minimum
- Temperature Range: 0°C to +50°C
- Optional Cover Kits Available for Additional Safety
- 2-Year Warranty

Screw Terminal Connections Save Installation Time

Silver Line Linears now available up to 288 watts. Feature industry standard footprints with the added convenience of screw terminal for AC input and DC outputs. Used in process control circuits, instrumentation, drives, CNC machinery and microprocessor circuits. Built-in over voltage protection, which provides both transient and power supply malfunction protection, is standard on 5 volt models and optional for other models *(order separately below)*. Covers sold separately; *go online or call*. When covers are used, derate the power supply by 15% of its rated value.

SINGLE AND MULTIPLE OUTPUT 25 - 60W POWER SUPPLIES

RoHS Compliant Available

ARTESYN EMBEDDED TECHNOLOGIES

- Universal input
- High efficiency
- Wide choice of outputs
- Remote Sense
- Built-in EMI filter
- Low output ripple
- Adjustable output
- Over voltage protection
- Overload protection
- Enclosure kits available
- -M suffix includes medical safety approvals

60-Watt LPS60 Series

50-Watt LPT50 Series

Applications Include:
- Telecommunications, Computer Peripherals, Test and Industrial Equipment and Business Machines

LP series low power switch mode power supplies offer outstanding performance and reliability. Available in single and multiple outputs. Units are designed for a wide range of applications. CE compliant.

NPS20-M SERIES 40W MEDICAL AC/DC POWER SUPPLIES

RoHS Compliant Available

ARTESYN EMBEDDED TECHNOLOGIES

TÜV Rheinland

- Medical and ITE safety approvals
- 2x4x1U form factor
- Overload and short circuit protection
- Built-in Class B EMI filter
- Remote sense
- EN61000-3-2 compliant
- Adjustable main output
- Less than 300mw no-load power consumption

NPS20-M series power supply is a compact open-frame design; measuring just 2 x 4 x 1", with a typical full load efficiency of 87%. The supply is primarily intended for use in information technology equipment (ITE) and light industrial systems, as well as, for equipment intended for non-patient contact and non-patient critical use in low power medical, dental and laboratory applications.

SPECIFICATIONS:	
Input Voltage:	90-264VAC (120-300VDC)
Input Frequency:	47-440Hz
Operating Temperature:	0°C to 50°C ambient derate each output as 2.5% per degree from 50°C to 80°C. -20°C start up
Approvals and Standards:	TUV, UL, CSA, and NEMKO: 60950, 60601-1, CB: Certificate and report, CE: Mark (LVD), CQC: Mark

NFS40 SERIES 40 WATT SINGLE AND TRIPLE OUTPUT AC/DC POWER SUPPLIES

RoHS Compliant Available

ARTESYN EMBEDDED TECHNOLOGIES

- 5.0 x 3.0 x 1.2 inch package (1U applications)
- Industry standard package
- Overvoltage and short circuit protection
- 40 W with free air convection
- EN55022, EN55011 conducted noise level A
- UL, VDE and CSA safety approvals
- Medical safety approval models available
- Two-year manufacturer's warranty

NFS40 series 40 watt universal input AC/DC power supplies include over voltage and short circuit protection. **NFS40 medical series** has a lower safety ground leakage and higher isolation as required for medical safety approval.

NPS40-M SERIES 60 WATT SINGLE OUTPUT AC/DC POWER SUPPLIES

RoHS Compliant Available

ARTESYN EMBEDDED TECHNOLOGIES

- Universal input
- Less than 1U high and 2" x 4" footprint
- Remote sense
- Overload and short circuit protection
- Adjustable output voltage
- High efficiency
- High MTBF
- Built in EMI filter (CISPR 22 Class B)
- International Efficiency Level V, Energy Star 2.0 & CeC compliant (except **NPS42-M**)

- Less than 300mW no-load power consumption
- 0°C to +80°C operation
- Input power <74 watts

Compact **NPS40-M series** supports up to 45W with convection cooling and up to 60W with forced air cooling. Backed by a comprehensive set of worldwide IT equipment (ITE) and non-patient contact and non-patient critical medical safety approvals, power supplies are ideal for use in light industrial, instrumentation and process systems as well as low-power dental and laboratory equipment.

LPQ110 SERIES AC/DC POWER SUPPLIES

RoHS Compliant Available

ARTESYN EMBEDDED TECHNOLOGIES

- Universal input
- High efficiency
- Remote sense on main output
- Built-in EMI filter
- Low output ripple
- Adjustable 5V output
- Overvoltage and overload protection
- Adjustable floating 4th output (**LPQ112** and **LPQ113**)
- Power fail
- Optional L bracket (**-B suffix**)
- Cover kit available (**LPX110-C**); *go online or call*

SPECIFICATIONS	
Input Range	85-264VAC, 120-300VDC
Frequency	47-440Hz
Efficiency	70% typical at full load
EMI Filter	FCC Class B conducted; CISPR 22 Class B conducted; EN55022 Class B conducted; VDE 0878 PT3 Class B conducted
Max. Power	80W for convection; 110W with 30CFM forced air
Operating Temp.	0° to +50°C ambient, derate each output at 2.5%/degree from +50° to +70°C

NFS110 SERIES 110W SINGLE AND QUAD OUTPUT AC/DC POWER SUPPLIES

RoHS Compliant Available

ARTESYN EMBEDDED TECHNOLOGIES

- Single and multi output
- 7.0 x 4.25 x 1.8″ package
- 110W with 20CFM
- Adjustable outputs
- EN55022, EN55011 conducted emissions level B
- Two-year manufacturer's warranty

NFS110 series is a 110 W universal input AC-DC power supply on a 7 x 4.25″ card. **NFS110 series** is highly reliable and versatile product for a wide range of communication and industrial applications, with a very high peak current capability on each output for drive and motor applications. The NFS110 provides 80W of output power with free air convection cooling which can be boosted to 110W with 20 CFM of air.

SPECIFICATIONS:	
Input Voltage:	85-264VAC (120-370VDC)
Input Frequency:	47-440Hz
Line Regulation:	±0.1% max.

TLP150 SERIES 150 WATT SINGLE OUTPUT AC/DC POWER SUPPLIES

RoHS Compliant Available

ARTESYN EMBEDDED TECHNOLOGIES

- 150W on main channel with only 200LFM
- Low profile fits 1U applications
- Active PFC and EN61000-3-2 compliant
- Integrated or-ing diode
- Active current sharing
- Integrated control and monitoring features
- Compliance to EN55022-B conducted noise standard
- 12V fan output
- 5V standby output (optional with **F suffix**)
- Two-year manufacturer's warranty

TLP150 series 150 watt universal input AC/DC power supplies include over current, over voltage and over temperature protection. The main output channel is compatible with systems that implement distributed power and point-of-load architectures. It can also be used to power electromechanical devices such as relays, motors and pumps. **TLP150 medical series** has a low earth leakage current suitable for use in medical equipment.

MVAD040 SERIES 40W HIGH-DENSITY AC/DC POWER SUPPLIES

NEW

RoHS Compliant Available

muRata Ps Murata Power Solutions

- ITE (2nd) and Medical 3rd ed. MOOP safety approved
- 40W compact high density
- 2" x 4" standard footprint
- High efficiency up to 89%
- Universal AC input
- Low profile - 1U package
- Convection-cooled operation up to 40W
- Complies with 5000m altitude
- UL Class I and II approved
- Input power < 0.3W @ no load
- Complies with ErP/Energy Star requirement average efficiency (24V/48V) > 85.3%
- UL recognized, VDE approved, CE certified

MVAD040series switching power supplies utilize advanced component and circuit technologies to deliver high efficiency. Designed for medical, telecom, and industrial applications to satisfy 1U height design considerations, the **MVAD040 series** measures only 2" x 4" x 1.3". All models offer universal AC input and compliance to worldwide safety and EMC standards.

Mfg. Part No.	Natural Convection Cooling	Main Output (V1)	Output Current	Stock No.	Price Each 1-4

MVAD065 SERIES 65W HIGH DENSITY AC/DC POWER SUPPLIES

RoHS Compliant Available

muRata Ps Murata Power Solutions

- ITE (2nd) and Medical (3rd ed. MOOP, Risk management) safety approved
- 65W compact high density
- 2" x 4" standard footprint
- High efficiency up to 90%
- Remote Sense
- Universal AC input
- Low profile - 1U package
- Convection-cooled operation up to 65W
- Complies with 5000m altitude
- RoHS compliant
- Input power < 74W
- Input power < 0.3W @ no load
- Complies with ErP/Energy Star requirement (average efficiency > 87%)

MVAD065 series switching power supplies utilize advanced component and circuit technologies to deliver high efficiency. Designed for medical, telecom, and industrial applications to satisfy 1U height design considerations, the **MVAD065 series** measures only 2.0" x 4.0" x 1.3". All models offer universal AC input and compliance to worldwide safety and EMC standards.

MVAB120 SERIES 120W HIGH DENSITY 2" x 4" AC/DC POWER SUPPLIES

RoHS Compliant Available

muRata Ps Murata Power Solutions

- 120W compact high density
- 2"x 4" standard footprint
- High efficiency up to 91%
- Universal AC input with active PFC
- Low profile - 1U package
- Convection-cooled operation up to 75W
- Over-voltage, over-current and over-temperature protection
- Operating temperature: -20°C to +70°C
- ITE (2nd) and medical 3rd ed. MOOP safety approved
- UL Class I and II approved
- Two-year manufacturer's warranty

MVAB120 series switching power supplies utilize advanced component and circuit technologies to deliver high efficiency. Designed for medical, telecom and industrial applications to satisfy 1U height design considerations. All models offer universal AC input with active power factor correction (PFC) and compliance to worldwide safety and EMC standards — IEC60950-1:2006/A11:2009; UL60950-1 2nd Edition 2007-03-27, CSA 22.2 No.60950-1 2nd Edition 2007.03; EN60950-1:2006+A11:2009; IEC60601-1 Edition 3 MOOP; ANSI/AAMI ES60601-1 (2005+C1:09+A2:10), CSA 22.2 No. 60601-1 (2008) 3rd Edition MOOP; EN60601-1:2006 3rd Edition MOOP (Evaluated); CE marked per LVD.

FOR INDUSTRIAL/TELECOM APPLICATIONS — 2" x 4" x 1.35"

SWITCHING POWER SUPPLIES

MVAC250 SERIES 250W HIGH DENSITY AC/DC POWER SUPPLIES

RoHS Compliant Available

muRata Ps Murata Power Solutions

- 3rd ed. medical and ITE safety approved
- 250W compact high density
- 3″ x 5″ standard footprint
- High efficiency up to 94%
- Remote sense
- Remote On/Off, Power OK (MVAC250-xxAFx)
- Universal AC input with active PFC
- Less than 1U high – 1.4″
- Convection cooled operation up to 170W
- Isolated 12V@1A fan output
- Isolated 5V@2A standby output with models MVAC250-xxAFx
- RoHS compliant
- Active inrush protection
- Current sharing option

MVAC250 series switching power supplies utilize advanced component and circuit technologies to deliver high efficiency. Designed for medical, telecom and industrial applications to satisfy 1U height design considerations, the **MVAC250 series** measures only 3.0″ x 5.0″ x 1.40″. All models offer universal AC input with active power factor correction (PFC) and compliance to worldwide safety and EMC standards.

Mfg. Part No.	Natural Convection Cooling	Forced Air Cooling	Main Out (V1)	Fan Out (V2)	Aux Out (V3)	Output Current (A)	Stock No.	Price Each 1-4

MVAC400 SERIES 400W HIGH DENSITY AC/DC POWER SUPPLIES

RoHS Compliant Available

muRata Ps Murata Power Solutions

- High efficiency up to 94%
- 3″ x 5″ standard footprint
- 1.5kVDC isolation
- Remote sense
- Remote On/Off, Power OK
- Isolated 12V@1A fan output
- Isolated 5V@2A standby output

MVAC400 series switching power supplies utilize advanced component and circuit technologies to deliver high efficiency. Designed for medical, computing, communications, telecom and other OEM applications to satisfy 1U height design considerations, the **MVAC400 series** measures only 3.0″ x 5.0″ x 1.40″. All models offer universal AC input with active power factor correction (PFC) and compliance to worldwide safety and EMC standards.

SPECIFICATIONS:	
Input Voltage:	90-264VAC (127-300VDC optionally available)*
Input Frequency:	47-63Hz
Operating Temperature Range:	-10°C to 50°C
Safety:	IEC60950-1:2006/A11:2009, UL60950-1 2nd Ed. 2007-03-27, CSA22.2 N0.60950-1 2nd Ed. 2007.03, EN60690-1:2006+A11:2009 (Evaluated), IEC60601-1 Ed. 3 MOOP, ANSI/AAMI ES60601-1 (2005+C1:09+A2:10), CSA 22.2 No. 60601-1 (2008) 3rd Edition MOOP, EN60601-1:2006 3rd ed.MOOP (Evaluated), CE Marking per LVD

SCP SERIES: EXTREME ENVIRONMENT POWER SUPPLIES

RoHS Compliant Available

SOLA HD

Features:

- IP66/67 versatile, NEMA 4X Rated
- Listed power supply for stand alone applications
- Can be mounted in any orientation without limitation
- Universal input
- High ambient temperature up to 60°C without derating
- Worldwide approvals
- DC OK green LED
- Ffive-year limited manufacturer's warranty

Mfg. part no. SCP100S24X-CP is designed for control power applications where a grounded power supply output is required and **mfg. part no. SCP100S24X-DVN** for DeviceNet™ application where an isolated output from ground is required.

GL SERIES SINGLE- AND MULTI-OUTPUT SWITCHERS

RoHS Compliant Available

SOLA HD

- Industry standard footprints
- Universal input (85-264VAC)
- Full power to 50°C
- High demonstrated MTBF
- Automatic overvoltage protection
- Overload protection
- Built-in EMI Filtering
- Extensive safety approvals
- Derated operation to 70°C
- 250 VA and higher VA size enclosed
- Two-year limited manufacturer's warranty

GL series provides a broad range of AC/DC power supply solutions that covers power ratings from 25 watts to 500 watts for use in various industrial and medical applications requiring standard footprint size and very high reliability. These low-profile AC/DC switchers offer universal input voltage with no switches or jumpers, ideal for higher volume worldwide applications. **M** suffix indicates medical models; **C** suffix with cover; **CEF** with cover and end fan; **CF** with cover and top fan.

HK-A SERIES SINGLE OUTPUT 115VAC INPUT INDUSTRIAL POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda
Innovating Reliable Power

- Small size, low profile design
- Adjustable potentiometer
- 85 - 132VAC input, 47-440Hz
- ±10% output adjustment
- Three-year manufacturer's warranty
- UL listed, CSA certified

HK-A series single output 115VAC input industrial power supplies are convection cooled units. Ideal for factory automation applications such as process control, NC-machining, packaging equipment, materials handling, chemical processing and robots. Used for test and measurement applications such as burn-in and test, automated test, instrumentation, measurement and detection. Also popular for automatic service applications such as vending machines, elevators, video gaming and point-of-sale equipment. Operating temperature range: 0°C to +60°C uncovered, 0°C to +50°C covered.

SWITCHING POWER SUPPLIES

HWS SERIES SINGLE OUTPUT INDUSTRIAL POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- Limited lifetime manufacturer's warranty
- UL508 approved
- SEMI F47 compliant, high line AC
- Universal input, 85-265VAC
- High efficiency

RWS-B SERIES 50 TO 600W SINGLE OUTPUT INDUSTRIAL POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

NEW

- Wide range AC input 85 to 265VAC (300VAC for 5 sec.)
- High efficiency
- Enclosed design, compact size
- Simplified functionality
- Solid, dependable performance
- Five-year manufacturer's warranty
- UL recognized, CSA certified, CE compliant

RWS-B series AC-DC power supplies comprise of four models rated from 50 to 600W featuring a "simple function" design to deliver solid basic performance with additional functionality optimized with regard to customer requirements and specific applications. Improved efficiency at low loads and power consumption during standby. The service life of the electrolytic capacitors is rated for at least five years, resulting in increased reliability. Ideal for use in general industrial equipment including automated devices for industrial and commercial applications, measuring instruments, and communications equipment.

SPECIFICATIONS

Models	RWS50B	RWS100B	RWS150B
AC Input Voltage Range:	85 - 265VAC (47-63Hz), 300VAC for 5 seconds		
DC Input Voltage Range:	120 - 370VDC (47-63Hz), 330VDC for **RWS600B**		
Inrush Current (100 / 200VAC):	18/36A	15 / 30A	16 / 32A
Input Current (100 / 200VAC Typ.):	1.1/0.7	1.3 / 0.7A	1.9 / 1A
Leakage Current (Max.):	750µA max., typically 175µA @ 115VAC, 63Hz		
Cooling:	Convection		
Safety Agency Approvals:	UL / CSA(cUL) / IEC 60950-1 (2nd Ed.), CE Mark EN60950-1		
Conducted & Radiated EMI:	EN55011/ EN55022-B, FCC Class B, VCCI-B		
Operating Temperature:	-10°C to +70°C, derate linearly to 20°C load from 50°C to 70°C (100 - 150W from 40 to 70°C)		
Dimensions:	3.23W x 1.34H x 3.2"D	3.7W x 1.54H x 4.25"D	3.7W x 1.61H x 5.04"D

SPECIFICATIONS

Models	RWS300B	RWS600B
AC Input Voltage Range:	85 - 265VAC (47-63Hz), 300VAC for 5 seconds	
DC Input Voltage Range:	120 - 370VDC (47-63Hz), 330VDC for **RWS600B**	
Inrush Current (100 / 200VAC):	17 / 34A	20 / 40A
Input Current (100 / 200VAC Typ.):	3.8 / 2.1A	7.2 / 4A
Leakage Current (Max.):	750µA max., typically 175µA @ 115VAC, 63Hz	
Cooling:	Internal Fan	
Safety Agency Approvals:	UL / CSA(cUL) / IEC 60950-1 (2nd Ed.), CE Mark EN60950-1	
Conducted & Radiated EMI:	EN55011/ EN55022-B, FCC Class B, VCCI-B	
Operating Temperature:	-10°C to +70°C, derate linearly to 20°C load from 50°C to 70°C (100 - 150W from 40 to 70°C)	
Dimensions:	4.02W x 1.61H x 6.7"D	4.72W x2.4H x 7.48"D

GWS SERIES SINGLE OUTPUT POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

GWS250

GWS500

- Standby power draw < 0.5W
- Average active efficiency @ 230V: 92.7%
- ErP compliant
- 41mm height (1U compatible)
- Convection cooled (250W)
- 5V / 300mA Aux supply
- Output remote programming
- Down to 25% load: Class C harmonics (IEC 61000-3-2)
- Allows use in lighting equipment
- Five-year manufacturer's warranty

Model	GWS250	GWS500
AC Input Voltage:	85 - 264VAC	
Input Frequency:	47 - 63Hz	
DC Input Voltage:	120 - 373VDC	
Power Factor:	Meets EN61000-3-2 (Typical PF 0.98/0.95)	
Operating Temperature:	-25°C to +70°C; derate linearly to 50% load from +50°C to +70°C

HWS1800T SERIES SINGLE OUTPUT 1800W 3PH INDUSTRIAL POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- Three phase input (170 - 265VAC)
- High efficiency
- SEMI F47 compliant
- Five-year manufacturer's warranty

Ideal for applications such as factory automation, semiconductor fabrication and test and measurement. Features compact size and high efficiency for easier system cooling.

SPECIFICATIONS:

Input Voltage:	Three phase 170-265VAC
Input Frequency:	47-63Hz
Ripple & Noise:	200-400mV
Efficiency:	84-90%
Conducted & Radiated EMI:	EN55011 / EN55022-A, FCC-A, VCCI-A
Operating Temperature:	-10° to +70°C, derate linearly to 50% load from 50° to 70°C, -20°C start up
Dimensions:	4.98W x 3.23H x 11"D

LS SERIES SINGLE OUTPUT GENERAL PURPOSE POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- Small size
- 115VAC or 230VAC input
- Withstands 300VAC surges (5s)
- Three-year manufacturer's warranty

Ideal for use in test and measurement, and automated service applications. Power factor meets EN61000-3-2, -3. Mounting plates available, *go online or call.*

SPECIFICATIONS:

Mfg. Part No.	LS25	LS35	LS50	LS75	LS100	LS150
AC Input Voltage (300 VAC for 5s):	88 - 264VAC (See note 2 for **LS100**)					88-132/ 176-264VAC (1)

LS200 SERIES SINGLE OUTPUT, GENERAL PURPOSE POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- Small size
- 115VAC or 230VAC input
- Withstands 300VAC surges (5s)
- Three-year manufacturer's warranty

LS200 series are enclosed style general purpose power supplies with internal fan. Ideal for use in light industrial, automated service, and test and measurement applications. U channel style with no internal fan available; *go online or call.*

SPECIFICATIONS:	
AC Input Voltage (300 VAC for 5s):	85 - 264VAC
Input Frequency:	47 - 63Hz
DC Input Voltage:	120 - 373VDC
Operating Temperature:	-25°C to +70°C. Derate linearly to 60% load from +50°C to +70°C
Safety Agency Approvals:	UL60950-1, EN60950-1 (cUL), IEC60950-1 2nd Edition, CE Mark
Conducted and Radiated EMI:	EN55011/EN55022-B, FCC-B
Dimensions (L x W x H"):	7.8 x 3.9 x 1.61"

LZSA SERIES SINGLE-OUTPUT INDUSTRIAL POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- Input transient protected
- -40°C to +71°C operation
- MIL-STD-810E vibration / shock
- UL508, SEMIF47, factory mutual (Class 1, Division 2)
- Five-year manufacturer's warranty

Ideal for industrial applications requiring reliable performance under harsh operating conditions. Features superior thermal design and wide range adjustment of output. **Mfg. part no. LZSA15003-001** is an upgraded version designed to deliver increased power.

SWS600/1000L SERIES SINGLE OUTPUT LOW PROFILE AC/DC POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- Low cost
- Low profile
- Active power factor correction
- Universal input (85 - 265VAC)
- Input transient protected IEC61000-4
- Medical certifications **SWS1000L series**

SWS600/1000L series feature power factor correction and global safety approvals, which support global use. Variable fan speed provides greater reliability and lower acoustical noise.

SPECIFICATIONS:

Mfg. Part No.	SWS600	SWS1000L
Input Voltage Range:	85 - 265VAC 47 - 63Hz or 120 - 350VDC	
Power Factor:	Meets EN61000-3-2 Class A	
Conducted and Radiated EMI:	EN55011/ EN55022-B, FCC Class B	
Operating Temperature:	-40°C start up. -20°C to 74°C, derating linearly to 50% load above 50°C	
Safety Agency Certification:	UL, CSA, EN60950-1, UL60601-1 (1000W only), IEC61010-1 (600W only), EN50178, CE Mark

RTW SERIES SINGLE OUTPUT INDUSTRIAL POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- Ultra thin package
- SEMI F47 compliant (high line AC)
- Universal input
- High efficiency
- 5 year warranty

Ideal for applications such as semiconductor fabrication and LED signs. Ultra thin package allows for use in small spaces. Wide range AC input supports global use. **C** suffix indicates cover for (50W, 100W and 150W models) and **H** suffix cover for (300W models). **L** suffix indicates vertical terminal block (50-150W models only).

SPECIFICATIONS:

Models	50W	100W	150W	300W
Input Voltage Range:	85 - 265VAC or 120 - 370VDC†			
Input Frequency:	47 - 440Hz			
Line Regulation:	0.2% (85-132 or 170-265VAC line change)			
Load Regulation:	0.4% (0-100% load change)			
Safety Agency Approvals:	UL60950-1, CSA60950-1 (cUL), EN60950-1, CE Mark			
Conducted & Radiated EMI:	EN55011/ EN55022-B, FCC-B			
Operating Temperature:	-10°C to +71°C, -20°C start up. See derating curves on datasheet

ZWS300BAF SERIES 300W SINGLE OUTPUT CONVECTION-COOLED POWER SUPPLIES

NEW

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

TÜV Rheinland

- Input voltage: 85 to 265VAC (47-63Hz); 120-370VDC
- Power factor corrected for worldwide use
- Convection cooled (300W) or forced air (336-338W)
- Less than 0.5mA earth leakage current
- Efficiency: 86% / 89%
- Overcurrent and overvoltage protection
- Operating temperature*: -10°C to +70°C
- UL60950-1, CSA60950-1, EN60950-1, EN50178 OV II, CE compliant (AC input only)
- Dimensions: 3.31W x 1.65H x 7.09"D (84 x 42 x 180mm) open frame
- Five-year manufacturer's warranty

ZWS300BAF series power supplies are ideal for communication, test/measurement and industrial applications. Mfg. part nos. with no suffix have JST connectors; mfg. part nos. with **"/L" suffix** indicates L bracket; **"/A" suffix** indicates cover and L bracket; **"/R" suffix** indicates remote On/Off; **"/T" suffix** indicates screw terminals; **"/TL" suffix** indicates screw terminals and L bracket; **"/TA" suffix** indicates screw terminals, cover and L bracket; **"/C02" suffix** indicates protective PCB coating.

ADJUSTMENT RANGE: 9.6V TO 13.2V

ZPSA SERIES 20W TO 100W AC/DC POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

ZPSA20

ZPSA100

- Single output
- Wide range AC input
- Low profile, industry standard footprint
- Global safety agency compliance

ZPSA series features industry standard footprint with up to 88% efficiency, wide range AC input for global operation and Class B conducted EMI reduces system filtering required. Meets EN61000-4 immunity.

SPECIFICATIONS:			
Mfg. Part No.	ZPSA20	ZPSA40/60	ZPSA100
Input Voltage Range:	85 - 264VAC (47 - 440Hz) or 120 - 370VDC	90 - 264VAC (47 - 440Hz) or 120 - 370VDC	
Ripple and Noise*:	1% or 50mV whichever is greater		1% (5V: 2%)
Conducted and Radiated EMI:	EN55022-B, FCC Class B		
Operating Temperature:	0°C to +70°C derate linearly to 37.5% load from 45 to 70°C	0°C to +70°C with derating	
Safety Agency Certification:	UL60950-1, CSA60950-1 (cUL), EN60950-1, CE Mark	UL60950-1, CSA60950-1, EN60950-1 Class I, CE Mark (LVD)

ZPD, ZPT SERIES MULTIPLE-OUTPUT POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda
Innovating Reliable Power

- Low-profile, industry standard footprint
- Compact design
- Wide range AC input
- High-efficiency, up to 88%
- Meets EN61000-4 immunity
- Global Safety Agency Compliance
- UL recognized, CSA certified, CE compliant

ZPD, ZPT series

Ideal for applications such as computer peripherals, datacom, point of sale and test and measurement. Features continuous hiccup-mode short-circuit protection, overvoltage protection and convention cooling. One-year manufacturer's warranty.

SPECIFICATIONS:

Input Voltage:	90-264VAC or 120-370VDC
Input Frequency:	47-440Hz
Line Regulation:	+/- 1% for V1 and V3, +/- 2% for V2
Load Regulation:	
Ripple & Noise:	1% or 50mV (whichever is greater)
Efficiency:	Up to 88%
Conducted & Radiated EMI:	EN55022-B, FCC Class B
Operating Temperature:	0° to +70°C
Dimensions:	4.0L x 2.0W x 1.2"H

ZWQ SERIES QUAD OUTPUT POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

Features:

- 80W to 170W quad output power supplies
- Universal input, 85-265VAC
- Power factor corrected
- Adjustable main and fourth output
- Floating fourth output
- Low profile, <1U high

ZWQ series can be used as positive or negative output. Convection cooling. Outputs 2 and 3 are user selectable via connector or PCB.

PFE300SA-700SA SERIES 300 TO 714W AC-DC POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

NEW

- Low profile, small size saves space
- 100°C baseplate temperature
- High-power density
- High-efficiency
- Suitable for conduction cooling
- Power Factor Corrected (PFC)
- Full brick footprint
- Overtemperature protection
- 2-year manufacturer's warranty
- UL recognized, CSA certified, CE compliant

SPECIFICATIONS:

Mfg. Part No.:	PFE300SA, PFE500SA	PFE700SA
AC Input:	85 to 265VAC, 47-63Hz	
Input Current (100 / 200VAC):	3.5 / 2A, 6.1 / 2.9A	8.3 / 4A
Power Factor:	0.95 min., Meets EN61000-3-2	
Ripple and Noise:	1%	4V
Parallel Operation:	No	Yes (Droop Mode)
Overcurrent Protection:	105-140% (Automatic Recovery)	
Overvoltage Protection:	125-150%	115-145%
Operating Temperature:	-40°C to +100°C Baseplate	
Safety Agency Approvals:	UL60950-1, CSA60950-1 (cUL), EN60950-1, CE Mark (LVD)	
Dimensions:	61mmW x 12.7mmH x 116.8mmD

PFE300-1000 SERIES SINGLE OUTPUT FULL BRICK AC-DC POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- Low profile, small size
- 100°C baseplate temperature
- High power density
- High efficiency
- Two-year manufacturer's warranty

Low profile assists system integration. Easier to cool high efficiency. Power Factor Corrected (PFC) supports global use. Up to 100°C baseplate temperature for operation in harsh environments. **Mfg. part no. PFE 500F** incorporates current share (F = full featured). **T** in suffix indicates 3.3mm non-threaded inserts (4).

SPECIFICATIONS:

Mfg. Part No.:	PFE300 PFE500	PFE700	PFE500F	PFE1000F
Input Voltage Range:	85 - 265VAC (PFE-S operation to 440Hz possible (2))			
Input Frequency:	47 - 63Hz			
Power Factor:	0.95 minimum			0.95 minimum, meets EN61000-3-2
Ripple & Noise: (1)	1%	4V	1%	1%
Operating Baseplate Temp.:	-40°C to +85°C-100°C (model dependent)

KM SERIES 5-40W MEDICAL AC-DC BOARD MOUNT POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- Small size and lightweight
- PC board mountable
- Wide range input
- Medical safety certifications (4kVAC input - output)
- Class II (no ground needed)

KM series small size and high efficiency minimizes PCB space, while lowering heat dissipated in system. Features a wide range input for global use with no manual intervention.

SPECIFICATIONS:

Mfg. Part No.	KMS15	KMD15	KMT15	KMS40	KMD40	KMT40
Input Voltage Range:	90 - 264VAC 47 - 440Hz or 110 - 375VDC					
Switching Frequency:	132 kHz					
Ripple & Noise (pk-pk):	50mV or 1%, whichever is greater					
Conducted EMI:	EN55011 Class B			EN55011 Class A		
Operating Temperature:	-25°C to 70°C, derate linearly to 50% load from 50°C to 70°C. Max case temperature 95°C.					
Safety Agency Certification:	UL60601-1, IEC60601-1, CE Mark

KPSA SERIES 5-15 WATT AC/DC BOARD MOUNT POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda
Innovating Reliable Power

- Low profile
- Smaller footprint
- PC board mountable

KPSA series features a smaller footprint to minimize PCB space and a wide range input for global use with no manual intervention. Easy to use no external components or ground connector needed. Ideal for applications such as factory automation, printers, motor drives and kiosks. Class II UL approved, CE compliant.

TMLM SERIES 4 TO 20W AC/DC POWER MODULES

RoHS Compliant Available

TRACO POWER

- AC/DC power modules for PCB mounting
- Highest power density
- Fully encapsulated plastic case
- Universal input 90–264 VAC, 47–440 Hz
- High efficiency
- EMI meets EN 55022, class B and FCC, level B
- Low ripple and noise
- Short circuit and overload protection
- Three-year manufacturer's warranty

TMP SERIES, 7 TO 60 WATT, AC/DC POWER MODULES

RoHS Compliant Available

TRACO POWER

Features:
- Ultra compact, low profile plastic case
- Single, dual and triple output models
- Universal input 85-264VAC, 47-440Hz
- Protection class II
- IEC/EN/UL 60950-1 approval, CB-report
- Short circuit and overload protection
- Three-year manufacturer's warranty

PCB Mount with Solder Pins

Chassis Mount with Screw Terminal Block

Specifications:
- Regulation:
  Line variation: ± 1% max.
  Load variation: ± 1% max. (single output models)
  ± 2.5% max. (balanced load)(dual output models)
  ± 1% max. (triple output models)
- Ripple & Noise: 30 mVpk-pk max. (20 MHz BW)
- I/O isolation: 3000VAC (60 sec.)
- Operating temperature range: -40°C to +60°C, above +50°C derating 3.5%/K

TMP series AC/DC power modules are fully encapsulated power supplies in an ultra-compact module. They feature easy chassis mounting with screw terminal block connection or direct PCB mounting with solder pins. Full compliance with International safety standards for industrial control equipment qualifies the products for worldwide markets. DIN rail mount adaptor is also available; *go online or call.*

TXL SERIES, 25 TO 300 WATT, SINGLE AND MULTIPLE OUTPUT ENCLOSED POWER SUPPLIES

RoHS Compliant Available

TRACO POWER

Features:
- Compact metal housing with screw terminal block
- Choice of single, dual and triple output models
- Multiple output models with isolated outputs
- Universal input 85 to 264 VAC
- Overload and short-circuit protection
- Three-year manufacturer's warranty
- EMI/EMC compliance with EN 61000-6-3 and EN 61000-6-1
- Compliance to EN 6100-3-2 (PFC)
- UL recognized, CE compliant

Specifications:
- Line variation: ± 1% max.
- Load variation: 2% max. (single output models)
- 4% max. main output/ 6% max. for output 2/3 20-100% load (multiple output models)
- Ripple and noise: 3.3 VDC output <50mV (20 MHz BW)
- I/O isolation: 3000VAC (input/output)
- Operating temperature range: -10°C to +70°C

TXL series compact, encased power supplies designed for a wide range of cost-critical applications. Features a low-profile metal case and screw terminal block connection making these units easy to install in any equipment.

SWITCHING POWER SUPPLIES

TOP 60 / 100 / 200 SERIES, AC/DC POWER SUPPLIES

RoHS Compliant Available

TRACO POWER

- 100W power supply in 2.0"x 4.0" footprint
- Full load operation up to +50°C with convection cooling
- Highest efficiency, 90% typ.
- EMI filter meets EN 55022, level B
- Compliance with EN 61000-3-2
- Low leakage current
- Safety class I and class II operation
- Three-year manufacturer's warranty

SPECIFICATIONS

Input Voltage:	85-264VAC (120-370 VDC)
Input Frequency:	47-63Hz
No Load Input Power:	<0.3W
Line Regulation:	±0.5% max single output, ±0.9% max multiple outputs
Load Regulation:	±1% max single output, <10% max multiple output
Ripple & Noise:	Single output versions: 3.3-5V: 50mV pk-pk, 12-15V: 120mV pk-pk, 24-48V: 200mV pk-pk Multiple output versions: 1% pk-pk on any output, 20 MHz bandwidth
Isolation:	3000 VAC Input to Output
Operating Temp:	-20°C to +70°C, derate linearly from 100% at +50°C to 50% at +70°C
Safety Approvals:	EN60950, UL60950, CSA22.2 No. 234 per cUL
EMC:	EN55022, level B conducted and radiated

5W, ENCAPSULATED PCB MOUNT, DIMENSIONS (H x W x L): 0.91 x 1.07 x 2.06"

SWITCHING POWER SUPPLIES

ECE SERIES 5W TO 60W ENCAPSULATED AC/DC POWER SUPPLIES

RoHS Compliant Available

XP Power

- Ultra compact size
- Single outputs from 3.3 to 48V
- Encapsulated
- PCB mount (chassis and DIN rail mount versions available; *go online or call*)
- <0.3W no load input power
- Peak load capability
- Three-year manufacturer's warranty

SPECIFICATIONS:

Input Voltage:	85-264VAC (120-370VDC) derate load from 100% @ 90VAC to 90% @ 85VAC
Input Frequency:	47-63Hz
Line Regulation:	±0.5% max
Load Regulation:	±1% max
Ripple & Noise:	3.3-5V versions: 60mV pk-pk; all other models: 1% pk-pk max. 20MHz bandwidth
Operating Temperature:	-25°C to +70°C, derate linearly from 100% at +50°C to 50% at +70°C
EMC:	EN55022, level B conducted and radiated, EN61000-4, EN61000-3
Safety Approvals:	EN60950-1, UL60950-1, CSA22.2 No. 234 per cUL
Dimensions (L x W x H):	ECE05: 1.0″ x 1.0″ x 0.6″ ECE10: 1.5″ x 1.0″ x 0.6″ ECE20: 2.06″ x 1.07″ x 0.91″ ECE40: 3.1″ x 1.5″ x 1.1″ ECE60: 3.6 x 1.5 x 1.1″

NEW

XP Power

Encapsulated - PCB Mount

Encapsulated - Screw Terminals

Open Frame - PCB Mount

- Ultra compact size
- Single outputs from 3.3 to 48V
- Encapsulated or open frame
- PCB, chassis mount and screw terminals
- Class II
- Peak load capability
- Convection cooled
- Input protection: internal 2A fuse
- Overvoltage, overload protection
- Short circuit protection
- Three-year manufacturer's warranty
- Medical safety approvals

SPECIFICATIONS:

Input Voltage:	85-264VAC (120-370VDC)
Input Frequency:	47-63Hz
Line Regulation:	±0.5% max.
Load Regulation:	±1% max.
Ripple & Noise:	3.3-5V versions: 50mV pk-pk; 12-15V versions: 120mV pk-pk; 24-48V version: 200mV pk-pk. 20MHz bandwidth
Operating Temperature:	-20°C to +70°C, derate linearly from 100% at +50°C to 50% at +70°C
EMC:	EN55022, level B conducted and radiated
Safety Approvals:	EN60601-1, AB51/AAIMT ES60601-1, IEC60601-1

ECS SERIES 25-130W SINGLE OUTPUT AC/DC POWER SUPPLIES

RoHS Compliant Available

XP Power

GREEN XP POWER

- Ultra compact 2" x 3" and 2" x 4" packages
- IT and medical safety approvals
- Green mode, <0.5 W standby power
- Class I & Class II construction
- Low leakage current
- Three-year manufacturer's warranty

ECS25 / ECS40 / ECS60

ECS65 / ECS100 / ECS130

ECS series next generation open frame power supplies feature smaller size and new "green mode", which ensures they meet the no load power consumption and energy efficiency specifications. For covered versions, add **suffix -C** to model number or order **mfg. part nos. ECM40/60 COVER KIT** (2" x 4" models) or **ECS25/45 COVER KIT** (2" x 3" models) for standalone cover; *go online or call.*

SPECIFICATIONS:	
Input Voltage Range:	80 - 264VAC or 120 - 370VDC, derate output power <90VAC
Input Frequency:*	47 - 400Hz*
Efficiency:	up to 90%, model dependent
Line Regulation:	±0.5% max
Load Regulation:	±1%
Ripple & Noise:	1% pk-pk V1, 20MHz bandwidth
Operating Temperature:	-20°C to +70°C derate linearly from +50°C at 2.5%/°C to 50% load at +70 °C
EMC:	EN55011/22, level B conducted and level A radiated, **ECS25** level B radiated
Safety Approvals:	IEC60950-1 CB report, CSA 22.2 No. 60950-1, UL60950-1, TUV EN60950-1, IEC60601-1 CB report, CSA 22.2 No. 60601-1, ANSI/AMMI ES 60601-1, TUV 60601-1, including Risk Management

- Single outputs from 12V to 48V
- Built-in fan supply
- <0.5 W no load input power
- 2″ x 4″ footprint
- Fits 1U applications

GREEN POWER

ECP150 series compact single output power supplies include over voltage, over load and short circuit protection.

SPECIFICATIONS:	
Input Voltage Range:	90 - 264VAC
Input Frequency:	47 - 63Hz
Line Regulation:	±0.5% max.
Load Regulation:	±0.5% max.
Cooling:	Convection cooled: 100 W Forced cooled: 150 W with 15 CFM
Ripple & Noise:	1% max. pk-pk**
EMC:	EN55011/22, Level B conducted and radiated
Operating Temperature:	-20°C to +70°C derate from 100% load at 50°C to 50% load at 70°C
Safety Approvals:	UL60950-1, IEC60950-1, EN60950-1, ANSI/AMMI ES 60601-1, IEC60601-1, EN60601-1
Dimensions (L x W x H):	4.0″ x 2.0″ x 1.26″

GCS SERIES 150/180/250W AC/DC POWER SUPPLIES

- Convection/forced-cooled ratings
- Universal 85 to 264VAC input
- IT and medical safety approvals (Class I and II)
- < 0.5W Standby power (150W and 180W models)
- Overvoltage, overload, overtemperature protection
- Short circuit protection
- Dual fusing for compliance with IEC60601-1
- Class B Emissions
- Three-year manufacturer's warranty
- UL recognized, TUV approved, CE compliant

XP Power

GCS series AC/DC single-output power supplies are designed to minimize the no load power consumption and maximize efficiency in order to facilitate equipment design to the latest environmental legislation. Approved for Class I and II applications, these units achieve EN55011/2 Level B emissions compliance while maintaining very low earth leakage currents, making them suitable for a wide range of 1U and other industrial, IT and medical applications.

SPECIFICATIONS	
Input Voltage:	85-264VAC derate load below 90VAC
Input Frequency:	47-63Hz
Line Regulation:	±0.5%
Efficiency:	93%
Isolation:	4000VAC Input to Output 2 x MOPP, 1500VAC Input to Ground 1 x MOPP, 1500VAC Output to Ground 1 x MOPP — IEC60601-1 Ed 3
Operating Temperature:	-40°C to +70°C derate output from 100% @ +50°C to 50% @ +70°C
EMC:	EN61204-3, high severity level, EN55011/22 level B conducted EN55011/22 level B radiated (GCS180/GSC250 level A)

LCL SERIES 150-500 WATT ENCLOSED AC/DC POWER SUPPLIES

RoHS Compliant Available

- Single output industrial supplies
- High efficiency
- Cost effective
- 150W convection cooled
- 300W and 500W with internal fans
- Outputs from 12V to 48V
- Three-year manufacturer's warranty

XP Power

LCL series single output, chassis mount, enclosed AC/DC power supplies provide typical efficiency of 88% at full load. The 150 watt units are convection cooled while the others benefit from an integral cooling fan. These self-contained units require no additional forced airflow. All units come with screw terminals and self-retaining guards.

SPECIFICATIONS	
Input Voltage:	85-264VAC (127-370 VDC)*
Input Frequency:	47-63Hz
Efficiency:	88% typical at full load & 230VAC
Line Regulation:	±0.5% max for LCL150, ±0.3% for LCL300 & LCL500
Load Regulation:	±1% max
Isolation:	3000 VAC Input to Output 1500 VAC Input to Ground 500 VAC Output to Ground
Operating Temperature:	-10°C to +70°C, derate from 100% load at +50°C to 50% load at +70°C
Safety Approvals:	EN60950-1, UL60950-1, CSA60950 No 22.2
EMC:	EN55022 level B conducted, level A radiated

SHP SERIES 350/650/1000W AC/DC POWER SUPPLIES

RoHS Compliant Available

XP Power

- Increased power at >180VAC input
- Rugged industrial construction
- -20°C to +70°C operation
- 5V standby
- AC OK, remote on/off and active current share
- Screw terminals
- Three-year manufacturer's warranty

SHP350/650/1000 series AC/DC power supplies are for use in a range of industrial applications. The unit is comprised of a main output with voltages from 12-48VDC and a 5VDC standby supply, which can be utilized with the signals and control features for detection of loss of AC input and remote on/off control. Suffix **-EF** indicates end fan.

SPECIFICATIONS	
Input Voltage:	85-264VAC
Input Frequency:	47-63Hz
Efficiency:	85% typical

FCM400 SERIES 400 WATT INDUSTRIAL AND MEDICAL AC/DC POWER SUPPLIES

RoHS Compliant Available

XP Power

- 400W continuous, 600W peak
- IT and Medical 3rd edition approvals
- 80V - 275VAC operation
- Screw terminals
- AC OK and remote on/off
- 5V standby
- Three-year manufacturer's warranty

FCM400 series compact AC/DC power supplies are for use in both industrial and medical applications. The single output units feature dual fusing, AC OK, remote on/off and a 5V standby supply. Wt. 1.8 lbs.

SPECIFICATIONS	
Input Voltage:	80-275VAC, Derate below 90VAC
Input Frequency:	47-63Hz
Efficiency:	85% typical
Line Regulation:	±0.5% max.
Load Regulation:	±1% V1, ±5% V2
Ripple & Noise:	1% pk-pk, 20 MHz bandwidth
Isolation:	4000 VAC input to output, 2x MOPP 1500 VAC input to ground, 1 x MOPP 500 VDC output to ground
Operating Temperature:	-10°C to +70°C, derate linearly from +50°C at 2.5%/ °C to 50% load at +70°C
EMC:	EN55011/22 level B conducted, level A radiated
Safety Approvals:	IEC60950-1 CB report, CSA 22.2 No. 60950-1, UL60950-1, TUV, EN60950-1, IEC60601-1 CB report, CSA 22.2 No. 60601-1, ANSI/AMMI ES 6060101 (including Risk Management), TUV60601-1

DIMENSIONS (L x W x H): 6 x 4 x 1.93"

MHP650/1000 SERIES 650/1000 WATT AC/DC MEDICAL POWER SUPPLIES

RoHS Compliant Available

XP Power

- Medical 3rd edition safety approvals
- -20°C to +70°C operation
- AC OK, remote on/off and active current share
- Screw terminals
- 5V standby
- Variable fan speed for noise reduction
- Three-year manufacturer's warranty

MHP650/1000 series AC/DC power supplies are for use in medical applications. Each series offers six output voltage variants covering the nominal voltages of +12, +15, +24, +28, + 36 or +48 VDC, and can be trimmed within +/- 10% of nominal. A +5 VDC, 1W always on output is also provided for standby purposes. MHP ranges feature a constant current overload characteristic making them suitable for motor and other industrial type loads. Suffix **-EF** indicates end fan.

SPECIFICATIONS	
Input Voltage:	80-264VAC- MHP650, 85-264VAC- MHP1000. Derate below 90VAC
Input Frequency:	47-63Hz
Efficiency:	86% typical
Line Regulation:	±0.5% max.
Load Regulation:	±1% V1, ±5% V3
Ripple & Noise:	1% pk-pk V1, 20 MHz bandwidth
Isolation:	4000 VAC input to output, 2 x MOPP 1500 VAC input to ground, 1 x MOPP 500 VDC output to ground
Operating Temperature:	-20°C to +70°C, derate linearly from +50°C at 2.5%/ °C to 50% load at +70°C (-40°C startup for 1000W)
Safety Approvals:	IEC60601-1 CB report, ANSI/AMMI ES 60601-1 (including Risk Management), EN60601-1, CSA 22.2 No. 60601-1
EMC:	EN55011/22 level B conducted, level A radiated

AEU65 SERIES SINGLE OUTPUT SWITCH MODE AC/DC POWER SUPPLIES

RoHS Compliant Available

TRIAD

NEW

AEU65 series enclosed, single output, switch mode AC/DC power supply designed for a wide variety of applications where high reliability is desired, including for the industrial and telecommunications markets. Excellent performance specifications are provided, together with compliance to European EMC (EN55022, Class B and EN61000-3-2), and Low Voltage directive (TUV EN60950). Three-year manufacturer's warranty. UL recognized, TUV approved, CE compliant.

SPECIFICATIONS (@ 25°C):	
Input Voltage:	90-264VAC, 127-373VDC
Input Frequency:	47-63Hz
Input Current:	1.6A @115VAC, 0.8A @230VAC Typical
Inrush Current (Max.):	30A @115VAC, 60A @ 230VAC -- Cold Start
Operating Temperature:	-20° to 50°C @ Full Load
Leakage Current:	<2.4mA / 240VAC
Cooling:	Natural Convection
Dimensions:	99mmL x 75mmW x 35mmH
EMC:	EN55022, Class B and EN61000-3-2
UL:	60950-1
TUV:	EN60950-1 (Insulation Class 1)

ABU125 SERIES SINGLE OUTPUT SWITCH MODE AC/DC POWER SUPPLIES WITH PFC

RoHS Compliant Available

TRIAD

NEW

ABU125 series open frame, single output, switch mode AC/DC power supply with PFC (Power Factor Correction) is designed for a wide variety applications where high reliability is desired, including the industrial and telecommunications markets. Excellent performance specifications are provided, together with compliance to European EMC (EN55022, Class B and EN61000-3-2), and Low Voltage directive (TUV EN60950).Three-year manufacturer's warranty. UL recognized, TUV approved, CE compliant.

SPECIFICATIONS (@ 25°C):	
Input Voltage:	90-264VAC, 127-373VDC
Input Frequency:	47-63Hz
Input Current:	1.6A @115VAC, 0.8A @230VAC Typical
Inrush Current (Max.):	30A @115VAC, 60A @ 230VAC -- Cold Start
PFC (Power Factor Correction):	>0.95/230VAC, >0.98/115VAC @ Full Load
Operating Temperature:	-20° to 50°C @ Full Load
Leakage Current:	<2.4mA / 240VAC
Cooling:	Natural Convection or Fan @ 15CFM
Dimensions:	127mmL x 76.2mmW x 27mmH
EMC:	EN55022, Class B and EN61000-3-2
UL:	60950-1

LDS100 SERIES 100W LED POWER SUPPLIES

RoHS Compliant Available

ARTESYN EMBEDDED TECHNOLOGIES

Features
- Constant current
- Constant voltage operation
- Dimming options
- Free-air rated

Compliance
- Class 2 outputs
- IP64 to IP67 water protection
- CISPR 15 / FCC Part 15 EMI performance
- Class C harmonics
- < 1.0W No-load power
- > 0.9 Power factor

LDS100 series 100 watt LED power supplies feature active power factor correction rated at 0.9 minimum to support Energy Star requirements and meet the class C harmonic requirements of IEC 61000-3-2. They have programmable current limit levels, controlled via an IEC 60929 compliant interface using a standard 0 to 10 V signal, to support dimming and are rated for operation over a wide case temperature range of -40 to 90°C without forced air cooling. Further help minimize running costs with a very high conversion efficiency, typically 90 percent when operating from a nominal 230 Vac input. Housed in a slimline, up to IP67 rated package measuring just 8.5 x 1.65 inches (215 x 42 mm), with a height of only 1.2 inches (30 mm), these power supplies are easy to accommodate in to modern LED lighting fixtures with limited space.

Mfg. Part No.	Output Current (A)	Output Voltage (VDC)	Input Voltage (VAC)	Stock No.	Price Each 1-4

TROPO 15W DIMMABLE LED DRIVERS

RoHS Compliant Available

ROAL living energy

- 120VAC and 230VAC inputs available
- Output current availability 0.35A-1.5A
- Operates with industry standard dimmers
- Compact encapsulated assembly
- Active power factor correction
- Output over-voltage, over-current, short-circuit protection and auto recovery
- High temperature operation (up to 90°C case)
- Long life 5 year warranty
- UL and ENEC approved, CE mark

TROPO series switch mode power supply technology is designed to generate one constant current output from an AC input, and work with industry standard lighting controls in dimming applications.

SPECIFICATIONS:	
Input Voltage:	90-135VAC (L Models), 176-265VAC (H Models)
Input Frequency:	47-63 Hz
Operating Temperature:	-30°C to +90°C case temp without derating
Efficiency (%):	80% typical @ >120VAC, full load
EMC and EMI:	EN55015 Class B, FCC Class47CFR Part 15 Class B
Safety Approvals:	UL60950-1 recognized, UL8750 compliant, ENEC Mark and CE Mark for EU
Dimension (LxWxH):	3.21 x 2.21 x 1.13"

RoHS Compliant Available

TRIAD

TLM series is a 26 watt constant current encapsulated DC/DC switching power supply used for indoor and outdoor IP66/NEMA 4 applications.

SPECIFICATIONS:	
Input Voltage:	10-40 VDC
Operating Temperature:	-40°C to +60°C Full Load, derate 1%/°C from 60°C to 70°C max
Efficiency (%):	90
Dimensions (LxWxH):	1.26 x 1.22 x 0.59"

Mfg. Part No.	Input Voltage (VDC)	Output Voltage (VDC)	Output Current	Stock No.	Price Each
TLM4036DC-0350	10 ~ 40	2 ~	350mA	45P2900	19.20
TLM4036DC-0700	10 ~ 40	2 ~	700mA	45P2901	19.20
TLM4036DC-1000	10 ~ 40	2 ~	1A	45P2902	19.20

DLE SERIES 15/25/35/45/60W AC/DC LED DRIVERS

NEW

RoHS Compliant Available

XP Power

- AC input LED driver
- Constant voltage or current operation
- High power factor
- High efficiency
- Waterproof to IP67
- Class 2
- 90-305VAC input voltage range
- Three-year manufacturer's warranty

15W 25/35W 45/60W

LED POWER SUPPLIES

DLE SERIES 15/25/35/45/60W AC/DC LED DRIVERS (CONT.)

SPECIFICATIONS:	
Input Voltage:	15W models: 90-264VAC; all other models: 90-305VAC
Input Frequency:	47-63 Hz
Power Factor:	15W models: >0.83; all other models: >0.9 @ 230VAC, full load
Line Regulation:	±0.5%
Load Regulation:	±1% in constant voltage mode; ±5% in constant current mode
Efficiency (%):	Up to 88%, model dependent
Isolation:	3750VAC Input to Output
Operating Temperature:	15W models:-20°C to +70°C; all other models: -20°C to +50°C
EMC Emissions:	EN55015, class B conducted and radiated
Harmonic Currents:	EN61000-3-2, class C
Safety Approvals:	EN61347, UL8750, CE Mark
Dimensions (LxWxH):	15W models: 4.33 x 1.38 x 0.98″ (110 x 35 x 25mm) 25/35W models: 4.33 x 2.89 x 1.29″ (110 x 73.5 x 33mm) 45/60W models: 6.73 x 1.78 x 1.27″ (171.1 x 45.3 x 32.5mm)
Lead Length:	5.9″ (150mm) each end

DCH3 SERIES EXTERNAL POWER ADAPTERS

RoHS Compliant Available

ARTESYN EMBEDDED TECHNOLOGIES

- Switching wallmount power supply
- Universal AC input
- Available in multiple AC plug configurations
- Overload and short circuit protection
- Constant voltage, constant current
- High MTBF
- Built in EMI filter (CISPR 22 Class B)
- Efficiency level IV for suffix **-0001, -0002 and -0004**
- Efficiency level V for suffix **-0005 and -0006**
- 2 year warranty

DCH3-050US

SPECIFICATIONS:

Series:	DCH3
Input range:	100-254 VAC (wide range)
Frequency:	47-63 Hz
EMI/RFI:	FCC Part 15, Subpart B Class B and EN55022 (CISPR 22) Class B and EMC89/336/EEC
Safety ground leakage current:	10 µA @ 50/60 Hz, 230 VAC input
Operating temperature:	0°C to 45°C ambient
Dimensions (L x W x H):	2.3 x 1.8 x 1.0"

WALL-MOUNT POWER ADAPTERS - MEDICAL

RoHS Compliant Available

ARTESYN EMBEDDED TECHNOLOGIES

- Medical and ITE safeties
- Switching wallmount power supply
- Available in interchangeable and fixed AC plug configurations
- US and EU interchangeable AC plugs can be inserted in multiple orientations (straight or 90°)
- CE Mark EMC and LVD
- Universal AC input
- Fully regulated output
- Overload and short circuit protection
- Thermal protection
- Efficiency level V
- Constant voltage
- High MTBF
- Built in EMI filter (CISPR 22 Class B)

12V OUTPUT 24W DESKTOP POWER ADAPTER

RoHS Compliant Available

ARTESYN EMBEDDED TECHNOLOGIES

- Universal AC input (90 to 264VAC)
- Fully regulated output
- EN61000-3-2 compliant
- Overcurrent and overvoltage protection
- High efficiency
- High MTBF
- IEC320 AC input receptacle 3 pin (type C14)
- Built in EMI filter (CISPR 22 Class B)
- LED power good indicator
- AC input fuse
- Efficiency Level V
- CE Mark EMC and LVD
- Meets K.21 Basic Surge requirement

EXTERNAL POWER SUPPLIES

DPS50 SERIES SINGLE OUTPUT EXTERNAL DESKTOP POWER SUPPLIES

RoHS Compliant Available

ARTESYN EMBEDDED TECHNOLOGIES

- Universal AC input
- Fully regulated output
- Overload and short circuit protection
- Constant voltage
- High efficiency
- High MTBF
- LED power good indicator
- Input power <74 watts
- Built in EMI filter (CISPR 22 Class B)
- IEC320 AC receptacle, 3 pin (type C14)
- CE Mark EMC and LVD (except for the **DPS52** and **DPS52-M**)
- Complies with EN61000-3-2
- Medical safety approval models available

SPECIFICATIONS:	
Input range:	90-264 VAC, 127-300 VDC
Frequency:	47-440 Hz
Inrush current:	<60A @ 230 VAC, cold start @ 25C
Input current:	<2.0A rms @ 115 VAC, <1A @ 230 VAC
Dimensions:	1.62 x 2.39 x 5.24" (H x W x D)

DTM65-C SERIES 40W TO 65W EXTERNAL POWER SUPPLIES - MEDICAL

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- CEC and EISA compliant for easier system compliance
- Wide range AC input: 90V to 264V (47Hz to 63Hz)
- Greater than 85% efficiency
- Medical certifications
- Dimensions (W x L x H): 2.72 x 5.2 x 1.57"

DT100/150-C SERIES 100W TO 150W AC/DC EXTERNAL POWER SUPPLIES

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- CEC and EISA* compliant
- Wide range AC input
- Power factor correction
- Low profile and lightweight
- One-year manufacturer's

DT100/150-C series 100 to 150W AC/DC external power supplies include over voltage and short circuit protection. AC input connector: IEC 320-C14 standard (accepts IEC320-C13). Output connector: Kycon KPP-4P or equivalent Pins 1 & 2: -Vout, Pins 3 & 4: +Vout. Case color: black.

SPECIFICATIONS:	
Input Voltage:	90 - 264VAC
Input Frequency:	47-63Hz
Total Regulation:	+5% / -2%
Hold Up Time (Typ.):	16ms @t 115VAC input
Efficiency:	>85% typical
Operating Temperature:	0°C to +40°C

WSU SERIES EXTERNAL SWITCHMODE POWER SUPPLIES

RoHS Compliant Available

TRIAD

Features

- No minimum load required
- Double insulated
- Overvoltage and short circuit protection
- Class B EMI
- EISA 2007 and CEC compliant
- Five-year manufacturer's warranty

Specifications

- Power Range: 6.75-36W
- Input: 100-240VAC, 50/60Hz, NEMA 1-15P
- Output: Six foot cord with standard barrel type connector
- Dielectric Isolation (Input to Output): 4KVDC for 60 secs.
- Operating Temperature: 0°C to 40°C @ Max. Load
- Storage Temperature: -20°C to 60°C
- Humidity: 5% to 95%, Non-condensing

WALL PLUG-IN POWER SUPPLIES

RoHS Compliant Available

TRIAD

- Input voltage 120VAC
- Available in 60Hz only

Wall plug-in power sources eliminate the need for internal power supply cooling devices, thereby reducing the noise level, size and weight of the end product. These compact power sources keep heat away from sensitive circuits, and supply a safer lower output to the end product. They are completely enclosed to prevent tampering. 6 ft. cord length. UL listed.

EXTERNAL POWER SUPPLIES

VEP SERIES 8, 15, 24 AND 36W SINGLE-OUTPUT PLUG-IN EXTERNAL POWER SUPPLIES

RoHS Compliant Available

XP Power

- Output voltages from 5 to 24V
- <0.3W no load input power
- Efficiency Level V (24W Level IV)
- Interchangeable AC input connectors — USA, UK, EU, Australia and China versions
- Class II construction
- CEC2008 and EISA 2007 compliant
- Medical and ITE approvals (36W ITE only)
- China Compulsory Certification (CCC) qualified (24W only)

GREEN XP POWER

SPECIFICATIONS:	
Input Voltage:	90 -264 VAC
Input Frequency:	47 - 63 Hz
Line Regulation:	±0.5% max.
Load Regulation:	±5% max.
Overload Protection:	120 - 280%, auto recovery
Isolation:	4000 VAC input-to-output
Operating Temperature:	0 to +40°C
EMC:	EN55022 level B conducted and radiated
Safety Approvals:	All Models: EN60950, UL60950-1, IEC60950-1, CSA 60950-1, EN60601-1, UL60601-1, IEC60601-1 All Models (except 36W): CSA C22.2 No 601.1 24W Only: China Compulsory Certification (CCC) Qualified

VEP series desktop plug-in power supplies include over voltage, over load and short circuit protection. Output cable length is approximately 71″. *Order Interchangeable AC input connectors (plugs) separately below.*

VEH SERIES 20/40/60/90 WATT EXTERNAL POWER SUPPLIES

RoHS Compliant Available

XP Power

- Energy Efficiency Level V
- CEC 2008 and EISA 2007 compliant
- China Compulsory Cert. (CCC) qualified (**VEH60**)
- Single outputs from 5V to 48V
- Universal input
- High power density
- Approved as a limited power source (except **VEH90**)

GREEN XP POWER

VEH series compact desktop power supplies include overload and short circuit protection. **VEH20, VEH40** and **VEH60 series** output connector is 5.5mm diameter outer barrel, inner diameter is 2.5mm barrel with center positive (+) and outer shell negative (-) polarity. **VEH90 series** output connector is Power Mini Din that mates with Kycon KPJ-4S or equivalent. All models have 48″ (1220mm) long output cable.

AHM SERIES 85-250 WATT IT AND MEDICAL EXTERNAL POWER SUPPLIES

RoHS Compliant Available

XP Power

- Energy Efficiency Level V
- EISA2007 and CEC2008 compliant
- Medical and ITE approvals
- <0.5W no load output power
- Class I and Class II versions on 85W and 100W
- High efficiency
- IP (x) 1 environmental rating
- Three-year manufacturer's warranty

AHM series compact IT and medical desktop power supplies include over voltage, over load, over temperature and short circuit protection. For Class I versions shell is connected to earth. For Class II versions shell is capacitively coupled to input. For Class II versions, add suffix C2 to 85W and 100W model numbers.

SPECIFICATIONS:

Input Voltage:	90-264VAC
Input Frequency:	47-63Hz
Line Regulation:	1.0% max.
Ripple & Noise:	1.5% max pk-pk (see note *)
Efficiency:	90% typical
Operating Temperature:	0 °C to +60 °C, derate from 100% power at +40 °C to 50% power at +60 °C
EMC:	EN55011/FCC/VCCI, Class B conducted and radiated
Safety Approvals:	EN60601-1, UL60601-1, CSA22.2 No. 601-1 per cUL, EN60950, UL60950

POWERVERTER® PLUS HIGH-PERFORMANCE INVERTERS

RoHS Compliant Available TRIPP·LITE POWER PROTECTION

- High-efficiency operation conserves batteries for longer run times
- Frequency control for operating stability
- Converts DC battery power to 120V, 60Hz AC power
- Automatic overload protection
- Clean, quiet operation

These PowerVerter® industrial-strength inverters are ideal for heavy-duty applications such as power tools, pumps, fans, desktop computer systems, portable electronics and battery chargers. Maintain up to 200% of their rated output for short durations, providing adequate power to start large AC motors and handle heavy inductive loads. Two NEMA-rated AC outlets. Diagnostic LEDs offer continuous status on load level and battery charge. Easy connection and mounting with user-supplied cable and hardware. Color: black. Instruction manual included. One-year manufacturer's warranty.

APS INVERTERS WITH INTEGRATED BATTERY CHARGER AND AUTOMATIC SWITCHOVER

RoHS Compliant Available

TRIPP-LITE POWER PROTECTION

APS2012

APS1012SW

Automatically sense and switch AC output between outside power (utility or generator) and battery power when no AC power is available. Ideal for use as mobile power systems or stationary UPS/emergency power supplies. 3-stage battery charger for quicker recharge, plus protection against over-charge and over-discharge to ensure a longer service life from batteries. High-efficiency output is frequency-controlled to support sensitive loads.

PROSINE™ INVERTERS AND INVERTER/CHARGER

xantrex Smart choice for power

PROsine™ inverters deliver true sine wave AC output: a clean, reliable electric power, often better than grid power supplied by local electric companies. Feature automatic overload, short circuit, over temperature, reverse polarity fuses and AC backfeed and over/under voltage protection. PROsine 1000s and 1800s dimensions: 4.5H x 11.0W x 15.4"D. Approvals: CSA NRTL/C (120V models), UL458, UL1741 CSA 107.1, designed to meet KKK-A-1822D.

DC/AC POWER INVERTER

xantrex Smart choice for power

PROWATT® power inverter plugs in for instant portable AC power to run laptops, printers, or fax machines. Convert battery power to standard AC power. Provide extra-long battery running time without recharging. Inverter can be plugged into cigarette lighter or any 12-volt battery pack for portable AC power. Compatible with AC adapter/charger found on computers. Surge to power levels far beyond their continuous ratings for short periods of time. Ideal for running loads with high start-up requirements. Internal circuits protect equipment from spikes and voltage fluctuations. Automatically shut down if overloaded or overheated. *Order inverter accessories separately; go online or call.*

CS AND ES SERIES BACK-UPS

RoHS Compliant Available

APC by Schneider Electric

CS series

ES series

CS and **ES series** Back-UPS utilize less power during normal operation and provide enough backup power to work through short and medium length power outages. They also safeguard equipment from damaging surges and spikes that travel along utility, data and phone lines. Most models include CD software, which automatically saves open files and gracefully shuts down the computer during extended outages. Additional features like an audible alarm, LED status indicator, user replaceable battery, push-button circuit breaker and transformer-block spaced outlets make these Back-UPS the perfect units to protect ones productivity from the constant threat of power outages and lost data. Three-year manufacturer's warranty. UL listed, CE compliant, FCC and C-Tick approval.

CS SERIES — BATTERY BACK-UP AND PROTECTION FOR BUSINESS COMPUTERS

Back-UPS **CS series** desk-top tower units ideally protect business and office computer systems. All models include CD with software, cord management straps, USB cable, and user manual.

UPS SYSTEMS

RS SERIES BACK-UPS

RoHS Compliant Available

APC by Schneider Electric

BR1000G

RS series Back-UPS offer high-performance protection for business and office computer systems. It provides abundant battery backup power, allowing user to work through medium and extended length power outages. It also safeguards equipment from damaging surges and spikes that travel along utility, phone and network lines. Features automatic voltage regulation (AVR) that instantly adjusts both low and high voltages to safe levels, so user can work indefinitely during brownouts and overvoltage situations, saving the battery for power outages when it's needed most. Shutdown software automatically powers down the computer system in the event of an extended power outage. Additional features like audible alarms, LED status indicators, user replaceable battery, push-button circuit breakers and plentiful outlets make the **RS series** Back-UPS perfect to protect business' productivity from the constant threat of power problems and lost data. All models includes CD with software, USB cable and user manual. Three-year manufacturer's warranty.

TOWER/RACK MOUNT SMART-UPS SYSTEMS

RoHS Compliant Available

APC by Schneider Electric

SUA3000XL SC1000 SMX750

Intelligent and efficient network power protection from entry level to scaleable runtime. Ideal for servers, point-of-sale, routers, switches, hubs and other network devices. Entry level 420-1500VA, Standard 750-5000VA, Extended Run 750-3000VA. Two year repair or replace manufacturer's warranty. UL listed, CSA certified.

SUA SERIES

SUA series Smart-UPS® protect critical data by supplying reliable, network-grade power in either traditional tower or rack-optimized form factors. Perfect for protecting business critical servers, voice and data networks, point of sale, retail/bank back office and ATM's. Features high real-power output (watts), generous runtime, sine wave output, 16-segment LED visual display and intelligent battery management. Most models have DB-9 RS-232, SmartSlot and USB interface ports. All include CD with software, Smart UPS signalling RS-232 and/or USB cable and user manual.

SC SERIES

SC series Smart-UPS is ideal for small and medium businesses looking to protect basic entry-level servers (with smaller, non-redundant power supplies), networking equipment and point-of-sale (POS) devices from power disturbances and outages. These models feature network grade runtime, hot swap batteries, and built-in data line protection for worry free uninterruptible power protection for increased availability. All models have DB-9 RS-232 interface port; **mfg. part no. SC1000** also has a USB port. All include CD with software, Smart UPS signalling RS-232 cable and user manual.

TOWER/RACK MOUNT SMART-UPS SYSTEMS (CONT.)

SMX SERIES

SMX series Smart-UPS systems have extremely high efficiency at low, medium and high load levels making them ideal for today's multi-core or virtualized servers that have varying load consumption. Features a 16-segment LED display, extended range automatic voltage regulation (AVR), and pure sine wave output on battery. Additional manageability options are available through the Smart-Slot interface, which is an internal slot for the installation of optional accessory cards.

Smart-UPS® 120V output/input systems provide equipment with backup safety and surge protection. Perfect for protecting business critical servers, voice and data networks, point of sale, retail/bank back office and ATM's. Features high real power output (watts), generous runtime, sine wave output, 16-segment LED visual display, and intelligent battery management. All units have an APC SmartSlot, an internal accessory slot that allows installation of optional accessories to enhance performance. Parts with **NC suffix** include network card. Two year repair or replace manufacturer's warranty. UL listed, CSA certified.

SUA SERIES

SUA series models include CD with software, rack mounting hardware, Smart-UPS signalling RS-232 cable, USB cable and user manual.

3S SERIES BATTERY BACKUP AND SURGE PROTECTION UPS

RoHS Compliant Available

EATON Powering Business Worldwide

NEW

- Ease of use plug-and-play functionality enables automatic integration (models **3S550**, **3S750** only)
- Sleek, compact design looks good displayed alongside high-tech equipment
- Space-saving wall or desk mount capability
- Premium protection for up to 10 devices, including those using data lines
- Provides up to 45 minutes of battery backup
- Data line protection for telephone, fax or Ethernet
- User-replaceable batteries
- Three-year manufacturer's warranty, includes batteries

3S series UPS provides power protection for office and home computer equipment and peripherals, broadline modems (internet and TV), IP telephony and POS equipment. EcoControl functionality provides up to 30 percent greater energy savings than typical battery backups (model **3S750** only). Features HID-compliant USB port for automatic integration with Windows, Mac and Linux (no drivers required). Up to 10 receptacles — (5) battery backup and surge protection, (5) surge protection. Offer integrated graceful shutdown capability for connected devices.

Mfg. Part No.	Power Rating	Input Connect-ion	Output Recept-acles*	Dimensions (In.) (H x W x D)	Stock No.	Price Each Each
3S 350	350VA / 200W	5-15P	(8) 5-15R	3.4 x 5.5 x 13.2	47X1694	88.00

5P SERIES NETWORK RACKMOUNT UPS

RoHS Compliant Available

EATON Powering Business Worldwide

NEW

- Conserves valuable rackmount space with compact 1U or 2U configurations
- Graphical interactive LCD display interface providess all critical UPS information in a single screen view
- Fully integrates with Intelligent Power® Software Suite for continuous up time of servers and virtual machines
- Extends battery service life by 50% with ABM Technology
- Three-year manufacturer's warranty, includes battery

5P series rackmount UPS delivers reliable enterprise-class backup power with an efficiency rating of up to 99% perfect for network closets and small data centers. Protects more devices by providing 20% more wattage than comparable UPSs. When paired with Eaton's free Intelligent Power® Software Suite, the user can seamlessly monitor and manage connected equipment, even in virtualized environments. ENERGY STAR® qualified 2U rackmount models help consumers save money and protect the environment through energy efficient products and practices. UPS comes complete with USB and RS-232 cables, four-post rail kit (model **5P550R** ears only), user manual CD, Intelligent Power Software Suite CD and Quick-Start guide. 2U models only include tower pedestals and Phillips head screwdriver. Globals models only include two IEC-to-IEC jumper cables, output and input cable locking systems.

UPS SYSTEMS

5S SERIES DESKTOP/ WORKSTATION UPS

RoHS Compliant Available

NEW

EATON
Powering Business Worldwide

- Fits in small spaces — use as tower or desktop monitor stand
- Interface is auto-recognized when plugged in with Windows®, Macintosh® and Linux® environments
- User-friendly LCD* display provides critical information in a single screen view
- Eco-control* saves up to 30% on energy consumption
- Provides surge protection for network phone lines, cable TV and satellite applications
- Three-year manufacturer's warranty, includes battery

5S series small, compact UPS delivers backup power for desktop PCs and workstations. When paired with Eaton's UPS Companion software users can enhance power protection capabilities and provide safe system shutdown. Features Eco-Control outlets (models **5S700LCD**, **5S1000LCD**, **5S1500LCD** only), outlets with battery backup and surge protection, outlets with surge protection, offet outlets to accommodate bulky transformers, reset button (circuit breaker) and six-foot line cord. UPS comes complete with USB cable and user manual.

5SC SERIES SERVER AND NETWORK TOWER UPS

RoHS Compliant Available

NEW

EATON
Powering Business Worldwide

- Graphical interactive LCD display interface providess all critical UPS information in a single screen view
- Extends battery service life by 50% with ABM Technology
- USB port is HID-compliant for integration into Windows®, Mac® OS and Linux®
- Reliable power protection, even in battery mode with pure sineware output
- Buck-and-boost operation ensures consistent input voltage to connected equipment
- Adjustable input waveform sensitivity adapts to specific environments, like genset
- Three-year manufacturer's warranty, includes battery

5SC series tower UPS provides affordable and reliable power protection for small business servers, storage and network equipment. Features an LCD display interface that provides a clear status of key UPS parameters, such as input and output voltage, load and battery level and estimated runtime. Designed to protect tower servers, network-attached storage (NAS) and network equipment, and similar IT applications; and its compact footprint accommodates tight spaces, such as small network closets, medical offices, automatic teller machines (ATMs), ticket machines and kiosks. UPS comes complete with 6-ft. input power cord, USB and serial cable, software CD, and user manual. Global models include two IEC output power cords but no input power cord.

5PX SERIES NETWORK AND SERVER TOWER UPS

EATON
Powering Business Worldwide

- Enables you to customize UPS settings, view load and power consumption through the interactive LCD screen interface
- Fully integrated with Intelligent Power Software Suite for continuous up time of servers and virtual machines
- Monitors and manages power consumption through managed outlets
- Provides more real power (watts) to protect more equipment and leave room for expanding IT systems
- Extends battery service life by 50% with ABM Technology
- Protects you with a three-year warranty, which includes the battery

5PX UPS is an integrated power management solution. Paired seamlessly with Intelligent Power Software Suite, the **5PX** provides the tools you need to manage your equipment, even in virtualized environments. Designed with managed outlet segments, you can monitor energy consumption on the intuitive LCD screen. It also delivers more power than comparable UPSs and has an efficiency rating of up to 99%.

POWERWARE® 9130 SERIES UPS SYSTEMS

EATON
Powering Business Worldwide

- Protects against downtime, data loss and process interruption by providing continuous, clean power
- Cuts energy usage and costs with >95% efficiency rating in high efficiency mode
- Conserves rack space with 2U rackmount form factor that includes internal batteries and a 4-post rail kit
- Provides more real wattage in less space with a 0.9 power factor
- Maximizes runtimes with optional extended battery modules
- Two-year limited factory warranty and a load protection guarantee

9130 series UPS delivers optimal power quality, provides superior power management, resolves utility power protection problems and supplies continuous power conditioning to all connected equipment. Simplifies UPS monitoring and management with a bright LCD user interface, intuitive power management software and optional eNotify Remote Monitoring service. Increases battery service life and system uptime with ABM battery-charging technology and hot-swappable batteries. **9130 series** delivers essential power protection for IT and networking data center equipment, medical systems, manufacturing process control or anywhere critical equipment and applications require clean, continuous power.

Pulsar EX Series

Pulsar M Series

Pulsar EX and Pulsar M series are packed with high-availability features like an automatic by-pass or hot-swappable batteries. Their network manageability is outstanding due to switched outlets to remotely reboot connected equipment or to extend backup time for the most critical servers. The bundled software suite provides a vast array of power management capabilities, like the ability to shutdown multiple servers or to be interfaced with the network even without a Web/SNMP card.

PULSAR EX SERIES

Pulsar EX series is made of high-performance UPSs designed for power protection of individual IT systems exposed to harsh conditions. Their on-line double conversion technology can ride through long lasting brownout conditions without draining the batteries while their high output provides typically 20% more power than comparable products. Available in different form factors like mini-tower or 2U Rack/Tower. **Pulsar EX series** is the ideal solution for mid-range servers and internetworking equipment with Power Factor Corrected power supplies.

PULSAR M SERIES

Pulsar M series is made of high-performance UPSs designed for power protection of servers and IT equipment exposed to harsh conditions. Their on-line double conversion technology can ride through long lasting brownout conditions without draining the batteries. Pulsar M is available in 2 Rack/Tower versatile form factors: 2U height for server protection in deep, high density rack enclosures, or 3U for shorter telecom/networking racks. **Pulsar M series** is the ideal solution for individual protection of enterprise servers.

A11H SERIES ON-LINE UNINTERRUPTIBLE POWER SUPPLIES

RoHS Compliant Available

SANYO DENKI

Rack Mount

Tower

- 19" rack mountable and tower models
- Single-phase, 2-wire AC input/output
- 55VAC to 150VAC input voltage window
- 40Hz to 120 Input frequency window
- On-line topology
- Overcurrent breaker protection
- UL listed
- Three-year manufacturer's warranty

A11H series on-line UPS reduces the use of batteries due to its wide 55VAC to 150VAC input voltage window resulting in longer battery life and high reliability. Plus its wide 40Hz to 120Hz input frequency window allows for small inexpensive generators, resulting in high dependability. Features forced air cooling, PC (RS-232C) interface, remote, emergency power off, maintenance-free sealed lead-acid battery and 6.12-ft input cable.

SDU SERIES OFF-LINE DIN RAIL UPS

RoHS Compliant Available

SOLAHD

- Compact industrial design
- Wide operating temperature range, 0°C to 50°C
- Phone line surge protection included
- Software and communication cable included
- Simulated sinewave output
- RS232 communication port
- USB port and Form C dry contact, optional
- Two-year manufacturer's warranty

SDU series off-line DIN rail UPS provides economical protection from damaging impulses and power interruptions. These units include accessible connection screw termination for critical devices needing battery back-up.

UPS SYSTEMS

SDU SERIES 24V DC DIN RAIL UPS

RoHS Compliant Available

SOLA HD

- Modular, rugged industrial grade design
- Microprocessor based controls
- Automatic self-test feature for UPS function and battery management check
- Power module wide operation temperature range (-20 to +50°C)
- Flexible batteries back-up expansion capabilities
- Overload protection in normal and battery modes
- User replaceable batteries
- IIP-20 rated input and output screw terminals
- No internal fan, no extra cooling required
- Sturdy, reliable all metal DIN rail mounting connector
- LED status indicators
- Universal Dry Contact Relay terminals provide remote signaling
- Monitoring, diagnostics, and remote turn-on and shut-off capabilities
- Two-year manufacturer's warranty

SDU DC UPS series is a powerful, microprocessor controlled UPS that provides protection from power interruptions. With an input voltage range of 22.5 to 30.0 Vdc, the DC UPS is the ideal power back-up solution for your critical connected loads. These units were designed for use with **SDN series** of power supplies.

S1K SERIES COMPACT UNINTERRUPTIBLE POWER SYSTEMS (UPS)

SOLA HD

Features:

- Small, compact design
- Data-line surge protection for phone or network
- DB-9 communications interface; software and cable included
- Step sinewave output
- Voltage: 115VAC input and output
- Frequency: 50 or 60Hz input and output
- Input plug: 5-15P
- Two-year manufacturer's warranty
- UL listed

Economical and compact protection from damaging impulses and lost data due to power interruptions. **S1K Offline series** is designed to fit easily under a desk, or in any other location where space is limited.

S3K SERIES INDUSTRIAL GRADE LINE INTERACTIVE UNINTERRUPTIBLE POWER SUPPLIES (UPS)

SOLA HD

- Line-interactive with data line protection for telephone and network connections
- Automatic voltage regulation (AVR) topology — Saves battery over/undervoltages when input is below 87V
- Sinewave output
- Configurable input voltage
- Automatic self test function
- User replaceable "Hot Swapping" batteries
- UL listed
- Two-year manufacturer's warranty

S3K series UPS protect against most power disturbances including over/under voltages through line-interactive technology. Additionally, **S3K series** UPS are provided with an input circuit protector and a pair of surge protected data line connectors (RJ-45), with an automatic test function to insure the capability of the battery to supply power in emergency situations. Should the battery fail this test, the UPS will display a warning to indicate that the battery needs to be replaced.

S4K2U-C / S4K2U-5C INDUSTRIAL ON-LINE UNINTERRUPTIBLE POWER SYSTEMS (UPS)

SOLA HD

Features:

- Hardwire capability for permanent installation
- Small 2U (S4KC) height, 4U (S4K4U) height maximizes available space
- Input and output noise suppression
- Higher output power factor of 0.90 (S4KC)
- PWM inverter reduces output voltage distortion
- Add on batteries for extended back-ups
- Integral sealed non-spillable batteries
- Hot swappable user replaceable battery
- Automatic restart and manual battery test
- Rack-mount or stand-alone tower mounting
- Two-year limited manufacturer's warranty

S4KC is a single-phase, on-line (double-conversion) UPS system available in 500-3000VA, 120V and 230V. On-Line design means zero transfer time from external to internal power. When utility power fails, your critical load remains supported by a seamless flow of power. S4KC protects equipment from virtually all power disturbances due to blackouts, brownouts, sags, surges or noise interference. The rack-tower models are also supplied with securing flanges and rack slide mounting hardware. Units can be easily hardwired by removing the attached line cord and receptacle plate. All units include a conduit knockout cover in the box. S4KC4U is a single-phase, on-line (double-conversion) UPS system available in 6000VA, 120V/ 240V.

ECO-UPS SERIES ENERGY-SAVING UPS SYSTEMS

TUV Rheinland

RoHS Compliant Available

TRIPP·LITE POWER PROTECTION

- 350VA – 850VA
- Green Outlet™ Technology
- Up to 99% Efficiency
- Protection from Blackouts, Phantom Loads, Surges & Line Noise
- Tel/Modem Line Protection
- LCD Status Screen (Select Models)

EC350UPS

EC0650LCD

Designed for home and office applications, **ECO-UPS** Systems protect your computer, electronics and other equipment from downtime, damage and data loss caused by power problems, including blackouts, surges and line noise. Reliable battery backup power keeps computers operating through shorter outages and allows enough time to save files and shut down during longer ones. Free PowerAlert software* saves files automatically on unattended computers, and **ECO-UPS** Systems also work with built-in power management features of popular desktop operating systems. Surge-blocking phone jacks protect telephones, fax machines, analog modems, DSL modems and other communications equipment. Select models include an illuminated LCD status screen that displays voltage, wattage, runtime and other useful information. **ECO750UPS** is ENERGY STAR qualified for its ability to save customers money while helping to protect the environment.

SMARTPRO® RACK/TOWER INTELLIGENT LINE-INTERACTIVE UPS SYSTEMS

RoHS Compliant Available

TRIPP·LITE POWER PROTECTION

- Automatic Voltage Regulation (AVR) Supports Equipment During Brownouts and Overvoltages
- Rack/Stack/Tower Adaptable Cabinets Occupy Less Space — As Slim As 1U
- Extended Runtime Options

Incorporates intelligent, microprocessor-controlled protection with a full range of power management features to protect network servers, rack mount equipment and more. Free enhanced PowerAlert software and up to 4 communication ports (USB and DB9) provide unparalleled network power management. **Mfg. part no. SMART5000RT3U** includes 3U power module and 3U battery module and offers 208 and 120V output. 17.5 inch external width.

OMNISMART™ LINE-INTERACTIVE UPS SYSTEMS

RoHS Compliant Available

TRIPP·LITE POWER PROTECTION

- Phone/DSL/Ethernet protection options safeguard against surge damage on the phone/DSL/ Ethernet lines

Mid-level, line-interactive UPS series offer automatic voltage regulation at an affordable price to protect computers, workstation and small servers. Free basic PowerAlert software (web download) and USB communication port provide automatic unattended shutdown.

SMARTONLINE® RACK/TOWER ON-LINE UPS SYSTEMS

RoHS Compliant Available

TRIPP·LITE POWER PROTECTION

- On-line double-conversion rack / tower UPS
- 100/110/120/127V 50/60Hz output; High efficiency economy mode option
- Interactive LCD with 9 selectable screens of UPS and site power data
- Expandable runtime, Hot-swap batteries
- USB, RS-232 & EPO ports, support for SNMP/WEB card option
- 2 independently switched load banks

Online, double-conversion Uninterruptible Power Supply (UPS) maintains perfectly regulated output power by continuously converting raw AC input to DC, then re-converting output back to AC. Fully regulated sine wave AC output with +/-2% voltage regulation powers network equipment continuously, even during severe brownouts and overvoltages, all without depleting UPS battery reserves. Maintains battery-derived AC output during power failures with zero transfer time. Highly efficient operation in optional economy mode saves BTU heat output and energy costs. Network management interfaces support communications via USB, RS-232, contact-closure and optional SNMPWEBCARD network interface. Built-in DB9 port offers both enhanced RS-232 data and basic contact closure monitoring ability. HID-compliant USB interface enables integration with built-in power management and auto shutdown features of Windows and Mac OS X. Includes PowerAlert monitoring software and complete cabling. Emergency Power Off (EPO) interface. LCD display reports UPS operating mode, line power availability, battery mode operation, inverter operation, ECO mode status and output power availability. LCD display panel easily rotates for viewing in rackmount or tower configurations. Audible alarm with push-button momentary alarm-cancel and silent-mode LCD configuration options. Programmable self-test. Fault-tolerant auto-bypass mode. Field-replaceable, hot-swappable internal batteries and external battery packs.

FB SERIES ENCAPSULATED LITHIUM COIN CELL BATTERIES AND BATTERY SOCKET

- Allow series or parallel interconnection between cells
- Withstand harsh manufacturing and user environments
- PCB mountable, wave solderable, and process tolerant
- Application flexibility
- Ideal for automated placement

FB2032H2-BA RH-23H2-B

FB series batteries consist of two lithium carbon-monofluoride coin cells encapsulated within a glass-filled polyester molded housing. Allows for series or parallel interconnection between the cells. Utilize Rayovac BR lithium carbonmonofluoride technology to provide the greatest reliability at very wide temperatures and the lowest self-discharge rate.

RELEX™ PCB MOUNTABLE BATTERY SOCKET

Mfg. part no. RH23H2-B printed circuit board mountable battery socket for use with **mfg. part nos. FB-1225H2-B** and **FB2032H2-BA** batteries; *ordered separately above*. This device provides excellent component retention and a gas tight, reliable electrical contact. It's wave solderable and process tolerant. Molded-in standoff for thorough post reflow cleaning. Its self-orienting design provides proper polarity installation without desoldering or the use of special tools.

CR SERIES USER REPLACEABLE LITHIUM BATTERIES

Panasonic. BATTERIES

- Consumer replaceable
- High safety and reliability
- High current pulse discharge capability
- Superior shelf life/minimal discharge
- Wide temperature range (-40°C to +70°C)
- Lightweight
- High energy density

User replaceable lithium batteries offer high voltage and high energy density. They are available in two types: poly-carbonmonofluoride and manganese dioxide (CFn/Li and MnO2/Li).

e²® RECHARGEABLE NICKEL-METAL HYDRIDE BATTERIES

Energizer

High-energy e²® rechargeable nickel-metal hydride batteries replace Nicads. Environmentally-safe, these NiMH batteries can be recharged up to 1000 times. Designed for high-drain, high-tech devices. Select from a wide assortment of Energizer® battery chargers; *order separately online.* **Suffix BP** in mfg. part no. indicates blister pack. **Sold in package quantities listed.**

EVERYDAY RECHARGEABLE NIMH BATTERIES

ULTRALAST Green

The Power of Green™ — Saves the Environment and Money!

- Pre-charged — ready-to-use right out of the pack
- Choice of AA and AAA in two, four and eight packs
- Long lasting performance
- Keeps charge up to 6+ months in low power consumption devices
- Holds 80% of charge after 12 months when not in use
- Charge as many as 500 times, or up to three years
- Ideal for household devices

ULGED8AA

Replace disposable batteries with UltraLast Green™ Everyday rechargeable nickel-metal hydride (NiMH) batteries in every application with sacrificing performance. Perfect for low-power consumption devices, such as remote controls, clocks, flashlights, and other common household applications. One UltraLast Green™ Everyday rechargeable battery can keep up to 1000 disposable alkaline batteries out of landfills. Packaged in eco-friendly materials. *Order UltaLast Green™ battery chargers separately on pages 1570-1571*

Mfg. Part No.	Size	Voltage	Capacity	Pkg. of	Stock No.	Price per Pkg. 1-9

HIGH-POWER RECHARGEABLE NIMH BATTERIES

ULTRALAST Green

The Power of Green™ — Saves the Environment and Money!

- Long lasting performance for power-hungry devices
- Choice of AA and AAA in two, four and eight packs
- Up to four times the life of standard batteries on each charge
- Charge as many as 500 times, or up to three years

ULGHP8AA

Replace disposable batteries with UltraLast Green™ High-Power rechargeable nickel-metal hydride (NiMH) batteries in every application with sacrificing performance. Perfect for high-power consumption digital and electronic devices, such as digital cameras, flashes, hand-held games, remote-control toys, and other items that require high power or long-usage time. One UltraLast Green™ High-Power rechargeable battery can keep up to 1000 disposable alkaline batteries out of landfills. Packaged in eco-friendly materials. *Order UltaLast Green™ battery chargers separately on pages 1570-1571*

MEGA CHARGER™ STANDARD EIGHT-SLOT AA/AAA BATTERY CHARGER

RoHS Compliant Available

ULTRALAST Green

The Power of Green™

- Mega charging — can charge eight batteries at once
- Multi-channel design allows for charging AA or AAA NiMH batteries
- Charges in pairs of two, up to eight batteries at one time
- Charges batteries in two to five hours*
- LED indicator light on each channel illuminates charging status
- Easy to use

Mfg. part no. ULG8SLOT Mega Charger™ standard eight-slot AA/AAA rechargeable battery charger comes complete with one AC wall adapter Packaged in eco-friendly materials. Don't forget the batteries — *order UltraLast Green™ Everyday and High-Power rechargeable batteries separately on this page.*

Mfg. Part No.	Description	Stock No.	Price Each
● ULG8SLOT	Mega Charger™ Standard 8-Slot AA/AAA Battery Charger	01T1128	48.10

*Depending on how many batteries are loaded and actively charging

(190992)

SWIFT CHARGER™ FAST, HIGH-SPEED AA/AAA BATTERY CHARGER

RoHS Compliant Available

ULTRALAST green

The Power of Green™

- Quickly charge from home, office or auto
- High-speed — completely charges in 1 to 2 hours*
- LCD screen displays charge status for easy battery
- Charge while on the move — DC adapter included for charging in car, RV, boat
- Charges up to four NiMH AA or AAA rechargeable batteries
- Adjustable terminals adapt to battery size
- Compact design goes anywhere

Mfg. part no. ULGFAST Swift Charger™ AA/AAA high-speed battery charger features settings for two or four NiMH batteries to direct power to the charger terminals in use, allowing batteries to charge as fast as possible for the quantity loaded. LCD screen shows flashing bars in battery icon while charging and solid bars when charging is finished. Swift Charger™ comes complete with four AA UltraLast Green™ High-Power rechargeable batteries, one AC wall adapter, and one DC automotive adapter. Packaged in eco-friendly materials.

Mfg. Part No.	Description	Stock No.	Price Each
● ULGFAST	Swift Charger™ High-Speed 4 AA/AAA Battery Charger with 4 AA UltraLast Green™ High-Power Rechargeable Batteries	01T1117	53.28

*Depending on how many batteries are loaded and actively charging
(190979)

VALUE CHARGER™ STANDARD AA/AAA BATTERY CHARGER

RoHS Compliant Available

ULTRALAST green

The Power of Green™

- Easy-to-use overnight battery charger
- Multi-channel design allows for charging AA or AAA NiMH batteries
- Charges in pairs of two, up to four batteries at once
- AC plug folds into back of charger — no extra parts to keep track of
- Compact design for easy storage and travel use
- Charges batteries in eight to twelve hours*

ULGVALUE2

Mfg. part no. ULGVALUE4 Value Charger™ 4 AA/2 AAA standard battery charger comes complete with choice of two or four AA UltraLast™ 1800 NiMH rechargeable batteries and one folding AC plug on back of charger. Packaged in eco-friendly materials.

Mfg. Part No.	Description	Stock No.	Price Each
● ULGVALUE4	Value Charger™ 4 AA/2 AAA Battery Charger with 4 AA UltraLast™ 1800 NiMH Rechargeable Batteries	01T1127	23.52

*Depending on whether AA or AAA batteries are loaded and actively charging
(190991)

TRUECHARGE2 SERIES BATTERY CHARGERS

TRUECHARGE2 Series

TRUECharge2 battery chargers feature low electrical interference and efficient, power factor corrected multistage charging. They can be mounted in a variety of positions given their drip-proof design and enable quick installation with easy-to-access AC and DC wiring compartments. Available in four 12V models, they are versatile enough to be used in a wide variety of conditions and locations. Auto-ranging AC input voltage capability (90 - 265 volts AC) makes traveling abroad and handling poor-quality power a breeze. The easy-to-read display can be augmented with an optional remote panel.

LinkPRO / LinkLITE BATTERY MONITORS

xantrex Smart choice for power

Performance Features

- Read your battery bank like a fuel gauge
- Provides critical information about the status of your battery bank
- Displays voltage, current, consumed amphours and remaining battery capacity
- Secondary battery bank voltage monitoring
- Auto sensing battery voltage inputs
- Large backlit LCD Display
- Quick nut mounting construction
- Programmable alarm relay
- Shunt selection capability enables flexible system integration
- Splash proof frontpanel
- 500A shunt included
- CE and e-mark certified

LinkPRO LinkLITE

LinkPRO Additional Performance Features

- Displays time remaining
- Communication/expansion port
- Stores a wide range of history events in internal memory
- Advanced programmable alarm relay
- Battery temperature sensor input

Defining the amount of energy available in a battery is a complex task since battery age, discharge current and temperature all influence the actual battery capacity. High performance measuring circuits, along with complex software algorithms, are used to exactly determine the remaining battery capacity. A new shunt selection feature enables the **LinkPRO** and **LinkLITE** to measure currents up to 10,000 and 1,000 amps respectively. The **LinkPRO** and **LinkLITE** selectively displays voltage, charge and discharge current, consumed amphours, remaining battery capacity and the **LinkPRO** also displays the time remaining of your battery bank. Using a clear backlit LCD Display and an intuitive user interface, all parameters can be recalled with just a button press. A second battery input is also provided to monitor voltage on a second battery bank. The **LinkPRO** and **LinkLITE** are equipped with an internal programmable alarm relay, to run a generator when needed or to turn off devices when the battery voltage exceeds programmable boundaries.

MN9100

High Power Lithium (HPL) round cells
- Whether for a camera, an alarm system or memory back up, you can rely on the LiMn02 chemistry of HPL Duracell batteries. Using a spiral-wound construction, they offer ideal power supply for high-drain devices, with high energy density and excellent resistance to cold temperatures.

Electronic coin cells
- Our range of high-quality button cells are designed to power electronic devices such as calculators, remotes, memory backups, meters and electronic books. With lithium (3V) or alkaline (1.5V chemistries) these coin cells are ideal for all your devices that require quality long-lasting energy.

Security and medical cells
- Duracell power and reliability for important devices like key fobs, car alarms, GPS trackers, medical devices, security equipment and even child locators. Duracell power you can trust when it matters most.

Duracell silver oxide watch cells
- Our range of silver oxide button batteries provide dependable Duracell power for almost all watches, with high energy density and no self discharge when not in use.

DURACELL® 1.5V SILVER OXIDE WATCH BATTERIES

DURACELL® MORE POWER. MORE LIFE.

Applications:
- Digital micrometers, calipers, display thermometers and pH testers

Duracell® zinc/silver oxide cell is noted for its high volumetric energy density and its ability to deliver this energy at relatively high current drains. Silver oxide cells are ideal for miniature devices where space is limited, such as small electronic and photographic equipment.

GENESIS® PURE LEAD ACID BATTERIES FOR HIGH PERFORMANCE AND HIGH RELIABILITY — ALL APPLICATIONS

- Non-Spillable-Use in Any Position
- Use in Float or Cyclic Applications
- Float Applications, 10-15 Year Float Design
- 400 Cycles at 100% DOD
- 2 Year Shelf Life at 25°C
- Capable of High Rate Discharges and Recharge
- All 12V

GENESIS NP, NPH, NPX SERIES LEAD-ACID BATTERIES

Features:
- Non-Spillable, Use in any Position
- Use in Float or Cyclic Applications
- Long Life, 5-Year Float Design Life

Applications:
- UPS
- Security
- Electric Mobility
- Telecommunications
- Panels
- Emergency Lights
- Computers
- Medical
- Back-up Power Applications

Choose from a complete line of rechargeable batteries for a wide variety of applications.Use as a supply of backup energy, or as a portable power source. **NP series** can be stored, charged, or operated in any position without leakage. Qualified to non-spillable UN2800 standards. **B suffix** in mfg. part no. indicates bolt; **R suffix** indicates receptacle; **FR suffix** indicates flame-retardant case and cover, rated UL94-V0. Standard housing is ABS resin. Other flame-retardant versions are available; *go online or call.*

CYCLON PURE LEAD ACID BATTERIES FOR HIGH PERFORMANCE AND HIGH RELIABILITY — ALL APPLICATIONS

EnerSys. Power/Full Solutions™

Cyclon.

D, DT, X, E Cell

- Long service life
- Minimizes replacements (lowers associated costs)
- Higher reliability
- Lessens system failures
- Cases are UL 94V-0 rated material
- Shock and vibration resistant
- Classified as nonspillable
- Highest recharge efficiency
- Extended storage capability

BC Cell

4-Volt, 6-Volt

The Green Label indicates that this product undergoes additional QC testing to give the same performance at an even higher reliability.

POWERSAFE SBS SERIES LEAD ACID BATTERIES

EnerSys. Power/Full Solutions™

- Proven long and trouble-free service
- High energy density in a compact design
- Advanced, thin-plate, pure lead technology
- Impact-resistant jar material, flame retardant to UL94V-0
- Leak-resistant, patented, dual-seal terminals
- Up to two year shelf life
- Very low ventilation required
- Operating temperature range: -40°F (-40°C) to 122°F (50°C)

PowerSafe® **SBS series** lead-acid, valve-regulated batteries provide reliable power in all wireless and fixed-line communication installations, and serve as an integral part of a standby system due to its long life. Also widely used in cable TV, emergency lighting, power generation and offshore applications. Designed to cope with raised temperatures and harsh environments. Ideal for use in cabinets, or on stands, close to the point of use. Can be mounted in any orientation except inverted. Fully compliant with BS 6290 Part 4 (1997). Conforms to IED 60896-21 and Telcordia SR-4228. UL recognized (UL Std. 1989). NEBS certified.

ADVANCED BATTERY INTERCONNECTION SYSTEM

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Multi-directional mating--all angles between 0° and 90°
- Choice of right-angle or vertical mount headers with left, right or keyless polarization
- Offered in a variety of key arrangement for different voltage batteries
- Headers available for 7.2, 10.8, and 12.0 volt rechargeable batteries
- Receptacle connectors with pcb tails or weld tabs
- Consumer-friendly mating/unmating of battery
- Reduces design cycle time
- Reduces overall costs
- Produced under a Quality Management System certified to ISO 9001.
- Blade Contacts for high durability
- Used industry wide for rechargeable battery I/O - in laptop computers
- 2.5mm, 3.0mm and 5.0mm contact pitch
- Up to 7 amps per contact
- Up to 2500 cycle durability
- Two pc tails per blade for better current distribution
- Operating Temperature: -30°C to +70°C

Single contacts are rated at 7 amperes with a 30°C T-Rise. Headers feature sturdy brass contacts with duplex plated tin or tin-lead solder tails and nickel on the mating area to ensure the life of the system and to provide high cycle mating/unmating. Housings are made of high temperature, UL 94V-0 rated thermoplastic and are available with left or right hand keying, or with keyless mounting configurations. Keyless headers are designed to minimize board space requirements, and require the battery manufacturer to provide voltage key in the battery pack compartment. Keyless headers accept all 3 voltage battery packs. Tyco Electronics "Drop-In" receptacle connectors fit securely within the battery pack compartment. They are offered in a choice of weld tab or solder tail versions for PC board mounting.

PC BOARD COIN CELL RETAINER CONTACTS

RoHS Compliant Available

KEYSTONE ELECTRONICS CORP.

Fig. 1 Fig. 2 Fig. 3

Fig. 4 Fig. 5 Fig. 6

Compact retainer contacts hold cell securely and withstand shock and vibration. Designed for quick and easy battery installation and replacement. Suitable for memory backup applications, soldering and reflow operations. Balanced and lightweight with stable thru mount legs. Solder tail design for joint strength. Polarity is clearly marked. Surface and thru hole mount retainer contacts are available for 4.8mm to 24mm lithium coin cell batteries. Phosphor bronze with gold flash, tin nickel or matte tin plating. Tin nickel palted retainers are ideal for lead-free, high temperature soldering applications. Matte tine finish for lower soldering temperatures needed forother temperature sensitive components. Also available on tape and reel; *go online or call.*

BATTERY SPRING AND BUTTON CONTACTS

RoHS Compliant Available

KEYSTONE

- For molded cases
- Single and dual contact design
- Excellent mechanical construction
- Spacing saving

Economical and reliable contacts are ideal for molded cases with self-contained battery compartments. Solder tab design for versatile PC mounting or wire lead attachment. Spring contact design adjusts to varying battery lengths and provides low contact resistance and dependable connections. Constructed of nickel-plated 0.020″ thick steel. Spring contact constructed of nickel-plated spring steel.

PLASTIC BATTERY HOLDERS

RoHS Compliant Available

KEYSTONE ELECTRONICS CORP.

Fig. 1 Fig. 2 Fig. 3 Fig. 4 Fig. 5 Fig. 6 Fig. 7 Fig. 8

Hold batteries securely in place to provide a positive connection and maintain low contact resistance. Available with PC terminals or wire leads. Choice of solder lugs or male/female snap fasteners. Contact springs self-adjust to variations in battery length. Able to withstand shock and vibration. Holder material: polypropylene. Springs: spring steel, nickel-plated. PC pins: 0.031 brass, nickel-plated.

THRU-HOLE AND SURFACE MOUNT BATTERY HOLDERS FOR LITHIUM AND ALKALINE CELLS

RoHS Compliant Available

KEYSTONE

Fig. 1 Fig. 2 Fig. 3 Fig. 4 Fig. 5 Fig. 6 Fig. 7 Fig. 8 Fig. 9 Fig. 10 Fig. 11 Fig. 12

THRU-HOLE MOUNT BATTERY HOLDERS — LOW PROFILE

Snap-in PC contact design holds in position for wave solderability. Low profile housings constructed of PBT, rated UL94V-0. Tin-nickel plated stainless steel contacts for excellent solderability and durability. Polarity marked for orientation. Operating temperature range: -60°F to 290°F (-50°C to 145°C). *Order retainer covers separately below.*

SURFACE MOUNT BATTERY HOLDERS — ULTRA LOW PROFILE

These ultra low profile SMT battery holders are ideal for cylindrical lithium and alkaline batteries. Feature heat-resistant nylon housings, rated UL94V-0, well suited for reflow soldering. Gold flash plated phosphor bronze contacts. Ideal for both lead-free and traditional solder processes. Easy battery installation required no tools. Securely holds battery in place. Polarity clearly marked for orientation. Operating temperature range: -60°F to 290°F (-50°C to 145°C). *Order retainer covers separately below.*

PC BOARD MOUNT COIN CELL LITHIUM BATTERY HOLDERS

RoHS Compliant Available

KEYSTONE ELECTRONICS CORP.

Vertical Slimline

Vertical Compact

Horizontal

These PCB mount holders accommodate lithium coin cell batteries 12-30mm diameter, and provide long-term power for 3-volt memory backup applications. Reliable nickel-plated contacts provide spring tension, low contact resistance and solderability. Bases made of UL94V-0 approved materials. Holders are impervious to most solvents. Temperature range: –50°C to +145°C.

- UL94V-0 flame retardant materials
- IP67 front panel sealed versions for AA, C, and D size cells
- Drawer style holder for AA, C, and 9-volt cells

Manufactured from quality moldings and metal components to provide a secure and reliable connection. Available for battery sizes AA, C, D and 9V for 1, 2, or 4 cells. Panel mounting versions are front panel sealed to IP67, extending the applications into harsher external environments where dust or waterproof seal is needed.

15 AMP - MEDICAL GRADE OUTLET STRIPS

RoHS Compliant Available

HAMMOND MANUFACTURING

Designed to meet the special requirements for institutional and chronic care use with "Hospital Grade" white receptacles, line cord and integral clear molded plug. Sturdy aluminum extruded case with black powder paint coated steel cover. Heavy duty 14 gauge cord - 14/3 SJT. Complete with 15 amp, 125 volt resettable circuit breaker. Additional grounding stud is provided on the case for any further external grounding requirements. Exceeds NEMA requirements for low leakage ground return and for withstanding impact or continuous physical shock without loss of grounding path continuity when plugged into properly grounded source receptacles. CSA certified, Standards C22.2 (No. 21-95 and No. 42-99), CSA Cord Sets No. 8 (Hospital Grade Powerbars) TUVus certified to UL60601-1 (medical grade) and UL1363 (relocatable power taps).

VERTICAL RACK MOUNT OR WORK BENCH OUTLET STRIPS

RoHS Compliant Available

HAMMOND MANUFACTURING

1585 series outlet strips are designed for power distribution in equipment racks or work benches. Rugged extruded aluminum case with heavy-duty 14/3 SJTW straight power cord for extreme temperature ranges. Integral molded plug available in straight blade (NEMA5-15P). Available with lighted on/off switch. Include 15A 120VAC circuit breaker to prevent overload, plus hardware and brackets for mounting to rack Amhal struts or for wall or bench mounting. UL listed, CSA certified.

CABINETMATE® SERIES POWER STRIPS AND SURGE SUPPRESSORS

legrand® Wiremold

- Multilength, low-profile
- 120V; Resettable overload circuit breaker
- Noncorrosive aluminum housing with gray finish
- Measure 1.5W x 1.18″D

Plug-in, vertical power outlet strips and surge suppressors suitable for relay racks, electronic cabinets, file server systems and other similar applications. Slim-line design allows easy mounting with enclosed spring clips. Surge suppressor units help protect sensitive electronics and offer a 5-year warranty. Non surge units have a 2-year warranty. Units are UL and cUL listed to 1363 standards. 15-amps models have 14/3 SJT black power cord; 20-amp models have 12/3 SJT black power cord with 20-amp receptacles and pilot light/power switch.

INDUSTRIAL-GRADE SURGE SUPPRESSORS

RoHS Compliant Available

HAMMOND MANUFACTURING

ZT series surge suppressors are designed for maximum surge protection. Use self-healing gas discharge protection for a 2,000-joule rating. 5 stages of protection in all 3 AC modes, complete with 3 diagnostic monitoring LEDs. Crowbar primary protection to 30,000A for sustained faults. Response time: <1ns. Telco-protected units feature delta protection with 3 long-life semiconductor suppressors. Also include voltage suppression at the outlet to guard against transients from equipment plugged into the unit. Rugged extruded aluminum case with a 6′ long, heavy-duty 14/3 SJTW power cord for extreme temperature ranges. Integral molded plug with on/off switch. Include 15A, 125VAC circuit breaker to prevent overload. UL listed, CSA certified.

PROTECT IT!® HOME/BUSINESS THEATER SURGE SUPPRESSORS

RoHS Compliant Available

TRIPP·LITE POWER PROTECTION

NEW

- 3 outlet - 2 fixed outlets, 1 rotating power outlet and rotating coax
- Direct plug-in design
- 1080 joule rating
- 1-line gold coax (2.2GHz bandwidth) protection
- $25,000 Ultimate Lifetime Insurance (USA, Puerto Rico & Canada only)

Tripp Lite's **TLP31SAT** Home/Business Theater Surge Suppressor provides high-performance protection--1080 joules--stopping damaging surges and filtering disruptive line noise so components perform at their peak! You can see and hear the difference: sharper, crisper video; deeper, fuller audio and longer component life spans. Perfect for small home/business theater installations: high-definition TVs, satellite and A/V receivers, DVD/CD players and more. 3 outlets, 1-line coaxial protection safeguard an entire home/business theater system. $25,000 Ultimate Lifetime Insurance coverage (USA and Canada only). Included 6 ft. gold coaxial cable.

1210/1250 SERIES AC SURGE PROTECTIVE DEVICES

RoHS Compliant Available

BOURNS®

NEW

- 100/50 kA max. discharge current rating
- Multi-pole uni-block design
- DIN Rail mountable
- UL 60691 compliant integrated thermal disconnect
- Visual fault indicator
- Remote signalling capability
- Compact design ideal for limited spaces
- Operating Temperature: -50°C to +85°C
- Connection: screw terminals, #6 AWG max.
- IP20

1210/1250 series is a heavy duty/general duty Surge Protective Device (SPD) designed to protect high risk electrical service entrance and branch panels. This SPD is intended to be installed at the front end of the installation, in the main switchboard, close to sensitive terminals or in installations without LPS (lightning rods). **1250 series** is a single-pole module that can be configured for both common mode and differential mode protection in single and three phase applications heavy duty up to 600V and general duty 480V.

1500 SERIES GIGABIT ETHERNET SURGE PROTECTIVE DEVICES

NEW

RoHS Compliant Available

BOURNS®

- GDT/TBU® High-Speed Protector technology
- Low impulse let-through
- High surge current rating
- Available in isolated and grounded versions
- 10/100/1000 data compatibility
- 5 kV isolation
- Ground Connection: screw lug
- Operating temperature: -40°C to +65°C

1500 series Ethernet Surge Protective Device (SPD) incorporates multiple Bourns® circuit protection technologies. These technologies are designed to work together to provide an unmatched level of surge protection for exposed Ethernet applications. **1500 series** is designed to meet key surge and AC power cross requirements of GR-1089-Core Issue 6. **1500 series** is available as a wall mount unit with optional DIN Rail hardware.

ISLATROL® PLUS SINGLE-PHASE ACTIVE TRACKING FILTERS

RoHS Compliant Available

CONTROL CONCEPTS A Subsidiary of the Liebert Corporation

Series connected high-frequency noise filter with transient protection. Provides continuous sinewave Active Tracking® filtration plus high energy protection from spikes, transients, and noise on the AC power line. Offers the flexibility of either receptacle/line cold connection or hard-wired connection to critical loads (up to 30 amperes). These units are bi-directional, excellent EMI/RFI noise rejection, 50/60Hz, single phase. Applications include industrial or office equipment, computers placed in harsh environments. UL 1283 listed.

ISLATROL® ELITE

RoHS Compliant Available

CONTROL CONCEPTS A Subsidiary of the Liebert Corporation

DIN/flange-mount high-frequency, single-phase noise filter/surge suppressors, Ideal applications include critical industrial loads drawing up to 20A of continuous current. Typical applications include any microprocessor-based products, including industrial PLCs, OEM applications, and motion control systems. LED status and form C dry contacts standard. UL 1449, 1283 listed; CE compliant.

SURGELOGIC SERIES SURGE PROTECTION DEVICES

RoHS Compliant Available

SQUARE D by Schneider Electric

- Compact package can be mounted on an electrical panel, meter socket, or inside electrical control cabinets
- Individually fused MOVs
- Plastic enclosure (Type 4X NEMA rating)
- Green status LED
- 2-year warranty

SDS1175 SDSA3650

Square D brand Surgelogic surge protection devices utilize high-energy suppression circuitry that can be located at any point in the electrical system. As a Type 1 rated device, they have the flexibility to be used with or without an Overcurrent Protection Device (OCPD). SPDs provide surge suppression for equipment from severe transient activity. Products are suitable for installing indoors, outdoors, or in other harsh environments.

SQUARE D Schneider Electric

NEW

- NEMA 4X Rated
- Overvoltage technology
- EMI/RFI Noise Rejection
- LED Status Indication
- Suppression Status Alarm
- Coordinated Fuse Technology

Square D brand Surgelogic HWA Surge Protective Devices (SPDs) are surge suppressors and noise filters in compact and affordable packages. The compact designs allow surge suppression to be installed adjacent to power panels or directly on sensitive equipment in harsh electrical conditions. HWA systems are versatile and compact Surge Protective Devices (SPDs) designed to provide high-quality surge suppression for a wide variety of commercial, industrial or institutional applications. Square D brand Surgelogic HWA devices can be used in a network of surge suppression applications or as a stand-alone surge suppressor.

STV 100K SERIES SURGE SUPPRESSORS

c UL us

RoHS Compliant Available

SOLA HD

- 100,000 Amp Peak Current Rating To Provide Protection Against Severe Transients
- All Mode Protection
- Excellent Clamping Levels (600V @ 120V Lines) Provide Protection For Sensitive Microprocessor-based Equipment
- 65 kAIC Fault Current Fusing Levels Provides Safety and NEC Conformance While Preventing Damage to Electrical Panels Due to Short Circuits or Component Failure
- LED Status and Audible Alarms Provide Visual and Audible Indication of Surge Suppressor Status
- UL 1449 (3rd edition)
- Compact Design With NEMA 12 Enclosure
- 10 Year Warranty

Applications

- Distribution Panels (<1200A)
- Branch, Lighting and Control Panels
- Factory Automation Installations
- Dedicated Industrial Equipment

STV100K series is a hard wired surge suppressor designed to be installed at the service entrance, branch panels or dedicated sensitive electronic loads. These units feature all mode protection, LED and audible alarm status indication, sine wave tracking and Form C dry contacts.

Mfg. Part No.	Input Voltage	Input Configuration	Stock No.	Price Each 1-2

STV25K SERIES DIN RAIL SURGE SUPPRESSORS

c UL us

RoHS Compliant Available

SOLA HD

- Compact and Narrow Design for Minimized Panel Space Requirements
- Compact Design Minimizes Connecting Lead Length While Reducing Impedance Ensuring a Superior Clamping Performance of 400V or Less
- Easy Access Terminal Screws for Quick Mounting and Installation
- 50,000 Amps of Surge Protection
- Sine Wave Tracking and All Mode Protection
- LED Status Indication
- 10 Year Warranty

Applications:

- Control Cabinets for Industrial Automation
- Point of Use Industrial/Service Equipment
- Remote Commercial or Industrial Equipment Instrumentation
- Commercial and Building Automation Systems

STV25K series DIN rail surge suppressors provide point-of-use protection against damaging transient at the dedicated equipment level. They are ideal for installation in electric control cabinets found on the factory floor or at remote locations. These devices provide protection for sensitive control and computer equipment from the effects of internally and externally generated transient found in harsh industrial environments. UL recognized to Standard 1449, 3rd edition.

STFE ELITE SERIES ACTIVE TRACKING® FILTERS WITH SURGE PROTECTION

RoHS Compliant Available

SOLA HD

CE c UL us

Features:

- Series connected DIN Rail mounted filter
- Patented durable metal mount clip
- UL listed surge current capacity – 45,000A
- Transient protection in all modes (L-N, L-G, N-G)
- Single phase applications up to 20A
- Operating temperature: -40°C to +50°C
- Screw clamp connections accept 10-16 AWG and meet IP20 specifications
- LED status indication
- Form C contact for remote monitoring
- UL 1449 (3rd edition), UL 1283, cUL recognized component, CE compliant
- 5 year limited warranty

STFE Elite series DIN Rail Mount combines Active Tracking® technology with UL Listed surge protection to protect against the full spectrum of voltage transients and surges. It continuously tracks the input AC power line responding instantly into action upon detecting extraneous high frequency noise and high voltage transients caused by everyday events such as turning on machinery, motors, or equipment.

STFE Elite series attenuates or reduces the amplitude of normal mode noise to a minimum of 90dB that occurs in a frequency range of 100KHz to 50MHz, and of common mode noise to a minimum of 60dB that occurs in a frequency range of 5MHz to 50MHz. **STFE Elite series** provides the industry's best IEEE C62.41 Category "A & B" Ringwave protection.

STFV PLUS SERIES DATA/SIGNAL LINE SURGE PROTECTION DEVICES FOR TRANSIENT DATA

RoHS Compliant Available

SOLA HD

UL

Features:

- Non degrading, series filter/TVSS technology for total durability
- Surge current capacity — 25,000 amps
- High impact plastic case, epoxy encapsulated enclosure
- Transient protection in all modes (L-N, L-G, and N-G)
- Single Phase applications up to 30 amp
- Operating temperature from -40°C to +60°C
- Hardwired connection
- LED power indication
- UL 1283
- 10 year warranty

STFV Plus series combines Active Tracking® filtration for low energy noise and surge suppression for high energy transients. It continuously tracks the input AC power line responding instantly into action upon detecting extraneous high frequency noise and high voltage transients caused by everyday events such as turning on machinery, motors, or equipment. These devices are designed to meet UL 1283. **STFV Plus series** attenuates or reduces the amplitude of high frequency noise to a maximum of 90dB that occurs in a range of 100 KHz to 50 MHz. **STFV Plus series** provides IEEE C62.41 Category "A & B" Ringwave protection.

STABILINE DIN1 PLUS SERIES SURGE PROTECTION DEVICES

Superior Electric

10 Year Warranty

Small Case

Large Case

- Dual-purpose tabs for DIN-rail or wall mounting
- 20kA or 40kA surge amp capacity per phase for AC use
- 10kA or 20kA surge amp capacity per mode for DC use
- 15A or 30A max. continuous operating current
- 1∅, 2-wire plus ground for Series and Parallel applications
- Ultra compact, fail-safe design
- High-frequency noise filtering
- Responds reliably and repeatedly in less than 1 nanosecond
- LED visual protection status
- Simple and quick installation — hard-wired via screw terminal (barrier strips)
- 10-year manufacturer's warranty

Stabiline® **DIN1 Plus series** surge protective device and filter for instantaneous protection of sensitive electronics. All models provide surge protection against harmful transient voltage and high-frequency noise that exceed the nominal operating voltage of AC and DC critical dedicated control loads. The fail-safe design incorporates thermal fuse links and TMOVs, and dual Component-Level Fusing (CLF). Durable ABS plastic polycarbonate enclosure, rated UL94V-0, is available in two sizes: small case 3.94H x 1.4W x 2.28"D and large case 3.93H x 2.8W x 2.28"D. All 120V and 250V models are cETL recognized components per ANSI/UL 1449 3rd Edition (SPD) and are UL 1283 as electromagnetic filter.

DIN2R-40 SERIES STABILINE TRANSIENT VOLTAGE SURGE SUPPRESSORS

10 Year Warranty

Superior Electric

DIN2R-40 series

Replacement Module for DIN2R-40-120-L1

- 120, 220, 240-277, 480 VAC and N-G models
- Low profile, DIN-rail (35mm symmetrical) mounting
- 40 kA surge amp capacity protection
- Replaceable plug-in surge protection module and fixed base
- Visual summary status of MOV element
- Internal thermal disconnect system
- Relay contacts for remote monitoring
- 10-year manufacturer's warranty
- Meet UL 1449, 2nd edition

DIN2R-40 series Stabiline® transient voltage surge suppressors are single pole, parallel-connected, MOV technology Class II, Category B surge protective devices suitable for use in AC electrical power systems for protection against surge and transient activity. **DIN2R-40 series** protectors provide 40 kA surge amp capacity protection in a maintenance free, low profile, DIN Rail mountable module. **DIN2R-40 series** feature a replaceable plug-in surge protection module and fixed base which allows for easy and fast maintenance. Ideal for protection of fire-alarm panels, control systems, and PLC's. L-N; L-G: L-L protectors use MOV technology and N-G protectors use Gas Tube. Wt.: 0.25 lbs.

WAGO®

UL

- Response time: <5ns
- Max. nominal current: 20A
- Temp. range: -40°C to +85°C
- Wire termination: CAGE CLAMP®
- Wiring configurations: L-L, L-N
- Wire range: 28-12 AWG
- UL listed

WAGO-PROTECT series surge suppressors are high-speed, high-current, solid-state devices designed to protect sensitive electronic equipment (PLCs, PCs, etc.) from transient over voltages present on AC/DC power lines. Powered by patented Silicon Avalanche Suppressor Diode technology from Transtector, these suppressors provide the utmost in protection without degradation - unlike MOV based technology. Feature LED fail mode indication as well as relay alarm output connection and built-in test points for easy troubleshooting and maintenance.

MCR SERIES PORTABLE FERRORESONANT POWER LINE CONDITIONERS

RoHS Compliant Available

SOLA HD

- Protects Systems from Surges, Spikes, Sags, Overvoltages, Brownouts, and Electrical Noise
- Automatic Overload Protection Eliminates Need for Circuit Breakers and Fuses
- Voltage Regulation: ±3% for Input Variation of +10%/-20%
- Overload: Output Current Limited to 1.65x Rated Current
- Harmonic Distortion: Less Than 3% Total RMS Content at Full Load
- MCR Portable is for 120V input/output only
- Average Continuous Life is 25 Years
- UL Listed, CSA Certified
- Limited 10-Year Warranty

MCR Portable

10 Year Warranty

PORTABLE MINI COMPUTER-POWER CONDITIONERS—OUTPUT: 60Hz/120V; INPUT: 95-130V
DIMENSIONS: 6.00 x 7.00 x 9.00″ (H x W x D)

MCR SERIES HARDWIRED FERRORESONANT POWER LINE CONDITIONERS

RoHS Compliant Available

SOLA HD

- Rugged Design
- Ideal for PLCs
- Excellent Protection for Machine Tools, Computer Loads, Robotics, Industrial Panels and Electronic Equipment
- Galvanic Isolation
- Acts as a Step-Up or Step-Down Transformer
- Noise Attenuation: 120dB Common Mode, 60dB Transverse Mode
- Surge Suppression Tested to ANSI/IEEE C63.41 Class A & B Waveform: <10V Let-Through Typical
- Hardwired
- 25-Year Typical MTBF
- No Maintenance Required
- 10-Year Warranty

10 Year Warranty

MCR series protects equipment from all power problems except total power loss. Suppresses transients, protects against overloads, sags, noise, brownouts and acts as a dedicated line. Neutralizes harmonics and SCR notches that can damage sensitive loads. Even with a heavily distorted or square-wave input, **MCR series** puts out a sine wave. To size the unit for your needs, simply multiply the Volts x Amps to obtain the VA load requirement. Then select the next larger size unit. If protection from severe brownouts is needed, the unit can be oversized for even greater input voltage window. If your load has an inductive inrush such as relays, coils, solenoids or motors, size the unit for the load inrush current. For 60Hz/600V models, 500 to 1500VA range, *go online or call.*

LINE CONDITIONERS (LINE VOLTAGE REGULATORS)

TRIPP·LITE POWER PROTECTION

- Filters EMI/RFI Line Noise Up to 40dB @ 1MHz
- Provides Complete Protection Against Damaging Surges
- Diagnostic LEDs Indicate Incoming Voltage Status

Automatically regulates high and low incoming voltages, creating the optimal operating conditions for computerized equipment. All models except **LS606M** feature isolated filter banks which reduce interference between connected equipment.

CORCOM EF SERIES RFI FILTERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

EF Series are general purpose filters effectively providing RFI control of line-to ground noise. The design is compact and meets the very low leakage current requirements of VDE portable equipment as well as (120 Volt) UL544 non-patient medical equipment. Models with F suffix have .250" terminals on load side

CORCOM FED SERIES THREE-PHASE EXTERNAL POWER LINE FILTER FOR FREQUENCY CONVERTERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

FCD series filters provide three phase filtering for frequency inverters and variable speed motor drives. Designed for very noisy Delta applications, they attenuate conducted interference at low and high frequency ranges and better protect programmable logic controllers from RF noise on the AC power line. These filters perform best when installed on the line side of the motor drive. Prevents noise from returning to the line, enabling equipment to meet strict European regulations on RFI.

CORCOM K, DK AND SK SERIES RFI FILTERS AND B SERIES GENERAL-PURPOSE FILTERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Fig. 1

Fig. 2

Fig. 3

Fig. 4

Fig. 5

Fig. 6

K series general-purpose, common- and differential-mode filters effectively control line-to-line and line-to-ground RFI interference. Ideal for uses where pulsed, continuous, and/or intermittent RFI interference is present. Maximum leakage: **K series**: 0.5mA @ 120VAC/60Hz; 1.0mA @ 250VAC/50Hz; **EK series**: 0.25mA @ 120VAC/60Hz; 0.40mA @ 250VAC/50Hz. **DK series** provide higher line to line attenuation performance than the **K series**. DK series maximum leakage: 0.4mA @ 120VAC/60Hz; 0.7mA @ 250VAC/50Hz. **SK series** high-performance, power line filters significantly outperform **K series**. Ideal for equipment with high line-to-ground and line-to-line conducted emissions. **SK series** maximum leakage: for 3A, 6A and 10A units, 0.5mA @ 120VAC, 60Hz; 1.0mA @ 250VAC, 50Hz; for 20A and 30A units, 0.3mA @ 120VAC, 60Hz; 0.5mA @ 250VAC, 50Hz. Both **K, DK** and **SK series** are UL recognized, CSA certified, and VDE approved.

CORCOM MV SERIES POWER LINE FILTER FOR MEDICAL EQUIPMENT

RoHS Compliant Available

TE connectivity

Authorized Distributor

6, 10 Amps

20 Amps

MV series power line filters aid compliance with requirements of UL2601, which limits leakage current for patient care equipment. These filters take advantage of the changed standard for leakage current and offers improved line-to-ground performance. Higher line-to-line performance is achieved through additional differential mode rod inductors. Max. leakage current (line to ground) @120VAC/60Hz, 0.07mA; @250VAC/50Hz, 0.15mA. UL recognized. CSA certified, VDE approved.

Developed specifically for switching power supplies and to be all the power line filtering required to control conducted emissions down to 10kHz. High attenuation provided for both common mode and differential mode interference throughout the frequency range, with no degradation of performance due to the large peak current drawn by switching power supplies. Maximum leakage current, line-to-ground for **VQ models** at 120VAC/60Hz is 1mA; at 250VAC/50Hz is 1.25mA. For **EQ models** at 120VAC/60Hz is 0.30mA; at 250VAC/50Hz is .50mA. Hipot rating line-to-ground, 2250VDC; line-to-line, 1450VDC. UL recognized, CSA certified, VDE approved, and only **EQ types** are SEV approved. Medical version available; *go online or call.*

CORCOM R SERIES DUAL T SECTION RFI POWER LINE FILTERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Fig. 1 Fig. 2 Fig. 3 Fig. 4

Well-suited for low impedance loads where noisy RFI environments are present. Units control pulsed, continuous and/or intermittent interference, assuring protection of equipment from power line noise while also protecting the line from equipment noise. In addition, these filters provide low leakage current without deterioration of insertion loss characteristics. 120/250V, 50/60Hz AC. All are UL recognized, CSA certified; VDE approved.

CORCOM S, V, W SERIES RFI FILTERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

3, 6, 10 Amps 20, 60 Amps

V Series

W Series

S Series

These RFI filter series combine line-to-ground interference rejection filters with additional circuitry designed to reduce low frequency line-to-line noise and add a balance N = 3 ("PI") line-to-line filter with high rejection at low frequency to the N = 2 ("L") and N = 3 ("T") sections to eliminate line-to-ground. Particularly effective when applied in equipment using switching type power supplies. SCR and TTL circuits. Maximum leakage current, line-to-ground at 120VAC/60Hz, 0.5mA; at 250VAC/50Hz, 1.0mA. UL recognized, CSA certified, VDE approved.

CORCOM T SERIES POWER LINE RFI FILTERS FOR SWITCHING POWER SUPPLIES

RoHS Compliant Available

TE connectivity

Authorized Distributor

15/20 Amps, T1 3, 6 and 10 Amps T1 6 Amps, T3 15 Amps, T6

T series RFI power line filters for switching power supplies provide superior common-mode and differential-mode attenuation in a small package. They are effective for very noisy equipment that must meet the emission limits of FCC Parts 15 and 18, or VDE 0871 A-level. In some instances, these filters can help bring equipment into compliance with VDE 0871 B-level. Meets the low leakage current requirements of SEV, VDE portable equipment, and (120 volt) UL544 non-patient medical equipment. UL recognized, CSA certified, VDE approved.

T SERIES, ET MODEL RFI FILTERS

Maximum leakage current line-to-ground for **ET models** at 120VAC/60Hz is 0.30mA; at 250VAC/50Hz is 0.50mA. Use for both line-to-ground (2250VDC hipot rating) and line-to-line (1450VDC hipot rating) application.

Mfg. Part No.	Current (A) Rating	Dimensions (In.) L x H x W	Stock No.	Price Each 1-9
● 3ET1	3	3.56 x 1.81 x 2.15	52K4499	43.58

AYC SERIES 3-PHASE RFI POWER LINE FILTERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features:
- For 3-phase, four wire, WYE applications
- Very high attenuation
- Low leakage current
- Ideal for EMC troubleshooting and refurbishing in the field
- Touch safe terminals provide easy connections and prevent inadvertent contact for safety in the most demanding applications

Specifications:
- Max. operating voltage: 277/120VAC, 50/60Hz
- Hipot rating (one minute): Line to Ground: 1850 VDC, Line to Line: 1850 VDC, Line to Neutral: 1450 VDC
- Operating temperature: -10°C to +40°C

FC SERIES SINGLE PHASE POWER LINE FILTERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features:
- Designed for frequency inverters and variable speed motor drives
- Suitable for electronically noisy environments
- Protects programmable logic controllers from RF noise on the AC power line
- Side flanges for easy mounting
- Touch safe terminals provide easy connections and prevent inadvertent contact

Specifications:
- Max. operating voltage: 250/120VAC, 50/60Hz
- Hipot rating (one minute): Line to Ground: 2250 VDC, Line to Line: 1450 VDC
- Operating temperature: -10°C to +40°C
- DIN type terminal block

FN3025/26 SERIES COMPACT 3-PHASE LOW LEAKAGE PLASTIC FILTERS

RoHS Compliant Available

SCHAFFNER

FN3025 Type

FN3026 Type

FN3025/26 series offer a extremely compact 3-Phase filtering solution that is ideal for motor and servo drives. Terminals include captive hinged covers at no extra cost. They are also compatible with tough leakage and sensitive earth leakage detector requirements. Housed in a plastic without the use of potting compounds makes these units environmentally friendly. Rated 520VAC, 50/60Hz.

FN 3280 SERIES 3-PHASE AND NEUTRAL LINE FILTERS

RoHS Compliant Available

SCHAFFNER

- Available up to 600A
- Compact, space saving design, optimized for industrial equipment
- Combines exceptional attenuation with low leakage current
- Suitable for machines in mixed/domestic environments (Class A/B)
- Increases also the immunity if operated directly on the mains input

FN 3280 series when used as a mains input filter provides enough performance to to ensure EMC compliance of machinery in mixed (Class A) or even domestic (Class B) environments. Typical applications include industrial equipment, machinery, machine tools and diverse process automation systems with three-phase and neutral electricity supply. Because of the relatively low leakage current, may even be used for some medical devices.

Mfg. Part No.	Current Rating @ 50°C (A)	Leakage Current @ 480VAC/50Hz	Power Loss @ 25°C/50Hz	Wt. (kg)	Stock No.	Price Each

FN 3359 SERIES HIGH-CURRENT 3-PHASE FILTERS

RoHS Compliant Available

SCHAFFNER

- Off-the-shelf high-power filter for rated currents up to 2500A
- Max. leakage current @ 480VAC/50Hz: <6mA
- Busbar for convenient and universal electrical connection
- Optional protective safety covers available below

FN 3359 series are compact high-current three-phase EMC/RFI filters for Class A compliance. Typical applications include high power motor drives, inverters, converters, machinery and mining equipment. **FN 3359HV** versions designed for 690VAC IT power networks are also available; *go online or call.*

FN 258 SERIES THREE-PHASE EMC/RFI FILTERS

RoHS Compliant Available

SCHAFFNER

3-phase filter designed for variable frequency motor drives. 480VAC rated two-stage design is optimized for drives with output cable lengths to 150' (50m). Current ratings range from 7 to 180A. Use in applications to bring systems with variable frequency motor drives into compliance with EN55011 and EN55014. Last two digits indicates the connector output. Versions with low leakage currents available, *go online or call.*

FN351 SERIES HIGH-PERFORMANCE 3-PHASE FILTERS

RoHS Compliant Available

SCHAFFNER

Ideal for variable frequency inverters and motor drives, these 3-wire filters feature high differential and common mode attenuation. Fully insulated safety contacts for blind installations. High leakage current to ground. Must be installed in a wired ground industrial environment. Rated 440VAC, 50/60Hz. UL recognized.

POWER LINE FILTERS – THREE-PHASE • POWER LINE FILTERS – IEC INLETS

CORCOM BCF SERIES VERY COMPACT THREE-PHASE FILTERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- For current rating up to 180A
- Cost-effective, low-weight design
- Insulated, high-quality safety terminals for in- and output

BCF series very compact bookform EMI/RFI power line filters are ideal for all kinds of industrial three-phase applications requiring very high attenuation in the frequency range between 100KHz and 30MHz. Very high common and differential mode performance over the whole frequency range. Maximum leakage current @ 400VAC 50Hz: 30mA under normal circumstances. Hipot rating (one minute): line-to-ground 1850VDC, line-to-line 1850VDC. Operating frequency: DC to 60 Hz. Rated voltage (max.):480VAC. UL recognized, VDE approved.

P SERIES POWER INLET RECEPTACLES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features:
- Provide all five power entry functions in one compact design
- Chameleon module readily adapts to its environment
- Snap-in or flange mounting
- Standard IEC 60321-1 C14 power inlet
- Both North American and metric fusing capabilities
- Two voltage selection options
- Optional DPST on/off switch
- Filter options for general purpose, medical and high-performance EMI filtering

PE0S0DZ_C PE0S0DH_B PS0S0SS_B

Specifications:
- Max. operating voltage: 250VAC, 50/60Hz
- Line to Ground: 2250 VDC
- Line to Line: 1450 VDC
- Selectable or Fixed 115/230 VAC
- Rated Current: Non-Filtered ¡V 10A
- Filtered ¡V 3, 6 or 10A
- Fuseholder: Accepts one or two fuses
- 10,000 operations at 51A max. inrush

SBE ENCAPSULATED SERIES INDUSTRIAL CONTROL TRANSFORMERS

RoHS Compliant Available

SOLA/HD

- 50 - 1000 VA, 50/60 Hz – suitable for worldwide applications
- Interleaved copper windings reduce I2R losses and maximize efficiency
- 55°C Rise, 105°C insulation system to minimize heat
- Epoxy encapsulated to protect cores and coils against moisture, dirt, and other contaminants
- Meets or Exceeds NEMA Standard ST 1 and ANSI C89.1 for load inrush capability
- Integrally molded, flame retardant (IEC 707/ISO Class 1210) Terminal Blocks provide greater terminal contact area and improved conductivity
- Heavy gauge steel mounting plate
- Mounting dimensions are compatible with similar control transformers

SBE Encapsulated series encapsulated industrial control transformers are epoxy encapsulated to seal the transformer windings against moisture, dirt and industrial contaminants. Extra deep, molded terminal barriers reduce the chance of electrical failure as the result of arcing or frayed lead wires. The rugged construction and proven reliability of the **SBE** design is uniquely suited for all industrial environments. ***NOTE:** Call to special order transformers with factory-installed primary fuse holder Class "CC" and secondary fuse holder plus safety covers. When special ordering simply add **"WA" suffix** to mfg. part no. for ¼" x 1 ¼" glass or ceramic fuse type or add **"WB" suffix** to mfg. part no. for 13/32" x 1 ½" midget cartridge fuse type. Add only **"W"** suffix to part number for **"WB"** option without covers.

120 x 240V PRIMARY, 24V SECONDARY, 60Hz

TCT40 SERIES CONTROL TRANSFORMERS

RoHS Compliant Available

TRIAD

- Maximum Power: 40VA
- Input options: 120V, 240V, 120/240V, 208/240V, and 120/208/240V 50/60Hz
- Output: 24V @ 1.67A
- Mounting Center: 3.18″ ± 0.02″
- Stack Depth: 0.87″
- Other Dimensions: 2.22″ x 3.64″(H x W)

These transformers are designed with dual bobbin construction and insulated shrouds on the primary and secondary sides. Welded laminations have holes in each corner to allow direct mounting to panel.

CHASSIS MOUNT POWER TRANSFORMERS

RoHS Compliant Available

HAMMOND MANUFACTURING

Style X

Style C

Style H

Chassis mount, channel bracket, split bobbin power transformers do not require an electrostatic shield due to low primary-to-secondary coupling. Single primary: 115V, 60Hz. All secondaries are center tapped. 6″ leads minimum. Hi-pot tested at 2,000Vrms. UL listed, CSA certified.

CHASSIS MOUNT - GLOBAL USE POWER TRANSFORMERS

RoHS Compliant Available

HAMMOND MANUFACTURING

Fig. A

Fig. B

Fig. B

185 series chassis mount AC power transformers feature dual primary 115/230VAC, 50/60Hz, operation with dual secondaries for series or parallel connection. Each unit carries a 4,000Vrm Hi-pot test. Dual bobbin construction using terminals (solder lug or quick connect). UL listed, CSA certified. C22.2 #66 and CE certified to IEC 950.

162/164 SERIES LOW VOLTAGE, LOW PROFILE, POWER TRANSFORMERS

RoHS Compliant Available

HAMMOND MANUFACTURING

- 20 output voltages to choose from (5 - 120VAC R.M.S.)
- Six VA size models available from - 1.1 to 36VA; *go online or call*
- Both series operate on 50/60 Hz current
- Low profile, split bobbin design
- Dual winding secondaries, non-concentrically wound
- High insulation - Hipot of 2,500V RMS
- Class B insulation - 130°C

Fig. A

Fig. B

162/164 series low voltage transformers are designed so that all windings must be used. Electrostatic shield is not required due to low primary to secondary coupling. Choice of economical single primary 115V (**164 series**) or universal dual primary 115/230V (**162 series**). No mounting hardware required on 1.1 and 2.4 VA sizes, two hole mounting on 6, 12 and 20VA sizes, four hole mounting on 36VA size (mounting screws not provided). PC board mount with Industry standard pin spacing. cULus recognized.

SINGLE PRIMARY, 115V

POWER TRANSFORMERS

183 SERIES LOW VOLTAGE, LOW PROFILE, POWER TRANSFORMERS

RoHS Compliant Available

HAMMOND MANUFACTURING

- 14 output voltages to choose from (5 - 36 VAC R.M.S.)
- Six VA size models available from - 2.5 to 56VA
- Universal operation on 50/60 Hz current, 115 or 230V dual primary
- Dual winding secondaries, non-concentrically wound
- High insulation - Hipot of 4,000V RMS
- Class F insulation - 155°C

183 series low profile, transformers feature split bobbin design with top shroud. Electrostatic shield is not required due to low primary to secondary coupling. Two hole mounting on 2.5, 5, 10 and 20VA sizes, four hole mounting on 30 and 56VA size (mounting screws not provided). PC board mount with industry standard pin spacing. CSA certified (# LR3902) and UL recognized (# E50394).

229 SERIES LOW VOLTAGE, LOW PROFILE, POWER TRANSFORMERS

c UL us

RoHS Compliant Available

HAMMOND MANUFACTURING

- Universal dual primary 115/230V - 50/60 Hz
- High insulation - Hipot of 1,750V RMS
- Class B insulation - 130°C

229 series low profile, power transformers feature dual - split bobbin design. Low primary to secondary coupling, balanced windings, no electrostatic shield required and low EMF radiation due to semi-toroidal design. cULus recognized.

PC BOARD AND CHASSIS MOUNT POWER TRANSFORMERS

RoHS Compliant Available

TRIAD

Fig. 1

Fig. 2

Fig. 3

PC BOARD MOUNT FLAT PACK® 115/230 VOLT, 50/60Hz POWER TRANSFORMERS — FIG. 1
Meet the needs of low-clearance PC boards and solid state power designs. Can also be used for control and instrumentation applications. Voltages and currents are chosen for widely-used power applications, and can be used in single or dual-output supplies. Designed to pass 2,000V HiPot test.

WORLD SERIES PC MOUNT 115/230V, 50/60Hz POWER TRANSFORMERS

RoHS Compliant Available

TRIAD

- Primary:115/230V, 50/60Hz
- VA Ranges: 2.5 to 56

World series PC mount transformers incorporate a dual bobbin construction with an insulating shroud, both made of a high temperature material that exceeds UL flammability requirements. Very high isolation between the primary and secondary, and between each winding and the core. Since the dual bobbin construction effectively reduces capacitance, electrostatic shielding is not required. UL recognized, CSA certified, VDE approved. CT = Center Tap.

WORLD SERIES CHASSIS MOUNT 115/230V, 50/60Hz TRANSFORMERS

RoHS Compliant Available

TRIAD

VPS12-2000

VPS12-6300

Feature dual-bobbin construction with an insulating shroud, keeping capacitance between the coils at a minimum. Very high isolation between primary and secondary, and between each winding and the core. HiPot tested at 4000 VRMS. Primary and secondary coils may be connected as either series or parallel, but both must be used simultaneously. Thru-hole mounting pins are square. Dimension "T" is 3/16" for all types listed. UL recognized, CSA certified, VDE approved.

MINIATURE EPOXY POTTED AUDIO TRANSFORMERS

RoHS Compliant Available

HAMMOND MANUFACTURING

- Pin type, P.C. board mount, net weight of only 0.1 oz.
- Rugged black epoxy potted construction produces a completely sealed unit withstanding severe environmental conditions.
- Secondary may be used as primary and primary as secondary.
- Power level: 100mw @ 300 Hz. to 100 Khz.
- -Freq. range @ +10 dbm is 200 Hz. to 100 Khz. +/- 0.5db
- -Freq. range @ +15 dbm is 200 Hz. to 100 Khz. +/- 0.5db
- -Freq. range @ +20 dbm is 300 Hz. to 100 Khz. +/- 0.5db
- -Freq. measurements with no D.C. saturation.

IT SERIES PULSE TRANSFORMERS

RoHS Compliant Available

SCHAFFNER

- Galvanic separation
- Allows high potential difference voltage scaling
- Optional grounded shields
- Vacuum potting
- Very low partial discharge effects
- PCB through hole mounting

IT series pulse transformers are designed to offer you galvanic isolation for transformer coupled gate drives. The IT series provides negligible delays and the possibility of voltage scaling. They are available for single or double secondary winding for multiple gate drives. Choosing the IT product line brings you the rapid availability of a standard gate drive transformer. A wide selection on turns ratio, ignition current and voltages are designed to off you the desired standard product.

Mfg. Part No.	Turns Ratio	Ignition Current	Isolation Voltage (Peak)	Stock No.	Price Each 1-24
● IT245	1:1	100mA	4kV	11B3548	6.34

PLUG-IN PRINTED CIRCUIT AUDIO TRANSFORMERS

RoHS Compliant Available

TRIAD

- Frequency response ranges: 200 - 15,000 Hz
- Impedance matching: 10% over frequency range

Audio printed circuit transformers are used in line matching, telephone coupling, pulse trigger, interstage, output, isolation and input applications.

TY-141P, 142P, 144P, 145P

1-PHASE CURRENT TRANSFORMERS AND TRANSDUCERS

RoHS Compliant Available

CARLO GAVAZZI

DIA53 MI A82

- One of the widest ranges of CTs in the industry
- Transistor or analog output
- LED indications
- DIN-rail or chassis mounting
- Some are for use with Carlo Gavazzi set-point relays, which provide relay output and adjustable delays/hysteresis

MINI DIN RAIL MOUNT CT WITH ADJUSTABLE SETPOINT
Housed in a compact 3.2H x 0.7W x 2.4D″ housing. **DIA53 series** snaps directly onto DIN rail. Features and adjustable set point, LED and transistor output. Thru-hole: 0.47″. UL recognized, CE compliant.

Mfg. Part No.	Monitoring Range (Amps AC)	Max. Amps (AC)	Inside Diameter (mm)	Stock No.	Price Each
DIA53S72420A	2-20	40	12	05M4087	153.00

CHASSIS-MOUNT CTs FOR USE WITH DIB, DUA & PUA SERIES
Thru-hole for **Mfg. part nos. MI5** and **MI20:** 0.41″. **MI100** and **MI500:** For up to 100 or 500A are also available: 1.06″. CE compliant.

MI5	0.5-5	20	10.5	05M4234	103.00
MI20	2-20	50	10.5	05M4233	103.00

CHASSIS-MOUNT CTs WITH 4-20mA ANALOG OUTPUT
Proportional 2-wire sinking output. Thru-hole: 1.06″. CE compliant.

"CROMPTON" AC CURRENT TRANSFORMERS

Designed to meet the requirements of IEEE C57.13 - 1993. This range of indoor single phase metering class voltage transformers has a metering burden capacity up to 0.3% class @ 75VA and a thermal rating up to 750VA. Some models available with up to two onboard fuses, *call*.

2RL and 5RL

AC CURRENT TRANSFORMERS

RoHS Compliant Available

multicomp

Round Style with Leads

Square Style with Base

Designed for use with AC panel meters where external transformers are required. Secondary output signal: 0-5A for all units. Fully encapsulated rubber molded for indoor and outdoor applications. Insulation class: 0.6kV, 10kV BIL full wave. 50 to 400Hz. Linearity: ±1.5%. Thermal rating: 1.33VA at 30°C, 1.0VA at 55°C. Square style have brass or aluminum. #8-32 UNC terminals. Round style have 24"-long 16 AWG flexible leads. Inside diameter: 1 inch. UL recognized. Made in USA.

AC CURRENT TRANSFORMERS

Simpson

Terminal

Donut

For use with panel AC ammeters where external transformers are required. All have 5A AC secondary current signal. Donut-type transformers are inserted 1 turn primary, rated at 2VA, and include 2' leads. Terminal-type transformers have #8-32 brass studs with washers for easy connection to meter. Leads not included.

HIGH FREQUENCY CURRENT SENSE TRANSFORMERS

RoHS Compliant Available

TRIAD

- Derate ET product by 32% for 50 kHz, 52% for 100 kHz and 50% for unidirectional operation
- Rated primary current renders approximately 40°C temperature rise
- **CST206** models have maximum recommended terminating resistance of 1 ohm per turn
- Primary is inserted through hole in casing

Designed for switching power supply applications, TRIAD current sense transformers are used to detect the current passing through a conductor. These transformers are very reliable and operate effectively over the frequency range of 20 kHz-200 kHz. They are constructed of UL rated 130°C materials. Both models are available with a center tap option. 3 pin or center tapped (CT) models are designated with a **T** suffix. Non-centered tapped versions do not have a center pin.

STEP-UP/STEP-DOWN AUTOTRANSFORMERS

RoHS Compliant Available

TRIAD

Case Type X

Case Type M

Case Type U

Single-winding autotransformers in which the primary coil is a fraction of the entire winding for voltage step-up or the secondary coil is a fraction of the entire winding for voltage step-down. Part of the power is transferred conductively through the windings. All units are 50/60Hz line frequency except units with **U suffix** in mfg. part no. which is 60Hz. Hi-pot tested to 1500Vrms. Available in various configurations, case types and output watts (VA) ratings. Units with **X** or **U suffix** in mfg. part no. have leads; and **MG suffix** have 3-wire plug with ground, socket and 6' line cord.

1000 SERIES PULSE TRANSFORMERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

- Up to 4kVrms isolation
- Compact footprint
- UL94 V-0 package materials
- PCB mounting
- Backward compatible with Sn/Pb soldering systems

1000 series are intended for wideband and pulse operations. They are suitable for signal isolation and use in small isolated power supplies. The compact footprint makes them ideal for applications where space is at a premium.

ISOLATION TRANSFORMERS WITH STATIC-SHIELD

RoHS Compliant Available

TRIAD

Case Type X

Case Type M

Case Type A

Case Type U

- Primary: 115/230VAC, 50/60Hz
- Secondary: 115/230VAC
- Output watts: 15 to 1,000VA
- Hi-pot tested at 1500 Vrms

Ideal for isolating equipment from direct connection to the power line. Offered in a variety of voltages and case types. Constructed with nonconcentrically wound coils. The primary and secondary are wound on separate arbors, then assembled on a laminate core side-by-side separated by insulation. This prevents electrical connection, under normal or overload conditions, between the primary and secondary windings. Units with **X** or **A suffix** in mfg. part no. have leads; **M suffix** have 2-wire plug, socket and 6' cord and are UL listed and verified to meet federal specifications. These isolation transformers are also offered in a hospital type unit; *ordered separately below.*

Mfg. Part No.	Power VA	Primary Volts	Secondary Volts	Secondary Amps	Case Type	Dimensions (in.) MW	Dimensions (in.) MD	Stock No.	Price Each 1-9

†Unit does not include static shield

ISOLATION TRANSFORMERS FOR HOSPITAL/DENTAL APPLICATIONS
Designed and constructed to meet the low-leakage current requirements for today's medical equipment. Leakage current primary-to-secondary is rated less than 50 micro-amps and is measured at less than 10 micro-amps. Includes 6' line cord, plug and socket with a resettable circuit breaker to provide protection from overload and short circuit conditions. UL listed 544 File E102910 and verified to meet federal specifications W-C 596E.

Mfg. Part No.	Power VA	Primary Volts	Secondary Volts	Secondary Amps	Case Type	H × W × D (in.)	Stock No.	Price Each 1-9
● N-92MD	500	115	115	4.35	M	5.344 × 4.500 × 7.000	30M8908	346.39

RM SERIES 3-PHASE LINE REACTORS

RoHS Compliant Available

HPS Hammond Power Solutions Inc.

Designed to reduce or eliminate most line problems including nuisance tripping, harmonic distortion, line notching, etc. In addition, performance, life expectancy and efficiency of both the motor and drive components will be extended and enhanced. These line reactors feature core and coils of the highest quality and performance, a superior insulation system, full "VPI" impregnation using VT polyester resin and custom-brazed connections. Suffix "E" in mfg. part no. indicates enclosed style. **Note: Some mfg. part numbers appear in more than one table, depending on their application.** UL listed, CSA certified, CE compliant. Line reactors are available in both 3% and 5% impedances with HP ratings from 1 to 100/amperage from 2 to 1200; *go online or call.*

115V/230V AC TWIN PRIMARY TOROIDAL TRANSFORMERS

RoHS Compliant Available

multicomp

- Very high quality construction
- High efficiency and smaller size compared to conventional EI transformers
- Extremely low radiated magnetic field, suitable for sensitive electronics
- Double insulated primary leadouts
- Flexible leadouts can be trimmed to any length without the need of removal of enamel
- Design, manufactured and tested in accordance with **EN60742**, **EN60065** and **EN60950**
- 100% electrical and flash tested
- Supplied with mounting dish, bolt and 2 foam pads
- Pri/Sec leads 0°C

A high quality range of open style toroidal transformers with flying leads. Featuring a dual 115V 50/60Hz primary winding for series (230V) or parallel (115V) connection only. Secondary windings can be connected in series or parallel or used independently.

VPT SERIES TOROIDAL POWER TRANSFORMERS

RoHS Compliant Available

TRIAD

- Power Range: 25VA to 2.5 kVA
- Primary: 115/230VAC, 50/60Hz
- Seconday:dual for parallel or series connection
- Insulation Class: Class B 130 °C
- Dielectric isolation (Pri to Sec): 4KV for 60 secs.
- High efficiency and low stray fields

Transformers are provided with one metal plate, two rubber pads, screw, nut and washer through 1kVA. Epoxied center and drilled hole for VA's larger than 1kVA. Stranded UL1015 leads stripped and tinned 0.25" (6mm). Standard lead length is 8" (200mm) for VA's up to and including 250VA; 12.0" (305mm) for 500VA and higher(these are stripped and tinned 0.5" (12.7mm)). CE compliant, UL recognized.

GENERAL PURPOSE, BUCK-BOOST, CONSTANT VOLTAGE, & VARIABLE TRANSFORMERS

GENERAL-PURPOSE DISTRIBUTION TRANSFORMERS

RoHS Compliant Available

SOLA HD

General-purpose distribution transformers are available in single-phase units from 0.050 to 25kVA and 3-phase units from 15 to 75kVA in a wide range of primary and secondary voltage combinations. Benefits include free shielding on 1kVA and above, UL-3R enclosures standard, fast delivery, easy installation and the industry's only "10 + 2" factory warranty. Typical applications include: hospitals, industrial plants, schools, shopping centers, office, commercial, apartment, high rise and institutional buildings. UL listed. **NOTE:** all transformers are available in stainless steel NEMA 4X enclosures and copper windings; *go online or call*.

240/480V PRIMARY, 120/240V SECONDARY — SINGLE-PHASE, 60HZ

BUCK-BOOST TRANSFORMERS

RoHS Compliant Available

SOLA HD

Buck-boost transformers are an ideal solution for economically changing line voltage by small amounts. These small, single-phase, dry-type distribution transformers have a dual voltage primary and secondary, making them unique in their ability to be connected in a wide range of voltage combinations. The most common use is to buck (lower) or boost (raise) the supply voltage a small amount, usually ±5 to 27%. Buck-boost transformers are UL-3R listed for outdoor service, compact in size, and are excellent for use in low voltage lighting and control applications, or any systems requiring 12, 16, 24, 32, or 48 volts. UL listed, CSA certified.

CVS SERIES HARDWIRED CONSTANT VOLTAGE TRANSFORMERS

RoHS Compliant Available

SOLA HD

10 Year Warranty

Specifications:
- Output Voltage Regulation: ±1% for Line Variation of +10% to –20%
- Output Voltage Remains within NEMA Specifications for Input of +20% to –35%
- Provides Galvanic Isolation with Common and Normal Mode Noise Attenuation of 40dB
- 6kV, 200-Amp ANSI/IEEE C62.45-1991 Powerline Surge is Attenuated to a Let-Through of 1%
- Regardless of Input Waveform, Output is a Sine Wave with Less than 3% THD

The **CVS series** are well-recognized voltage regulation devices for industrial applications where extremely precise voltage regulation is required. All types are 60Hz hardwired input/output with a terminal block accessible through concentric knockouts. Even with heavily distorted and/or notched input voltages, the **CVS series** outputs a sine wave. **CVS series** devices filter harmonics, thereby protecting facility wiring and sensitive electrical loads from over-heating. **CVS series** devices are ideal for protecting industrial automation equipment, PLCs, panelboard power supplies, photographic enlargers, analytical lab equipment, broadcasting equipment and marine navigation equipment. To size a Sola CVS, simply multiply the load Volts x Amps to obtain the load VA requirement. Then select the next larger size Sola CVS. Note: If protection from severe brownouts is needed, the **CVS series** can be oversized for even greater input voltage window. If the load has an inductive inrush, such as relays, coils, solenoids, or motors, size the **CVS series** for the load inrush current. Or, with high inductive inrush loads, load power factor correction capacitors can reduce the need to oversize the **CVS series** for inductive inrush currents. UL listed, CSA certified.

18T SERIES VARIABLE VOLTAGE CONTROLS

PAYNE ENGINEERING

Fig. 1

Fig. 2

Fig. 3

Features:
- AC Input and Infinitely Variable AC Output
- Replace Variable Transformers
- All Solid-State Construction
- Integral Heat Sink
- Self-Protecting Design for Long Life
- Lightweight (Less than 12 oz.)
- Easy to Wire and Use

Applications:
- Control Electric Heaters
- Hot Wire Cuttings
- Food Preparation

Mfg. part no. 18TBP is a door mounted unit that provides infinitely variable control of a single-phase AC voltage in a compact solid-state package. Variable voltage output controls the thermal output from electric heaters and the speed of single-phase shaded pole motors. Fast-acting "2 millisecond" fuse prevents damage from short-circuits. Integral chassis heat sink eliminates thermal derating. Output voltage: 0-95% of input. Overall efficiency: 99%. Control input: integral manual potentiometer (included). **Mfg. part no. 18TB** is a panel mount variable voltage control unit with control potentiometer that can be remotely mounted up to 100′ away. Control input: remotely mounted manual potentiometer (included with 2′ cable). **Mfg. part no. 18TP** includes 6′ power cord with three-prong plug, lighted On/Off rocker switch, three-prong case-mounted receptacle. Control potentiometer mounted in case. Control input: integral manual potentiometer (included).

multicomp

Specifications:
- Input 120VAC, 60Hz
- Output 0–130VAC
- Current: 10A 1.3KVA
- Fuse 10A AGC (Included)
- Non-Isolated
- 90 day Warranty

Gives you the ability to vary line voltage between 0-130VAC. Ideal for troubleshooting power supplies, regulators, output sections, etc. Fused design enables user to limit current by changing fuse value (10A maximum). 3-prong grounded cord and socket provide convenience and safety.

50/60Hz VARIABLE TRANSFORMERS

RoHS Compliant Available

STACO ENERGY PRODUCTS CO.

Fig. 1 Fig. 2 Fig. 3 Fig. 4 Fig. 5 Fig. 6 Fig. 7 Fig. 8

Models available to suit a wide variety of applications: automation equipment such as vibrating parts feeders and finishing controls, test equipment, and industrial equipment such as motor speed controls and voltage regulators. Units operate on either 120 or 240 volts input. Mfg. part nos. without suffixes are open styles. **"CT"** suffix have coils and terminals enclosed, for panel or conduit mounting. All are 50/60Hz except (*) 60Hz only, and † 60Hz on overvoltage. All models can be ordered clockwise or counterclockwise rotation. Additional ratings available including motor operated units, *go online or call.*

Variable transformers provide continuously adjustable output voltage from utility line voltage. Movable brush-taps ride on commutators. Rotation of brush by manual or motor-driven means delivers any voltage in the range between zero and line voltage. Feature epoxy-coated POWERKOTE® coils for long life, greater ratings/overload capacities and better resistance to fungus, salt spray and other contaminants. All models available with motor drives except **mfg. part nos. 10C, 12C. Mfg. part nos. 1156DU, 1256DU** available with ratings to 365 kVA. **Prefix 3PN** denotes models with 3-wire cord/receptacle. **Suffix T** indicates terminal enclosure; **suffix U** indicates open construction. UL recognized, CSA certified. *For Powerstat® transformer enclosures go online or call.*

L SERIES

Totally enclosed models designed to meet OSHA requirements. For maximum user protection and safety, all models are equipped with a grounded NEMA cord/plug assembly, on-off switch, pilot light, grounded output receptacle and fuse. All models have rear slots to accept wall hanger brackets for use in alternated locations. Input: 120VAC single-phase.

Panel Instrumentation

Over 18,200 products
From 151 top brands including:
Eaton-Cutler Hammer
Schneider Electric
Omron
Newport Electronics
Red Lion

DG34 SERIES AUTOMOTIVE INDUSTRIAL POWER RELAYS

DURAKOOL INC.

Features:
- High resistance to inrush current
- For PCB or chassis mounting
- Flat insert faston terminal options
- AC and DC coils

Specifications:
- Max. inrush current: 80A
- Contacts: SPST-NO
- Contact material: AgCdO
- Max switching voltage: 277VAC, 30VDC
- Min switching voltage: 10VAC/DC
- Min switching current: 10mA
- Insulated rated voltage: 250VAC
- Mechanical life: 10million cycles

Mfg. Part No.	Carry Current (A)	Contacts	Coil Voltage (VDC)	Coil Resist. (Ω)	Stock No.	Price Each 1-9
DG34-1021-36-1012-F	30	SPST-NO	12	144	59P3464	3.99

(145374)

DG36 SERIESINDUSTRIAL POWER RELAYS

DURAKOOL INC.

Features:
- 2-pole heavy duty power relays
- Up to 30A switching capacity
- Flat insert connectors - faston 6.35 x 0.8mm
- Optional PCB mounting
- 8mm creepage distance and 4kV dielectric

Specifications:
- Max. inrush current: 30A
- Contacts: DPST-2NO
- Contact material: $AgSnO^2$
- Max switching voltage: 277VAC
- Min switching voltage: 10VAC/DC
- Min switching current: 100mA
- Insulated rated voltage: 250VAC
- Mechanical life: 5million cycles

DC COIL VERSION

Mfg. Part No.	Carry Current (A)	Contacts	Coil Voltage (VDC)	Coil Resist. (Ω)	Stock No.	Price Each 1-24

(145373)

60-80A AUTOMOTIVE RELAYS

RoHS Compliant Available

DURAKOOL INC.

- High resistance to inrush current
- Ideal for DC motor control
- Industry standard size and footprint
- High continuous DC current capacity
- Contact material: AgNi0.15
- Power consumption: 1.6W (1.81W with resistor)

Mfg. part no. with suffix **"DR"** has diode option, suffix **"R"** has resistor option. Insulation dielectric strength coil contact: 500Vrms/1min. 30A versions available; *go online or call.*

MINI K HV SERIES HIGH VOLTAGE PRECHARGE RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Benefits:
- The smallest precharge relay available in its class (PCB version)
- Vast majority of precharge applications in electrical vehicles can be served by the Mini K HV
- Mini K HV even covers fault break operations of up to 20A at 450VDC
- Available with PCB and plug-in terminals

Applications:
- DC high voltage precharge applications in:
  Hybrid
  Full battery electric vehicle
  Fuel-cell cars

P&B 15A-20A BI-STABLE, IMPULSE RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

S89R S90R

Bi-stable impulse relays can effect power savings in applications where load is on for long time periods. Meet UL 508 energy management requirements. 9VA coil power. Class B coil insulation. Operate on rated voltage pulses as short as 150ms. Mechanical life expectancy: 100,000 cycles. Temperature range: –40°C to +60°C. Applications include industrial lighting control, motor starting and reversing of conveyor systems, or in air conditioning systems. Also available with octal plug-in base; *go online or call*.

TE connectivity

Authorized Distributor

S86R S87R

Relays have .250″ quick-connect/solder coil terminal located perpendicular to .250″ quick connect terminals. Contacts rated at 20A @ 277VAC, with life expectancy of 50,000 operations. Coil breakdown voltage: 1560Vrms, 60HZ. **S87R series** relays are designed to operate with plunger in vertical or horizontal position, but not in upside-down position. Temperature range: -45°C to +65°C. **S87R series** width: 1.62″ (41.1). **S86R series** width: 1.92″ (48.77). UL recognized, CSA certified.

Weidmüller

Specifications:

- Slim design with 6.4 mm or 12.8 mm width
- 1 CO and 2 CO contact versions
- Screw clamp and tension clamp technology
- Input voltages from 5 up to 230V
- Unique multi-voltage input version for 24V-230V AC/DC
- Distinctive fiber-optic illuminated status display
- 5 cross connection levels
- Clear marking
- Pluggable relays and SSRs
- Wide range of accessories

CORES SERIES UNIVERSAL INPUT/OUTPUT DIN RAIL MOUNT ANALOG SIGNAL ISOLATION/ CONVERSION MODULES

RoHS Compliant Available

wieland

NEW

Wieland's NEW cores universal signal converters & isolaters provide 3 or 4 way galvanic isolation between input, output and power source. Input and output ranges or types can be user configured based on application requirements. The cores c2 M2-A offers the user dual ouputs for the current loop so the signal can be used locally and transmitted to the control system. Small and convienent packaging,these products protect against signal degredation from ground loops and signal loss for reliable control system operation.

1A COMPACT HIGH-FREQUENCY RELAYS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

- 1A, 30VDC discrete load; 1W @ 1GHz high-frequency load @ V.S.W.R. < 1.2
- Gullwing surface-mount terminals
- Low power consumption: 100mW
- Non-latching and single-coil latching available
- Ambient temperature range: -40° to +70°C

Contacts are silver alloy on gold base. Contact resistance: 100mΩ max. Must operate and release times are 3 ms max. Max. switching voltage: 60VDC, 125VAC. Max. switching current: 1A. Max. switching capacity: 37.5VA (AC); 30W (DC). Must operate/release voltages are 80%/10% of rated voltage, respectively. Units shown are non-latching. Single-coil latching units also available; *go online or call.*

EA2/EB2 SERIES 1A MINIATURE SIGNAL RELAYS

RoHS Compliant Available

NEC

Features:
- Surface Mount (L-lead) & DIL packages
- High sensitivity coil
- Ultra low profile, minimal board area
- Fully sealed for immersion cleaning
- Low magnetic interference
- FCC Part 68 compliant
- UL recognized (E73266), CSA Certified (LR46266)

EA2

Specifications:
- Contact rating: 1A at 30VDC / 0.5A at 125VAC
- Initial contact resistance: 50mΩ typical
- Contacts: DPDT
- Contact material: Silver alloy with gold overlay
- Max. switching voltage: 220VDC / 250VAC
- Max. switching current: 1A
- Insulation resistance: 1000MΩ @ 500VDC
- Dielectric strength: 1000VAC
- Operating temperature: -40°C to +85°C
- Unit weight: Approximately 1.5g

G5V-2

Suitable for handling low signals in computer peripherals, telecommunications, and security equipment. Maximum operating voltage: 125VAC, 125VDC. Maximum switching capacity: 62.5VA, 60W. Fully sealed construction. Bifurcated crossbar contacts. Standard models have a power consumption rating of 500mW, carry current: 2A. High sensitivity models have a power consumption rating of 150mW, carry current 1A, except for the **G5V-1 series** which have a carry current of 2A. Outside dimensions in inches (mm): G5V-1: .490(12.5)L x .300(7.50)W x .390(10.0)H, G5V-2: .807(20.5)L x .398(10.1)W x .453(11.5)H.

2A LOW-SIGNAL RELAYS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

G6A series are fully sealed PCB relays. 1500V impulse withstand voltage. Dielectric strength: 1000VAC. Maximum switching capacity under resistive load: 125VA, 60W. Maximum operating current: 2A. Maximum operating voltage: 250VAC, 220VDC. Contact material: silver/lead. Outside dimension in inches (mm): .800(20.2)L x .400(10.1)W x .330(8.4). UL recognized, CSA certified.

2A LOW-SIGNAL RELAYS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

- High dielectric withstand voltage of 2000VAC between coil and contacts (standard type) non-latching
- Contact form: DPDT
- Meet FCC part 68 and Telecordia 2.5 kV surge withstand requirements

Outside dimensions in inches (mm): .583(14.8)L x .287(7.3)W x .362(9.2). UL recognized, CSA certified. Art dimensions: inches (mm). Dual-coil latching models are also available; *go online or call.*

3A SUBMINIATURE LOW-SIGNAL RELAYS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

- SPDT contact arrangement
- Sealed construction
- High sensitivity relays with pick-up coil power of 98mW
- Unique moving loop armature reduces relay size, magnetic interference, and contact bounce time
- Packaged for automatic insertion
- Meets Bellcore 2.5kV surge withstand requirement

Non-latching units feature bifurcated crossbar contacts for high reliability. Outside dimensions in inches (mm): .630(16.0)L x .390(9.91)W x .330(8.38)H. "L" in mfg. part no. indicates low sensitivity. UL recognized, CSA certified.

1A LOW-SIGNAL RELAYS

RoHS Compliant Available

Panasonic

- Flat body signal relays allow mounting with a high-speed chip mounter
- DPDT contact arrangement
- Outstanding vibration and shock resistance

AGQ series relays switch 1A at 30VDC, and feature 1,500V surge withstand between open contacts (FCC Part 68) and 2,500V between contacts and coil. Operating temperature: -40°C to +85°C. Dimensions: .417(L) x .283(W) x .205(H) ", 10.6(L) x 7.2(W) x 5.2(H) mm.

LOW-SIGNAL RELAYS

2A PC BOARD RELAYS

RoHS Compliant Available

Panasonic

- DPDT contacts
- Breakdown voltage between contacts and coil: 2000V
- Outstanding surge resistance

Small in size, **TX series** relays have DPDT contacts. Contact material: gold-clad silver alloy. Nominal switching capacity: 2A @ 30VDC. Initial contact resistance, max.: 100mΩ. **TX series** relays are high-capacity relays with high surge voltage and high breakdown voltage.**TXS series** are small polarized relays with high sensitivity of 50mW. All are UL recognized, CSA certified. 1 and 2 coil latching versions also available *go online or call.*

AXICOM SIGNAL RELAYS, FX2 SERIES

NEW

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Slim line 15x7.3mm (.590x.287")
- 2 form C bifurcated contacts (2 CO), switching current 2A
- High sensitivity for low power consumption, 80mW/140mW
- High dielectric characteristic, up to 2100Vrms between open contact
- High surge capability (1.2/50μs and 10/700μs) meets Telcordia GR 1089 and FCC Part 68, up to 2900V between open contacts, up to 6000V between coil and contacts
- High mechanical shock, up to 1500g survival.
- Hermetically sealed (RT V)

Communications equipment, linecard application - analog, ISDN, xDSL, PABX, voice over IP, office and business equipment, measurement and control equipment, consumer electronics, set top boxes, HiFi, medical equipment

AXICOM SIGNAL RELAYS, FP2 SERIES

NEW

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Telecom/signal relay (dry circuit, test access, ringing)
- Slim line 14x9mm (.551x.354")
- Switching current 2A
- 2 form C bifurcated contacts (2 CO)
- High sensitivity results in low nominal power consumption, 80mW for high sensitive, 140mW for sensitive version
- High mechanical shock resistance, up to 300g functional, up to 1500g survival

Communications equipment linecard application (ringing and test access), PABX, voice over IP, office equipment, measurement and control equipment, automotive equipment as CAN bus, keyless entry, speaker switch, medical equipment, consumer electronics, set top boxes, HiFi.

AXICOM 2A PC BOARD RELAYS

NEW

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Standard telecom relay (ringing and test access)
- Slim line 15x7.5mm (.590x.295")
- Max. switching current 5A
- 2 form C bifurcated contacts (2 changeover contacts, 2 CO)
- Immersion cleanable
- High sensitivity for low power consumption 140mW/ 70mW
- Single coil version with surge voltage resistance between contact and coil: 2.5kV (2/10μs) meets the Telcordia Requirement GR-1089,
- 1.5kV (10/160μs) meets FCC Part 68
- Max. switched voltage: 220VDC, 250VAC
- Switching power 60W, 62.5VA

Communications equipment linecard application (ringing and test access), PABX, voice over IP, office equipment, measurement and control equipment, automotive equipment as CAN bus, keyless entry, speaker switch, medical equipment, consumer electronics, set top boxes, HiFi.

RoHS Compliant Available

TE connectivity

Authorized Distributor

SMD

Relays are designed for compact, high-density mounting. 108.5mm² surface area. Units switch loads from dry circuit to 1A. Contact type: bifurcated, SPDT. Dimensions for thru-hole: 0.138H x 0.272L x 0.512"W max.; pin length = 0.138" max. Suitable for data and communication systems. Expected mechanical life: 1 billion operations. **V23026B1** thru-hole dual-coil latching, **V23026C1** thru-hole single-coil latching and surface mount versions also available; *go online or call.* UL recognized, CSA certified.

RF SIGNAL RELAY HF3 SERIES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features

- Y-Design
- Rated current: 2A
- Frequency range DC to 3GHz
- Impedance 50Ω or 75Ω
- Small dimensions (14.6x7.2x10mm)
- 1 form C contact (1 changeover contact) SPDT-CO
- Immersion cleanable
- Low power consumption (≤140mW)

Applications

- Cable modems and linecards/ CATV, Tabs
- Measurement and test equipment ATE, satellite / audio / video tuners
- Wireless base stations and antennas
- Switching boards

AXICOM 2A SLIMLINE LOW-PROFILE LOW-SIGNAL PC BOARD RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Thru-hole, SMT gullwing and SMT J-leg
- Contact material: palladium-ruthenium, gold covered
- Reflow solder capable to 260°C for SMT and 265°C for thru hole
- Non-Latching
- Meets Bellcore GR 1089, FCC Part 68 and ITU-T K20
- Immersion cleanable IP67, plastic sealed case
- Low.power consumption
- DPDT bifurcated contacts
- Max. switched voltage: 220VDC, 250VAC
- Max. switched power: 60W DC or 62.5VA AC.
- Expected mechanical life: 100 million operations

SMT Gullwing

For applications in telecommunications, office automation, consumer electronics, medical equipment, measurement and control equipment Capacitance: Between Open Contacts: 1pF, max. Between Coil and Contacts: 2pF, max. Between Poles: 2pF, max. RF Characteristics: Isolation at 100 / 900 MHz: -37.0 db / -18.8 db. Insertion loss at 100 / 900 MHz: -0.03 db / -0.33 db, V.S.W.R at 100 / 900 MHz: 1.06 / 1.49. Initial Dielectric Strength: Between Open Contacts: 1000 Vrms for 1 minute. Between Coil and Contacts: 1800 Vrms for 1 minute. Between Poles: 1000 Vrms for 1 minute. Temperature Range: -55°C to +85°C. Maximum Allowable Coil Temperature: 125°C. Continuous Duty Cycle.

CII 5-25A MIL SPEC PC BOARD RELAYS

TE connectivity

Authorized Distributor

5A, DPDT

10A, DPDT

5A, 4PDT

10A, 4PDT

- Hermetically sealed
- All welded construction
- Balanced force
- Permanent magnet drive
- Coil voltage: 28VDC

Polarized single-side stable design. Flux from a permanent magnet provides the armature holding force in the deactivated state. Flux path is switched and combined with the coil flux in the operated state which results in increased contact pressure in both states over that of a spring return non-polar design. Pin terminals except **mfg. part no. FCA-210-0923M** which has solder hook terminals. Bottom mount. MIL-R-83536 qualified.

PHOTOVOLTAIC RELAYS

RoHS Compliant Available — International IOR Rectifier

Fig. 1 8-Pin DIP

Fig. 2 14-Pin DIP

Fig. 3 6-Pin DIP

Fig. 4 8-Pin DIP

Photovoltaic relays switch general-purpose analog signals. Four terminal devices with an LED input which provides a photo-isolated signal for actuating the power ICs, which form the solid-state output contacts. 0.2µV maximum thermal offset voltage @ 5mA control. **"T" suffix** in mfg. part no. indicates Tape and Reel packaging.

PHOTOVOLTAIC ISOLATORS

RoHS Compliant Available — International IOR Rectifier

Ideally suited for applications requiring high-current and/or high-voltage switching with optical isolation between the low-level driving circuitry and high-energy or high-voltage load circuits.The **series PVI** photovoltaic isolator generates an electrically isolated DC voltage upon receipt of a DC input signal. It is capable of directly driving gates of power MOSFETs or IGBTs. The **PVI series** is available in thru-hole (N-Ending) and surface mount (NS-Ending). The PVI5033R photovoltaic isolator is a dual-channel, opto-isolated driver capable of directly driving gates of power MOSFETs or IGBTs. The PVI5033R series is available in thru-hole (R-Ending), surface mount (RS-Ending), and surface mount tape and reel (RS-Tending); *go online or call for tape and reel version.*

LOW-SIGNAL SOLID-STATE MOSFET PC BOARD RELAYS

RoHS Compliant Available — OMRON ELECTRONIC COMPONENTS

- Extremely low input current
- Ideal for microprocessor and logic switching relays
- Input voltage: 1.15V
- Forward current: 50mA
- Reverse voltage: 5V
- Reverse current: 10µA
- Operating temperature: -40°C to +85°C
- New ultra sensitive, current/low on resistance options

Complete part number is not printed on the part.

Panasonic

- On resistance (Typ.): 0.8 ohm
- Output capacitance (Typ.): 14 pF
- LED forward current: 50mA
- LED reverse voltage: 5V
- Peak forward current: 1A
- Power dissipation: 75mW
- Ambient temperature: -40°C to +85°C

4.6 mm2 mounting area achieved. Approx. 29% less than previous product (SON type). Contributes to the miniaturization of instruments and higher density mounting.

Mfg. Part No.	Load Voltage	Load Current (mA)	Description	Stock No.	Price Each 1-24

POWER PHOTOMOS RELAYS

RoHS Compliant Available

Panasonic

- Contacts: SPST
- Output power: 1.6W for AC/DC types, 1.35W for DC types only
- PC board layout is simplified
- No restriction on mounting direction

High capacity PhotoMOS relay in a compact and slim 4-pin SIL. Feature extremely low on resistance and extremely low closed circuit offset voltage to enable control of low-level analog signals without distortion. Eliminate the need for a counter electromotive protection diode in the drive circuit on the input side and the need for a power supply to drive the power MOSFET. Outside dimensions: 21mm(L) x 12.5mm (H) x 3.5mm (D).

RF PHOTOMOS-SON RELAYS

RoHS Compliant Available

Panasonic

- C x R 5, C x R 10 versions avaible
- 4-pin SSOP package
- 40% less mounting space than 4-pin SOP packages
- Lower output capacitance and on resistance
- New flat lead terminal to reduce mounting space and improve output signals
- High-speed switching (0.02ms)
- SPST contacts
- Output capacitance: 1pF

Typical applications include test equipment, board testers, medical equipment, and multipoint recorders. Turn-on and turn-off time is 0.02ms. Power dissipation = 75mW (in), 250mW (out). Operating temperature = -40°C to +85°C. Dimensions: (4.45L x 2.65W x 1.80H)mm. Relays are packaged as each. For tape & reel picked from the 1-4 pin side, add **suffix "Y"** to mfg. part no.; for tape & reel picked from the 2-3 pin side, add **suffix "W"** to mfg. part no. **Reel qty: 3500**. For availability, *go online or call*

RF 4-CHANNEL PHOTOMOS RELAYS

RoHS Compliant Available

Panasonic

- 4PST contacts
- CxR: 33.4
- Miniature 16-pin SOP package
- Low-level off state leakage current
- Controls low-level analog signals
- 50% space savings over two 8-pin 2-channel relays
- Low capacitance between output terminals ensure high response speed

PhotoMOS relays feature extremely low closed-circuit offset voltage to enable control of low-level analog signals without distortion. Applicable for 4PST use, as well as 4 independent SPST. Typical applications: Telephone and data communication equipment, measuring equipment, medical equipment and industrial equipment. Dimensions: 10.37W x 4.4L x 2.1H mm. .408W x .173L x .083H inches. **Packaging is tape & reel.**

RoHS Compliant Available

IDEC

- DPDT and 4PDT contact configurations
- Contact resistance: 50Ω
- Power consumption: 1.2VA (60Hz), 0.9W DC
- 0.110" solder/quick-connect or PC board terminals
- Options include indicator light, check button and top mounting bracket
- DIN socket, top mounting, PC board socket or panel mount socket

RY series relays satisfy applications for lower level switching needs such as pilot lights or logic level devices. Standard gold-plated contacts prevent contact oxidation from affecting circuit continuity. Temperature range: -22°F to +158°F. Operating time: 20 msec. max. UL recognized, CSA certified, CE compliant, TÜV approved.

10A GENERAL-PURPOSE POWER RELAYS

RoHS Compliant Available

IDEC

- High reliability and long service life
- DPDT or 3PDT pure silver contacts
- 11-blade plug-in terminals
- Options include check button for test operation and indicator light
- Mounting options include flange mounting, DIN socket, or panel mount socket

Contact material is silver. Operating time: 25ms. Release time: 25ms. Temperature range: -30°C to +70°C. Socket ordered separately, *below*. UL recognized, CSA certified.

8-16A POWER RELAYS

RoHS Compliant Available

IDEC

- Compact housing only 12.7 mm wide
- Large contact rating: RJ1 (1-pole) 16A (UL general use rating@250V AC), RJ2 (2-pole) 8A
- Non-polarized LED indicator available on blade type. IDEC unique light guide structure enables high visibility of coil status from and direction
- Excellent electrical and mechanical life
- Electrical life: 200,000 operations (AC load)
- Mechanical life: 30 million operations (AC coil)
- RoHS directive compliant (EU directive 2002/95/EC). Contains no lead, cadmium, mercury, hexavalent chromium, PBB or PBDE.
- Diode model: Diode reverse withstand voltage: 1000V
- UL recognized, CSA certified, EN compliant

Relay Socket

RJ series relays are available with optional green, non-polarized LED that provides enhanced visibility of power status from multiple directions. Unique light guide makes status indicator brighter and more noticeable. Compact blade relay saves space when used with compatible **SJ series** sockets. Using **RJ series** relay and **SJ series** socket, reduce DIN width mounting by 30 percent when compared to standard 2-pole relays. UL recognized, CSA certified, VDE approved, and CE marked in compliance with IEC 61810-1. PCB versions and 120V models also available; *go online or call*.

MAGNECRAFT 3A-15A MINIATURE POWER RELAYS

RoHS Compliant Available

Schneider Electric

Full Featured Cover:
- Flag indicator for relay status in manual or powered condition
- LED lamp for coil "on" or "off" status
- Pushbutton for manual operation of relay without need for coil power
- Lock-down door when activated to hold pushbutton and contacts in operate position
- ID tag for write-on surface
- Dimensions: 1.54"H x 1.06"W x 0.83"D
- Operating Temperature: -40°C to +70°C

Full Featured Cover

Plain Cover

Hermetically Sealed Relay

Plain Cover:
- Dimensions: 1.40H x 1.06W x 0.83"D
- Flag indicator for relay status in manual or powered condition
- Plastic i.d. tag/write label
- Operating temperature: -40°C to +70°C

Hermetically Sealed Relay:
- Class 1, Division 2 certification for hazardous locations
- Ideal for harsh environments
- Dimensions: 1.28"H x 0.91"W x 1.16"D
- Operating temperature: -40°C to +70°C

All relays below are UL listed when used with a Magnecraft socket.

MAGNECRAFT 40A HEAVY-DUTY POWER RELAYS

RoHS Compliant Available

Schneider Electric

DPDT

SPDT

SPST-NO (DM)

5/16" (7.95) diameter, silver alloy gold-flashed contacts are rated at 40A at 300VAC/28VDC. Magnetic blowout versions rated up to 20A at 110VDC (SPDT-DM only); 10A at 110VDC (double through). All versions are rated 15A tungsten, NEMA A600 pilot duty and up to 2HP. Class B insulation system. Dielectric withstanding voltage between open contacts: 1500V; between mutually insulated conductive elements: 2200V. Combination screw terminals. Molded phenolic base. UL listed File No. E43641, CSA certified file no. 168986, CE compliant.

16-DCLIP-1

Mfg. part no. 70-124-1 sockets have solder terminals, while **mfg. part no. 70-124-2** sockets have quick-connect terminals. **Mfg. part no. 70-178-1** sockets have printed circuit terminals with mounting tabs; **mfg. part no. 70-178-2** is without mounting tabs. **Mfg. part no. 70750E11-1** is a economical 11-pin socket with rising elevator box terminals mates with **mfg. part no. 750XCX** and **750XCXH** relays. For rating, dimensional information and volume pricing, *go online or call.*

PLUG-IN/INDUSTRIAL RELAYS – SQUARE

5A-10A ULTRA-HIGH SENSITIVITY RELAYS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- High reliability up to 500k operations
- Ultra-high sensitivity and quick response
- Ideal for switching multiple loads with one compact device
- Vibration and shock resistant

Standard Case

Flange mount, PC board mount and other coil voltages available; *go online or call.* All mfg. part no. shown below are plug-in/solder termination. **"S" suffix** indicates manufactured on automated production line. Items without **"S" suffix** are equivalent. **CR** in mfg. part no. indicates built-in surge suppression.

10A GENERAL-PURPOSE PLUG-IN RELAYS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- Interlocked frame-and-contact block prevents contact misalignment during plug-in
- Rugged power driver offers superior 3/16" through-air and 3/8" over-surface spacing
- ½HP motor controller applications @ 240, 480 and 600VAC or ⅓HP @ 120VAC

MJ series are 10A general-purpose plug-in relays. Plain case: 48.38(1.905)H x 38.73(1.525)W x 35.56"(1.400mm)L. Flange: 73.66(2.90)H x 38.73 (1.525)W x 35.56"(1.400mm)L. UL recognized, CSA certified. For use with **PTF series** sockets, *order separately below.* Latching versions and units with manual operator, push-to-operate button and LED indicator are also available; *go online or call.*

10A-15A PLUG-IN RELAYS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- Available in 4 contact configurations
- Available in plug-in, flange mount and PC board mounting styles
- Arc barrier equipped
- Dielectric strength: 2,000VAC
- AgCdO contacts
- AC models: 50 million operations min.
- DC models: 100 million operations min.

UL recognized, CSA certified. Additional accessories available (**mfg. part no. PT14** back connecting solder terminal socket and **mfg. part no. PT14-0** back connecting PCP terminal socket); *go online or call.*

25A GENERAL-PURPOSE RELAYS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- Ideal for 3-phase resistive and inductive motor control applications
- No contact chattering for momentary voltage drops up to 50% of rated voltage
- Withstand more than 4 kV between contacts that are of different polarity and between the coil contacts
- Flame-resistant materials (UL94V-0) used for all insulation
- Push-to-test button on all models
- Termination configuration - screw terminal

Applications:

- Compressors for air conditioners and heater switching controllers
- Switching controllers for power tools or motors
- Lamp controls, motor drivers, and power supply switching controllers in copy machines, fax machines, and other office equipment
- Power controllers for packers, food processing equipment and inverters

Contains the relay and bracket packed together. The rated current and coil resistance are measured at a coil temperature of 23°C (73°F) with tolerances of +15%/-20% for AC rated current and ±15% for DC coil resistance.

30A - 200A SERIES DC POWER RELAYS

RoHS Compliant Available

OMRON ELECTRONIC COMPONENTS

- Contact Form: SPST-NO
- Interrupt high-capacity loads
- Consume less power than conventional relays
- Low noise level during switching

The switching section and driving section are gas-injected and hermetically sealed, allowing these compact relays to interrupt high-capacity loads and high-voltage circuits. The sealed construction also requires no arc space, saves space, and helps ensure safe applications. Operating temperature: -40°C to +70°C (**mfg. part nos. G9EA-**); -40°C to +50°C (**mfg. part nos. G9EC-**). UL/CSA approval pending.

INDUSTRIAL SEQUENCING (STEPPER) RELAYS

STRUTHERS-DUNN

- 5A rated DPDT contacts
- Transfer-on-energize or transfer-on-release available
- Custom cam sequences available (up to 8 steps)
- Seismic qualified integral hold-down clip
- 5 million operations - mechanical
- Encapsulated coil

RELAYS

Mfg. Part No.	Contact Transfer	Coil Voltage	Coil Resist. (Ω)	Stock No.	Price Each 1-4
A311XBXP-120VAC	When Coil is Energized	120VAC	540	29F2873	248.98
A311XBXPR-120VAC	When Coil is De-energized	120VAC	540	29F2874	244.07

SOCKETS

27390	12-Pin Panel Mount with Screw Terminals & Clamping Plates	60F3117	22.34
27390D	12-Pin DIN Mount with Screw Terminals & Clamping Plates	69H8902	21.10

Lamp (L) and coil supperssion (V) among options available (example 311XBXPLV-24VDC)
(4038)

10A INDUSTRIAL RELAYS

STRUTHERS-DUNN

- 10A carry / 30A make
- Multiple / Custom contact configurations up to 6 pole
- Blowout magnets available for DC switching
- Seismic qualified integral hold-down clip
- Nuclear versions available
- Continuous duty rated

UL listed when used with mating sockets **27390(D)** for 12 pin or **33377(D)** for 14 pin.

12 & 14PIN INDUSTRIAL RELAY SOCKETS

STRUTHERS-DUNN

27390

27390D

33377D

- Rated 10A at 300V
- Single level wiring
- Polarized
- DIN or panel mount ("D" versions)
- Finger safe non-removable screws ("D" versions)
- Removable screws for ring terminals (Non "D" versions)
- Panel mounting (Non "D" versions)

Industrial sockets have front-connected wiring on one level with screw terminals. Mating relays have locking clip that snaps into socket. Dimensions for **27390**: 2.65L x 2.18W x 0.78"H; **33377**: 3.10L x 2.18W x 0.78"H. Sockets fit **219, 236, 237, B255, A311 series** relays; *sold separately on pages 1647-1648*. UL listed when used with **219** and **B255 series** relays; otherwise UL recognized file no. E70550.

(4035)

25A POWER RELAYS

STRUTHERS-DUNN

- AC or DC operation up 480V
- 4PDT contacts
- 100,000 cycles @ load
- 35A @ 277VAC
- 20A @ 30VDC
- Screw terminations standard, QC available

35D203

Screw-terminal units have silver-cadmium oxide contacts rated 25A at 277VAC, 50/60Hz resistive, or 1HP per moveable arm at 120 or 240VAC single phase. Mount by one front key hole and two rear channel slots for 8-32 screws on 2 x 2.5″ (50,80 x 63.50) triangular centers. Plastic and metal covers available. Dimensions: 2.657L x 3.394W x 2.719″H. UL listed file no. E22575, CSA certified file no. 15374. Covered versions also available, *go online or call*

P&B 2.0-7.5A SOCKET, PANEL MOUNT AND PC BOARD RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Dry circuit to 7.5A
- 2.2W power consumption max.
- AC or DC coil
- 1-pole thru 8-pole

R10-E1
#3-48 Mounting Stud

R10 series relays have DPDT contacts. **R10S series** are super-sensitive **R10s** (case and terminals E1 and E2 only). Solder terminals are 0.012″ (0.305) x 0.080″ (2.03) x 0.210″ (5.33) mm long with #3-48 mounting stud. Expected mechanical life: 100 million operations (except contact code W: 1 million operations, typical). Initial dielectric strength: Between open contacts - 500Vrms, for contact codes P and Z; 1,000Vrms for contact codes W, X and Y with coil code V. Between all other conductors - 1,000Vrms. All units are UL recognized, and all except 8PDT are CSA certified. **R10T series** relays with 8-pin or 11-pin octal base and sockets available. **R10L series** relays with LED indicator available (V or S coil adjustment only; to 48VDC only); *go online or call.*

SOCKETS FOR R10 AND R10S SERIES RELAYS

Rugged, molded socket body retains floating terminals or either solder or printed circuit pin configuration. Contacts are spring brass, tin-plated. PC sockets are available in 0.1" (2.54mm) staggered grid or in-line spacings. Solder terminal sockets are rated for 10A maximum. Molded phenolic socket retains floating pierced solder terminals. Solder slot: 0.045" x 0.090". *See also the Relay Socket Usage Guide.*

P&B LIGHT POWER SOCKET AND PANEL MOUNT RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

AC VOLTS, 5A OPEN

Highly efficient relays for light power loads such as small motors, solenoids, other relays and general automation work. Mechanical life expectancy: 10 million operations. Mfg. part nos. with **"Y" suffix** have silver contacts rated 5A @ 120VAC, **"G" suffix** have silver cadmium oxide contacts rated 10A @ 120VAC. Insulation material is molded phenolic. **KA series** is open version. Mounting: one no. 6-32 threaded stud and locating tab on 0.438" (11.13) centers. **KAP series** is enclosed model, protected by a clear polycarbonate dust cover. UL recognized, files E22575 and E29244, and CSA certified, file LR15734. 8- or 11- pin octal type plugs for socket mounting; *see Relay Socket Usage Guide.*

P&B 5A - 30A SERIES GENERAL-PURPOSE RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Available in AC or DC coil
- 5, 10, 15, 20 and 30A ratings
- Silver contacts (5A); silver-cadmuim oxide contacts (10-30A)
- 5V through 240V
- Quick-connect solder terminals

Plain Case

Flange Mount

Top Flange Mount

KUIP and **KUGP series** relays have 8mm coil-to-contact spacing and 3mm contact gap. **KUHP** series have silver-cadmium oxide contacts and solder/push-on terminals. **KUEP series** relays feature wide contact gap and are equipped with a permanent magnet blowout to assist in interrupting DC current when the contacts are opened. Enclosed in a polycarbonate dust cover. UL recognized, CSA certified. **KUGP** and **KUIP series** relays are also VDE approved. *Order sockets and hold-down springs separately below. See also the Relay Socket Usage Guide.* See footnotes regarding push-to-test and neon indicating lamp options.

SCHRACK 6-12A LOW-PROFILE MINIATURE PLUG-IN RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Low-profile height of 29mm
- DPDT, 3PDT, or 4DPT contacts

PT series miniature plug-in relays feature greater switching performance (up to 3,000VA), AC and DC coils, mechanical indicator and a manual test-tab with locking option. Nominal coil power is 750mW for DC and 1.0VA for AC mfg part no. Dimensions: 1.102H x 1.14W x 0.882"D. Solder terminal length is 0.236". UL recognized, CE compliant, VDE approved. PC board thru-hole mounting style is also available; *go online or call.* Sockets available below. *See also the Relay Socket Usage Guide.*

P&B 10A SINGLE AND DUAL COIL MAGNETIC LATCHING RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

KUL series magnetic latching relays require only half the space of mechanical latching relays. Designed for continuous duty in applications demanding good memory stability. Contacts are silver-cadmium oxide, 10A at 28VDC resistive or 240VAC, 80% PF. AC coil relays include diodes. Dimensions: 2.156"H x 1.531" x W1.406"D. See also the Relay Socket Usage Guide.

P&B 15A SOCKET OR PANEL MOUNT RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Socket Mount

Top Flange

K10 series relays offer reliable DPDT, 15 Amp switching capability in a compact, polycarbonate dust cover enclosed package. Silver cadmium oxide contacts rated 15 amps @ 120VAC resistive; 10 Amps @ 30VDC resistive or 277VAC; ½HP @ 250VAC; ⅓HP @ 120VAC. Nominal power: 0.9W for DC coil types and 1.2VAC for AC coil types. Mechanical life: 10 million operations. Electrical life: 100,000 operations. *Order sockets and hold-down spring separately below or see the Relay Socket Usage Guide.*

SCHRACK POWER RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- For direct control of squirrel-cage motors, water heaters, and night storage heaters
- Used as power relays in electrical appliances
- Push-to-test button and mechanical indicator
- DC- or AC-coil
- 2 / 3 pole 10 / 16 A, 2 CO or 3 CO contacts
- RM8: 2 pole 25 A, 2 CO contacts
- Switching capacity: up to 6000VA
- Plug-in version, PCB terminals, chassis- or DIN-rail mount
- RoHS compliant (Directive 2002/95/EC) as per product date code 0415

RM2

RM2, 3, and **7 series** rated up to 16A @ 380VAC (440 max. breaking voltage). **RM8 series** rated up to 25A @ 250VAC (440 max. breaking voltage). Relays have a mechanical life of >20 x 10^6. Dielectric strength: coil-contact 2500VAC; contact-contact 2500VAC; pole-pole 2500VAC. UL recognized, CE compliant, VDE approved. Order sockets and hold down springs separately below. PC terminal versions and VDE approved with 3mm contact gap versions also available; *go online or call.* Models with 3mm contact gap (RM5/6) and models with 30A rating (RMC/D) also available.

Authorized Distributor

PRD1, 3, 5, and 7

PRD11 and PRDA11

PRD series relays are designed for use in high inrush current applications such as motor starting, other inductive and incandescent lamp loads. Relay bobbin is contained in plastic housing for added protection. Units feature screw terminations. Operating temperature range: –55°C to +45°C for AC models; –55°C to +80°C for DC models. Dust cover **mfg. part no. 35D013** also available; *go online or call.* UL listed under file E22575 and CSA certified under file 15734.

2A ENCLOSED CURRENT ACTUATED RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Specifications:
- Contact ratings: 2A at 120VAC
- Contact material: Silver
- Expected life: 15million operations
- Mechanical life: 100,000 operations
- Initial insulation resistance: 1000MΩ
- Operating temperature: -45°C to +70°C

Features:
- DC current sensitive relay
- Enclosed in a clear polycarbonate dust cover
- Operates on 125mW per movable arm
- 8--pin octal-style plugs

Mfg. Part No.	Current (A)	Contact Voltage (VAC)	Contacts	Coil Resist. (Ω)	Stock No.	Price Each 1-24

D15 SERIES GENERAL PURPOSE RELAYS

RoHS Compliant Available

DURAKOOL INC.

Features:
- For plug-in sockets, 35 mm DIN rail mount, or on panel mounting
- Cadmium - free contacts - relays D15 2C/0, D15 3C/0
- *WT*: mechanical indicator + lockable front test button
- Relays may be provided with the test buttons type P (no latching) and plugs

Specifications:
- Max. inrush current: 20A
- Rated current: 10A
- Max. breaking capacity: 2500VA
- Resistance: less than 100milliohms
- Max. operating frequency (at rated load): 1200 cycle per second

PLUG-IN/INDUSTRIAL RELAYS – OCTAL

10A GENERAL-PURPOSE RELAYS

RoHS Compliant Available

IDEC

- High reliability and long service life
- DPDT or 3PDT pure silver contacts
- Available with octal 8-pin and 11-pin terminals
- Worldwide approvals on octal models
- Options include check button for test operation and indicator light
- Mounting options include DIN socket, or panel mount socket

Contact material is silver. Operating time: 25ms. Release time: 25 ms. Temperature range: –25°F to +158°F for non-latching relays, -30°C to +70°C for dual-coil latching relays. Mount into standard 8- or 11-pin octal sockets. Sockets ordered separately, *below*. UL recognized, CSA certified, CE compliant, TÜV approved.

10A PLUG-IN RELAYS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

Features:
- Mechanical indicator standard on all models
- Optional lockable test button and/or LED indicator
- Octal base
- Wider operating temperature
- Versions with built-in varistors and diodes are also available; *go online or call*

Specifications:
- Contact rating: 10A at 250VAC
- Impulse withstand voltage: 4.5kV
- Nom. coil voltage: 1.4W
- Electrical life min: 100,000 ops
- Operating temperature: -40°C to 60°C

HERMETICALLY SEALED PLUG-IN RELAYS

STRUTHERS-DUNN

- DPDT - 12A @ 120VAC, 10A @ 28VDC
- 3PDT - 10A @ 120VAC / 28VDC
- Hermetically sealed steel case
- Vacuum baked / nitrogen filled
- Socket mounted

Highly reliable, general purpose relays have glass melamine insulation for high dielectric strength and resistance to humidity or temperature change. Molded nylon bobbin and coil cover. Contacts: Silver-cadmium oxide, gold flash, rated 10A @ 120/240VAC/28VDC resistive. Steel enclosure filled with dry nitrogen and solder sealed to prevent contamination of internal parts. DPDT mates with socket **SK-CIR8-DS** *on this page*, 3PDT mates with socket **SK-CIR11-DS**.

P&B 20A KRP-3H SERIES GENERAL-PURPOSE RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

KRP-3H series relays are enclosed in clear polycarbonate dust cover. Many uses in automation controls and other applications requiring high current switching. Heavy copper alloy movable contact arms. Twin silver-cadmium oxide contacts. Operating temperature: -40°C to +85°C. For use with **mfg. part no. 27E122** screw terminal socket or **mfg. part no. 27E891** screw terminal DIN mount socket and **mfg. part no. 20C206** hold down spring; *order separately, go online or call.*

DM84 SERIES INDUSTRIAL RELAYS

RoHS Compliant Available

DURAKOOL INC.

Features:
- Cadmium - free contacts
- Height 15.7mm
- 5000V / 10mm reinforced insulation
- For PCB and plug-in sockets
- AC and DC coils
- Recyclable packing

Specifications:
- Max. inrush current: 15A
- Rated current: 8A
- Max. breaking capacity: 2000VA
- Resistance: less than 100milliohms
- Max. operating frequency: 600cycles/hour
- Operating time: 7ms
- Release time: 3ms
- Mechanical life: 30million cycles
- Operating temperature: -40°C to 70°C

DM85 SERIES INDUSTRIAL RELAYS

RoHS Compliant Available

DURAKOOL INC.

Features:
- Cadmium - free contacts
- Height: 15.7 mm
- 5000V / 10mm reinforced insulation
- For PCB and plug-in sockets
- AC and DC coils
- Recyclable packing

Specifications:
- Max. inrush current: 30A
- Rated current: 16A
- Max. breaking capacity : 4000VA
- Resistance: less than 100milliohms
- Max. operating frequency (at rated load): 600cycles/hour
- Operating time: 7ms
- Release time: 3ms
- Mechanical life: 30million cycles
- Operating temperature: -40°C to 70°C

RJ22 SERIES SLIM POWER RELAY PLUG-IN TERMINAL

NEW

RoHS Compliant Available

IDEC

- Compact and rugged power relays. Large switching capacity
- Compact housing only 12.7-mm wide.
- Large contact rating: RJ1 (1-pole): 16A (UL general use rating @250V AC), RJ2 (2-pole): 8A
- Non-polarized LED indicator available on blade type. IDEC's unique light guide structure enables high visibility of coil status from any direction.
- The smallest width for 2-pole/bifurcated contact relay
- Excellent electrical and mechanical life. Electrical life: 200,000 operations (AC load), Mechanical life: 30 million operations (AC coil)
- RoHS directive compliant (EU directive 2002/95/EC). Contains no lead, cadmium, mercury, hexavalent chromium, PBB or PBDE.
- Diode model: Diode reverse withstand voltage: 1000V
- UL recognized, CSA certified, EN compliant.

RV8H SERIES 6MM INTERFACE RELAYS

NEW

RoHS Compliant Available

IDEC

- Class I, Division 2 environment
- Contact configuration: SPDT
- Contact rating: 6A
- Space-saving 6mm width.
- Only 70 mm in height from DIN rail
- Gold plated contacts
- Pre-assembled including DIN-rail and relay
- Universal screw terminals flat and Philips head
- Universal AC/DC socket with built-in surge protection and GREEN LED Indicator
- Lever for easy locking and removal of the relay
- Wide coil voltage range: 6 to 240V
- High dielectric strength and impulse withstand voltages.
- Sensitive coil 170 mW
- Reverse Polarity protected
- 400VAC maximum switching voltage
- 1500VA AC maximum switching power

Relay and Socket

Replacement relay

IDEC RV8H Series 6mm wide slim interface relays provide a perfect solution for general purpose relay applications in compact spaces. The RV8H 6mm relays are ideal for PLC and electronic systems, industrial automation, panel builders, assembly machine applications and other applications that require a high switching capability. The RV8H relays can be used as a universal interface between the controller and the actuator to switch small and medium size loads. Pre-assembled relays and sockets reduce installation time. Replacement relays are also available. Optional accessories include jumpers, spacers and marking plates for wiring and marking solutions.

SRF SERIES 2A SUBMINIATURE INTERMEDIATE POWER RELAYS

RoHS Compliant Available

IMO

Features:
- Low cost
- SPCO configuration
- Standard PC layout
- Sealed and flux-tight construction
- UL Approved
- RoHS Compliant

Specifications:
- Contact rating: 1A at 120VAC / 30VDC
- Initial contact resistance: 100mΩ Max.
- Contacts: SPST-NO, SPDT
- Max. switching voltage: 250VAC / 30VDC
- Max. switching current: 2A
- Max. switching power: 240VA / 30W
- Initial insulation resistance: 100MΩ @ 500VDC
- Dielectric strength: 1000VAC
- Operating temperature: -25°C to +70°C
- Unit weight: 5g

Mfg. Part No.	Current (A)	Contacts	Coil Voltage (VDC)	Coil Resist.	Stock No.	Price Each 1-24

SRB SERIES 5A SUBMINIATURE INTERMEDIATE POWER RELAYS

RoHS Compliant Available

IMO

Features:
- SPNO or SPCO variants
- Standard and Sensitive Coils
- Sealed IP67
- UL/TUV Approved
- RoHS Compliant

Specifications:
- Contact rating: NO: 5A at 250VAC / 30VDC; NC: 3A at 250VAC / 30VDC
- Initial contact resistance: 100mΩ Max.
- Contacts: SPST-NO, SPDT
- Max. switching voltage: 250VAC / 30VDC
- Max. switching current: 5A
- Max. switching power: 1250VA / 150W
- Initial insulation resistance: 1000MΩ @ 500VDC
- Dielectric strength: 1000VAC
- Operating temperature: -40°C to +85°C
- Unit weight: 8g

Mfg. Part No.	Current (A)	Contacts	Coil Voltage (VDC)	Coil Resist.	Stock No.	Price Each 1-24

SRD SERIES 10A SUBMINIATURE INTERMEDIATE POWER RELAYS

RoHS Compliant Available

IMO

Features:
- 5A, 10A switching capabilities
- SPNO & SPCO configurations
- Subminiature, standard PCB layout
- Sealed Construction

Specifications:
- Contact rating: 3A at 250VAC / 30VDC
- Initial contact resistance: 100mΩ Max.
- Contacts: SPST-NO, SPDT
- Max. switching voltage: 250VAC / 30VDC
- Max. switching current: 10A
- Max. switching power: 1250VA / 150W
- Coil power: Standard: 450 mW; Sensitive: 200mW
- Initial insulation resistance: 1000MΩ @ 500VDC
- Dielectric strength: 1000VAC
- Operating temperature: -40°C to +70°C
- Unit weight: Approximately 6g

EV1N SERIES 2A SUBMINIATURE POWER RELAYS

RoHS Compliant Available

IMO

Features:
- Fully sealed for immersion cleaning
- Ultra small size
- High coil sensitivity 150-175mW
- Surface mount revision

Specifications;
- Contact rating: 0.5A at 125VAC / 1A at 30VDC
- Contact resistance: 100mΩ
- Contacts: SPDT
- Contact material: Silver alloy (Au clad)
- Max. switching voltage: 125VAC/60VDC
- Max. switching current: 2A
- Mechanical life: 10million ops
- Electrical life: 100,000 ops
- Insulation resistance: 1000MΩ
- Dielectric strength: 1000VAC
- Operating temperature: -30°C to +70°C
- Unit weight: 2.2g

SRM SERIES 10A SUBMINIATURE HIGH POWER RELAYS

RoHS Compliant Available

IMO

Features:
- SPNO & SPCO configuration
- Subminiature, standard PCB layout
- Flux-Tight and Sealed Construction

Specifications:
- Contact rating: 7A at 250VDC / 10A at 277VAC
- Initial contact resistance: 100mΩ
- Contacts: SPST-NO, SPDT
- Max. switching voltage: 250VAC / 30VDC
- Max. switching current: SPST-NO: 15A; SPDT: 10A
- Max. switching power: 2770VA / 210W
- Initial insulation resistance: 100MΩ @ 500VDC
- Dielectric strength: 1500VAC
- Operating temperature: -40°C to +85°C
- Unit weight: Approximately 10g

SRG SERIES 30A MINIATURE HIGH POWER RELAYS

RoHS Compliant Available

IMO

SRG Open Relay

Features:
- 30A switching capabilities
- PCB coil terminals, ideal for heavy duty load
- 4K dielectric coil to contact
- Heavy load up to 7,200VA
- Open and Sealed types available
- AC Coil versions available

Specifications:
- Contact rating SPST- NO: 30A at 240VAC / 20A 28VDC
- Contact rating SPDT NO: 20A at 240VAC / 20A 28VDC
- Contact rating SPDT NC: 10A at 240VAC / 10A 28VDC
- Initial contact resistance: 50mΩ
- Contacts: SPST-NO, SPDT
- Max. switching voltage: 277VAC / 28VDC
- Max. switching current: SPST-NO: 40A; SPDT: NO 20A, NC 10A
- Max. switching power: 1250VA / 150W
- Initial insulation resistance: 1000MΩ @ 500VDC
- Dielectric strength: 1500VAC
- Operating temperature: -55°C to +85°C
- Unit weight: Approximately 36g

5A PC BOARD RELAYS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

- Environmentally friendly, Pb-free/cadmium-free
- SPDT contacts with high insulation between coil and contacts
- Up to 5A switching on the N.O. contacts
- Ensures an impulse withstand voltage of 8,000V between the coil and contacts

Fully sealed construction. Ideal for fan control of air conditioners and heating control of small appliances.

5A-8A PC BOARD RELAYS

RoHS Compliant Available

OMRON. RONIC COMPONENTS

- 5-24V
- Low Power Consumption: 200mW
- Sealed Construction
- High-Capacity and Single- and Dual-Coil Latching Types Available
- Meets FCC Part 68 Requirements
- Reduced Magnetic Interference and Contact Bounce with Moving Magnet Armature

High-capacity versions have LED indicator and surge suppression diode. Dimensions in inches (mm): .39 (9.90)H x .79 (20.06)W x .39 (9.0)L **Mfg. part no. P6B-26P** back connecting socket for double-pole non-latching versions also available. Single-coil latching series **G6BU-1114P-US** also available; *go online or call.*

G2R SERIES POWER RELAYS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

G2R series are slim-styled power PCB relays. Creepage distance of 0.31″ min. between coil and contact. Relays with **E** in mfg. part no. are high-capacity 16A; all others are general purpose. Relays with **N** in mfg. part no. include LED indicator; **ND** in mfg. part no. indicates LED indicator and surge suppression diode. Outside dimensions in inches (mm): 1.14(29)L x .510(13)W x 1.0(25.5)H. UL recognized, CSA certified. Also available: class B insulation, latching types and flange mount version with quick connects: order **mfg. part no. G2R-1-T-(voltage). Type P2R-P** connecting socket mounting plate, **Mfg. part no. P6C-08P** back-connecting PCB terminal, socket also available; *go online or call.*

PLUG-IN POWER RELAYS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- Environmental friendly (Cd, Pb free)
- Lockable test button models now available
- Built-in mechanical operation indicator
- Provided with nameplate
- AC type is equipped with a coil-disconnection self-diagnostic function (LED type)
- High switching power (1-pole: 10A)
- LED indicators, test button, and diode available
- Wide range of sockets also available; *go online or call*

8A-10A POWER PC BOARD RELAYS

RoHS Compliant Available

OMRON ELECTRONIC COMPONENTS

- Moving loop armature reduces size, magnetic interference and bounce time
- Semi-sealed and sealed versions available
- Low power consumption: only 200mW
- Non-natching

Rated current and coil resistance are measured at a coil temperature of +23°C with tolerance of ±10%. Dimensions shown are in inches (mm): .790(20.06)L x .590(14.98)W x .390(9.9)H.

10A POWER PC BOARD RELAYS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

Subminiature "sugar cube" relays are rated 10A and are UL Class B insulation certified. Withstand impulses of up to 4,500V. Maximum switching voltage: 250VAC, 125VDC. Operating temperature: -25°C to +85°C. Dimensions in mm (inches): 19.05 (.75)H x 22.5(.89)L x 16.51(.65)"W. Ideal for security equipment, home electrical appliances, audio equipment, and remote control switched power. UL recognized, CSA certified.

8-16A LOW-PROFILE RELAYS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

- Low-profile 15.7mm (H) x 28.8mm (L) x 12.mm (W)
- Low power consumption: (400mW, DC48-430mW)
- Over 8mm creepage and clearance coil to contact spacing for very high isolation
- Tracking resistance (CTI) rated at 250
- Vented or sealed (with ventable nib)
- UL recognized, CSA certified, VDE approved

Units with "CF" in mfg. part no. class F coil insulation; others have class B.

20A-30A PC BOARD AND FLANGE MOUNT RELAYS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

Fig. 1 - PC Board Mount | Fig. 3 - PCB + Quick Connect Terminals | Fig. 4 - Flange Mount | Fig. 2 - PC Board Mount Open Style

G8P series: industry standard 30A power relay. Class F coil insulation. Applications include HVAC and appliance controls. Meets UL873 column A spacing (¼" over surface ⅛" through air) and 6kV impulse surge coil to contacts. Dimensions in mm: PC board model = 32.1L x 27.7W x 20.1H; PC board + ¼" quick-connect terminals = 31.9L x 27.5W x 28.3H; flange mount = 50.3L x 27.7W x 28.3H. UL recognized, CSA certified.

G7SA SERIES FORCE GUIDED RELAYS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- 4 pole or 6 pole models
- Track-mounting or Back-mounting Sockets
- Conforms to: EN50205, EN61810-1
- 6A resistive load
- Temperature -40° to 85°C

The G7SA relays with force guided contacts are compact, slim and conform to EN standards. DIN mountable sockets make these ideal for control panels with limited space. Ideal for use with Safety Interlock circuits.

Mfg. Part No.	Contacts	No. of Poles	Voltage Rating (VDC)	Stock No.	Price Each

10A NOMINAL POWER LOW PROFILE PCB RELAYS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

Features:
- Low profile: 12.3mm
- Max. switching capacity: 2,500 VA (NO)
- IEC 60947-5-1, AC-15, DC13
- Clearance and creepage distance: 10 mm
- Models with high shock resistance (250 m/s2) are available
- Fully sealed or flux protection

Specifications:
- Contact rating:10 A at 250VAC; 5A at 30VDC
- Carry current: 10A
- Switching voltage: 400VAC, 300VDC
- Switching current: NO: 10 A, NC: 8 A
- Contact resistance: 100mΩ
- Operate time: 10ms (SR Models: 15ms)
- Release time 5ms
- Insulation resistance: 1,000MΩ
- Dielectric strength: 5,000VAC
- Operating temperature: -40°C to 85°
- Weight Approx. 7.8 g

5A HIGH-POWER PC BOARD RELAYS

RoHS Compliant Available

Panasonic

- Space saving packages
- High contact reliability due to bifurcated contacts
- Latching types available
- Soldering flux inflow prevented by terminal location
- Amber sealed types available
- High breakdown voltage for transient protection: 1,000 Vrms between open contacts, contact sets

Flat Package

Vertical Package (PC board)

Contact rating: 5A @ 250VAC. Max. switching power standard: DPDT 1250VA 150W, 4PDT 1000VA 150W. Max. switching power amber sealed: DPDT 750VA 150W, 4PDT 500VA 150W. Initial contact resistance max: 50mΩ. Initial insulation resistance: Min. 100MΩ at 500VDC. Operating temperature: up to 48VDC -40°C to +70°C, 110VDC -40° to +55°C. EB in mfg. part no. indicates amber sealed type. **L2** in mfg. part no. indicates 2 coil latching. UL/CSA, approved type is standard.

5-10A COMPACT PC BOARD RELAYS

RoHS Compliant Available

Panasonic

TÜV Rheinland

Sealed relays with 8mm spacing between coil and contacts. Universal terminal footprint. High dielectric withstanding for transient protection: 10,000V surge in microseconds between coil and contact. Nominal operating power: 530mW. Silver alloy contacts are 70% nominal voltage sealed. UL recognized, CSA certified, TÜV approved.

HE SERIES 48A, 30A, 20A POWER RELAYS / INVERTER RELAYS

RoHS Compliant Available

Panasonic

Features:

- Ideal for Solar inverter
- Contributes to energy saving in devices due to reduced coil hold voltage
- High insulation resistance
- Conforms to various safety standards
- Compact size: (LxWxH) 33 × 38 × 36.3mm

Specifications:

- Contact rating: 48A at 250VAC
- Contacts: SPST-NO
- Contact gap: 2.5mm (.099")
- Surge breakdown voltage: 10kV
- Contact material: AgNi
- Contact carrying power: 12,000VA
- Operating power: 1,920mW
- Insulation resistance: 1,000MΩ

8A IC DRIVEABLE PC BOARD RELAYS FOR FIELD LOAD SWITCHING

RoHS Compliant Available

Panasonic

- Amber sealed for automatic wave soldering and cleaning
- Initial contact resistance: 30 milliohms.
- 0.400" (10.16) row spacing
- Gold-flashed silver alloy contacts rated 8A, 2000VA
- 150W switching power
- 380VAC switching voltage
- Nominal operating power: 240mW
- Shock resistance: 20G
- Ambient temperature: -40°C to +60°C
- Dimensions: 0.445"(11.3)H x 0.551"(14)L x 1.220"(31.0)W
- DPST, 2-coil latching version also available

AXICOM 3A HIGH-SENSITIVITY DIP PC BOARD RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

DIP PC board relays have DPDT gold-plated silver-nickel contacts. They are industry standard DIP footprint and come in an immersion-cleanable [IP67] plastic sealed case. Dimensions in inches (mm): 0.799 (20.3) L x 0.398 (10.1) W x 0.45 (11.43) H. Meet FCC Part 68 voltage surge. Mate with 16-pin socket. 3A switching and carrying current.

OEG 3A SLIM LINE PC BOARD RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- 5mm wide, permitting high density spacing
- SPST contract arrangement
- Sensitive coil requires only 120mW coil power
- Well suited for HVAC controls, I/O panels, PLCs
- Bifurcated AgNi contacts
- Maximum switching rate: 12,000 ops./min/ (no load); 100 ops./min. (rated load)
- Expected mechanical life: 20 million operations (no load)
- Expected electrical life: 100,000 operations (rated load)
- Minimum load: 1mA @ 5 VDC
- Operate power: 58.8mW

Dimensions in inches (mm): 0.492 (12.5)H x 0.787 (20.0)W x 0.197 (5.0)L.

SCHRACK RT SERIES RELAY PACKAGES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Relay package consisting of RT relay, DIN-rail socket, plastic retaining clip, module and marking tag
- 1CO with 16A or 2CO with 8A rated load
- Sensitive DC- or AC coil
- Reinforced insulation (protection class II / VDE 0700), safe separation to VDE 0160
- Jumper bars for interconnection
- Contact material: AgNi 90/10

P&B 14A PC BOARD MINIATURE RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- High sensitivity-coil power as low as 212mW
- SPDT contacts
- Single coil, non-latching
- Immersion cleanable

Dimensions: 0.591H x 0.394W x 1.181"L (15mm x 10mm x 30mm). 3-60VDC types and SPST-NO contacts available; *go online or call*.

P&B 8-16A MINIATURE POWER PC BOARD RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- SPST through DPDT contacts
- Low-profile 15.7mm height
- Immersion cleanable and flux-tight versions available
- VDE 10mm spacing, 5kV dielectric, coil-to-contacts
- UL class F coil insulation system
- Conform to UL 508, 1873, 353 and 1950

8A-16A relays are miniature and low profile. Expected mechanical life: 30 million operations. Sensitive coil: 400mW. Dimensions: 0.62"H x 1.14"L x 0.50"W; pin length = 0.17". All units listed have contact material of silver-nickel 90/10. **Suffix "F"** in mfg. part no. indicates class F coil insulation. No type suffix indicates class B coil insulation. AC coil relays are Schrack brand. 10A, other contact styles, latching, high-temperature, and high-inrush and 200mW sensitive coil models also available; *go online or call.*

RoHS Compliant Available

TE connectivity

Authorized Distributor

Specifications
- 1 pole 12 / 16 A, 1 CO or 1 NO contact
- DC-coil 400 mW
- 5 kV / 10 mm coil-contact, reinforced insulation
- Ambient temperature 85°C, HOT version for 105°C
- Product in accordance to IEC60335-1

Applications
- Household appliances
- Boiler control
- Timers
- Garage door control
- POS automation

Fig. 3

Up to 30 amp switching in SPST and 20 amp in SPDT arrangements. Meets UL 873 and UL 508 spacing - ⅛″ through air, ¼″ over surface. Class F coil insulation standard. Silver-cadmium oxide contacts. Maximum coil paper: 2.8W. Nominal coil power: 1.0W. **"P"** in mfg. part no. indicates unsealed version with plastic dust cover. **"S"** in mfg. part no. indicates version that is immersion cleanable, has a knock-off nib and comes in a sealed plastic case. **"V"** in mfg. part no. indicates version that has a flux-proof plastic case. UL Class F insulation standard. UL recognized, CSA certified.

P&B 30A PC BOARD RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Class F coil insulation
- Max coil power: 2.8W
- Contacts: silver-cadmium oxide
- Operating temperature: -55°C to +85°C
- Continous duty cycle

T90N

T90S

T90N series relays are open with no cover (snap-on dust cover available as an option). **T90S series** relays are immersion cleanable, plastic sealed case available. Designed primarily for appliance industry and heating, ventilating and air conditioning markets. Mechanical life expectancy: 10 million operations. Electrical life expectancy: 100,000 operations.

REED RELAYS

2270 SERIES REED RELAYS

NEW

features:
- Very small footprint (0.17 in2), high reliability reed relays
- High Insulation Resistance - 1012 Ω available with model 2274
- Long Life/High Reliability
- Hermetically sealed contacts for long life
- Epoxy coated steel shell provides magnetic shielding
- 125##UndefTag-786##C Operating Temperature
- Specifically engineered for OEM designs and maintenance of existing production fixtures

Specifications:
- Switching Current Max: 250 mA
- Relay Mounting: Through Hole

MOLDED SIP REED RELAYS

RoHS Compliant Available

9081 9001, 9007 9002 9091 9092

Series	Outside Package Dimensions in inches (mm)
9081	.890(22.60)L x .295(7.50)W x .315(8.00)H
9001, 9002, 9007	.760(19.34)L x .200(5.08)W x .300(7.62)H
9091	.600(15.24)L x .275(6.99)W x .150(3.81)H
9092	.600(15.24)L x .150(3.81)W x .350(8.89)H

- Contact carrying power: 10W
- Switching current: 0.5A
- Switching voltage: 200VAC
- Operating temperature: -20°C to +85°C

9001 series is engineered for low-level switching. **9002 series** is ideal for 50-ohm transmission line switching as found in automatic test equipment, instrumentation, RF, telecommunications, and other applications. Designed for mounting on 0.2″ (5.08) centers and automatic insertion using SIP equipment. Rugged, epoxy-molded, lead frame package is impervious to cleaning fluids and enables use in harsh, industrial environments. **-01 suffix** denotes internal diode option. Relays with a magnetic shield coil suppression diode are also available. **9091** and **9092 series** relays feature similar functional characteristics as **9001 series**, but require only 40% of the board area.

MICROMINIATURE REED RELAYS

RoHS Compliant Available

- Hermetically sealed contacts for long life
- Epoxy coated steel shell provides magnetic shielding
- Operating temperature: -20°C to +85°C

Microminiature reed relays occupy 0.17″ (4.32) square of PC board space and provide improved system to lock-in terminal pins. **2200-2301** and **-2302 series** are engineered to meet automatic test equipment specifications. Capable of 5ms must-operate time, 500 x 10^6 life expectancy. **2200-2301 & -2302 series** operate voltage: 3.6VDC; release voltage: 0.5VDC. **2204 & 2211 series** (5V version) operate voltage: 3.8VDC; release voltage: 0.4VDC. **2204 & 2211 series** (12V version) operate voltage: 9.0VDC; release voltage: 1.0VDC. Outside package dimensions in inches: .810L x .210W x .225H.

MULTIPOLE MICROMINIATURE REED RELAYS

RoHS Compliant Available

TOTO TECHNOLOGY

2300 series relays occupy 0.17" (4.32) of PC board space – yet their additional height allows for SPDT, 3PST and DPDT. Operating temperature: -20°C to +85°C. Carrying current: 1.5A for **2332, 2333**, and **2341 series**; 0.5A for **2342 series**. Switching current: 0.5A for **2332, 2333**, and **2341 series**; 0.25A for **series 2342**. Must operate/Must release voltages: 3.8/0.4VDC for 5V relays; 9.0/1.0VDC for 12V relays. Outside package dimensions in inches(mm): .810(20.57)L x .210(5.30)W x 370(9.40)H. Contacts are hermetically sealed. Relays with electrostatic shield also available; specify **suffix -010** in mfg. part no.; *go online or call.*

HIGH-VOLTAGE SIP REED RELAY

RoHS Compliant Available

TOTO TECHNOLOGY

- High voltage switching up to 1000V
- High dielectric strength (2000VDC)
- High insulation resistance: $10^{11}\Omega$ min.
- High reliability, hermetically sealed contacts for long life
- High-speed switching compared to electromechanical relay
- Molded thermoset body on integral lead frame design
- Optional coil suppression diode - protects coil drive circuit
- Magnetic shield - reduces interaction

9104 series relays are 4-pin molded SIP. SPST-NO contacts. Switching current: 0.5A. Carry current: 1.3A. Contact power: 10W. Operating temperature: -20°C to 85°C. Outside package dimensions in inches (mm): .950(24.13)L x .245(6.22)W x .320(8.13)H.

S SERIES HIGH-VOLTAGE REED RELAYS

RoHS Compliant Available

cynergy3 components

- Designed specifically for high voltage
- Rhodium contacts for low resistance
- Contact form: SPST-NO
- 5kV isolation between contacts
- Max. switching power: 10W
- Max. switching voltage: 20V
- Max. switching current: 0.5A
- Max. carry current: 2A

The S series was developed for the high voltage ATE market, where printed circuit board (PCB) space is at a premium, the S series high voltage reed relay offers a 3 or 5* kV isolation performance in a 30mm size package. With low contact resistance, the S series is suitable for many high voltage applications at DC and low frequency, where performance and reliability are paramount.

RF REED RELAYS MINIATURE SCREENED, OPEN FRAME 4 SERIES

RoHS Compliant Available

cynergy3 components

Features

- A highly flexible, low cost package for RF applications in the 1-30MHz band
- The use of vacuum reed switches with rhodium contacts offers high isolation voltages
- Low contact resistance and long operating lifetime
- Available as Form A (SPNO), Form B (SPNC) or latching (bistable) contact configurations with switch connections via either PCB or flying lead

Specifications

- 3.5A RF at 1-30MHz
- 3.5kV isolation
- Contacts Form A, B or latching
- Long lifetime

RF REED RELAY SCREENED FRD12000 SERIES

RoHS Compliant Available

cynergy3 components

Features

- Used many HF radio system specifications, with applications in commercial maritime (GMDSS)
- The use of vacuum reed switches with rhodium contacts offers high isolation voltages, low contact resistance and long operating lifetime
- Available as Form A (SPNO) or Form B (SPNC) contact configurations

Specifications

- Up to 8kVDC Isolation between Contacts
- 6A Carry Current (up to 30MHz)
- Excellent RF Performance
- Ideal for Antenna Tuning Units
- Form A/B Contact Configuration

REED RELAYS

RoHS Compliant Available

HAMLIN // NOW PART OF Littelfuse Expertise Applied | Answers Delivered

DIL

2-4-2 SIL

2-2-2 SIL

Relays are molded construction and compatible with automatic insertion and board washing. All contacts are run-in one million operations prior to testing. Operating temperature: -40°C to +85°C. Immune to 50G shock and 20G vibration. 10-2000Hz. Maximum contact resistance: 200 milliohms. Other voltages are also available. **721, 3321**, and **3621 series** reed relays are also available in a form B (normally closed) configuration in both 5-volt and 12-volt coil versions. Form B 24-volt coil not available on **3621 series.** All of the **721, 3321** and **3621 series** reed relays are available with an external magnetic shield; *go online or call.*

HIGH-VOLTAGE RELAYS

STRUTHERS-DUNN

- 102V switches up to 5KV / 10mA
- 102HV switches up to 10KV / 5mA
- Fully enclosed
- Ideal for medical or hipot applications
- Tungsten contacts
- Dielectric 6000 Volts (V) / 12000 Volts (HV)

102V series = 50VA max switching load, 10mA max current, 5000 max voltage.
102 HV series= 50VA max switching load, 5mA max current, 10000 max voltage.

P&B DIP AND SIP DRY REED RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

JWD series DIP units and **JWS series** SIP units are designed to accommodate automatic component insertion and permit high density packaging of components on printed circuit boards. Contact material: ruthenium. Mounted height is only 0.315″ (8.00), allowing PC board spacing on 0.500″ (12.70) centers. Molded epoxy package with terminals on 0.100″ (2.54) centers compatible with automatic wave soldering. Can be immersion or spray cleaned. Operating temperature range: –35°C to +85°C.

KILOVAC 8A - 25A POWER RELAYS

TE connectivity

Authorized Distributor

- SPDT contacts
- Coil voltage: 26.5VDC
- Max. isolation voltage: 8000VDC

HC-1 and HC-3

HC-1 and HC-3 series relays have contacts sealed in a vacuum. **HC-1** relays are widely used in RF applications. Their copper contacts are not designed for load switching. **HC-3 series** relays have tungsten contacts, switch low current loads. **HC-5 series** relays have contacts sealed in SF-6 gas for make-only power switching in capacitive discharge applications. **HC-2 and HC-4 series** relays have contacts sealed in a vacuum and meet requirements of MIL-R-83725. **HC-2** has copper contacts not designed for load switching. **HC-4** relays have tungsten contacts, switch low level loads. **HC-6** series relays have contacts sealed in SF-6 gas for make only power switching in capacitive discharge applications. Each has a 0.5625″-32 threaded base with hex nut and lockwasher for mounting.

Mfg. Part No.	Max. Carry Current (A)	Power Switch	Switch Voltage (kV)	Stock No.	Price Each 1-4
HC-2	25	Carry Only	8	09J3881	533.01

HC-4	15	Make & Break	8	09J3883	556.10

(83662)

KILOVAC 5A - 30A POWER RELAYS

TE connectivity

Authorized Distributor

- Power switch: make & break
- Max isolation voltage: 12-10,000VDC
- Vacuum-sealed contacts for low-current load switching

K81B

K81C

K81 series relays switch up to 10kV. Carry current varies by model. Mfg. part no. ending in "57" is a panel mount relay with stud terminals; "35" designates PC board mount with only PC terminals; and "45" is PC board mount with flying leads for load connections.

SF-Y SERIES COMPACT SAFETY RELAYS WITH FORCIBLY GUIDED CONTACTS

RoHS Compliant Available

Panasonic

4-Pole

6-Pole

Features:
- Forcibly guided contact structure (EN 50205, Type A)
- Small size
- Low profile: 14.5mm (0.571")
- Reinforced insulation: clearance and creepage 5.5mm (0.217")
- Basic insulation: clearance 3mm (0.118") and creepage 4mm (0.157") between all contacts and between contact NC3 and coil

Specifications:
- Nominal operating power: 670mW
- Max. switching voltage: 250VAC, 30VDC
- Max. switching current: 6A
- Contact material: gold-flashed silver nickel alloy

SF SERIES SLIM COMPACT SAFETY RELAYS

RoHS Compliant Available

Panasonic

TÜV Rheinland

Features:
- Forcibly guided contact structure (EN50205 ClassA TÜV recognized)
- Slim profile (mm inch)
- Built-in LED indication type available
- Fast response time is achieved (8 ms or less).
- High shock resistance (Functional: Min. 200m/s2)
- PC board sockets also available (4 and 6-pole)
- Lineup also includes DIN terminal socket with finger protect construction. (4 and 6-pole)

Specifications:
- Initial contact resistance: 100mΩ max.
- Contact material: Gold flashed silver tin oxide
- Nominal switching capacity: 6A / 250 VAC; 6A / 30 VDC
- Max. switching power: 1500VA / 180W
- Max. switching voltage: 250VAC / 30VDC
- Max. carrying current: 6A
- Min. switching capacity: 1mA 5VDC
- Nominal operating power: 4-pole: 360mW; 6-pole: 500 mW
- Initial insulation resistance: 1000MΩ @ 500VDC
- Operating temperature: -40°C to +85°C
- Unit weight: 4-pole: Approx. 20g; 6-pole: Approx. 23g

PRINTED CIRCUIT BOARD ZERO-CROSS SWITCHING RELAYS

RoHS Compliant Available

CARLO GAVAZZI

- 4 to 32VDC Input
- 3, 5, 10 and 25 Amp Versions
- 3A and 5A Versions Are Available Soldered into DIN Rail Mount Socket
- 10A Versions Feature Integrated Heat Sink (25A with Forced Air Cooling)

Zero switching PC board SSRs are ideal where mounting space is limited. 3A and 5A types with **suffix MI** in type number are soldered into a DIN rail mount socket with an LED indicator; *go online or call.*

G3RV SERIES SOLID STATE RELAYS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

- Contacts: SPST-NO
- Operating temperatue: -30°C to +55°C
- Long electrical life and high speed switching
- Large plug-in terminals for reliable connection
- G3RV-D (DC load) models can manage resistive loads of 100 uA to 3.0 A
- LED indicator for visible operation checking
- Convenient quick electrical connections possible with G3RV push-in models and cross bar connectors
- Low power consumption for energy savings
- G3RV is cUL listed when correct relay is matched with the G3RV socket

PCB MOUNT SOLID-STATE RELAYS SSRC SERIES

c UL us RoHS Compliant Available

TE connectivity

Authorized Distributor

Features:

- PC board mount in SIP configuration
- Paired SCR output
- Contacts: 1 Form A (SPST-NO)
- Rated up to 5A at 660VAC
- Isolation voltage: 4kV
- DC control input: 3-15VDC
- Pin-out compatible with standard I/O module boards
- Zero voltage or random voltage turn-on versions

Applications:

- Blood analysis equipment
- Portable vital sign monitors
- Lasers
- Scanners
- Baby warmers
- Elevator control panels
- LED's, dimmer ontrol, traffic control
- Industrial machinery and commercial equipment

Mfg. Part No.	Load Current (A)	Load Voltage (Vr)	Control Voltage (VDC)	Surge Current (A_{PK})	Stock No.	Price Each 1-9

PHASE ANGLE FIRED ANALOG SWITCHING RELAYS

RoHS Compliant Available

CARLO GAVAZZI

- For phase angle control of resistive loads
- Proportionate output to analog control signal
- Up to 100A, 660VAC switching
- LED indication

Fig. 1

Fig. 2

Ideally suited for "phase angle" control of resistive loads, such as heater bands or incandescent lamps. The relay switches off every time the current crosses zero and switches the load voltage proportionally with the applied analog control current. Back-to-back SCR output, up to 660VAC, controlled by 4-20mA DC or 0-10VDC signal. The 0-10VDC controlled models require a constant 24 VDC supply voltage. Contact your sales office.

Mfg. Part No.	Fig.	Line Voltage (VAC)	Output Current (A)	Control Input	Stock No.	Price Each

SOLID-STATE PANEL-MOUNT RELAYS

SCR ZERO-CROSS SWITCHING RELAYS

RoHS Compliant Available

CARLO GAVAZZI

- Green LED indicator
- Protective touch-safe cover
- Built-in MOV protection
- SMD internal circuitry
- No internal mechanical stress (no potting)
- AC and/or DC control voltage
- Up to 100A switching capability
- Up to 660VAC switching

Zero switching solid-state relays offer up to 1400Vp non-repetitive peak voltage. Provide high current carrying capabilities for operational voltages up to 660VAC. Normally open, back-to-back SCR outputs are utilized in the output circuitry to reduce leakage current. UL recognized, CSA certified, CE compliant. 600VAC switching types also available; *go online or call.*

TWO-POLE SCR ZERO-CROSS SWITCHING RELAYS

RoHS Compliant Available

CARLO GAVAZZI

- 25A or 40A SCR outputs
- 4.5 to 32VDC input
- 2 Outputs controllable separately, isolated from one another
- 2 LEDs, 1 for each input signal
- Easy installation via fast-on terminals

Zero switching solid-state relays offer 2 isolated outputs, which can be controlled by separate 4.5 to 32VDC control signals input via fast-on terminals. Up to 1200Vp non-repetitive peak voltage. 2 LEDs indicate the control status of each pole. Normally open, back-to-back SCR outputs are utilized in the output circuitry to reduce leakage current. UL recognized, CE compliant, VDE approved.

3-PHASE ZERO SWITCHING SOLID STATE RELAYS

RoHS Compliant Available

CARLO GAVAZZI

- Built-in snubber network and protective cover
- Bright LED indication
- Unique raised back plate
- Optimum heat dissipation
- AC and/or DC control voltage
- Up to 75 A, 660 VAC switching
- Up to 1200 Vp non-repetitive voltage

Three phase zero switching solid state relays for resistive loads (heater bands) and inductive loads. Optional over temperature protection option with alarm output.

24-275 VAC or 24-50 VDC CONTROL

COOLTECH SOLID-STATE RELAYS

RoHS Compliant Available

CROUZET AUTOMATION

22.5mm 45mm 90mm

Crouzet's new CoolTech solid-state relays offer the latest in integral heat sink / SSR technology. Standard features include; an epoxy-free design, internal transient protection, DBC substrate, IP20 touch-safe housing, EMC compliance, and relay or contactor terminal configuration. The CoolTech is rated up to 30A @ 660Vac in a compact 22.5mm housing, or 45A in a 45mm housing.

SOLID-STATE SERIES RELAYS

RoHS Compliant Available

CROUZET AUTOMATION

TÜV Rheinland

Features:
- Current ratings from 10 to 125A
- Output voltage from 24 to 660Vac
- Back to back SCR's for severe inductive loads
- Direct bond copper substrate
- Improved power lead frame design
- LED input status indicator
- Feature same screw-terminal package as Crouzet's traditional solid-state relays *on page 1681*

Specifications:
- 4000Vac Optical Isolation
- Operating temperature: -40° to 80°C
- Operating Frequency: 47 to 63Hz
- Housing Material: UL94V-0

HDC SERIES SOLID-STATE PANEL MOUNT RELAYS

RoHS Compliant Available

crydom

- Current rating: 120A and 160A
- LED status indicator
- Heavy duty stud terminals
- AC or DC control
- Microsecond Turn-On and Off times
- Low On-state voltage drop
- Ambient Operating Temperature range: -30°C to 80°C
- Suffix "H" thermal pad included

PANEL MOUNT SOLID-STATE RELAY ASSEMBLIES

RoHS Compliant Available

crydom™

- Single Channel or 3 Phase output
- AC output current rated at 40°C
- Control voltage: 3 to 32VDC
- Dielectric strength: 4000Vrms
- Insulation resistance: 1090hms
- Capacitance: 8pF
- Operating temperature: -40 to 80°C
- Encapsulation: Themally conductive epoxy

HS-251

EL SERIES SOLID-STATE PANEL MOUNT RELAYS

RoHS Compliant Available

crydom™

Features/Specifications

- Ratings of 5A and 10A @ 3-100 VDC
- Ratings of 5A, 10A and 20A @ 24-280 VAC
- UL Recognized, CE and RoHS Compliant
- 5, 12 and 24VDC control
- Small outline panel mount "mini-puck" package
- Fast on terminal for easy wiring
- Mosfet Output
- Zero-crossing (resistive loads) or random-fire (inductive loads) output

Applications

- HVAC
- Panel builders
- Medical equipment
- Food/process control
- Theater lighting

Mosfet Output — Zero-crossing

LVD SERIES SOLID-STATE PANEL MOUNT RELAYS

RoHS Compliant Available

crydom

Specifications
- Low Voltage Disconnect
- Output Ratings from 40A to100A @ 3-75 VDC
- Low On-State Resistance FET Output
- Six DC control Ranges Available for 12 & 24VDC Battery Systems
- Compact Encapsulated Panel Mount Package

Mfg. Part No.	Control Voltage (VDC)	Load Voltage	Load Current (A)	Stock No.	Price Each 1-9

EVOLUTION DUAL SOLID STATE RELAYS

RoHS Compliant Available

crydom

Features:
- Improved mechanical and thermal design providing higher capacity output and significantly increased power density
- Screw termination suitable for rated load currents up to 50A at 660VAC per channel
- Each AC output channel features high power SCRs with high surge ratings and is available with either zero voltage or random turn on
- Four different input termination options (pin, locking connector, detachable barriers w/screws, and direct wire)
- For direct wire input termination; *go online or call*

IP20 - Cover

IP00 - No Cover

Specifications:
- Output rating (per channel): 25A and 50A
- Operating voltage rating: 120/240 and 480VAC
- Control input: 4-32VDC
- Left-right output screw connection
- Zero voltage turn-on
- SCR output for heavy industrial loads
- IP20 sealed

IP20 - COVER

AC OUTPUT SOLID-STATE RELAYS WITH TOUCH-SAFE COVER

RoHS Compliant Available

crydom

- Integrated removable touch-safe cover rated IP20
- Broadened operating voltage range (24 to 280VAC)
- Low off-state leakage (1mA, snubberless)
- SCR AC switch output
- Zero cross and random voltage switching available
- LED status indicator
- Standard panel mount package
- User friendly, universal connectors
- EMC compliant design

Operating voltage: **(CW24 series)**: 24-280VAC, **(CW48 series)**: 48-660VAC. Max. turn-on and turn-off time: ½ cycle. Blocking voltage: 600V **(CW24 series)**, 1200V **(CW48 series)**. Operating Temperature: -40°C to 80°C. Dielectric strength: 4000V_{RMS}. Heatsinks, covers, thermal pads and noise filters available; *on page 1687.*

Add the following suffix to the end of the mfg. part no. to obtain the respective option:

Suffix	Option
-10	Random voltage switching
E	24VAC input (18-36VAC)
P	Internal overvoltage protection
S	Internal snubber

SERIES 1 SCR OUTPUT SPST-NO OR NC RELAYS

RoHS Compliant Available

crydom

- Current ratings up to 125A @ 530VAC
- SCR output for heavy industrial loads
- AC or DC control voltage
- Zero crossing (resistive loads) or random-fire output (inductive/phase-control loads) available
- N.O. or N.C. outputs

Control voltage for DC models is 3-32VDC. Control voltage for AC models is 90-280VAC. **-B suffix** in mfg. part no. indicates normally closed (NC) version. **-H suffix** in mfg. part no. indicates heat transfer pad version. All models have 4000 V_{RMS} opto-isolation. To gradually apply power to the load when energized by the control voltage, order **mfg. part**

➤CONTINUED➤

SERIES 1 SCR OUTPUT SPST-NO OR NC RELAYS (CONT.)

no. SST120 (120V) or **mfg. part no. SST240 (240V)** soft start modules driver only. Relays shown have zero-cross switching. To order random-fire add **"-10"** to mfg. part no. suffix. To order 24VAC (8-36VAC) control voltage, add **"E"** suffix. Outside dimensions in inches (mm): 1.87 (47.5) L x 1.80 (45.7) W x 0.9 (22.9) H. UL recognized, CSA certified, VDE approved, CE compliant.

HIGH-VOLTAGE AC OUTPUT SOLID-STATE RELAYS

RoHS Compliant Available

crydom

- Features same industrial standard surface-mount package as **Series 1** relays *on pages 1684-1685*
- Current rating up to 90A @ 660VAC
- SCR output for heavy industrial loads
- AC or DC control voltage
- Zero-cross (resistive loads) or random-fire (inductive/phase-control loads)
- SPST-NO contacts

Dual relays feature two totally independent AC output relays in a single standard panel-mount package. Control voltage: 4-32VDC (15mA @ 5VDC) for DC relays, 90-140VAC (15mA @ 120VAC) for AC relays. UL listed, CSA certified, VDE approved and CE compliant.

SOLID-STATE PANEL-MOUNT RELAYS

DUAL 25A & 40A AC OUTPUT SOLID-STATE RELAYS

RoHS Compliant Available

crydom

- Dual SSR output in one industry standard package
- Current ratings up to 40A @ 480VDC
- SCR output for heavy industrial loads
- ¼" fast-on output terminals

Control voltage: 4-15VDC. Outside dimensions: 2.30 (58.4)L x 1.80 (45.7)W x .850 (21.6)H. Units shown are 240VAC(24-280VAC). 480VAC(48-530VAC) models are also available; *go online or call.*

53TP SERIES THREE PHASE SOLID STATE RELAYS

RoHS Compliant Available

crydom

- Rating: 25A, 50A per phase @ 48-530 VAC
- 2 package styles IP20 or IP00 (see IP00 spec sheet for more information)
- SCR output for heavy industrial loads
- AC or DC control
- Zero-crossing (resistive loads) or random-fire (inductive loads) output
- LED input status indicatior
- Transient protection built in
- IP20

SOLID-STATE RELAY FILTERS — AC OUTPUT

RoHS Compliant Available

crydom

Single Phase

Three Phase

- Suppresses EMI noise
- Simple installation in new or existing equipment

Designed to significantly reduce EMI noise generated by solid-state relays to meet EMC regulations. All AC solid-state relays that use thyristor switching devices generate some low frequency noise, that may appear as conducted emissions on the main supply line connection. Current is not required to pass through the filter. The only connections required are across the incoming supply line.

MAGNECRAFT PANEL MOUNT SOLID-STATE RELAYS

RoHS Compliant Available

Schneider Electric

High reliability, opto-isolated solid-state AC output relays enable switching of AC loads up to 125A and DC output models to switch loads up to 40A VDC. LED lamp indicators. AC output has back-to-back SCRs. Isolation voltage: 4000VAC std. (input to output). Temperature range: -30°C to +80°C. Input current DC: 14mA @ 5VDC. Input current AC: 8.5mA @ 120VAC, 22mA @ 240VAC. Leakage current: 8mA @ 120VAC, 10mA max. @ 240VAC. Dimensions: 2.250L x 1.750W x 0.996"H. UL recognized file No. E52197.

OMRON AUTOMATION & SAFETY

- Protective cover for greater safety
- Built-in varistor effectively absorbs external surges
- Operation indicator enables monitoring operation
- 5 to 90A output current
- Screw terminals

The **G3NA** is an industry standard "hockey puck" style, solid state relay. Ideal for industrial switching applications where long life, heavy duty loads and fast switching speed are required. Standard operation indicator. Output load current can be significantly increased with a **mfg. part no. Y92B** heat sink. Dimensions: 2.28 x 1.69 x 1.06" (58 x 43 x 27). **-UTU** models are also VDE (TÜV) approved. Additional models available; *go online or call.*

AC and DC Controlled

Z Series

Heatsink

- 4,000V optical isolation input to output
- Zero voltage turn-on
- Turn-on/turn-off time: ½ cycle maximum
- Operating frequency: 25 to 65Hz (operates at 400Hz with six times off-state leakage)
- Coupling capacitance input to output: 8pF maximum
- DV/DT off-state: 200 volts per microsecond
- DV/DT commutating: snubbed for rated current at 0.5 power factor
- TTL compatible
- Operating temperature range: -40°C to +100°C
- Order IP20 touch safe cover for standard case separately below
- UL recognized, CSA certified, CE compliant

SOLID STATE PANEL MOUNT AQA SERIES RELAYS

RoHS Compliant Available

Panasonic

Features

- Input voltage: 4VDC to 32VDC
- Input current: 20 mA max.
- Load voltage: 75VAC to 250VAC
- Compact sze: W 40 x L 58 x H 25.5 mm (W 1.575 x L 2.283 x H 1.004 inch)
- Terminal cover for safety (output side only)) *Cover on input side is available as option
- Mounting pitch 47.5 mm (1.870 inch)
- Built-in varistor for excellent surge absorption
- LED indication for operation status verification

Applications

- Heater control
- Commercial: Cooking machine, vending machine, freezer and refrigerator
- Industrial: Molding machine, temperature controlled bath, printing machine and packing machine

SSRD

SSRQ

SSRD series relays comprise 2 totally independent, optically-isolated, inverse parallel SCR output solid-state relays in 1 standard package. Used as 2 On/Off switches for loads through 25 amps. 2 x SPST-NO. 2500Vrms isolation. Overall dimensions: 2.25" L x 1.75" W x 1.26" H. **SSRQ series** relay comprises 4 independent, optically-isolated, triac output solid-state relays in 1 package. Used as 4 On/Off switches for loads through 20A. 4 x SPST-NO. 250Vrms isolation. Overall dimensions: 2.3" L x 1.75" W x 1.225" H. Line voltage: 24-280VAC. Input voltage: 4-15VDC. Both are UL recognized for industrial applications.

TE connectivity

Authorized Distributor

SSRT series relays have TRIAC output and are controlled by an optoelectronic coupler. Intended for use as an On/Off switch for loads through 25 amps. EMI and RFI are greatly reduced due to zero voltage turn-on and zero current turn-off of the load. SPST-NO contacts. Plastic case is UL rated self-extinguishing. 400V rms isolation. Overall height: 0.87". Line voltage: 24-280VAC.

SSR series have medium/high power, 120/240VAC, 47-70Hz inverse parallel SCR output solid-state relay and are controlled by an opto electronic coupler. Intended for use as On/Off switch for loads through 110 amps. Line voltage: 24-280VAC. SPST-NO contacts. 400Vrms isolation. Zero voltage turn-on except **"R" suffix**, which is random voltage turn-on. UL recognized.

RGC1F SOLID STATE RELAY CONTACTORS WITH INTEGRATED FUSE

RoHS Compliant Available

CARLO GAVAZZI

- Solid State Contactor with integrated fuse
- Zero Cross Switching
- Operational voltage: 230 VAC and 600 VAC
- 35mm width
- Control voltage: 3 - 32 VDC or 4 - 32 VDC
- Heater Break and SSR short circuit detection option
- Rated Load Currents of 20 AAC, 30 AAC and 40 AAC
- Alarm Signal Output
- 100 kA short circuit current rating

This solid state contactor includes three functions in one housing: power switching, short circuit protection by semi-condcutor fuse and system monitoring. RGC1FA is the version including the powerswitch and the fuse version with a fuse while the RGC1FS includes also the monitoring function which detects load, fuse and SSR faults.

The RGC1FA Series includes the powerswitch and the fuse version with a fuse.

Mfg. Part No.	Operating Voltage Range	Control Voltage Range	Current Rating (A)	Stock No.	Price Each
● RGC1FA23D20GGE	24V AC to 240V AC	3V DC to 32V DC	20	73T1936	118.00
● RGC1FA23D30GGE	24V AC to 240V AC	3V DC to 32V DC	30	73T1937	124.00
● RGC1FA23D40GGE	24V AC to 240V AC	3V DC to 32V DC	40	73T1938	146.00
● RGC1FA60D20GGE	42V AC to 600V AC	4.5V DC to 32V DC	20	73T1939	130.00

RGC2/RGC3 SERIES 3-PHASE SOLID STATE RELAYS W/ INTEGRATED HEATSINK

RoHS Compliant Available

CARLO GAVAZZI

- 2-pole & 3-pole AC switching solid state contactors
- Product width up to 70mm
- Rated operational voltage: up to 600VAC
- Rated operational current: up to 75AAC
- Control voltages: 5-32VDC, 20-275VAC (24-190 VDC)
- Up to 15,000A²s for I²t
- Motor ratings up to 11kW @ 400VAC, 25HP @ 600VAC
- Integrated varistor protection on output
- Controlled fan operation for versions with integrated fan
- UL, cUL Listing
- 100kA Short Circuit Current Rating according to UL508
- DIN or panel mount
- RoHS compliant

This product is intended to replace mechanical contactors especially when switching is frequent. The smallest product width in the **RGC2, RGC3** range is 54mm (3xDIN) and goes up to 70mm. 2-pole and 3-pole switching options are available. Switch ON occurs at the voltage zero cross and switch OFF occurs at the current zero cross. Apart from resistive and slightly inductive loads, the RGC is certified for motor switching with associated motor ratings. Varistors are integrated for output overvoltage protection. A green LED gives indication of control voltage presence. Fan operation is controlled for the versions which have an integrated fan.

2-POLE SWITCHING + 1-POLE DIRECT, ZERO CROSS SWITCHING

3 PHASE SOLID STATE RELAYS

RoHS Compliant Available

CROUZET AUTOMATION

TÜV Rheinland

Fig. 1

Fig. 2

Features:
- Three-phase *(motor-reversing)* solid-state relay
- DBC substrate for superior thermal performance
- Epoxy-free design reduces internal component stress
- Back-to-Back dual SCR output for heavy industrial loads
- 100k-cycle UL508 endurance rating for enhanced reliability
- No external transient protection required (internal TVS)
- EMC Compliant for reliable operation in harsh environments
- Epoxy-free design reduces internal component stress

Specifications:
- Ratings up to 50A at 530Vac
- 4000Vac Optical Isolation
- Operating temperature: -40° to 80°C
- Operating Frequency: 47 to 63Hz
- Housing Material: UL94V-0

PCB Relay Socket

- AC and DC output solid state relay in an industry standard
- EMR plug in package
- Current rating: 3 and 5 amps
- Load voltage range of 1-48 and 1-80 VDC
- Ambient operating temperature: -30°C to 80°C
- Fits standard DIN rail & PCB mountable sockets
- LED input status indicator
- AC or DC control
- Motor Controller Rated

PROPAK™ AC OUTPUT RELAYS

RoHS Compliant Available

crydom

- Zero-cross (resistive loads) or random-fire (inductive/phase-control loads) output
- SCR output for heavy industrial loads
- LED input status indicator
- Optically isolated
- Box clamp terminals for easy installation

Relays feature status indicating LED and "fingerproof" easy-to-use input and output cage-type terminals. All types are panel mount and offer zero-cross switching. For random-fire output add "-10" to mfg. part no. suffix. **CMD series** have 3-32VDC control. **CMA series** have 10-140VAC control. ISO 9002 certified. Dimensions: 3.0 (76.2)L x 1.75 (44.5)W x 1.15 (29.2).

SOLID-STATE DIN-RAIL MOUNT RELAYS CKM SERIES

RoHS Compliant Available

crydom

- Ratings from 10A to 30A at 60VDC
- Slim 22.5mm (width) package
- Low Leakage
- LED input status indicator
- DC control
- DIN Rail and Panel Mount

Mfg. Part No.	Load Current (A)	Load Voltage (VAC)	Control Voltage	Surge Current (A_{PK})	Stock No.	Price Each 1-9
● CKM0620	20	0-60	4-4VDC	60	61M3762	86.79
● CKM0630	30	0-60	4-4VDC	90	53M0261	108.64

(163265)

DIN MOUNT SOLID-STATE RELAYS

RoHS Compliant Available

crydom

- Integral heat-sink eliminates need for thermal calculations
- 22.5mm DIN mount package
- Current ratings up to 30A at 660VAC
- SCR output for heavy industrial loads
- "Fingerproof" easy-to-use input and output cage-type terminals
- LED status indicator

The **CKRD** and **CKRA series** feature zero-cross switching. Options include: random turn-on, add **suffix "R"** to mfg. part no.. **CKRA series** have a 90 - 280VAC control and are also available with a 24VAC control; *go online or call.*

SERIES ONE DR SERIES SOLID-STATE RELAYS DIN RAIL MOUNT

RoHS Compliant Available

crydom

Features

- Single ratings of 3, 6 or 12 Amps
- Dual output with ratings of 6 Amps each channel
- Load voltage ratings of 2-60VDC, 2-100VDC, 24-280VAC and 48-600VAC
- Fits standard 35mm DIN-RAIL
- LED input status indicator
- AC or DC control
- Zero-crossing (resistive loads) or random turn-on (inductive loads) output
- SeriesOne DR Dual series feature dual output with ratings of 6 Amps each channel

DIN-RAIL MOUNT SOLID-STATE RELAYS SSRK SERIES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features:
- DIN-rail or panel mount
- Integral heat sink design
- Space-saving narrow package
- Paired SCR output for reliability when switching heavy industrial AC loads
- 10A to 30A ratings at 480VAC
- Contacts: 1 Form A (SPST-NO)
- Isolation voltage: 4kV
- AC or DC control input options
- LED indicator
- Finger-safe load and control terminals

Applications:
- Blood analysis equipment
- Portable vital sign monitors
- Lasers
- Scanners
- Baby warmers
- Elevator control panels
- LED's, dimmer ontrol, traffic control
- Industrial machinery and commercial equipment

SOLID-STATE DIN MOUNT RELAYS

MAGNECRAFT 861H SERIES CLASS 1, DIVISION 2 CERTIFIED SOLID STATE RELAYS

RoHS Compliant Available

Schneider Electric

Features:
- Class 1, Division 2 certification
- Solid state circuitry
- Optically coupled circuit
- Internal heat sink
- Finger-safe terminals
- DIN-rail or panel mounting
- Safety codes IP20

Benefits:
- Approved for use in hazardous locations
- Involves no moving parts
- Provides electrical isolation between input and output circuits
- Protects relay's output circuit from high voltage transients
- Internal heat sink
- Provides factory tested thermal management

The **861H** is the first complete solid state relay approved for use in hazardous locations. It is ideal for applications that demand frequent switching and reliability such as burner assemblies, chemical injections systems, extraction and refining machines, solenoid control, blower control, motorized duct and vent control, medical equipment and lighting in Class 1, Division 2 rated environments. Patent pending.

MAGNECRAFT 8A-45A SOLID STATE DIN MOUNT RELAYS

RoHS Compliant Available

Schneider Electric

861 Modular Style:
- 100% solid-state circuitry
- Enclosed heat sink for thermal management
- Internal snubber protects from transients
- Isolation of input and output terminals ensures no interference between separate circuits
- Flexible mounting: Mount to din rail or panel
- Dimensions: 3.5"L x 0.7"W x 2.6"H

861 Modular Style

SSRDIN Style

SSRDIN Style:
- Integral heat sink for thermal management
- Internal snubber protects from transients
- Isolation of input and output terminals ensures no interference between separate circuits
- Flexible mounting: Mount to din rail or panel
- Dimensions: 3.15"L x 0.88"W x 3.8"H (10-45A); 3.1"L x 1.79"W x 4.2"H (45A)

G3PA SOLID STATE RELAYS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

G3PA

G3PA single-phase models feature built-in heat sink for increased service life and reliability for circuits that cycle frequently. Voltage turn-on at zero crossing reduces initial inrush and load currents. **G3PA** has replaceable triac output cartridge (order replacement cartridges below). Control power LED indicator. DIN rail mountable. Conforms to UL, CSA, and CE.

G3PA SINGLE-PHASE RELAYS

6MM DIN MOUNT RELAYS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- Mechanical indicator
- Transparent housing
- Strong mechanical pin
- Optional label
- Green LED indicator
- SPDT contacts
- Switching voltage max: 400VAC
- Switching current max: 6A
- Switching power: 1500VA/180W

Incorporates a strong mechanical pin to avoid bending during replacement, while large contact surface ensures reliable connection between socket and relay. Dimensions: 92.5W x 107H x 6.2T mm. Cross bars **series P2RV** available in various colors and number of poles; *go online or call.*

MICROSERIES C1D2 RELAYS MRS SERIES

RoHS Compliant Available

Weidmüller

- C1D2 approved for use in hazardous locations
- Relay module interchangeable
- Space saving 6.1mm width
- Pluggable cross-connection at input and output minimizes the wiring workload
- Integrated RC circuit at input available, protecting from leakage current on control side
- Integrated polarity protection for quick and safe installation of the relays
- Integrated LED status indicators for easy and instant troubleshooting and minimized machine downtime

RSL SERIES SLIM INTERFACE PLUG-IN RELAYS

RoHS Compliant Available

Schneider Electric

- Contact configuration: SPDT
- Contact rating: 6A
- Space-saving 6mm width
- Wide coil voltage range: 6 to 300V
- Sensitive coil 170 mW
- Retention lever for easy removal of the relay from its socket
- Sockets: wire connection by screw connector or spring terminals
- All sockets have a built-in protection circuit and an LED indicator
- Wide range of operating voltages from 12 to 230 V

XT SERIES INTERFACE PLUG-IN RELAYS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features:

- Compact design is only 0.54" (13.7mm) wide
- Aproximate size: 1.14x0.54x1.01in (29x13.7x25.6mm)
- Choice of SPDT rated 16A or DPDT rated 8A
- Plugs into same sockets as the RT series
- Sensitive DC coil (400mW) or AC coil (0.58VA @60 Hz)
- Test lever, mechanical indicator, LED and protection diode options
- 4kV (8mm) coil-to-contact isolation
- RoHS Compliant (Directive 2002/95/EC)
- Reinforced insulation, protection class II (VDE 0700)

Specifications:

- Contact Ratings: 1FormC (SPDT): 16A at 240VAC; 2FormC (DPDT): 8A at 240VAC
- Contact material: Silver Nickel 90/10
- Mechanical life (at rated load): 10million operations w/DC coil; 5million operations w/AC coil
- Coil voltage: 12 to 110VDC and 24 to 230VAC; others on request
- Coil Power: 400mW; 0.76VA at 50Hz / 0.58VA at 60Hz
- Dielectric strength: 5,000Vrms

857 SERIES PLUGGABLE RELAYS

RoHS Compliant Available

Features:
- Industries smallest pitch, reduces panel space
- Pluggable relays for easy placement
- Flexible jumpering system eliminates redundant wiring
- Safe operation with three-way isolation (2.5kV)

Specifications:
- Module width: 6.0mm
- Input voltage range: VN -15 % to +20 %
- Max. switching voltage: 250VAC
- Max. continuous current: 6A
- Ambient temperature: -25°C to +50°C

Flare Move Relays

Flare Relays

DIN rail mount **Flare series** terminal block relay combinations provide a means of isolating the PLC or controller from the process. **The Flare** series is available in mechanical and solidstate relays. Measuring and monitoring relays feature current, voltage and phase loss detection. DIP switch selection for operation (on-delay, one-shot, cycle-on, cycle off and-off-delay operation) and the time range settings (0.1-30sec. depending on module and configuration). Coil and contact wiring on opposite sides of the block for clear visual separation with pluggable screw clamp connections. 2kV electrical isolation. 12 AWG stranded max. wiring size. UL, UR, CE rated and approved.

DURAKOOL INC.

2M35

2060APS

BF 2

DFC 2

- All relays are normally-open
- Tubes are hermetically sealed
- Pull-In voltage is 85% of nominal; typical contact resistance is 4 milliohms
- Long life, quiet operation; self-renewing liquid mercury contacts are virtually immune to wear, pitting or corrosion

General-purpose, resistive, motor load, and tungsten ratings are available. Other control voltages available, 24VAC thru 480VAC.

MERCURY DISPLACEMENT RELAYS

STRUTHERS-DUNN

- AC or DC coils
- 1 to 3 poles
- Normally open or normally closed contacts available
- Panel or DIN rail mounting
- Exceptional surge capability

1-Pole

2-Pole

3-Pole

Handle tungsten resistive and motor loads. Current range: 35A-100A, up to 600VAC or 250VDC at lower currents. Contactor tubes hermetically sealed in stainless steel tubes. Frequency of operation: 60 per minute max. Pull-in voltage: 80% of rated voltage typical for AC and DC models. Operate time typical: 50 milliseconds. Operating temperature: –35°C to +60°C. **WML series** relays for resistive and tungsten loads with AC power, optional DIN adapter **mfg. part no. BT5664** for 1-pole relays, **mfg. part no. B75665** for 2 and 3 pole relays, also available; *go online or call.* UL listed, CSA certified. Relays shown have normally open contacts. Replace **"A"** with **"B"** for normally closed contacts.

Number of Poles	Dimensions (inches) L	W	H
1-Pole/35-60A	2.3	2.0	5.1
2-Pole/35-60A	2.3	3.5	5.1
3-Pole/35-60A	3.4	3.8	5.1

CONTACTORS/MOTOR STARTERS/AC DRIVES

SLIM-LINE SOLID STATE CONTACTORS WITH INTEGRATED HEAT SINK

RoHS Compliant Available

CARLO GAVAZZI

- User friendly - just snap onto DIN rail
- Ideal alternative to mercury relays
- One pole switching
- Slimline design as small as 18mm wide
- Zero switching for resistive/motor loads
- Random switching available (RGC1B Series)
- Built-in snubber and MOV protection
- LED indication
- AC and/or DC control voltage
- Up to 60 amps output current
- Higher rated outputs available upon request
- Up to 660 VAC switching
- Up to 1200 Vp non-repetitive voltage
- Type-1 UL508 SCCR rating up to 100kA

Solid state relays with heat sinks integrated directly onto the relay provide an excellent alternative to (environmentally hazardous) mercury relays. The nominal current ratings are at 40oC. The smallest width is 18mm wide, while the largest is only 70mm. Higher rated relays (90A) with integrated cooling fan are also available.

SINGLE POLE SCR OUTPUT, 4-32 VDC CONTROL

SOLID STATE CONTACTORS AND OVERLOADS

RoHS Compliant Available

CARLO GAVAZZI

Features

- Instant-on solid state switching technology
- Reversing or standard contactors
- Control status LED indication
- One frame size for three current ratings
- Up to 5Hp motor rating
- 90-253 VAC or 24VDC control voltage
- Up to 600VAC switching
- Screw connections for load/line voltage
- DIN-Rail or Panel Mounting
- Pictured alone (left) and with overload relay (right)

REC Series Solid State Contactors and Reversing Contactors are ideal where you're looking for a fast switching, long lasting and much quieter alternative to standard electromechanical contactors. They are one of the only solid state contactors available on the market. Dimensions (H x W x D in mm): REC: 105 x 45 x 100mm. Also offered are a series of bi-metallic overload relays, type CGT-22: 46 x 44 x 85mm. Other Motor Protection Ranges are available upon request for the Thermal Overloads. cUL listed, RoHS compliant, CE compliant.

STANDARD SOLID STATE CONTACTORS

ELECTROMECHANICAL MINI-CONTACTORS AND OVERLOADS

CARLO GAVAZZI

Contactor Overload Relay

- Compact size / powerful performance ratio
- Approximately 2.25 cubic inches
- One frame size for three current ratings
- Up to 7.5HP motor rating
- Up to 20A resistive rating
- 120VAC coil voltage with other coil voltages available upon request
- Other auxiliary contact configurations/ types available upon request
- Captive screw clamp, but also available with cage clamp, fast-on or solder connections
- DIN rail or back panel mounting (PCB mounting for solder pin types)
- Manual motor starters and direct bridge adapters available upon request

CGMS Series Mini-Contactors and CGT-12M Mini-Overloads are ideal where you're looking for a compact and light contactor and/or overload solution. They are also amongst the most cost effective contactor on the market. Dimensions (H x W x D in mm): CGMS : 58 x 45 x 57mm; CGT-12M: 73 x 45 x 64mm. Other Motor Protection Ranges are available upon request for the Thermal Overloads. cUL listed, RoHS compliant, CE compliant.

NEW

- 7.6 Amp Motor Controlier rated Solid State Contactor
- Load voltage range up to 530VAC
- Fits standard 35mm DIN-RAIL
- LED input status indicator
- AC or DC control
- Zero-crossing (resistive loads) or instantaneous turn-on (inductive loads) output
- C-UL-US Listed, IEC Rated, CE & RoHS Compliant, Horsepower Rated
- Built in Overvoltage Protection
- Ultra-efficient thermal management design (Patented)

3-PHASE SOLID-STATE CONTRACTOR RELAYS

RoHS Compliant Available

crydom

SPECIFICATIONS
- Ratings 25A per phase @ 600 VAC
- DIN-RAIL or panel mount 90mm (width) package
- 100K-cycle UL 508 endurance rating for enhanced reliability
- SCR output for heavy industrial loads
- LED input status indicator
- AC or DC control
- Zero-crossing (resistive loads) or random-fire (inductive loads) output
- IP20 touch safe housing

APPLICATIONS
- Transportation (rail, back up power)
- Industrial automation
- Process control
- Machine tools (hydraulic pumps)
- Semiconductor equipment
- HVAC (heating, ventilation & air conditioning)
- Food processing
- Compressors
- Elevators & rolling shutters
- Plastics industry
- Material handling & packaging
- Oil services
- Paper & printing
- Lighting

DS7 SERIES SOFT START CONTROLLERS

RoHS Compliant Available

EATON

Features and Benefits
- Bypass mode reduces internal heating created by the power dissipation across the SCRs
- LED displays device status and provides fault indication
- Variable ramp times and voltage control (torque control) settings provide unlimited starting configurations, allowing for maximum application flexibility
- Soft stop control suits applications where an abrupt stop of the load is not acceptable
- 24 Vac/Vdc and 120/230 Vac control voltage enhances personnel and equipment safety
- Auxiliary relays (TOR and RUN) indicate status of the controllers

Certifications
- IEC 60947-4-2
- EN 60947-4-2
- C-Tick

4Amps to 12Amps

16Amps to 32Amps

Eaton's **DS7** line of reduced voltage solid-state soft start controllers is very compact, multi-functional, easy to install, and easy to commission. Designed to control the acceleration and deceleration of three-phase motors, the device is available for current ranges from 4–32A in four frame sizes.

IEC NON-REVERSING MOTOR STARTERS

EATON

- AC control from 12V to 600V 50/60 Hz
- DC control from 12V to 220V
- Available with screw or spring cage terminals
- Reversing or non-reversing contactors and starters
- AC-3 contactor ratings to 1000A and AC-1 contactor ratings to 2000A
- Non-reversing starters to 650A
- Panel or DIN rail mounting to 65A
- IP20 finger and back-of-hand proof

Fig. 1

Fig. 2

Fig. 3

- Large ambient temperature range, -25 to 50°C [-13 to 122°F]
- AC and DC controlled contactors in the same compact frame
- Low power consumption DC coils
- Built-in NO or NC auxiliary contacts to 32A

COMPACT DEFINITE PURPOSE CONTACTORS

RoHS Compliant Available

- Insulation Voltage: 690V
- Magnet Coil Class F, 155°C
- Operating temperature: -25 to +70°C
- Coil Power VAC: 2.2kW
- Coil Terminals: Screw with Quick Connect
- Coil Voltage AC Max: 120V
- Coil Voltage AC Min: 110V
- Contacts: DPST-NO-DB
- Horsepower: 3hp
- Line Voltage: 230V

1-Pole Binding head screw/QC

2-Pole Binding head screw/QC

2-Pole Box Lugs/QC

C25 Series 20 - 40A single and double-pole contactors feature a compact, efficient design with a low VA coil and straight-through wiring. New contactor housing desigh effectively limits dust and other contaminants from magnet structure, reduces or eliminates noise.

1-POLE CONTACTORS BINDING HEAD SCREWS AND QUICK CONNECT TERMINALS

FREEDOM FULL VOLTAGE STARTERS

- Meet and exceed all NEMA, UL and CSA standards.
- Sized based on standard NEMA classifications.
- Designed and built for a variety of demanding applications.
- Easy coil change and inspectable/replaceable contacts.
- Adjustable/interchangeable heater packs for flexibility.
- Available in Open and NEMA 1, 3R, 4/4X and 12 enclosures.
- Adjustable Bimetallic Ambient Compensated Overload relays with interchangeable heater packs
- A full line of snap-on accessories common to both IEC and NEMA devices
- Horizontal or vertical mounting on upright panel for application freedom.
- Screw type power terminals have captive, backed-out self-lifting pressure plates with ± screws
- Accessible terminals for easy wiring.
- Optional fingerproof shields available to prevent electrical shock.
- Top located coil terminals convenient and readily accessible.
- Encapsulated dual voltage/frequency magnet coils
- Designed to meet or exceed NEMA, UL, CSA, IEC, VDE, BS and other international standards and listings.

The "Freedom Series" starters and contactors feature a compact, space-saving design, using state-of-the-art technology and the latest in high strength, impact and temperature-resistant insulating materials. Starters and contactors are available in two rating/configuration styles — NEMA (National Electrical Manufacturers' Association) and IEC (International Electrotechnical Commission).

50MM DEFINITE PURPOSE CONTACTORS

RoHS Compliant Available

15-50A Screw/ Pressure & QC Side by Side

60-75A Box lugs & QC Side by Side

15-50A Box lugs & QC Side by Side

Side Mounted Auxiliary Contact

- Current rating: 15-75A
- Available in 2,3, and 4 pole configurations
- Universal mounting plate
- Contacts: Double Break
- Coil terminals: 10 - 14 AWG
- Magnet coil: Class F, 155°C
- Ambient temperature: 150°F (65°C)

Side Mounted Snap Switch Auxiliary Contact

Definite Purpose Contactors and Starters are electrically operated switching devices specifically designed for the heating, ventilation, air conditioning and refrigeration (HVAC) industry. They are typically controlled by automatic, i.e. thermostat, control or manual, i.e. pushbutton, interfaces. They are suitable for a wide range of other low-cycle duty applications requiring low cost switching of single- and three-phase loads. In addition to HVAC, these compact and relatively low cost devices can be found in the following applications: Elevators, Pool and spa, Food processing, Pumps and compressors, Lighting, Hoists and cranes, Welding, Battery chargers, Printing presses, Power supplies, Vending machines, Agricultural applications

XT-IEC CONTACTORS AND OVERLOAD RELAYS

RoHS Compliant Available

Contactor with Overload Relay

Overload Relay

C Frame Contactor

- IEC contactors available from 7 to 2500 amps
- Reversing contactors, FVNR and FVR starters, and CMC's (integrated Starters) available
- Low wattage coils are available in a wide range of both AC: 12V to 600V 50/60 Hz, DC: 12V to 220V
- DC coil has same physical dimensions as AC coil
- Panel or DIN rail mounting

D Frame Contactor

F Frame Contactor

The **XT series** is the perfect product solution for IEC applications all over the world. Compact, space saving, and easy to install (requires no tools). It is the efficient and effective solution for customer applications from 7A to 2000A. Eaton revolutionary design is the latest in leading edge technology combining space-savings with generations of IEC design experience tracing its origins to its engineering roots in 1899 in Bonn,Germany. The tool-less design allows contactors and overload relays to be combined easily into non-reversing and reversing contactors, starters, combination motor controllers. Manual Motor Protectors are also available on the website. Ambient temperature range: -25°C to +50°C.

XT CONTROL RELAYS

RoHS Compliant Available

EATON

- DC coil has same physical dimensions as AC coil
- AC control from 12V to 550V 50Hz, 600V 60Hz
- DC control from 12V to 220V
- 4-pole configurations
- IP20 finger and back-of-hand proof

Mini frame control relays and auxiliary contacts for use in various applications. Is the perfect product solution for IEC applications all over the world. Compact, space saving, and easy to install, the **XT** line is efficient and effective solution for customer applications. Thermal current: 10A. Ambient temperature range: -25°C to +50°C. Available with screw or spring cage terminals.

DS6 SERIES SOFT STARTERS

RoHS Compliant Available

EATON

- The smallest soft start controller in its class, the DS6 is the perfect option for upgrading existing systems that may currently be using wye-delta, autotransformers or across the line NEMA starters
- Run bypass mode greatly reduces the internal heating created by the power dissipation across the SCRs
- LED displays device status and provides fault indication
- Variable ramp times and voltage control (torque control) settings provide unlimited starting configurations, allowing for maximum application flexibility
- Soft stop control suits applications where an abrupt stop of the load is not acceptable
- Soft acceleration and deceleration reduces wear on belts, gears, chains, clutches, shafts and bearings
- Minimizes the peak inrush current's stress on the power system
- Minimizes peak starting torque to diminish mechanical system wear and damage
- 24Vdc control module enhances personnel and equipment safety
- Cost effective reduced voltage soft start
- Small size - replace motor starters in same panel
- Bypass contactor built-in
- Two phase controlled soft start
- LED's indicate Run and Fault status
- Start and stop ramp times: 1-30 seconds

Eaton's DS6 soft start eliminates the mechanical problems caused by the high initial inrush of traditional motor starters. This cost effective soft starter needs the C396 overload relay for motor overload protection.

MC SERIES CONTACTORS AND OVERLOAD RELAYS

RoHS Compliant Available

IMO

Contactor

Contactor

Overload Relay

Auxiliary Contact

Features

- IEC/EN 60947-4-1
- Din-Rail mounting right up to 74A AC3
- Compact - only 45mm wide up to 40A AC3
- Large terminations: 6mm2 MC10 - MC22 25mm2, MC24 - MC40, 50mm2 MC50 - MC74
- Increased operational currents AC1 + AC3
- Resistant to high ambient temperatures (90oC) and humidity
- Made from halogen and CFC-free plastics
- Single auxiliary contacts color coded for easy identification
- 4 main pole versions available
- Capacitor switching versions
- AC and DC Coil versions

3G3MX2 SERIES AC DRIVERS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

- Current vector control
- High starting torque: 200% at 0.5Hz
- Double rating VT 120%/1min and CT 150%/1min
- Speed range up to 1000 Hz
- IM & PM motor control
- Torque control in open loop vector
- Positioning functionality
- Built-in application functionality (i.e. Brake control)
- User programmable as standard
- Safety embedded compliant with ISO13849-1 (double input circuit and external device monitor EDM)
- USB port for PC programming
- 24 VDC backup supply for control board
- Fieldbus communications: Modbus, DeviceNet, Profibus, Componet, Ethercat, ML-II and CanOpen

ATS SERIES TORQUE LIMITING SOFT STARTS

RoHS Compliant Available

Schneider Electric

Features

- Maximum load voltage: 460 V
- Side-by-side mounting to minimize panel space
- Pass through wiring: input power on top, motor terminals on bottom
- Two indicator lights for quick status check
- Analog adjustment knobs

The Altistart® 01 soft start enhances starting performance by ensuring a smooth and controlled start for asynchronous motors, while providing torque surge suppression during both the starting and stopping operation. The Altistart 01 features simple installation through DIN rail mounting and a removable control wiring terminal.

DEFINITE PURPOSE CONTACTORS

SQUARE D by Schneider Electric

2-Pole Compact

2-Pole

3-Pole

- 2-, 3-, and 4-pole versions 600VAC max
- Quick-connect terminals and binder head screws for easy wiring

Definite purpose contactors are ideal for heating, air conditioning, refrigeration, data processing and food service equipment. Includes box lugs on 40A contactors and larger. Coils may also be changed quickly without a tool. **Mfg. part no. 9999D** snap-on auxiliary contact modules for **8910DPA series** fasten on to either side of contactors; *ordered separately on this page. Other versions available; go online or call.*

ALTIVAR 312 VARIABLE FREQUENCY DRIVES

RoHS Compliant Available

Schneider Electric

- Input voltage: 200 V -15% to 240 V +10%, 380 V -15% to 500 V +10%
- Input frequency: 50 Hz -5% to 60 Hz +5%
- Output frequency: 0.5 to 500 Hz
- Functions: 50
- Preset speeds: 16
- Analog inputs: 3
- Analog outputs: 1
- Operating temperature: -10°C to +50°C
- Enclosure rating: IP20 rating with optional conduit kits for UL Type 1

The Altivar 312 drive is designed to make industrial and commercial machines more energy efficient, while at the same time simplifying its integration into a single control system architecture. With the highest overtorque and the only drive with a remote graphic keypad in its class, the Altivar 312 drive is ideally suited to the needs of material handling, packaging, food & beverage, pump & fan, and other OEM machines. It also comes standard with integrated communications port for Modbus and CANopen networks, and optional cards for CANopen Daisy Chain, DeviceNet and Profibus DP.

ALTIVAR® 12 VARIABLE SPEED DRIVES

RoHS Compliant Available

Schneider Electric

- Eliminate the need to oversize the drive or dynamic braking in most applications
- Simple rotary adjustment and navigation provides fingertip control.
- Drive can be programmed in package without power, providing easy and safe installation
- Adds to machine life, lowers maintenance costs, improves customer satisfaction
- Ten year service life
- Suitable for consumer and industrial markets.

ALTIVAR 212 VARIABLE SPEED DRIVES

RoHS Compliant Available

Schneider Electric

- Altitude ratings: Up to 3,300 ft (1,000 meters) without de-rating, de-rate nominal current by 1% for each additional 330 ft (100m) up to 10,000 ft (3,000 m) limit to 6,600 ft (2,000 m) if supplied by corner grounded distribution system
- Temperature ratings: 0 to + 40°C operational without de-rating, up to 60°C with de-rating (see installation manual for deratings)
- Humidity: Up to 95% non-condensing , IEC 60068-2-3
- Input frequency: 50 Hz -5% to 60 Hz +5%

The Altivar 212 drive is intended for use with three-phase asynchronous motors for variable torque pump and fan applications. Select the Altivar 212 drive using the nameplate voltage and full load ampere rating of the motor nameplate and the table below. The Altivar 212 drive includes 3 logic inputs, 2 analog inputs, 1 analog output and 2 relay outputs (with 1 NO and 1 NO/NC contacts). It includes integrated 4 digit, 7 segment LED dispay with 7 button keypad, as well as RJ45 Modbus™ port, plus a 4 screw removable terminal block for software selectable BACnet, Modbus, METASYS N2 or APOGEE P1 communication protocols. LonWorks is available in an option card.

ALTISTART 22 SOFT START/STOP UNITS

RoHS Compliant Available

SQUARE D by Schneider Electric

- Three-phase power supply voltage 208 to 600 V
- 220 V control power supply
- Save time on wiring (6 terminals instead of 12)
- Optimise the size of your enclosures (Altistart 22 is very compact)
- Keep temperature rises to a minimum (low heat dissipation)
- Reduce the number of components you need to manage (multifunction product)

TESYS D-LINE 9-150A IEC CONTACTORS

Schneider Electric

- 45mm wide for panel space savings (up to 32A)
- Control motors up to 20HP @ 480VAC, 150A
- Finger-safe terminals and safety cover
- Reduced installation time with quickfit spring terminal system
- Low power consumption DC coils

CONTINUED

TESYS D-LINE 9-150A IEC CONTACTORS (CONT.)

60Hz contactors are 3-pole, AC coil, non-reversing. Side- and top-mount auxiliary contact modules give more design flexibility. Snap-mount on standard 35mm DIN rail. Mechanical life of up to 30 million operations. All coils have three leads to accommodate global wiring practices. Coil wire insulation is rated at 180°C. A choice of wiring connections including spring terminals, ring tounge terminals, slip-on terminals and screw clamps provides flexibility in meeting specific, application requirements. Auxilary contacts are 1NO and 1NC. To create a motor starter, choose a contactor and an overload relay. SEMI 47 low voltage ride through module, IP Class 20 overload relay, four pole contactor also available.

CONTACTORS/MOTOR STARTERS/AC DRIVES

IEC CLASS 10 TESYS D-LINE OVERLOAD RELAYS

RoHS Compliant Available

Schneider Electric

- Selectable manual/ auto reset
- Seperate "stop" and "reset" controls
- Ready-to-wire screw terminals
- Ambient compensated, bi-metallic

Designed for direct mounting on underside of D-Line contactors. To create a motor starter, choose a contactor and an overload relay *on page 1707*. Class 10 without single-phase sensitivity, class 20 with and without single-phase sensitivity also available; go online or call.

GV2 SERIES MANUAL MOTOR STARTERS

RoHS Compliant Available

Schneider Electric

- For Control of Motors With Full Load Current Up to 32A

GV2 series manual motor starters comprise a manual isolation switch, an overload relay, and an instantaneous magnetic trip mechanism in one compact device. Snap onto 35mm DIN rails. Rated voltage: 600. Rated thermal current is 25A. Interrupting current at 480V is 12kA. Shock resistance is 30g per IEC 600 68-2. Vibration resistance is 5g (5 to 150 Hz) per IEC 600 68. Available with spring terminal clamps-add "3" to end of type number. Conform to IEC standards. Dimensions: 1.77H x 1.73W x 3.42"D. UL listed, CSA certified, and CE compliant. Order auxiliary contact blocks and enclosures separately; *on page 1707. Go online or call.*

KILOVAC SEALED POWER CONTACTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Designed to be the smallest, lightest weight, lowest cost sealed contactor in the industry with its current rating (500+A carry, 2000A interrupt at 320VDC)
- Built-in coil economizer - only 1.7W hold power @ 12VDC and it limits back EMF to 0V. Models requirin external economizer also available
- Optional auxiliary contact for easy monitoring of power contact position
- Hermetically sealed - intrinsically safe, operates in explosive/harsh environments with no oxidation or contamination of coils or contacts, including long periods of non-operation
- Versatile coil/power connections

RoHS Compliant Available

TE connectivity

Authorized Distributor

Key Features
- Hermetically sealed — intrinsically safe
- Operates in explosive/harsh environments without oxidation or contamination of contacts, including long periods of non-operation
- 8kV isolation between open contacts permits use for high voltage isolation and carry
- 12, 24 and 48 Vdc coils
- Designed and built in accordance to AIAG QS9000

Bottom Mount

Side Mount

Specifications
- Voltage rating main contacts switching (max): 900 VDC
- 1 form X SPST-NO-DM contacts rated 100A continous
- Compact epoxy-sealed resin enclosure

Applications
- Power/motor control circuit isolation
- Circuit protection and safety in industrial machinery

P&B 25A-30A DEFINITE PURPOSE CONTACTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

TÜV Rheinland

- 3PST-NO-DM contacts
- AC or DC coil
- For controlling motors, power supplies, heating elements and lighting
- Switch 3-phase motor loads to 25A, 600VAC, and resistive loads to 30A, 600VAC
- Field replaceable, silver-cadmium oxide contact
- Life expectancy: 500,000 operations

Main contact terminals arranged for straight-through wiring. Coil terminals are combination #8-32 screw terminals and .250" quick connects. Dimensions: 3.75L x 2.50W x 3.47"H. Other options available: Auxiliary switch, dust cover, other voltages, dual .250" (6.35mm) quick-connect terminals, DPST-NO-DM and SPST-NC-DB contacts; *go online or call*.

MONITORING RELAYS

RoHS Compliant Available

CARLO GAVAZZI

- 1-phase AC/DC voltage and current monitoring relays
- 3-phase AC current monitoring relay (with MP Series CT)
- 8A SPDT output
- Adjustable set-point, time delay and hysteresis
- For DIN-rail or 11-pin socket mounting

Plug-In

DIN Rail

Common specifications: 11-pin plug-in mount, 3.2H x 1.4W x 3.4"D (P type); DIN rail mount, 3.2H x 0.9W x 3.9"D (D type). Adjustable set point/hysteresis, diagnostic LEDs, latching function. 115/230VAC supply, other voltages are available; *go online or call*. UL recognized, CSA certified, CE compliant.

1-PHASE AC/DC VOLTAGE AND 1- OR 3-PHASE AC CURRENT MONITORS
Multifunction AC/DC over voltage or AC over current relay with 8A SPDT output, adjustable set point and hysteresis, latch function, and 2 diagnostic LEDs.

Mfg. Part No.	Monitoring Range	Stock No.	Price Each
● PUA01CB23500V	2-500VAC/DC, 0-5AAC (Direct Input) or 0.5-500AAC (with **Mfg. part no. MI** or **MP** CTs)	16C5112	136.00
● DUA01CB23500V		05M4100	136.00

1-PHASE TRUE RMS AC/DC VOLTAGE OR CURRENT MONITORS
AC/DC true RMS over or under voltage or current monitoring relays with 8A SPDT output, adjustable set point, hysteresis and 0.1-30-second time delay, selectable 1- or 6-second delay on "power-up," latch function, and 3 diagnostic LEDs.

● DUB01CB23500V	Up to 500VAC/DC (in 5 Sub-Ranges)	05M4101	201.00
● DIB01CB235A	Up to 1A, 2A and 5A AC	05M4089	201.00
● DIB02CB23150MV	Up to 60mV or 150mVAC/DC and 4VpAC Ideal for 4V Output CTs (**Types MI** and **MP**)	05M4090	201.00

CURRENT CONTROL RELAYS

RoHS Compliant Available

CROUZET AUTOMATION

Features:
- Controls AC/DC currents, with or w/o memory
- When current reaches the set point the output changes state at the end of the selected time delay
- Once the current drops below the hysteresis (% of the threshold) the output changes instantly
- In memory mode the relay remains in the faulted condition until the unit is reset manually
- HDI & EI are over or under current monitors

Specifications:
- Display precision: ±10% of full scale
- Digital probe input circuit: Volt-free contact
- Min. pushbutton activation duration: 50ms
- Max. input current: 1mA
- Max. length of probe cables: 100m
- Outputs: 8A

EI SERIES

Mfg. Part No.	Supply Voltage	Mounting	Stock No.	Price Each 1-14

CAH SERIES CURRENT SENSING RELAYS

RoHS Compliant Available

MACROMATIC

- Monitors single phase AC current
- Can be used as either an overcurrent or undercurrent relay
- Three separate adjustable fault trip current ranges covering 0.5 – 50 amperes
- Built-in toroidal through-hole current transformer allows easy access & multiple loops for increased sensitivity
- Adjustable time delay on fault trip
- LED indicates fault condition
- 10A SPDT output contacts
- Encapsulated for protection in harsh environments

Mfg. Part No.	Fault Trip Current (A)	Input Voltage	Trip Delay (sec.)	Sensing Delay (sec.)	Stock No.	Price Each 1-14

3-PHASE MONITORING RELAYS

RoHS Compliant Available

CARLO GAVAZZI

Mini DIN Rail

DIN Rail

Plug-In

- One of the widest offerings available in the industry
- For 3-phase voltages up to 660VAC
- For detection of phase loss, reversal and/or asymmetry errors
- Some models feature adjustable set-point, time delay and hysteresis
- Diagnostic LED indication
- For DIN-rail or 11-pin socket mounting

3-PHASE MONITORING RELAYS

DPA/PPA series monitors phase sequence/loss and regenerated voltages (up to 70%); additionally the **DPA53 series** protects against under voltage conditions. **DPB series** features an adjustable delay of 0.1 to 30 sec. **DPC series** additionally protects against phase asymmetry errors, offers a selectable 1 or 6 second delay upon power-up and two separate outputs and time delays for over and under voltage. **PPA series:** 3.2H x 1.4W x 3.4"D. **DPA01/DPB01** series: 3.2H x 0.9W x 3.9"D. **DPA51 and DPA53 types**: 3.2H x 0.7W x 2.6"D. DPC01 type: 3.2H x 1.6W x 3.9"D Powered by three phase mains voltage, 5A SPDT output and up to four diagnostic LEDs.

MINI DIN RAIL MOUNTING

PHASE MONITOR RELAYS

RoHS Compliant Available

MACROMATIC

UL LISTED with Appropriate Macromatic Socket

PMPU AND PMDU SERIES

- Universal voltage range of 208 to 480VAC
- Protects against phase loss, phase reversal, phase unbalance, undervoltage and overvoltage
- User-adjustable settings for time delay on undervoltage dropout, percent unbalance, time delay on restart and undervoltage setting for the ultimate in three-phase protection
- Automatic or manual reset
- Multi-color LED indicates normal condition and defines fault to simplify troubleshooting
- 45mm DIN-style surface-mount case (PMDU)

PMDU SERIES

Output: SPDT and SPNC 10A resistive at 240VAC/30VDC, 1/2HP at 240VAC (NO only). Adjustable time-delay drop-out (0.1 to 20 seconds) on undervoltage prevents nuisance tripping. Temperature: -28°C to 65°C. Mechanical life: 10 mil. operations. Full load: 10 mil. operations. Dimensions: 4.5″ H x 2.7″ D x 1.8″ W. UL recognized, CE approved.

MACROMATIC

UL LISTED with Appropriate Macromatic Socket

Over/under voltage relays and voltage band relays monitor either AC single-phase (50-60Hz) or DC voltages to protect equipment against voltage fault conditions. Output: DPDT 10A Resistive @240VAC/30VDC. Response time: 500ms for pick-up and adjustable 0.5 - 10 sec for drop-out. Voltage tolerance: +25%/-50% of nominal voltage. Temperature: +25° to 65°C. Dimensions: 2.4 x 1.7 x 3.5 inches. UL recognized for US and Canada. UL listed with relay socket **mfg. part no. 70169-D**; Order separately below.

RELAYS

Over/under voltage relays are designed to operate when the operating voltage reaches a pre-set value and drop-out when the operating voltage drops to a level below pre-set value.

Mfg. Part No.	Control Voltage	Pick-Up Voltage	Drop-Out Voltage	Stock No.	Price Each 1-14	15-24	25-49
● VAKP120A	120VAC	102-138VAC	97-133VAC	**43K4410**	90.21	85.84	81.91
● VAKP012D	12VDC	10-14VDC	8-13VDC	**43K4405**	88.33	84.05	80.19
● VAKP024D	24VDC	21-27VDC	16-26VDC	**43K4407**	88.33	84.05	80.19

Voltage band relays are designed to provide protection to equipment that is required to operate within an upper and lower limit. As longs as the operating voltage remains within an over and under voltage range, the internal relay stays energized. If the operating voltage falls outside this range, the relay will drop-out.

● VWKP120A	120VAC	120-150VAC	90-120VAC	**43K4430**	89.27	84.94	81.04
● VWKP024D	24VDC	24-30VDC	18-24VDC	**43K4427**	89.27	84.94	81.04

P&B 10A SOLID STATE VOLTAGE SENSORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- DPDT contacts
- 10A @ 28VDC resistive, 120VAC resistive
- Molded nylon dust cover
- Temperating rating: -10°C to +55°C

Sound alarms, turn off equipment, or trigger auxiliary power source with voltage sensors which energize and de-energize internal relay at predetermined voltages. Solid-state sensors available with voltage levels fixed or knob-adjustable. Can be used as over-voltage or under-voltage sensor. Dimensions: 2.406L x 1.781W x 2.937"H (61.11 x 42.24 x 76.60). UL registered. CSA certified. *Order socket separately below.*

HARMONY™ BIOMETRIC SWITCHES

RoHS Compliant Available

Schneider Electric

Features

- Protect access to your operators and equipment while lowering costs
- Compact and easy to install
- User-friendly as fingerprint is your key
- Quick and easy set-up using stand-alone programming
- Fingerprint processing assures operator anonymity

Specifications

- Rated supply voltage: 24 VDC with protection against reverse polarity
- Operating temperature: -5 to +50° C
- Housing material: polyamide PA66

Mfg. Part No.	Description	Connection	Stock No.	Price Each
XB5S1B2L2	Maintained biometric switch	2 m Cable	73R5297	544.15
XB5S1B2M12	Maintained biometric switch	M12 Connector	73R5298	558.52
XB5S2B2L2	Momentary biometric switch	2 m Cable	73R5299	544.15

ACCESSORIES

Mfg. Part No.	Description	Stock No.	Price Each
ZB5SZ70	Protective cover, translucent and self-adhesive	73R5302	11.79
ZBY0101T	Legend plate, 28 x7 mm self-adhesive, blank, with black background for engraving	73R5301	2.25
ZB5SZ72	Stainless-steel protective cover	73R5304	259.22

9001KY/SKY 30 MM CONTROL STATIONS AND ENCLOSURES

RoHS Compliant Available

Schneider Electric

9001KY and 9001SKY 30 mm control stations are available in two forms: pre-assembled control stations and empty enclosures. Control stations may include, non-illuminated operators, selector switches, pilot lights, illuminated operators, enclosure.

UL TYPES 1, 3, 4, AND 13/NEMA 1, 3, 4, AND 13 DIE CAST ZINC ENCLOSURES WITH INTEGRAL GUARD

Mfg. Part No.	Operator Style and Features	No. of Holes	Legend Plates	Stock No.	Price Each
9001KYG11	Guareded enclosure (grey) with 120V red LED pilot light	1	Order separately	93T7055	533.76

9001BW PENDANT STATIONS

RoHS Compliant Available

Schneider Electric

- Double circuit blocks (SPST-NO / SPST-NC)
- Voltage rating: 120VAC, 240VAC, 480VAC, 600VAC
- Continuous carry current: 5A
- Easy to hold in one hand with contoured grip
- Single-speed or two-speed buttons
- Momentary or maintained contact
- Available with or without mechanical interlocks
- Yellow, black or red enclosure options
- High impact thermoplastic enclosure with self-extinguishing flammability rating (UL 94V)
- NEMA 1, 3, 3R, 4, 4X and 13 water-tight, dust-tight, oil-tight and corrosion-resistant
- UL listed, CSA approved, carries CE marking

94 SERIES CODED ROTARY DIP SWITCHES (CONT.)

94 series actuator sealed rotary DIP switches have binary (octal, BCD, hexadecimal) output with 8-, 10- or 16-positions. Complement codes are also available. Perpendicular or right-angle mounting with flush or choice of two shaft lengths. Perpendicular and surface mount types have terminals on 0.1″ (2.54) by 0.3″ (7.62) grid. Right-angle mount on a 0.1″ (2.54) by 0.1″ (2.54) grid. Terminals are copper alloy, gold over nickel.

FLUSH ACTUATOR TYPE

JS SERIES ULTRAMINIATURE DIP SLIDE SWITCHES

RoHS Compliant Available

NEW

NKK SWITCHES

Features:
- Slide type and piano type actuators available
- Twin sliding contact mechanism with self-cleaning action provides smooth actuation and produces high contact reliability
- Gold plated contacts prevent oxidation and sulfide effect and provide stable contact resistance
- Use of self-extinguishing UL94V-0 certified material in cover and base provides high arc resistance and high insulation resistance
- Slanted and Gull-wing terminals ensure secure PCB mounting
- End-to-end stackable
- Terminal spacing
  JS01 & JS03: .100" (2.54mm) PCB grid
  JS02: .100" (2.54mm)
  JS04: .050" (1.27mm)

A6SN SERIES DIP SWITCHES (SLIDE TYPE) SMT

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

- Voltage rating: 24VDC
- Current rating: 25mA
- Operating force: 0.98 to 7.9 N
- Contact resistance: 200 mΩ max.
- Ambient operating temperature: -30 to 85 °C at 60% max. (with no icing or condensation)
- Knife-edge high pressure mechanics will ensure high reliability
- Knife-edge high pressure mechanics will ensure washing without seal tape
- Embossed taping models available for automatic mounting
- Temperature-resistance resin allows at peak reflow temperature of 260 °C

ALCOSWITCH GD SERIES SEALED DIP SWITCHES MACHINE INSERTABLE

RoHS Compliant Available

TE connectivity

Authorized Distributor

GDH | GDS Slide | GDP Piano | GDR Recessed Rocker

- Conventional gold wiping contact system (0.25 micron)
- Withstands wave soldering temperature of 245°C for 60 seconds.
- Base, cover and actuator materials are high temperature thermoplastic.
- Terminals are tin lead over nickel over copper alloy over brass.
- **TR** in mfg part no. indicates tape and reel.

LOW-PROFILE SLIDE ACTUATORS 0.244" WIDTH

End-stackable, auto-insertable. Vacuum pick-and-place-compatible. Also available in 2-, 6- and 10-positions; *go online or call*.

7100 SERIES SPST DIP SWITCHES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Standard

Low Profile

Standard and low profile DIP switches are designed for life of 2000 cycles per pole. Spring contacts and leads are copper alloy with gold over nickel plating in contact area. Rated 60mA at 5VDC. Dielectric strength: 500VDC. Operating temperature: -55°C to +105°C. Low-profile version has recessed cams to prevent accidental change of rocker position. Blue polyester housing and white thermoplastic rockers are rated 94V-0. Available sealed or unsealed.

SWITCHES – FOOT • SWITCHES – JOYSTICKS

HEAVY-DUTY FOOT SWITCH

RoHS Compliant Available

LINEMASTER

This foot switch is driptight, dusttight, watertight and oiltight. Snap action - SPDT. Electrical rating: 20A, 1 hp, 125-250VAC. Heavy pilot duty: 250VAC max. Size: 9⅛″ x 6″ x 5²⁹⁄₃₂″. Weight: 4½ lbs. UL listed, CSA certified.

Mfg. Part No.	Description	Stock No.	Price Each 1-2	3-4	5-9
● 531-SWHOX	"OX" Shield Foot Switch	04M4748	236.91	216.49	198.80

491 SERIES COMPACT FOOT SWITCHES

RoHS Compliant Available

LINEMASTER

Steel housing with skid-proof base pad. Dimensions: 2.87L x 2.50W x 1.12″D. **Mfg. part no. 491-S** is a momentary SPDT unit. 10A, ½ hp, 125-250VAC. UL recognized, CSA certified. **Mfg. part no. 491-SC3** is a momentary SPDT wired normally open unit. 10A, ½ hp, 125VAC. Includes 8′ 16⅔ cord and three-prong series plug. Green lead grounded. UL listed, CSA certified. **Mfg. part no. 491-SC36** is identical to **mfg. part no. 491-SC3** but 125-250VAC and has a 6″ 16⅔ cord without a plug. Green lead grounded. **Mfg. part no. 491-SC36MP** is identical to **mfg. part no. 491-SC36**, except it is provided with a mounting bracket. UL listed, CSA certified. **Mfg. part no. 491-DA** is a maintained SPST unit. 10A, ½ hp, 125-250VAC. UL listed, CSA certified.

Mfg. Part No.	Circuitry	Function	Cord	Stock No.	Price Each 1-14	15-24

(3386)

AIR-SEAL FOOT SWITCHES

RoHS Compliant Available

LINEMASTER

Combines a foot-operated air bulb mounted in a strong steel compact housing and a remotely located air-operated electric snap switch. Electrical ratings: 20A 125-250VAC, 1HP @ 125VAC, 2HP @ 250VAC. Operating temperature: 10°F to 120°F. A 10′ ⅛″ ID PVC tubing connects the foot pedal to the remote air switch, which is equipped with a ⁹⁄₁₆″ UNF bulkhead mount. UL recognized.

Mfg. Part No.	Description	Circuit	Stock No.	Price Each 1-4	5-9
● 41SH12	Momentary	SPDT	04M4737	103.93	90.19
● 41DH12	Maintained	SPDT	04M4736	104.14	89.57

SERIES 44 OIL & WATERTIGHT JOYSTICK CONTROLLERS

RoHS Compliant Available

eao

Features:
- Compact and sealed momentary positioning device
- Ideal for hoists and other machinery
- Feature short-throw, rugged momentary switch elements, and self-centering actuation for positive control

Specifications:
- Rating: 6A at 250VAC, 0.5A at 250VDC, 2A at 110VDC, 5A at 75VDC
- Gold-plated silver-nickel alloy contacts
- Contact configuration: 1NO/1NC per position
- Q.C. (0.110 x 0.020″) combination push-on or solder terminals
- Sealed to NEMA 4 & 13 and IP65 standards
- 2 million operations in each direction
- Operating temperature: -12 to +158°F
- Zinc-coated, high-manganese steel stems, suitable for certain marine applications

Mfg. Part No.	Description	Action	Stock No.	Price 1-24
● 44-800.2	2x 1N.C.+1N.O.	2-Position w/o Latch Position	30C8521	51.21

M22 22mm JOYSTICK SWITCHES AND BUZZERS

RoHS Compliant Available

EATON

Specifications:
- Contact rating: 4A at 230VAC; 3A at 24VDC
- Rated to max 500VAC and 220VDC
- Action: On = Maintained; (On) = Momentary

Features:
- Joysticks, buzzers, 4-way pushbuttons
- Quick installation with modular construction
- Mounting base includes operators
- Heavy duty construction UL NEMA type 4X/13 and IP66 and IP40 (Buzzers) on front panel
- Notched hole mounting with anti-rotation tab

J1 LOW PROFILE "SWITCH STICK" JOYSTICK

RoHS Compliant Available

ETI SYSTEMS

Features
- Spring return to center
- Tapered knob
- Four 5 amp/250VAC SPST directional switches (N.O and N.C contacts)
- Capable of 4-way or 8-way directional switching
- Four point mounting with hardware
- Protective rubber boot (IP65 rating above panel)
- Single axis and plus (+) pattern limiter plates included

Specifications
- Two axis control
- 1.73" handle height
- 24° deflection angle (± 12°)

Mfg. Part No.	Description	Stock No.	Price Each
J1-00105	J1 Low Profile "Switch Stick" Joystick	83H7201	43.66

SWITCHES – KEYLOCK & SELECTOR

14 SERIES 22mm KEYLOCK, AND ROTARY SWITCHES

NEMA

RoHS Compliant Available

eao

Keylock

Short Lever

Specifications:
- Switch ratings: 5A at 250VAC, 2A at 24VDC
- Mount in a 22.5mm (0.885") diameter hole
- Sealed to NEMA 4&13 standards; IP67 rated

Features:
- 2 position keylock and selector switches
- Self-cleaning snap action or low level contacts
- 2 high-security flat keys included with each keylock
- Over 690 keycodes exist for increased security
- Solder and QC terminals available
- Anodized aluminum bezel
- On = Maintained; (On) = Momentary

SHORT LEVER ACTUATOR

(5095)

704 SERIES TWO- AND THREE-POSITION KEYLOCK AND ROTARY LEVER ACTUATORS

RoHS Compliant Available

eao

UL CE

Features:
- Keylock and rotary selector actuators come in round and square bezel; plastic or anodized aluminum
- Keylocks include 2 keys and lever actuator is black
- Middle position is neutral/ unactuated in standard 3 position actuator
- Key removable (Rmv) and position codes are left (L), center (C) , and right (R)
- Other position/functions exist
- Additional key codes available

STEP 1: Rotary

STEP 1: Keylock

Specifications:
- Switch rating: 10A at 600VAC
- Standard mount in 22.5mm (0.885") round hole
- Flush mount in 30.5mm (1.2") round hole
- Sealed to NEMA 13 and 14 standards; (IP65 standard)
- ISO 9001 certified

Use 2-Step Component Process to Assemble Complete Switch:
- STEP 1: Choose keylock or selector switch front section
- STEP 2: Choose contact block separately *on page 1762*

C22 SERIES NON-ILLUMINATED KEYLOCK SWITCHES

RoHS Compliant Available

EATON

With over 20 variations of operation and 8 varieties of key codes, the C22 line offers a very complete line of keylock switches.

NON-ILLUMINATED SELECTOR SWITCHES - KEY OPERATED, 2 POSITION, MOMENTARY

KEYLOCK AND ROTARY SELECTOR SWITCH MODULES

RoHS Compliant Available

EATON

Features:
- Quick installation with modular construction
- Mounting base included with operators
- Field convertible from momentary to maintained
- Heavy duty construction UL NEMA type 4X/13 and IP66 on front of panel
- Notched hole mounting with anti-rotation tab

Specifications:
- Contact rating: 4A at 230VAC; 3A at 24VDC
- Rated to max 500VAC and 220VDC
- Action: On = Maintained; (On) = Momentary

30MM SELECTOR SWITCHES 10250T SERIES

EATON

- Heavy-duty zinc die cast construction
- Enclosed silver contacts with reliability nibs
- Reliability nibs improve contact reliability even under dry circuit and fine dust conditions
- Drainage holes prevent buildup of liquid inside the operator which can prevent operation in freezing environments
- Grounding nibs bite through paint and other coatings to secure grouding

The 10250T 30.5 mm selector line features a zinc die cast construction with chrome-plated housing and mounting nut. The same durable construction is also available with the corrosive resistant E34 line of pushbuttons.

2 POSITION - SRL SERIES ROTARY KEYLOCK SWITCHES

RoHS Compliant Available

LORLIN

Features:
- Silver plated brass contacts
- Spare keys are available for common key profile
- Each keyswitch is provided with two keys, random or common profile

Specifications:
- Switch rating: 5A at 115VAC
- Lock type: 5 disc
- Indexing: 90°
- Switch chamber: Polyester (PBT) V0 rated
- Keys: Nickel plated steel

WRL SERIES SEALED KEYLOCK SWITCHES

RoHS Compliant Available

LORLIN

Features:
- Miniature key-operated Lock switch
- Single or Double pole
- Up to 200 key combinations
- Common keys available – keys to pass
- Keys are double entry
- Occupies small panel area
- Easily assembled through front of equipment panel
- Rear projection less than 30mm from panel
- Suitable for Marine Environment exposure to Severity 1(EN60068-2-52)

Specifications:
- Switch Rating: 5A at 115Vac; 3A at 50Vdc
- IP67 rating/waterproof
- Life: more than 10,000 cycles
- Operating temperature: -20##UndefTag-786##C to +65 ##UndefTag-786##C
- Proof voltage: 750Vdc (initial)
- Insulation resistance: 999MΩ at 500Vdc
- Contact resistance: 20mΩ (initial)
- Lock type: 5 disc
- Std. qty. of keys per lock: 2 brass - Ni plated
- Contact material: Brass CZ108 Ag plated
- Moulding material: Polyamide 6.6 UL94V0 rated
- Lock housing: Zinc-alloy bright Cr plated

LS-TITAN™ MINIATURE DIN LIMIT SWITCHES

RoHS Compliant Available

EATON

Features

- Modular, plug-in system (head and body components)
- Positive opening NC contacts for safety applications
- Wide variety of economical plastic and rugged metal versions available
- Operating heads can be rotated 90 degrees to suit specific direction of operation
- Unique electronic safety position switches (LSE models) provide analog (0–10 Vdc or 4–20 mA) outputs proportional to the actuator position and allow for easy configuration of a custom trip point
- Safety function by positive opening contacts per IEC/EN 60947-5-1 up to Category 4 per EN 954-1

96 SERIES CONDUCTIVE RUBBER KEYPADS

RoHS Compliant Available

Grayhill

3 x 4

4 x 4

96 series are economical 3 x 4 and 4 x 4 conductive rubber keypads. 3 million operations per button. Compatible with high resistance logic circuitry and excellent operator feedback. Matrix circuitry. Rated for 5mA @ 12VDC for 0.5 sec. –30°C to +80°C operating temperature. Front (top) panel or rear (flush) panel mounting. Mfg. part nos. with **-102** and **-006** feature black-on-white legends. Mfg. part nos. **-152** and **-056** feature white-on-black legends. 4x4 legends are alphanumeric telephone plus A thru D; 3x4 are numeric telephone. Shielded versions also available. Also available with backlight; *go online or call.*

SCHURTER ELECTRONIC COMPONENTS

12 and 16 Keypad Features
- Totally rugged with completely sealed metallic surface
- Water and dust proof, degree of protection IP 69K
- High lifetime of more than 20 million actuations
- Point illumination and flexible lettering layout possible

Specifications
- Max. switching voltage / current: 50VDC / 200mA
- Contact resistance ON / OFF: <7.5Ω / >5MΩ
- Dielectric strength: 2500V
- Duration of bounce: <1ms
- Breaking capacity: 600mW
- Operating temperature: -25°C to +85°C

88-001/88BB2,88BC2

Specifications
- Rating at 24 Vdc: 10 milliamps, resistive
- Contact Resistance: Compatible with MOS, TTL and DTL (10 ohms maximum)
- Voltage Breakdown: 250 Vac between mutually insulated parts
- Life Expectancy: 3,000,000 operations per button
- Contact Bounce: Less than 4 milliseconds at make, 10 milliseconds at break
- Temperature: -40°C to +80°C
- Button Travel: 0.015″(0,38 mm) nominal total travel
- Typical Operating Force: 350 grams

Features
- Sealed keyboard
- Colorful graphic overlay
- Audible, snap-dome contact
- User legendable styles
- 3,000,000 operations per button
- Optional panel Seal gasket to protect your equipment
- Housing: ABS polycarbonate, black
- Graphic Overlay: Polyester
- Contact Dome: Stainless steel, selectively goldplated
- Terminals: Phosphor bronze

720GFX/ 720GFX-i SERIES SEALED AND RUGGED KEYPADS

RoHS Compliant Available

NEW

Features
- Keytop graphics can be easily configured / customised
- Supplied with numeric legend tiles (Set A)
- IP65 - sealed for use in wet or dirty environments
- Impact, shock and vibration resistant
- Available with integral, white light LED illumination (Storm 720GFX-i version)
- Keys are arranged on an X-Y matrix circuit
- Directly compatible with the Storm 450 and 450i USB keypad Interface

Specifications
- Insulation Resistance: 50 Mohms (min)
- Breakdown Voltage: 500 V AC (max 60 secs.)
- Switch Rating: 24V DC 50mA (max)
- Connector: 0.1″pitch, gold plated square pin
- Illumination: 5V +/- 10% at 13mA per key

Storm's 720TFX/ 720TFX-i Series keypads are tough, water resistant, & made with industrial grade polymer. These keypads feature tactile keys with 'snap-on' key caps. Keytop graphics can be easily customised by the location of thin plastic tiles under 'snap-on' transparent keycaps. Once snapped into place the tamper resistant keycaps encapsulate and protect the keytop graphics. The keypads are designed for use in harsh industrial environments. These keypads are also available with integral white light LED illumination for use in dark or partially lit locations. Available in standard 4,12 and 16 key formats.

720TFX/ 720TFX-i SERIES SEALED AND RUGGED KEYPADS

RoHS Compliant Available

NEW

Features
- High contrast white keytops permanently laser engraved with black characters
- IP65 - sealed for use in wet or dirty environments
- Impact, shock and vibration resistant
- High contrast laser marked keytop characters
- Available with integral, white light LED illumination
- Raised 'home pip' to aid tactile navigation of the numeric keypads
- Keys are arranged on an X-Y matrix circuit
- Directly compatible with the Storm 450 and 450i USB keypad Interface

Specifications
- Contact Bounce: 5 ms (max)
- Contact Resistance: 100 ohms (max)
- Insulation Resistance: 50 Mohms (min)
- Breakdown Voltage: 500 V AC (max 60 secs.)
- Switch Rating: 24V DC 50mA (max)
- Connector: 0.1″pitch, gold plated square pin
- Illumination: 5V +/- 10% at 13mA per key

Storm's 720TFX/ 720TFX-i Series keypads are tough, water resistant, & made with industrial grade polymer. These keypads feature moving, tactile keys with a responsive 'over-centre' action. The keypads are designed for use in harsh industrial environments. High contrast white keytops are permanently laser engraved with black characters. These keypads are also available with integral white light LED illumination for use in dark or partially lit locations. Available in standard 4,12 and 16 key formats.

720 BLK SERIES SEALED AND RUGGED KEYPADS

RoHS Compliant Available

NEW

Features
- Top-Surface or Under-Panel Mountable
- High contrast laser marked keytop characters and colour coded function keys
- IP65 – sealed for use in wet or dirty environments
- Impact, shock and vibration resistant
- Directly compatible with the Storm 450 and 450i USB keypad Interface

Specifications
- Contact Bounce: 5 ms (max)
- Contact Resistance: 100 ohms (max)
- Insulation Resistance: 50 Mohms (min)
- Breakdown Voltage: 500 V AC (max 60 secs.)
- Switch Rating: 24V DC 50mA (max)
- Operational Life: 2 million cycles (min) per key
- Keytop Travel: 1.4mm nominal
- Actuation Force: 150 grams nominal
- Connector: 0.1″pitch, gold plated square pin

These tough, water resistant keypads feature moving, tactile keys with a responsive 'over-centre' action. High contrast white keytop characters are permanently laser marked on black polymer keys. Function keys are in an easily recognizable colour coded format to present a contemporary and visually striking keypad. Available in standard 4, 12 and 16 key formats.

INTEGRATED KEYPAD AND DISPLAY MODULE

RoHS Compliant Available

- Can be supplied with or without 20-character, 4-line illuminated LCD securely located behind a scratch-resistant polycarbonate window
- Available with engraved, chromed metal keys or laser-engraved, high-impact polymer keys
- Compatible with the STORM **420 series** RS-232 keypad interface

Developed for use in a wide range of industrial and commercial applications, this integrated keypad and display module is extremely tough. Ideal for manufacturing and heavy industries where data entry is required in harsh, dirty or outdoor environments.

700/900 SERIES KEYPADS FOR WET OR DIRTY ENVIRONMENTS

RoHS Compliant Available

Storm Interface

- Illuminated (900 Series) or Non-Illuminated (700)
- Interchangeable Keytop Legends
- Fast, Reliable Data Entry, Even When Keys are Struck Off Center
- Positive Tactile Response
- Easy to Clean and Decontaminate
- Top-Surface or Under-Panel Mountable
- Connector: 0.1″ Pitch Gold Plated, Square Pin Male with Locking Ramp
- Contact Circuit: Gold on Nickel Plated FR4 PC Board

A range of high-specification sealed keypads offering rapid and reliable data entry in extreme wet, dirty, or sterile environments. Storm® **700 and 900 series** keypads can be used individually or in combination to create more complex key panel layouts. **900 Series** illuminated keypads incorporate twin diode, dual color LEDs.

420 SERIES RS-232 KEYPAD INTERFACE

RoHS Compliant Available

Storm Interface

- Overall dimensions: 89 x 66mm
- Input power: +5V ±0.25VDC
- RS232 output via 6 pin Molex 2.54mm (0.100″) Pitch KK® Series Connector
- Drives Powertip's 80 character LCD display from keypad

Storm **420 series** encoders provide an interface between keypads and host systems. Converting the matrix output from Storm keypads, the encoder sends RS232 output to a host system, via 6 pin (0.1″ pitch) connector. The **420 series** encoder can also be used to drive the LCD on Storm's integrated keypad and display unit. Alphanumeric data can be sent from the keypad to the display via the encoder. Additionally, data can be sent from a host system to the display via the encoder. The encoder board can be mounted directly onto Storm 12 and 16 way keypads, as well as Storm's integrated keypad/display unit.

6000 SERIES ALPHA-NUMERIC, ADA COMPLIANT KEYPADS

RoHS Compliant Available

Storm Interface

- Rugged, reliable and responsive data entry keypads
- Vandal resistant
- Weather resistant to IP65
- Large buttons for clarity and ease of use
- High contrast, laser engraved keytop graphics will not wear off over time
- Overall dimensions: 124 x 118 x 17mm
- Front plate: Brushed stainless steel
- Keys: Super high impact polymer

The **6000 series** keypad is perfectly suited for vending applications, access control devices, or any public data entry device. Large, brightly colored keys with raised tactile symbols ensure maximum usability by those with visual or mobility impairments. The **6000 series** features Storm's patented weather and vandal resistant switch technology, which allows these devices to be confidently deployed in the harshest outdoor/public environments. Available with integrated key illumination.

STRIKEMASTER™ AXS KEYPADS FOR ACCESS CONTROL

RoHS Compliant Available

Storm Interface

- One- or two-door control
- Weather resistant for outdoor use (vandal resistant and robust spec.)
- Operational life >4 million cycles per key
- Indexing permits the secure allocation and re-allocation of PIN codes
- Forced door, anti-tamper and duress alarms
- Timed lockout for repeated invalid code input
- LED and audible tone status indication

DE1KT103

Secure, self-contained keypad and controller for electrically operated door locks and strikes. Authorized personnel use their PIN code to open either one or two normally locked doors. Up to 50 different 4-, 5-, or 6-digit codes can be individually programmed. Each code can be set to trigger an electric lock or strike for a pre-set time (allowing just one person to access); or to "latch" the door in an unlocked condition (requiring the code to be re-entered to "unlatch" or re-lock the door).

E50 SERIES HEAVY-DUTY ASSEMBLED LIMIT SWITCHES

UL CSA TÜV Rheinland

EATON

- Operator must be ordered separately
- Viton gasket seals
- Rugged zinc die-cast housing
- Conduit, cable and connector wiring options
- Dozens of operators available
- Rotary, top and side push, wobble and specialty operating heads

E50 series modular plug-in limit switches have standard Viton® gaskets, seals and boots and a zinc die cast enclosure to provide exceptional chemical resistance to the common coolants, cleansing agents, and hydraulic fluids. Super bright 24 to 120VAC/DC LED indicating light versions available. Mounting dimensions accommodate both U.S. and DIN standards. The switches have terminal identification on the nameplate for visual wiring checkout without guesswork. Heads and switch bodies can be replaced without rewiring. Keyed, four direction head positioning. Rotary heads are field convertible CW, CCW, or both, without special tools. Epoxy filled, pin connector or pigtail connector receptacles also available. Standard force to operate contact is 3in-lbs. Meets IEC.947.5.1 requirements. UL listed, CSA certified, TÜV approved. NEMA 4X, 6, 6P, 13, IP67 rated. *Order operators separately online or call.* Low force spring return (1.5in-lbs.) also available; *go online or call.*

EATON

Operator | Operating Head | Switch Body | Switch Receptacle

- Wide variety of operator types for rotary and wobble style limit switches
- Rollers and rods available in metal and nonmetal contact surfaces
- NEMX, 4X, 6, 6P, 13, IP67

Cutler-Hammer® operators are used with Eaton's **E50 series** plug-in and 6P+ limit switches and 10316 rotary type limit switches. Complete switch consists of an operator, operating head, body and receptacle. Standard force to operate is 3in-lbs. Low force spring return (1.5in-lbs.) also available; *go online or call*.

LIMIT SWITCH OPERATORS

Mfg. Part No.	Description	Dimensions in.(mm) Length	Dimensions in.(mm) Width	Stock No.	Price Each 1-9

MICRO SWITCH™ LIMIT SWITCHES LS SERIES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Mode of operation is field adjustable
- Meets NEMA 1, 3, 4, 6 and 13 standards
- Wide choice of heads and actuators
- Captive screws

Specifications:
- Electrical Ratings: 10A at 120, 240, or 480VAC; ½HP at 120VAC; ¾HP a 240VAC
- Resistive Ratings: 0.8A @ 115VDC; 0.1A @ 550VDC
- Pilot Duty, 600VAC Max.

MICRO SWITCH™ LIMIT SWITCHES SL1 SERIES COMPACT

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Compact limit switches
- Long-life, small size
- Ideal for machine or equipment miniaturization
- Rugged zinc diecast housing
- Snap-in terminal enclosure
- Easy mounting and wiring

Specifications:
- Circuitry: SPDT
- Meet NEMA Enclosure Types 3, 4 and 13 and IEC Enclosure IP67
- Dimensions: 1.27H x 0.70W x 1.78″D (32.4 x 18 x 45.4)
- Operating temperature Range: -10°C to +70°C
- Electrical rating: 5A, 125/250VAC
- Gold plated contacts are rated at 0.1 A, 125VAC/30VDC and are denoted by a "K" in mfg. no. suffix

Mfg. Part No.	Actuator Style	Operating Force (g)	Over Travel (mm)	Stock No.	Price Each 1-9

MICRO SWITCH™ LIMIT SWITCHES GLL SERIES MINIATURE

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Double break, direct opening snap action contacts conform to IEC 60947-5-1-3
- EN50047 mounting
- Double insulated plastic housing
- Integral contact block
- Hinge cover for easy wiring access
- Sealing to IP66, NEMA 1, 12, 13

Specifications:
- Circuitry: 1NO/1NC direct opening snap action
- Electrical: AC15,A600, DC13 Q300: 10Amp Thermal
- Threaded conduit termination

Mfg. Part No.	Operating Force (N)	Pre-Travel	Conduit Thread	Actuator	Stock No.	Price Each 1-9

MICRO SWITCH™ LIMIT SWITCHES GLS SERIES MINIATURE GLOBAL

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Double break, direct opening contacts conform to IEC 60947-5-1-3
- EN50047 globally accepted mounting standard
- Sealing up to IP67/NEMA 4
- Suitable for most industrial applications and outdoor environments
- Full range of actuator heads and levers
- Snap action + slow action contact available
- Gold contacts are available for low energy switching

Specifications:
- Electrical; AC15, A300: DC13 Q300, 10 Amp Thermal
- Temperature; -40C to 85C (-40F to 185F) except wobble actuators -25C to 85C (-13F to 185F)
- Mechanical Life; 10 million operations except wobble actuators 0.5 million
- Vibration: 10g conforming to IEC 68-2-6
- Shock: 50g conforming to IEC 68-2-27
- ½' NPT conduit thread

Pin Plunger

Top Roller Plunger

GLS miniature global switches are designed to provide a complete range of globally approved products. Side rotary versions offer a unique dual bearing design, preventing side loading during application. Compact housing size is ideal for mounting where space is at a premium.

MICRO SWITCH™ LIMIT SWITCHES E6/V6 COMPACT ENCLOSED

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Original Micro Switch over 50 years of installed base
- Precision switching mechanism
- Boot versions meet IP66, NEMA 1, 3, 4 for use in harsh applications
- Multiple actuators for design versatility
- Applications: Off road equipment, industrial machinery, refuse vehicles, balers\compactors

Specifications:
- SPDT switches are 15A @ 125, 250, or 480VAC and 2A @ 600VAC; 0.5A @ 125VDC and 0.25A @ 250VDC; ½ Hp @ 125VAC; ¼ Hp @ 250VAC
- DPDT switches are rated 10A @ 125 and 250VAC; 0.3A @ 125VDC and 0.15A @ 250VDC
- Switch body dimensions: 3.04L x 1.00W x 1.75"H
- Boot versions: NEMA 1, 3, 4; IP66
- Without seal boot: NEMA 1; 1P40
- Venpt Conduit
- Temperature: -32C to 71C (-24F to 160F)

MICRO SWITCH™ LIMIT SWITCHES GL SERIES GLOBAL

RoHS Compliant Available

Honeywell
Sensing and Control

SELECTION, SPEED, SERVICE.
All Found Here.

Features

- Double break, direct opening normally closed contacts conform to IEC 60947-5-1-3
- EN50041 globally accepted mounting standard
- Suitable for industrial, indoor and outdoor applications
- Full range of actuator heads and levers
- Snap action or slow action contacts
- Gold contacts are available for low energy switching

Specifications

- Certified with Global Agencies for worldwide use
- Electrical; AC15, A600: DC13 Q300: 10 Amp Thermal
- Normally closed contacts are positive break
- Temperature range; -25C to 85C (-13F to 185F)
- Weather sealed to IP 67, NEMA 1, 4, 12, & 13
- Mechanical Life; 15 million operations
- Vibration; 10g conforming to IEC 68-2-6
- Mechanical Shock; 50g conforming to IEC 68-2-27
- ½ NPT conduit thread

Side Rotary

MICRO SWITCH™ LIMIT SWITCHES - HEAVY DUTY

RoHS Compliant Available

Honeywell
Sensing and Control

SELECTION, SPEED, SERVICE.
All Found Here.

Features:

- Robust switch
- Wide variety of actuators circuitry and body styles allows for design flexibility
- Low temp seals can be used outdoors
- Exceeds IP67 for harsh duty applications
- Applications: Material handling, agric. euip., off-road equip., industrial machinery
- Gold contacts are available for low energy switching

Specifications:

- Electrical: 10 Amp Thermal
- Single Pole: AC15, A600; DC13 R300
- Double Pole: AC15, B600; DC13 R300
- Size: 4.69 ″(H) x 1.88″ (W) x 1.78″ (D)
- (On) = Momentary; On = Maintained
- Sealing; IP 65, 66, 67; NEMA 1, 3, 4, 4X, 6, 6P, 12, 13

Side rotary limit switch heads can be field-adjusted in four positions and actuators can be field-adjusted for CW, CCW or both operations. Corrosion-resistant zinc head and body are epoxy-finished. Stainless steel side rotary shaft . NEMA 1,3,4,4X, 6,6P,13. *Order levers for rotary actuated switches separately online or call.* Manifold-mount, low temperature, fully-potted, preleaded, gravity-return stainless steel, quick connect, viton steel, wobble, and other limit switch versions available; *go online or call.*

ENCLOSED LIMIT SWITCHES

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

ZE series enclosed limit switches feature large switching capacity and long service life, with a mechanical life of 10 million operations minimum. Rated: 15A @ 125 and 250VAC, and 10A @ 480VAC. Sealed die-cast housing with side mounting design. Operating temperature range: –14°F to +176°F. Dimensions 3.4W × 1.0"D (86W × 25.4mmD); for height, *see table below*. Meets IEC enclosure IP65 classification and NEMA enclosure types 1, 2, 3, 4, and 5. UL recognized, CSA certified.

Coil Spring

* O.F. = Operating Force

Mfg. Part No.	Height	Actuator Type	O.F.*	Stock No.	Price Each 1-9

COMPACT PRE-WIRED ENCLOSED SWITCHES

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

D4C series limit switches feature rugged die-cast housing and triple-sealed construction for harsh environments. Accept loads of up to 5A @ 250VAC. Units come pre-wired with 9.8' (3M) of SJTO cable. Slim profile body: 1.96H × 1.57W × 0.62"D (50H × 40W × 16mmD) for easy gang-mounting. Mechanical life: 10 million cycles minimum. Meets IP67 and NEMA types 3, 4, and 13. UL listed, CSA certified.

9007MS SERIES LIMIT SWITCHES MINIATURE POTTED 39MM METAL BODY

RoHS Compliant Available

SQUARE D by Schneider Electric

- Contact Configuration: SPDT-1NO/1NC
- Current rating: 10A
- Voltage rating: 240VAC, 28VDC
- NEMA Types: 1, 2, 4, 6, 6P, 12, 13
- IEC Types: IP67
- -40°F to +221°F (-40°C to +105°C)
- Extended temp range version available
- Bottom or side cable entry and strain relief. Connector options available. Full range of 12 operating heads

9007 (MS) miniature switches meet the need for very small, enclosed switches with environmental sealing. Housings are rugged diecast zinc construction. Excellent sealing is achieved with an epoxy compound encapsulation of the electrical cable connections and switch housing. The 9007 MS limit switches have a full range of styles available, including top push plunger, parallel roller plunger, cross roller plunger, rotary lever and omni-directional whisker. Factory pre-wiring with industrial grade cable (type SJTO) eliminates the need to remove the cover to wire the switch. Bottom or side entrance cable connections and bottom or side connectors are available along with a symmetrical design and top mounting holes for easy gang mounting of several switches for multiple switching.

Mfg. Part No.	Actuator Style	Switch Terminal/ Length	Actuation	Stock No.	Price Each

XCS SERIES SAFETY LIMIT SWITCHES

RoHS Compliant Available

Schneider Electric

- Tamper resistant cover prevents tampering with mounting, wiring, and repositioning of the operating head
- Red color makes them easily identifiable as a safety related component
- 2 N.C. contacts provide electrical redundancy
- Small size allows easy installation even in cramped spaces

Safety limit switches are for use on gates and guards for safety related applications. They can also be used for end of travel or overtravel notification to the safety related system, as well as for positioning prior to allowing a machine or process to start.

IEC OSISENSE LIMIT SWITCHES XCKP COMPACT MODULAR 31MM WIDE PLASTIC BODY

RoHS Compliant Available

Telemecanique Sensors

Features
- Product types include miniature, compact, and industrial switches for general, medium, and heavy-duty applications
- Offering Metal and Plastic enclosures for the most demanding applications
- Small enclosure styles for mounting in tight spaces
- Multiple head and lever types to fit a wide variety of application requirements
- Meet the International Electrotechnical Commission (IEC) standards , NEMA, UL, CSA, VDE and more.

Specifications
- Enclosure Rating: NEMA 1/2/4/6/6P/12/13, IP66, IP67
- Contact Configuration: 1 N.O./1 N.C.
- Contact operation: snap action
- Body material: zinc alloy
- Operating temperature range: -25°C to 70°C

OsiSense® XC Limit Switches detect objects by physical contact. Limit Switches are placed in the application such that an object moves an operating head, or lever. Depending on the position of the lever, the switch contacts will be actuated or not. Advantages of OsiSense® XC Limit Switches are they are suitable for targets that will not deform, regardless of shape, type, composition, or color. XC Limit Switches are rugged products that are intuitive and easy to install.

IEC OSISENSE LIMIT SWITCHES XCKL COMPACT SEMI-MODULAR 52MM METAL BODY

RoHS Compliant Available

Telemecanique Sensors

Features

- Product types include miniature, compact, and industrial switches for general, medium, and heavy-duty applications
- Metal and Plastic enclosures for rugged and demanding applications
- Small enclosure styles for mounting in tight spaces
- Multiple head and lever types to fit a wide variety of application requirements
- Meet the International Electrotechnical Commission (IEC) standards , NEMA, UL, CSA, VDE and more.

Specifications

- Contact Configuration: 1 N.O./1 N.C.
- Contact operation: snap action
- Body material: zinc alloy
- Operating temperature range: -25°C to 70°C
- Termination: screw clamp
- Contact current: 10A

OsiSense® XC Limit Switches detect objects by physical contact. Limit Switches are placed in the application such that an object moves an operating head, or lever. Depending on the position of the lever, the switch contacts will be actuated or not. Advantages of OsiSense® XC Limit Switches are they are suitable for targets that will not deform, regardless of shape, type, composition, or color. XC Limit Switches are rugged products that are intuitive and easy to install.

LIMITLESS™ WLS HEAVY-DUTY WIRELESS LIMIT SWITCHES

RoHS Compliant Available

Honeywell Sensing and Control

SELECTION, SPEED, SERVICE. All Found Here.

Features

- Enables wireless presence/absence detection in applications/ machinery where wiring is challenging or not feasible
- Integration of existing wireless technology with the superior reliability of Honeywell MICRO SWITCH™ limit switch series
- Ability to reconfigure and network multiple switches or point-to-point personalized addresses, thus easily allowing adding, subtracting, or relocating Limitless™ switches
- Reduced installation/maintenance costs with no wires, conduit, strain relief, clips, connectors, or connection boxes
- Output options
- - Panel mount monitor: visual, audible (buzzer), NPN output
- - DIN-mount receiver: visual, NPN/PNP (relay, CAN, Ethernet, Profibus available in the future)
- Consumes ultra-low power to prolong battery life (replaceable)
- Long-range signal of 305 m/1000 ft line-of-sight in North America
- RF board operating in 2.4 GHz globally license-free frequency band; WPAN 802.15.4
- EN 50041 metal enclosure; IP67;NEMA 1, 3, 4, 6, 6P, 12, 13
- Full complement of operating heads and levers, as well as monitor/receivers and accessories
- Metal and plastic construction

Applications

- May be used in applications that are currently wired, new applications where wired devices are not economical or feasible, where wiring and connections cause reliability issues, and where increased functionality can be realized by eliminating wires.
- **Industrial:**
- Door position
- Grain diverters or flaps
- Hose attachment verification
- Lifts
- Material handling
- Presses/conveyors
- Specialty machines
- Valve position

ESE22 SERIES 2N DETECTOR SWITCHES

RoHS Compliant Available

Panasonic

Features:
- Easy-to-use
- Can be operated with different actuation angles (horizontally and vertically)
- Reflow soldering
- Rated: 50µA 3VDC to 10mA 5VDC (resistive load)
- Contact resistance: 500mohm max. (initial)
- Insulatation resistance: 100Mohms min. (100VDC)
- Dielectric withstanding voltage: 100VAC for 1 minute
- Light operating force: 300mN max.
- Operating life: 50,000 cycles min.
- Temperature range: -10°C to +70°C

Applications:
- Detection of media in portable electronic equipment

Mfg. Part No.	Contact Configuration	Full Travel (mm) (Pushing Distance)	Mounting Ht. (mm)	Stock No.	Price Each 1-9

(208962)

ESE16 SERIES 1VR DETECTOR SWITCH

RoHS Compliant Available

Panasonic

Features:
- Rated: 50µA 3VDC to 10mA 5VDC (resistive load)
- Contact resistance: 500mohm max. (initial)
- Insulatation resistance: 100Mohms min. (100VDC)
- Dielectric withstanding voltage: 100VAC for 1 minute
- Light operating force: 250mN max.
- Full travel: 1.5mm (1mm pushing distance)
- Operating life: 50,000 cycles min.
- Temperature range: -10°C to +60°C
- Size: 2.2mmL x 3.35mmW x 1.5mmH

Applications:
- Detection of media in portable electronic equipment — mobile phones, digital still cameras, camcorders

Mfg. Part No.	Contact Configuration	Soldering Type	Stock No.	Price Each 1-9

MICRO SWITCH™ BX2 SERIES HAZARDOUS AREA SWITCHES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Side Rotary

Top Plunger

Features and Benefits
- Stainless steel housing can provide corrosion resistance up to four times longer than standard housing switches
- Tracking interchangeable with MICRO SWITCH™ BX Series for drop-in replacement
- Variety of heads and non-sparking actuators allows for a wide range of product choices
- Electrical; 10 Amp Thermal. Single Pole: AC15, A600; DC13 R300. Double Pole: AC15, B600; DC13 R300
- Gold contacts available for low energy switching
- Both internal and external grounding screw to comply with international standards
- UL, CSA, ATEX, and IEC Ex certified for global use
- IP67

Potential Applications
- Control valves and actuators
- Offshore drilling
- Gas recovery units
- Petrochemical plants
- Grain eleators
- Waste treatment
- Paint booths
- Mining conveyors
- Pulp and paper handling
- Hazardous waste handling

SWITCHES LIMIT

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE. All Found Here.

Features:
- Multi use explosion proof sealed switch
- Small package size
- Housing mounts from 4 sides
- Compact for multiple applications ideal for use in valves and valve actuator

Specifications:
- Contact rating: 10A/15A at 125VAC or 250VAC
- Explosion-proof switches have smallest UL listed housings for hazardous locations
- Meet NEMA 1, 7 and 9. Housing mounts from 4 sides
- Body Dim.: 3.66"L x 2.02"W x 2.56"H
- Temperature range: -40°C to 71°C (-40°F to 160°F)
- UL, CSA, ATEX, IEC EX certified

22mm PILOT LIGHTS

NEMA

RoHS Compliant Available

EATON

Features:
- Quick installation with modular construction
- Mounting base included with operators
- Notched hole mounting with anti-rotation tab

Specifications:
- LED rating: 100,000 hours of expected life in high vibration environments
- Heavy duty construction UL NEMA type 4X/13 and IP67 and IP69K on front of panel

Illuminated Pilot Light

LED Light Unit

NOTE: LED light unit and optional legend plate must be added to illuminated pilot lights.

18 SERIES MINIATURE PUSHBUTTON SWITCHES

RoHS Compliant Available

eao

Rectangular Square

Features:
- Available in both standard and flush mount styles
- For illuminated versions, LED is directly integrated into lens
- Minimum behind-panel depth — 0.906″ for standard mount, 1.20″ for flush
- Solder terminals

Round

Specifications:
- Sealed to IP40 standards
- Maximum switch rating of 100mA at 42VAC/DC
- Standard switches and indicators mount in 8mm dia. hole
- Flush units mount in a 16mm dia. or 15.8 x 15.8mm cut-out

Use 2-Step Component Process to Assemble Complete Switch:
- STEP 1A: Choose standard or flush mount pushbutton or indicator
- STEP 1B: For flush mount choose flush mount adapter kit
- STEP 2: Choose lens standard or flush (For pushbutton only)

STEP 1A: PUSHBUTTON SWITCH STANDARD MOUNT

- Voltage Breakdown: 1000VAC Between Mutually Insulated Parts
- Insulation Resistance: 1000 Megohms Minimum
- Operating Temperature: -40°C to +85°C
- Rated to 1/2A at 115VAC Resistive, with Up to 500,000 Operations; 1/4A Resistive at 115VAC for Sealed

39 series have an adjustable location setting and are available in a plunger-sealed version. Dimensions: switch diameter is 0.287″ (7.29) max. across single "**b**" flat, threaded.

23, 4000/10 SERIES WIPING CONTACT, AND 2200 SERIES SNAP ACTION SWITCHES

RoHS Compliant Available

Grayhill

- For Low Voltage and High Current Applications
- Rated to Make and Break at 115VAC

23-1 | 10-09, 4001, 4002 | 2201, 2202

Mfg. part no. 23-1 clean wiping contact N.O. switches have consistent contact resistance for low voltage applications. Rating: 250mA, 100,000 operations. **Mfg. part nos. 10-09, 4001** and **4002** clean wiping contact N.O. and N.C. switches rated 1A, 100,000 operations; or 3A, 6,000 (UL) operations. **Mfg. part nos. 2201** and **2202** have audible click and rapid spring action for switching high currents. Rating: 10A, 25,000 operations. *Order hardware separately on page 1746.*

39 SERIES ½A AND 30 SERIES 1A MINIATURE SPST BUTT CONTACT PUSHBUTTON SWITCHES

RoHS Compliant Available

Grayhill

39-2 | 30-1, 30-2, 30-3, 30-15 | 30-17 | 30-05

Gold contact switches provide low level switching. **Mfg. part nos. 39-1** and **39-3** are rated 1/2A res. at 115VAC and 1/4A res. at 220VAC, 1,000,000 operations. Behind panel: 0.315″ (8.00); diameter 0.25″ (6.35). **Mfg. part no. 39-2** is rated 1/4A at 115VAC and 1/8A at 220VAC. Behind panel: 0.490″ (12.45); diameter 0.25″ (6.35). **Mfg. part nos. 30-1** and **30-3**. Behind panel: 0.592″ (15.04); diameter 0.375″ (9.53). Mounting hole 0.266″ (6.76). Rated 1A at 115VAC, 1,000,000 operations. **Mfg. part no. 30-2** behind panel: 0.605″ (15.37). Rated 1A at 115VAC, 1,000,000 operations. **Mfg. part no. 30-15** has .02″ (0.51) overtravel. Behind panel 0.677″ (17.2). Rated 1A at 115VAC, 500,000 operations. **Mfg. part no. 30-17 RED** and **Mfg. part no. 30-17 BLK** have overtravel and positive feel. Behind panel: 0.631″/0.864″ (16.03/21.95) adjustable, diameter 0.468″ (11.89), mounting hole 0.484″ (12.30), cap diameter 0.390″ (9.91). **Mfg. part no. 30-05-01** behind panel: 0.930″ (23.62), diameter 0.625″ (15.88), mounting hole 0.516″ (13.10). **Mfg. part no. 30-05-04** has overtravel and positive feel. Behind panel 1.130″ (28.7). Round bezel. Decorative mounting . *Order hardware for* **30 series** *switches separately on page 1746.*

ESB33 SERIES VERTICAL PUSHBUTTON SWITCH

RoHS Compliant Available

Panasonic

Specifications:
- Rated: 50µA 3VDC to 0.2A 14VDC (resistive load)
- Travel: Full 2.3mm; Lock 1.5mm
- Operating mode: self-lock
- Switching mode: non-shorting
- Operating force: 3N±1N
- Low profile — mounting height: 6mm
- Lever color: light yellow

Applications:
- Autos — heater control operation switches
- Consumer electronic equipment — secondary power switches for lower voltage and mode switches

Mfg. Part No.	Switch Action	Actuator Style	Termination	Stock No.	Price Each 1-9
ESB-33133	DPDT	Rectangular	Solder	83T2658	2.28

ESE20C AND ESE20D SERIES MOMENTARY PUSHBUTTON SWITCHES

RoHS Compliant Available

Panasonic

Specifications:
- User-friendly tactile feedback when operated
- Long over-travel — full travel: 2.5mm
- Rated: 0.01A 5VDC to 0.1A 14VDC (resistive load)
- Mounting height 8.9mm
- Operating mode: non-lock

Applications:
- **ESE20C series** for automotive use — heater controls, overdrive, steering operation switches
- **ESE20D series** for consumer electronic equipment — secondary power switches for lower voltage and mode switches

ESB32 SERIES MIDDLE CURRENT PUSHBUTTON SWITCH

RoHS Compliant Available

Panasonic

Features:
- Long travel
- Can be fitted to a PC board

Specifications:
- Rated: 0.1A 12VDC to 3A 12VDC (resistive load)
- Travel: Full 4.5mm
- Operating mode: self-lock
- Switching mode: non-shorting
- Operating force: 3.5N±1.5N
- Lever height 25mm
- Mounting height: 12.8mm

Applications:
- Autos — overdrive, hazard, map/lamp operation switches
- Relay and solenoid controls to detect function

(208955)

ESB30 SERIES PUSHBUTTON SWITCH

RoHS Compliant Available

Panasonic

Features:
- Reduced interlock operation switching noise (-10dB compared to the current value)
- Simultaneous locking prevention mechanism

Applications:
- Autos — air conditioners and hazard operation switches
- Consumer electronic equipment — secondary power switches for lower voltage and mode switches

Specifications:
- Rated: 50µA 3VDC to 0.2A 14VDC (resistive load)
- Travel: Full 3.5mm; Lock 2.5mm
- Operating mode: self-lock
- Switching mode: non-shorting
- Operating force: 2N±1N
- Formed terminals
- Lever height 20.5mm
- Mounting height: 12.5mm

65000 AND 67000 SERIES DOUBLE WIPE MULTI-STATION SWITCHES

RoHS Compliant Available

Switchcraft® Harsh Environment Connectivity Solutions A HEICO Company

MADE IN USA

Factory assembled and tested, these switches are DPDT modules with solder lug terminals. U-shaped bifurcated contacts, rated 3 amps AC or 0.5 amps DC, 125 volts. All interlock with lockout. Panel cutout: 0.313″ (7.94) + 0.625″ (15.88) x number of stations = hole-to-hole distance. **67000 series** switches accept T-1¾ flange base lamps in 6V, 6.3V and 28V sizes. One lamp per station. *Order lamps separately; go online or call.*

MINIATURE MOMENTARY PUSHBUTTON SWITCHES

RoHS Compliant Available

Switchcraft® Harsh Environment Connectivity Solutions A HEICO Company

MADE IN USA

923, 933

903X, 913X

Molded red or black plastic pushbutton enclosed in metal housing. Solder lug terminals. Integral nickel silver contacts rated 250mA, 30 watts maximum AC non-inductive. SPDT, break before make. **Mfg. part nos. 903, 913** are front mount in 0.469″(11.91) mounting hole for panel up to 0.297″(7.54) thick. **Mfg. part nos. 923, 933** are rear mount in 0.250″(6.35) mounting hole for panel up to 0.156″(3.96) thick. All are bushing mount.

eao

RoHS Compliant Available

Step 1: Complete Switch

Step 2: Illumination

Step 3: Lampholder

Step 4: Tool

Features:
- Combines On and Off momentary pushbuttons plus indicator in a single unit
- 2 1NO/1NC contact blocks included with switch units
- Large buttons for easy operation
- Chrome-plated front bezel
- Green plus red lens
- Blue and white LEDs available; *go online or call*

Specifications:
- Rating: 10A/660VAC
- Silver-Nickel Alloy Contacts
- Recessed Screw Terminals
- Mount in a 22.5mm dia. cut-out (0.885")
- NEMA 4 & 13 and IP65 rated
- Operating Temperature: -12 to +140°F

Use 4-Step Component Process to Assemble Complete Switch:
- STEP 1: Choose switch
- STEP 2: Choose illumination (optional)
- STEP 3: Choose lampholder (required for illumination)
- STEP 4: Choose tools (optional)

8400 SERIES GENERAL PURPOSE AC RATED PUSHBUTTON SWITCHES

RoHS Compliant Available

EATON

- Slow-Make, Slow-Break Contact Mechanism
- Mfg. part no. 8442K4 is rated 6A @ 125V, and 3A @ 250V
- Mfg. part no. 8444K4 is rated 15A @ 125V, and 10A @ 250V

Light-duty momentary contact switches. Mounting hardware consists of one hexagon nut and one nickel-plated facenut. UL recognized, CSA certified except **mfg. pat no. 8440K2** and **8440K3**. 15/32" bushings except **mfg. part no. 8411K13** (¼"). **Mfg. part no. 8411K11 and 8411K13** also feature combination spade/solder lug terminals.

LIMITLESS™ WOI SERIES WIRELESS OPERATOR INTERFACE

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

- Radio code: WPAN 802.15.4; 2.4GHz
- Communication range: Up to 305 m (1000ft) when used with wireless monitor or receiver module *on page 1737*
- Battery: 3.6 Vdc Lithium Thionyl Chloride; 2/3 AA size
- Operating temperature: -25°C to 50°C
- Sealing: IP65
- Housing material: Powder coated aluminum
- Offers flexibility for users to choose and install desired operator type such as 22mm rotary switch, 22mm key switch, etc.
- Ability to reconfigure and network multiple WOI inputs or point-to-point with personalized addresses
- Eliminates issues with wire connection integrity on moving equipment
- Consumes ultra-low power to prolong battery life

WB SERIES ENVIRONMENTALLY SEALED PUSHBUTTON SWITCHES

RoHS Compliant Available

NEW

NKK SWITCHES

Features:

- Environmentally Sealed
- Available in 10A toggles, 6A pushbuttons and in 15A rockers
- Antijamming design on toggle switches protects contacts from damage due to excessive downward force on the actuator
- Solder lug and screw terminal models meet IP67 of IEC60529 Standards at front panel (dust tight and water protected for temporary immersion)
- Behind panel standard is IP60 (dust tight but not water protected).

Wire Lead — Solder Lug — Screw Lug

- Single unit construction of the bushing and CASE gives added protection from environmental elements
- Specially designed CONTACT mechanism for breaking light welds.
- Sealed actuator area and epoxy sealed base prevent entry of contaminants
- Minimal contact bounce is achieved with specially designed interlocked switching mechanism
- Outer housing of heat resistant resin meets UL 94V-0 flammability standard and provides high arc and tracking resistance

Mfg. Part No.	Poles	Circuit	Terminals	Cap Size	Cap Color	Stock No.	Price Each 1-24

JP SERIES STANDARD PUSHBUTTON SWITCHES

RoHS Compliant Available

NKK SWITCHES

NEW

Features:

- Internationally Approved Pushbutton Switch
- Industry's first molded pushbutton with TV rating
- Designed to handle large inrush current:
  JPM models certified for TV-5 rating
  JPL models for TV-8 rating
- Prominent external insulating barriers increase insulation resistance and dielectric strength
- Constructed for dust resistance with interior seal of polyphenylene sulfide (PPS) between actuator and contact area
- Specially designed to break light contact welds
- Snap-action contact mechanism
- Terminals are molded in and epoxy sealed to lock out flux, dust, and other contaminants
- Outer case of heat resistant resin meets UL's 94V-0 flammability standard

SWITCHES – PUSHBUTTON STANDARD

OLED SMARTSWITCH™ PUSHBUTTON SWITCHES

NEW

NKK SWITCHES

Features:
- Viewing area: 15.5mm x 11.6mm
- High reliability and long life of three million actuations minimum
- High resolution of 64RGB x 48 pixels
- Epoxy sealed straight PC terminals
- Snap-in standoff for easy, secure mounting and alignment
- Organic LED technology; now with 30,000 hours life and 30% less power consumption
- Range of 65,536 colors in 16 bit mode, 256 colors in 8 bit m ode
- Full viewing angle of 180°
- Exceptional contrast: 50 times greater than previous LCD pro ducts
- Four times more enhanced resolution
- High resolution provides sharp, clear images of ver y small characters
- Operated by commands and data supplied via serial communicat ions (SPI)
- Distinct, long travel of 4.5mm (same as KP01 Series)
- Dust tight construction
- Stylish, translucent black housing design

The **OLED Pushbutton** is a pushbutton switch with a built-in color OLED display. Enhance your designs with a switch that runs video or image sequences. Ideal for control rooms with real-time data, operator training equipment, broadcast panels, kiosks, etc. OLED display life is 60K hours at 50 cd/m² with 40% pixels on (typical for many applications).

LCD PUSHBUTTON SWITCHES

NEW

NKK SWITCHES

Features:
- Broad and even light distribution
- Consistent bright backlighting
- Lower energy consumption
- Programmable LC Display
- Rubber Dome
- Epoxy Sealed Straight PC Terminals
- Programmable to display graphics, alphanumeric characters, and animated sequences
- Wide viewing area 15.0mm x 10.8mm

The LCD pushbutton product family combines a LCD display and pushbutton switch in one device. Use the display for graphics, animations, and alphanumeric messages. Backlighting options are single color, bi-color, or RGB. Design engineers have full control of the backlight through software. Some products are compatible with 3D glasses. Ideal for control panels and keyboards.

36X24 LCD PUSHBUTTONS

Mnf. Part No.	Backlight LED	Viewing Area	Display Mode	Display Condition	Stock No.	Price Each 1-24
IS15AACP4CF	Red, Green	15mm x 10.8mm	STN	Transflective	09X9999	38.08
IS15ABFP4RGB	Red, Green, Blue	15mm x 10.8mm	FSTN	Transflective	10X0008	46.95

Features:
- High resolution of 64 x 32 pixels
- 64 colors of backlighting can be controlled dynamically
- Pushbutton switch with LCD, RGB LED backlighting
- General brightness of backlight is dynamically controlled in eight steps from dark to bright
- Operated by commands and data supplied via serial communications (SPI)
- Can display as many as four lines of text with ten characters each
- Incorporates bitmap display function
- Programmable display graphics for alphanumeric characters and animated sequences
- Dual image VRAM for quick change of displayed images
- Low energy consumption
- Dust tight construction

64X32 LCD PUSHBUTTONS

IZ SERIES REAR MOUNTED SEALED PUSHBUTTON SWITCHES

RoHS Compliant Available

APEM

Features
- Rear mounting for easier installation
- Latching action metal models
- Fixed or variable panel thickness
- Illuminated or non-illuminated
- Flat actuator for optional marking
- Sealed to IP67

Specifications
- Max. current/voltage rating with resistive load : 100mA 24VDC - 200.000 cycles
- Case : thermpoplastic UL94-V0
- Bushing/bezel : brass, nickel plated
- Contacts : silver, gold plated
- Temperature range : -40°C to +85°C
- Degree of protection : IP67

01 SERIES 16mm LIGHTED PUSHBUTTON SWITCHES AND INDICATORS

RoHS Compliant Available

eao

Rectangular Switch | Square Switch | Round Switch

Features:
- Front panel replaceable illumination and lens
- Minimum behind panel depth
- Extended lens w/ tapered bezel
- Available in up to a 4-pole form Z contact configuration
- Blue and white LEDs available; *go online or call*

LEDs

Specifications:
- 250VAC/5A, 220VDC/0.1A, 24VDC/2A Snap-Action
- 42VAC/0.1A, 42VDC/0.1A Low Level
- Minimum Depth: 1.34"
- Use T-5.5 slide base single chip high intensity LED for illumination
- (On) = Momentary action; On = Maintained action

Use 4-Step Component Process to Assemble Complete Switch:
- STEP 1: Choose indicator or pushbutton
- STEP 2: Choose lens
- STEP 3: Choose optional LED illumination
- STEP 4: Choose optional accessories and tools

31 SERIES LIGHTED PUSHBUTTON SWITCHES AND INDICATORS

RoHS Compliant Available

"Complete" Switch

Rectangular Switch

Lenses

Illumination

Features:
- Mount in 16mm round hole
- Uses a T-1¾ midget "groove" illumination in either incandescent, or LED style
- IP40 rated
- Solder or Q.C. terminals
- Front replaceable lens and illumination
- Blue and white LEDs available; *go online or call*

Specification:
- 5A at 250VAC (Snap-action)
- 0.1A at 42VAC/DC (Low level)
- Minimum Depth: 1.14"

Use 4-Step Component Process to Assemble Complete Switch:
- STEP 1: Choose pushbutton or indicator
- STEP 2: Choose lens
- STEP 3: Choose optional illumination
- STEP 4: Choose optional accessories and tools

STEP 1: PUSHBUTTON SWITCHES

SNAP-ACTION

(5094)

SERIES 51 16mm LIGHTED PUSHBUTTON SWITCHES

NEMA RoHS Compliant Available e a o

Complete Pushbutton

Step 1: Choose Actuator or Indicator

Step 2: Lenses

Step 3: Illumination

Features:
- Switches and indicators available in round, square, or rectangular shape
- Mounts in panels of approximately ¼" thick (max of 0.255")
- Illuminated by a T-1 ¾" midget groove incandescent bulb or high intensity "daylight readable" LED
- Illuminated selector switches offered within this series
- Blue and white LEDs available; *go online or call*

Specifications:
- Oil and watertight to IP65 standards
- Snap action switch ratings: 5A at 250VAC, 2A at 24VDC, 0.1A at 220VDC
- Mounting in a 16mm diameter cut-out
- Low level contact rating: 100mA at 42VAC/DC
- QC, solder, or PCB terminals available
- On = Maintained; (On) = Momentary

Use 4-Step Component Process to Assemble Complete Switch:
- STEP 1: Choose pushbutton or indicator
- STEP 2: Choose lens
- STEP 3: Choose illumination (optional)
- STEP 4: Choose acessories and tools (optional)

61 SERIES 16mm LIGHTED PUSHBUTTON SWITCHES

RoHS Compliant Available

eao

Standard + Flush Mount Complete Switch

Illumination

Tools

Specifications:
- Max rating: 5A at 250VAC
- Raised mounting into 16mm cut out
- Flush mounting into 22.5mm, 21x21mm and 21x27mm cut out
- Illumination using midget-grooved T-1¾ lamps or single chip LEDs
- Sealed to IP65 standards
- On = Maintained; (On) = Momentary

Features:
- High quality modular switch range
- Standard and flush mount styles available
- Illuminated selector/rotary switches available
- Keylock with 135 different key codes exists
- Blue and white LEDs available; *go online or call*

Use 4-Step Component Process to Assemble Complete Switch:
- STEP 1A: Choose standard or flush mount actuator or indicator
- STEP 1B: Choose flush mount adapter (for flush mount actuator only)
- STEP 2: Choose lens
- STEP 3: Choose contact block separately *on page 1762*
- STEP 4: Choose illumination (optional)

STEP 1A: STANDARD MOUNT PUSHBUTTON ACTUATORS

R13 SERIES MINIATURE PUSHBUTTON SWITCHES

RoHS Compliant Available

multicomp

Fig. 1

Fig. 2

Fig. 3

Fig. 4

Fig. 5

Fig. 6

Features:
- Illuminated actuators are moulded in PC
- Snap-in mounting, easy to install switch into panel
- Water proof and dust proof to fit IP-66
- R13-527, R13-548: Nylon frame and silver plated brass terminals
- R13-24: PBT actuators, nickel plated metal frame and phenolic base
- R13-509: Nylon actuator and frame and silver plated brass terminals
- R13-23: ABS actuator and phenolic base
- R13-502: Nylon frame and silver plated brass terminals; M types are nickel plated brass metal frame

Specifications:
- Contact rating: 3A at 125Vac; 1.5A at 250Vac; R-13-527: 10A at 125Vac; 6A at 250Vac
- Maximum contact resistance : 50mΩ
- Minimum insulation resistance : 500Vdc, 100MΩ
- Dielectric strength : 1000Vac for 1 minute

XB6 SERIES 16mm ILLUMINATED PUSHBUTTONS

RoHS Compliant Available

Schneider Electric

The **XB6 series** offer direct-acting contacts and tactile/audible feedback in the same unit. Utilize integrated, maintenance-free, protected LED's which operate at 12 to 24VAC/VDC. Reverse polarity protection, spike and surge protection, and EMI protection. Complete units with quick connectors/solder tabs. Contacts: 1 N/O, 1 N/C. Contacts rated 3A, 300V. NEMA 4X rating. UL listed, CSA certified, CE compliant.

ZB6 SERIES 16mm CONTACT BLOCKS

Schneider Electric

For use with **XB6 series** illuminated and non-illuminated pushbuttons (maximum of 3 contact blocks per mounting base). Contact material: silver alloy. Direct-acting contacts have a failure rate of less than 1 failure in 100,000,000 electrical operations (5V-1mA). Contacts rated 3A, 300V. UL listed, CSA certified, CE compliant.

Authorized Distributor

164EL 164SL 164TL

Instrument-grade switches feature snap-acting double-break, gold-plated, silver-clad contacts that satisfy logic level and power switching requirements. Electrically independent of one another and isolated from the lamp circuit, contacts are rated 0.4VA at 20VDC or peak AC, 5A at 250VAC or 24VDC resistive. Dielectric strength: 1,500Vrms. Life: 100,000 operations. Fit 0.625" (15.8) D panel hole. UL recognized E-51302. Units accept T-1¾ midget flanged base lamp. *Order lens button sets separately on this page.*

84 SERIES OIL AND WATERTIGHT "HALO" PUSHBUTTON SWITCHES AND INDICATORS

RoHS Compliant Available

eao

Complete Halo Switch Switch Unit Lens Tools

Features:
- Fresh new design for both industrial and commercial applications
- Glowing light emitted around edges of a raised aluminum lens by high intensity LED
- Low back-of-panel depth solution - 23mm to 31mm
- "Halo style illumination provides high visibility of status indication

➤CONTINUED➤

84 SERIES OIL AND WATERTIGHT "HALO" PUSHBUTTON SWITCHES AND INDICATORS (CONT.)

- Ideal for dimly lit applications - quickly attracts attention primary control or function
- Enhanced durability offered by required use of raised aluminum lens
- Other lens colors and styles offered

Specifications:
- 100mA at 42VAC/DC
- Circuitry: 1NO
- Power rating: 2W max
- ≤100mΩ resistance in a new state
- Mechanical life: ≥ 1 million operations
- Operating temperature: -13°F to +158°F/-25°C to +70°C
- Front dimension (bezel): 25mm
- Mounting hole diameter 22.5mm
- Oil and watertight - meet the IP67 standard

Use 4-step component process to create your "Halo" pushbutton switch or indicator:
- STEP 1: Choose housing
- STEP 2: Choose switching/indicator unit
- STEP 3: Choose lens
- STEP 4: Choose tools (optional)

STEP 1: HOUSINGS

Mfg. Part No.	Description	Stock No.	Price Each 1-24
● 84-1091.7	Momentary illuminated pushbutton actuator, translucent "Halo" plastic	08N6158	14.06
STEP 2: SWITCH UNITS

84 SERIES OIL AND WATERTIGHT MOMENTARY PUSHBUTTON SWITCHES

RoHS Compliant Available

eao

Complete Switch Complete Indicator w/Window Lens Housing Lens Aluminum lens w/Window

Features:
- Attractive, low-profile, momentary switching units give fresh, modern appearance
- Low back-of-panel depth solution – 23mm to 31mm
- Ideal for applications which require durability and longevity of much larger, heavy-duty pushbuttons
- Other lens colors and styles offered
- "Halo" style lens illuminate outer edges of lens providing high visibility of status indication

Tools

Specifications:

84 SERIES ILLUMINATED OIL AND WATERTIGHT INDICATORS

RoHS Compliant Available

eao

Specifications:
- 100mA at 42VAC/DC
- Circuitry: 1NO
- Power rating: 2W max
- ≤100mΩ resistance in a new state
- Mechanical life: ≥ 1 million operations
- Operating temperature: -13°F to +158°F/-25°C to +70°C
- Front dimension (bezel): 25mm
- Mounting hole diameter 22.5mm
- Oil and watertight - meet the IP67 standard

Features:
- Sleek contemporary look
- Functionally flush by being just 2.0mm above the front panel
- Low back-of-panel depth solution – 23mm to 31mm
- Complement Series 84 pushbuttons
- Assurance, confidence, and quality of EAO
- "Halo" style lens illuminate outer edges of lens providing high visibility of status indication
- Other lens colors and styles offered

Use 4-step component process to create your "Halo" pushbutton switch or indicator:
- STEP 1: Choose housing
- STEP 2: Choose switching/indicator unit
- STEP 3: Choose lens
- STEP 4: Choose tools (optional)

Complete Indicator w/Window lens

Complete Halo Diffused Indicator

14 SERIES 22mm PUSHBUTTON AND MUSHROOM SWITCHES

NEMA

RoHS Compliant Available

eao

STEP 1: Round Pushbutton

STEP 1: Mushroom Pushbutton

STEP 1: Extreme-Duty Mushroom Pushbutton

Features:
- Front panel replaceable lens and illumination
- Flush mount version available
- Legends are possible by engraving and hot stamping
- Low level switching elements offered
- Blue and white LEDs available; *go online or call*

Specifications:
- Contact rating: 5A at 250VAC; 2A at 24VDC
- Standard mounting in 22.5mm diameter hole (0.875")
- Oil watertight to NEMA 4 and 13 standards (IP67)
- Flush style mount in 30.5mm diameter hole (1.20")
- Utilizes T-5.5 slide base lamps and LEDs

STEP 2: Illumination

Use 2-Step Component Process to Assemble Complete Switch:
- STEP 1: Choose pushbutton
- STEP 2: Choose illumination (optional)

STEP 1: ROUND PUSHBUTTON SWITCHES

704 SERIES 22.5mm PUSHBUTTON SWITCHES AND INDICATORS

RoHS Compliant Available

eao

STEP 1: Indicator

STEP 1: Flush-mount Pushbutton

STEP 1: Illuminated Pushbutton

STEP 2: Contact Block

STEP 3: Illumination

STEP 4: Accessory/Tool

Specifications:
- Raised mounting into 22.5mm cutout
- Flush mounting into 30.5mm cutout
- Standard transparent lenses and translucent diffusers
- Max switch rating: 10A at 600VAC
- Suffix "BX" indicates black anodized aluminum
- Suffix "NX" indicates natural anodized aluminum

Features:
- Modular construction for easy assembly
- IP65 protection
- NEMA 4 and 13 rating
- Screw termination; quick connect also available
- Blue and white LEDs also available; *go online or call*

Use 4-Step Component Process to Assemble Complete Switch:
- STEP 1: Choose indicator or pushbutton front section
- STEP 2: Choose contact block separately *on this page*
- STEP 3: Choose optional illumination
- STEP 4: Choose optional accessories and tools

EAO SWITCH LAMPS, LEDS AND TOOLS

RoHS Compliant Available

eao

Features:
- New Single chip LEDs offer high intensity "daylight readable" illumination
- LEDs offer high reliability and durability often needed for volatile applications and hazardous environments
- LEDs are available in custom colors, voltages and styles; *go online or call*
- LEDs have a low current consumption and a virtually unlimited life
- EAO single chip LEDs can now handle both AC and DC current

Specifications:
- Both incandescent and LEDs are offered in a range of voltages from 6V to 230V
- Industry standard bases

C22 SERIES COMPACT NON-ILLUMINATED AND ILLUMINATED PUSHBUTTON SWITCHES

RoHS Compliant Available

EATON

- Field convertible maintained pushbuttons from maintained to momentary
- Field convertible selector switches from momentary to maintained operation and vice versa
- LED offering only for all illuminated operators
- Laser engraved pushbuttons and lenses
- Heavy-duty construction with a minimum of IP65 and UL NEMA® Type 4X/13 on front of panel operators
- Many operators even carry IP67 and IP69K, for the toughest applications

NON-ILLUMINATED SWITCHES - FLUSH, MOMENTARY

22mm ILLUMINATED PUSHBUTTONS

NEMA

RoHS Compliant Available

EATON

Features:
- Quick installation with modular construction
- Mounting base included with operators
- Notched hole mounting with anti-rotation tab

Specifications:
- LED rating: 100,000 hours of expected life in high vibration environments
- Contact rating: 4A @ 230VAC, 3A @ 24VDC
- Rated to max. 500VAC and 220VDC
- Heavy duty construction UL NEMA type 4X/13 and IP66, IP67 and IP69K on front of panel

Pushbutton

Double Pushbutton

NOTE: LED light unit, contact block and optional legend plate must be added to all illuminated pushbuttons.

CW SERIES 22MM FLUSH MOUNT PUSHBUTTON SWITCHES

RoHS Compliant Available

IDEC

- Rated insulation voltage: 300V
- Rated thermal current: 10A
- Operating temperature: non-illuminated -25 to +60°C, LED illuminated -25 to +55°C
- Contact resistance: 50 mohm maximum (initial value)
- 22.3mm mounting hole compliant with IEC 60947-5-1
- 3.5-mm operator travel for pushbuttons ensures comfortable and reliable operation
- Black and metallic bezels available
- UL Type 4X rating with optional boot

XB7 SERIES 22mm PUSHBUTTON

NEW

RoHS Compliant Available

Schneider Electric

Specifications:
- IP65 rated
- Contact rating: 600mA at 240VAC; 750mA at 250VDC
- Screw terminal or plug-in connections

Features:
- Monolithic design — easy to select and quick to install by eliminating the need for components
- Separate N.O. and N.C. contacts — increase wiring flexibility
- Seamless integration with Harmony accessories and legend plates

ZB4 SERIES 22mm PUSHBUTTON COMPONENTS – NON-ILLUMINATED

RoHS Compliant Available

Schneider Electric

Flush Head Operator

Extended Head Operator

Booted Operator

Push/Pull E-Stop Operator

Double-Head Operator

Mounting Base Non-Illuminated

Quick assembly components easily combine to provide custom switches to meet your specific requirements. **Complete Pushbutton Assembly = Operator + Mounting Base + Contact Block.** Operator locks into mounting collar, securing the operator in the enclosure. Screw clamp terminal contact blocks clip-on, up to 9 circuits. Operators are self-grounding, tamperproof, and antirotating. NEMA 4X, 13 IP65. Contact blocks are rated A600/Q600 (10A continuous). On = Maintained action; (On) = Momentary action. UL listed, CSA certified, CE compliant.

ZB4 SERIES 22mm PUSHBUTTON COMPONENTS – ILLUMINATED

RoHS Compliant Available

Schneider Electric

Extended Head

Flush Head

Light Module

Quick installation. Screw-clamp terminals. Operator locks into mounting collar, securing the operator in the enclosure. Protected LED reduces the effects of lightning, inductive spikes generated by coil de-energization and reverse polarity. Complete pushbutton assembly: operator and mounting base and contact blocks. Contact blocks clip-on, up to 9 circuits. Self-grounding, tamperproof, and anti-rotating. 100,000 hours average LED life. Contacts rated 6A @ 120VAC, 600VAC/DC Max. UL listed, CSA certified, CE compliant.

30MM PUSHBUTTONS 10250T SERIES

EATON

- Heavy-duty zinc die cast construction
- Enclosed silver contacts with reliability nibs
- Reliability nibs improve contact reliability even under dry circuit and fine dust conditions
- Drainage holes prevent buildup of liquid inside the operator which can prevent operation in freezing environments
- Grounding nibs bite through paint and other coatings to secure grouding

10250T1xx

10250T411

10250T597LRD2A-1X

The 10250T 30.5 mm pushbutton line features a zinc die cast construction with chrome-plated housing and mounting nut. The same durable construction is also available with the corrosive resistant E34 line of pushbuttons.

76-95 SERIES VANDAL-RESISTANT PUSHBUTTON SWITCHES

RoHS Compliant Available

ITW Switches
SENSORS, SWITCHES, ELECTRONIC CONTROLS

76-95 Series

- Momentary Action
- Operating Temperature Range: -30°C to +105°C (-22°F to 221°F)
- Form Z: 5A @ 125/250VAC, 3A @28VDC Ind.

The **76-95 series** pushbutton switches are designed to withstand impacts of significant force. The main switch body and button are created by using rugged stainless steel with front mount styling. The bezel protrudes a maximum of 0.10" (2.5m) from the front panel, including sealing washer. The low profile makes it difficult for vandals to pry the switch from its mounting. Panel thickness: .06" - .3" (1.5 to 8). Panel sealed to IP67. All measurements in inches (mm).

Mfg. Part No.	Contacts	Contact Arrangement	Stock No.	Price Each 1-9

57 SERIES MINIATURE VANDAL-RESISTANT PUSHBUTTON SWITCHES

RoHS Compliant Available

ITW Switches
SENSORS, SWITCHES, ELECTRONIC CONTROLS

57 Series

Illuminated

- Momentary Action
- Travel (Nom): .09" (2.3)
- Current Rating: 400mA @ 32VAC Resistive, 100mA @ 50VDC Resistive, 125mA @ 125VAC Resistive
- Operating Temperature Range: -40°C to +125°C Illuminated (-40°F to 257°F), 35°C to +85°C (-31°F to 185°F)

The **57 series** pushbutton switches are miniature, rugged panel sealed with a round button and bezel. Available with or without LED status illumination. A lockout is supplied with each switch. Manufactured of non-spark zinc alloy and chrome velour plated. Panel is sealed to IP67 and is designed to be impact resistant. The small size, robustness and panel sealing makes these switches ideal in a harsh environment. The illuminated version is available with a choice of 2 high brightness LED colors: red LED or green LED. All measurements in inches (mm).

VANDAL-PROOF MSM SWITCHES

RoHS Compliant Available

SCHURTER ELECTRONIC COMPONENTS

- Stainless steel housing and actuator
- Flat construction of 1.7mm provides nearly flush mounting to the panel surface
- Quick-connect terminals
- SPST-NO+SPST-NC contacts
- Momentary switching action

Non-Illuminated

Red Ring Illumination

MSM series switches are built for tough environments where the switch can be subject to heavy use or impact. Ideal for use in equipment exposed to liquid spills, drips, leaks or wash-downs. Actuating force: 3.7N. Actuating travel: 0.8mm. Operating temperature: -25°C to +85°C. IP 67 degree of protection. Shock resistance according to DIN EN 50102 of IK 06 for 16mm mounting diameter and IK 07 for 19 and 22mm mounting diameters.

VANDAL-PROOF LATCHING ACTION SWITCHES

RoHS Compliant Available

SCHURTER ELECTRONIC COMPONENTS

Specifications:
- Contact rating: MSM DP 3A at 250 VAC and 5A at 125 VAC MSM LA 12A at 30VDC or 250VAC
- Circuitry: *MSM DP* DPST; *MSM LA* SPST
- Temperature range: -25°C to +85°C

Standard

Ring Illuminated

Features:
- The new MSM LA has a push-on push-off latching function
- In the OFF state, the actuator position protrudes; in the ON state, it is depressed
- This provides a user-friendly actuating function and also prevents inadvertent switching, e.g. caused by objects leaning on the switch
- The new MSM DP switch is designed with two separate switching contacts and may thus be used as normally open, normally closed or as change-over
- Point and ring illuminated versions in different colors are available
- IP67 sealed

MSM CS SERIES 19mm / 22mm VANDAL-PROOF PUSHBUTTON SWITCHES

RoHS Compliant Available

SCHURTER ELECTRONIC COMPONENTS

- Meets vandal-proof demands due to the low profile of the front structure (1.7 mm), the IP 69K protection class and the high level of impact resistance
- Equipped with quick connect terminals to allow for fast connections
- Wires are connected to the switching element which is subsequently snapped onto the switch housing

Equipped with an actuator made of highly durable ceramic which is resistant to scratches, abrasion, impact and chemicals. The non-illuminated version has a translucent white actuating surface. Lettering is black and applied directly onto the ceramic material. The illuminated version illuminates uniformly across the entire actuator surface. Lettering and symbols can also be applied. The standard black lettering provides a positive effect against the illuminated actuator, while negative lettering provides an inverse effect.

ILLUMINATED EMERGENCY STOP PUSHBUTTON, 30MM MOUNT

RoHS Compliant Available

BANNER® more sensors, more solutions

- Highly visible illumination with simple installation
- When button is actuated base Flashes Red
- When unactuated, base is yellow or green
- Push to stop, Twist or pull to release
- Multiple buttons can be connected in series with splitter to easily show stop condition on all bases
- Safe-Break Contact action ensures NC contacts open when actuated
- Rugged 30mm mount, rated IP65
- 8-pin Euro-style quick disconnect
- Emergency Stop legend included
- Meets applicable IEC, ANSI, NFPA standards

SSA-EB SERIES ILLUMINATED EMERGENCY STOP PUSHBUTTON SWITCHES

RoHS Compliant Available

BANNER® more sensors, more solutions

- Rugged design; easy installation with no assembly or individual wiring required
- Push-to-stop, twist-to-release (standard and lockable), or pull-to-release (standard) operation per IEC60947-5-5
- Latching design complies with ISO 13850; direct (positive) opening operation per IEC 60947-5-1
- Compliant with ANSI B11.19, ANSI NFPA79, and IEC/EN 60204-1 Emergency
- Safe Break Action ensures NC contacts will open if the contact block is separated from the actuator
- 8-pin M12/Euro-style Quick Disconnect
- Models with highly visible indication of actuation (armed or depressed/latched button)
- Emergency Stop legend included

61 SERIES 16mm "FOOLPROOF" EMERGENCY STOP PUSHBUTTON SWITCHES

RoHS Compliant Available

eao

Features:
- Kit comes complete with contact block and 43mm emergency stop legend plate
- Actuators meet EN418 "tease-proof" directive
- Actuator design prevents blocking by foreign objects
- For higher security applications key release versions available

Specifications:
- IP65 rated; oil and watertight
- Mount in 16mm diameter cut-out
- Maximum rating: 5A at 250VAC
- Gold contacts available

04 SERIES 22.5MM EMERGENCY STOP PUSHBUTTON SWITCHES

RoHS Compliant Available eao

STEP 1: EN418 Emergency Stop Actuator

STEP 1: Key Release Emergency Stop Actuator

STEP 2: Contact Block

Specifications:
- IP65 rated; oil and watertight
- Contact rating: 10A at 600VAC; 10A at 24VDC
- Screw terminal or plug-in connections

STEP 3: Legend Plates

CONTINUED

04 SERIES 22.5MM EMERGENCY STOP PUSHBUTTON SWITCHES (CONT.)

Features:
- Stays in "off" position when actuated
- Released when twisted in direction of arrows
- 37mm versions rated to EN418 tease-proof directive
- Mounts in 22.5mm round hole
- Key release versions available for higher security applications
- Non-mushroom styles designed to prevent blocking of actuation
- *Order SM contact blocks on page 1762 and legend plate separately below.*

Use 3-Step Component Process to Assemble Complete Switch:
- STEP 1: Choose actuator
- STEP 2: Choose contact block separately *on page 1762*
- STEP 3: Choose emergency stop legend plate (optional)

STEP 1: 22.5mm "TEASE-PROOF" EMERGENCY STOP ACTUATOR

Mfg. Part No.	Release	Description	Stock No.	Price Each 1-24

84 SERIES 22.5mm ILLUMINATED LOW PROFILE EMERGENCY STOP SWITCHES

c UL us RoHS Compliant Available eao

Specifications:
- Foolproof: Conforms to EN418, EN60947-5-1, EN60947-5-5
- Electrical and mechanical life: 50,000 operations
- AC 15 B300: 3A at 120V; 1.5A at 240V
- DC 13 R300: 0.22A at 120V; 0.1A at 240V

E-Stop w/Plug-In Terminals

E-Stop w/Ribbon Cable

Features:
- Robust: single piece "monoblock" construction sealed to IP65
- Bright: LED illumination visible (including side view)
- Versatile Illumination: Powered by any voltage from 5 to 30 VDC
- Complete unit; no additional parts needed
- Compact shallow panel depth
- 22.5mm diameter mounting hole
- Illumination color: Red (custom colors available)
- Color of status indication ring: Black

10250T SERIES EMERGENCY STOP PUSHBUTTON SWITCHES

EATON

- Heavy-duty zinc die cast construction
- Enclosed silver contacts with reliability nibs
- Reliability nibs improve contact reliability even under dry circuit and fine dust conditions
- Drainage holes prevent buildup of liquid inside the operator which can prevent operation in freezing environments
- Grounding nibs bit through paint and other coatings to secure groud

The 10250T 30.5 mm pushbutton line features a zinc die cast construction with chrome-plated housing and mounting nut. The same durable construction is also available with the corrosive resistant E34 line of pushbuttons.

40mm Plastic Bezel - XN1E 60mm Plastic Bezel - XN1E Padlock - XN4E

Features:

- Plastic bezel, metallic padlock and flush bezel available
- Install up to 12 padlocks (XN4E)
- ø40, ø44 or ø60mm Mushroom heads available
- IDEC's original "safe break action" ensures that the contacts stay open when the contact block is detached from the operator
- Safety-lock mechanism (IEC60947-5-5, 6.2)
- 2-in-1: Push-to-lock, Pull/Turn-to-Reset (XN4E: Turn to Reset only)
- Push-ON LED model allows E-Stops to be illuminated only when latched
- Direct Opening Action mechanism (IEC60947-5-5, 5.2, IEC60947-5-1, Annex K)
- Only 47.7mm depth behind the panel for up to 4 contacts (XN1E)
- RoHS compliant (EU directive 2002/95/EC)

Flush Bezel - XN5E

Specifications:

- Min. Force for Direct Opening Action: 80N
- Contact rating: 5A at 125VAC
- Contact resistance: 50mΩ max
- Mechanical life: 250,000 operations
- Terminal type: M3.0 screw terminal
- Degree of protection IP65 (IEC60529)
- XN4E series complies with OSHA and ISO 12100-2:2003 standards

CT10 SERIES ENCAPSULATED MOLDED SWITCH

RoHS Compliant Available

NEW

TOTO TECHNOLOGY

Specifications:

- Contact Configuration: SPST-NO
- Contact Current Max: 500 mA
- Switching Voltage Max: 200 VDC
- Ideal for SMD pick and place
- Tape and reel packaging
- 10W rating
- Rugged encapsulation
- Excellent life and reliability

The CT10 is an encapsulated molded dry reed switch. It is single-pole, single throw (SPST) type, having normally open ruthenium contacts. The sensor is a double-ended type and may be actuated with an electromagnet, a permanent magnet or a combination of both. The device is designed for SMD mounting and is available in three lead configurations.

MAGNETIC REED SWITCHES AND MAGNETS

UL RoHS Compliant Available

HAMLIN // NOW PART OF Littelfuse Expertise Applied | Answers Delivered

SWITCHES

Switches are activated by a magnetic field from either a magnet or coil. Contacts are hermetically sealed in inert gas to provide long life with stable electrical and operating characteristics. NO = Normally Open; CO = Changeover. Combination of switching voltage and current should not exceed wattage rating.

621 SERIES SUB-MINIATURE SNAP-IN ROCKER SWITCHES

RoHS Compliant Available

Carling Technologies Innovative Designs. Powerful Solutions.

Features
- Double insulated
- Cost effective solution for appliance, audio visual, power supply, telecom markets

Specifications
- Operating Temperature: 0°C to 85°C
- Nylon base actuator
- Black rockers have no legends
- Visi rockers with "9" suffix have vertical I-O legend

8A/125VAC, 4A/250VAC. Dielectric strength: 1000V. UL recognized, CSA certified, VDE, SEV, and SEMKO approved.

V SERIES CONTURA II SEALED ROCKER SWITCHES

RoHS Compliant Available

Carling Technologies
Innovative Designs. Powerful Solutions.

Illuminated Non-illuminated

V-series snap-in rocker switches offer countless unique options including choices for ratings, circuits, colors, illuminations and symbols. Sealed front panel components are certified to IP66 and IP68, signifying complete protection against dust and prolonged spray and submersion under pressure. Recognized to UL1500 - Ignition Protection for Marine Products. LED lighted switches have 12VDC green and 12VDC amber lamps with a white square base lens. Ratings: 20A @ 12V. Dielectric strength: 2,000Vrms opposite polarity; 4,000Vrms between live parts and operator accessible surface. Terminal options: .250 QC tabs. Mounting method: snap-in. UL recognized, CSA certified, VDE, DEMKO, NEMKO, SEMKO, FIMKO and BEAB aproved.

HEAVY DUTY SNAP-IN ROCKER SWITCHES

RoHS Compliant Available

Carling Technologies
Innovative Designs. Powerful Solutions.

Constructed with a snap-in bracket system that provides front panel dust/moisture protection. Action is On-None-Off. Ratings: 15A/125VAC, 28VDC; 10A/250VAC, ¾ H.P. Dielectric strength: 1000V. Available in lighted and non-lighted versions. 125V neon models: **"RC"** in mfg. part no. designates red; **"AM"** designates amber.

NEW GENERATION ROCKER SWITCHES

RoHS Compliant Available

- Ratings: 15A @ 125VAC, 10A @ 250VAC, 15A @ 28VDC
- Slow-Make/Slow-Break Contact Mechanism
- Mechanical Life: 250,000 Operations Min.
- Terminals: Standard 0.250″ Spade
- Silver-Plated Copper Alloy
- Dielectric: 1,000V_{RMS} Min
- Gang Mounting System
- Pad-Printed Legends on Lens Rocker and Bezel

Full-size rugged switches feature ergonomic design and are sealed to resist splashing and dust. ( ) in table denotes momentary contact. Circuits available: SPST, SPDT, DPST, and DPDT, maintained and momentary action. Switches have thermoplastic base and rocker. Units featured are black frame, rocker and paddle style. Illuminated switches listed have 2 14VDC incandescent lamps, except **mfg. part no. NGR25011**, which has one lamp. Standard rocker actuator is two face, matte black, and snaps on and off the switch. Fits in panel cutouts 1.734 x 0.867″. *Rockers, lenses and connectors must be ordered separately.* Other colors available.

SVR SERIES SEALED VEHICLE ROCKER SWITCHES

RoHS Compliant Available

- Illuminated versions have a 14V Green LED
- 50K Operations at Full Load
- 12A @ 28VDC to 10mA @ 14VDC
- IP68 sealed: complete protection from dust and water immersion

Below Panel Rocker Below Panel Paddle

Below panel versions now come assembled with the actuators. Switches incorporate automotive styling and LED lighting in a 10-terminal design. Standard IP68 sealing on the front and back of the switch, including at the switch/connector interface. Snap-in lens rocker provides option for backlighting. Mounting hole size: 1.45 x 0.83 x 1.9″ depth behind including the connector. Other circuit configurations and LED combinations available.

EATON

- Ratings: 15A at 125VAC
- Slow-Make/Slow-Break; Butt-Action
- Standard Brass 0.250″ Spade Terminals

Standard and full-size rugged rocker switches are snap-mount with matte finish and easy actuation. Designed for AC and low voltage DC applications. Featured units are sealed, with black mounting frame. Switches and actuators are black. Full and standard size switches featured have two lenses and a 14VDC bulb, except switch **mfg. part nos. 8005K23**, which has one lens and a 14VDC bulb; Thermoset base; thermoplastic rocker actuators. Dielectric: 1,000Vrms min. ( ) in table denotes momentary action. *Other color lens, contact, configuration and rocker versions available; go online or call.* Order lenses and connector separately for illuminated switches. UL recognized, CSA certified.

RVW SERIES 20 AMP FULL SIZE ROCKER SWITCHES

RoHS Compliant Available

E•SWITCH®

Features
- Heavy Duty Ratings with cULus Approval
- Full Size Rocker Switch
- Internal Dust and Water Protection to IP54
- Glossy Finish Option

Specifications
- Contact rating: 20A 125VAC
- Operating temperature: -20°C to 55°C
- Electrical life: 6,000 Cycles
- Contact resistance: 50mohm max.
- Insulation resistance: 800Mohm min. at 500VAC
- Dielectric strength: 1,500VAC for 1 minute
- Ingress protection: IP54 standard

OLED SMARTSWITCH™ ROCKER SWITCHES

NEW

NKK SWITCHES

Features:
- White monochrome OLED featuring sharp contrast and high resolution with 96 x 64 pixels
- Wide viewing angle of 180° and large 0.92" display with exceptional contrast
- Organic LED technology in display rocker (patent pending)
- Multifunction programmable device: select with rocker, push for activation
- All-in-one solution: replaces multiple switches and displays with one device in a small package
- Easy navigation through structured menus, both forward and reverse and up and down
- Waterprotected and dust tight; conforms to IP64 of IEC60529 Standards on panel surface
- Displays up to 8 lines with 16 characters 5 x 7 each, or 5 lines with 12 characters 7 x 10 each
- Graphics and animations
- Long life OLED with 52,000 hours at 30% illumination
- Panel mount with easy snap-in installation
- Short 14.6mm (.575") behind-panel depth for compact spaces
- Commands and data supplied via serial communications protocol (SPI)
- Stylish black housing design with matte finish complements any application
- High reliability and long mechanical and electrical life of one million actuations minimum

The **OLED Rocker** is a SP3T Switch with (ON) (ON) (ON) action, and Normally OFF configuration. The IS-DEV Kit-8 is a complete kit for demonstration with pre-programmed options to be operated with customized graphics.

Authorized Distributor

Features:
- Designed for snap in panel mounting
- 21.2x36.6mm panel cut-out
- Sealed to IP66 standards
- Various rocker markings standard
- Ideal for us in industrial machinery, vacuum cleaners, HVAC equipment, etc

Specifications:
- Current rating: 20A at 125VAC
- Contact resistance: 50mΩ
- Mechanical life: 1000,000 operations min
- Actuating force: 400 to 2900g
- On = Maintained action

C4, C5 and C7 SERIES NON-SHORTING ROTARY SWITCHES

RoHS Compliant Available

ELECTROSWITCH UNIT OF ELECTRO SWITCH CORP.

C4 Series;
- Current and Voltage Ratings: 0.5A @28VDC; 0.3A @ 125VAC
- Current Carrying Capacity: 15A
- IP67 Rated Switches are Available; *Go online or call*

C5 Series
- Current and Voltage Ratings: 1A @28VDC; 01A @ 125VAC
- Current Carrying Capacity: 5A

C7 Series
- Current and Voltage Ratings: 1.0A @28VDC; 0.5A @ 125VAC
- Current Carrying Capacity: 25A
- Dielectric Strength: 1,000VAC Between Current Carrying Parts and Ground

C4

The **C4 series** rotary switches fully enclosed design helps keep dirt and moisture out of the contact area while locking in lifetime lubricants. Terminals and contacts: brass with silver plating. Index life: 25,000 cycles minimum. Insulation: Diallyl phthalate. Index angles: standard 30°. *Order knob separately.* Mounting nut and lockwasher are shipped fully assembled. *Shorting type switches are also available; go online or call.*

C5 series non-shorting rotary switches have an economical and lightweight design. Features include 30°indexing up to 12 positions, solder lug terminals, fixed stops, and both internal and external seals for washability. For convenience, mounting nut and washer are shipped assembled. Insulation: polyester. Index life: 25,000 cycles minimum. Terminals and contacts: brass with silver plating. Index: molded live spring detent. *Order knob separately; go online or call.*

D2D AND D4 SERIES NON-SHORTING ROTARY SWITCHES

RoHS Compliant Available

ELECTROSWITCH UNIT OF ELECTRO SWITCH CORP.

D2D Series
- Current and voltage rating: 0.55A at 28VDC; 0.25A at 115VAC
- Current carrying capacity: 7A

D4 Series:
- Current and voltage rating: 1.5A at 28VDC; 0.5A at 115VAC
- Current carrying capacity: 9A

D2D

The **D2 series** switches are used where space is at a premium. Dual-ball side thrust index offers exceptional torque control. All parts utilize non-corrosive materials. Clips and rotors: brass with silver plating. Insulation: Diallyl phthalate, glass or ceramic. Index life: 25,000 cycles minimum. Index angles: +30°. *Order pointer knob separately below.*

Mfg. Part No.	Poles	Positions	Stock No.	Price Each 1-14	Price Each 15-24

D2D0605N	6	2-5	06M4624	68.35	66.31

D4 series switch is economical and versatile. Offers the quality feel of a ball and spring index mechanism and is available with up to 12 positions and 30° or 60° indexing. All parts are made of non-corrosive materials. Clips and rotors: brass with silver plating. Insulation: glass epoxy, ceramic or diallyl phthalate. Index: single-ball, hill and valley. Index life: 25,000 cycles minimum. *Order knob separately below.*

SERIES 56 SINGLE DECK ROTARY SWITCHES

RoHS Compliant Available

Grayhill

- 0.5″ (12.70) diameter, 200mA, 0.480″ behind panel
- Single deck adjustable stops (AJ) non-shorting contacts (N)
- Life - 10,000 cycles at 200mA, 300VDC or 115VAC resistive
- Mfg. part nos. with "P" have PC terminals
- Mfg. part nos. with "S" have shaft and panel seal
- Shorting contacts available; *go online or call.*

Bushing: ¼-28 UNF - 2A thread, 0.25″ (6.35) long. Shaft: 0.125″ (3.18) dia., 0.375″ (9.53) long. Panel to PC board: 0.377″ (9.58). Circle of terminal centers is 0.340″ (8.64) for 10-position switches and 0.366″ (9.30) for 12-position switches.

SERIES 50 AND 51 SINGLE DECK ROTARY SWITCHES

RoHS Compliant Available

Grayhill

Features:
- ½" diameter rotary switch
- Adjustable stops (AJ) with non-shorting contacts (N)
- Solder or PCB terminals

Specifications:
- Current rating: 200mA
- Life: 10,000 cycles
- ¼-28 UNF-2A bushing thread, ¼" shaft
- Behind panel: 0.658" (solder), 0.537" (panel to PCB)
- For shaft and panel seal, shorting contacts; *go online or call*
- Mfg. part nos. with C = military style (panel seal)

SERIES 77 SINGLE DECK ROTARY SWITCHES

RoHS Compliant Available

Grayhill

NEW

Features:
- Small Size - Minimal Space Required Behind Panel
- Available with Continuous Rotation or a Fixed Stop
- High Stop Strength
- Shaft and Panel Seal
- Single Deck with 1 or 2 Poles

Specifications:
- Low Level Circuit Rating: 10 ma
- Contact Resistance: 50 mΩ max
- Operating Temperature: -40°C to +85°C
- Rotational Torque: 3 in-oz min. to 7 in-oz max
- Stop Strength: 7.5 inch pounds min

312 SERIES 30-AMP 300VAC ROTARY TAP SWITCHES

UL RoHS Compliant Available OHMITE

- Ratings: 30 Amps, 300VAC (150VAC Between Taps), 20VDC Non-inductive
- Shaft Torque: 3-7 in./lbs.
- Diameter: 3.13" (79.5mm)

Slow-break, quick-make action for switching AC current, and all-soldered, all-riveted metal and ceramic construction for reliable operation. Self-cleaning silver alloy contacts, rounded common contact. Arc-proof ceramic body. Mount in 1/4" panels (maximum) with three no. 10-32 flat-head, 3/8" long machine screws, included. Soldering type terminals. UL listed file no. E14245. *Order knobs separately; on this page.*

Mfg. Part No.	No. of Taps	Total Rotation	Stock No.	Price Each 1-9	10-49
● 312-3E	3	60°	64K8432	150.67	140.01

(5010)

111 SERIES 15-AMP 125VAC ROTARY TAP SWITCHES

UL RoHS Compliant Available OHMITE

- Ratings: 15 Amps, 125VAC, 20VDC Noninductive
- Shaft Torque: 1.5-3.8 in. lbs.
- Diameter: 2.0" (50.8mm)

Slow-break, quick-make action for switching AC current, and all-soldered, all-riveted metal and ceramic construction to provide reliable operation. Self-cleaning silver alloy contacts, rounded common contact. Arc-proof ceramic body. Use 3/8-32 bushing and hex nut for 1/4" thick maximum panel mounting. A 3/16" hole is required for the non-turn washer. Soldering type terminals. UL listed, file no. E14245. *Order mounting hardware kit and knobs separately on this page.*

Mfg. Part No.	No. of Taps	Total Rotation	Stock No.	Price Each 1-9	10-49

1K2 SLIDE SWITCHES

RoHS Compliant Available

eao

Standard | Standard Right-Angle | Extended Actuator | Extended Actuator Right-Angle

Features:
- Recommended for PCB applications
- One of the most compact miniature single-pole changeover switches available
- Ideal as a jumper replacement
- Offered in straight or right angled versions
- Raised actuator version suitable for through-panel operation

Specifications:
- Gold over nickel contacts offer high reliability
- Sealed base for solvent cleaning; *contact for details*
- Clear actuated position indicator
- Operating life of 10,000 operations
- Stackable at 0.1" pitch
- SPDT contact

83139 SERIES SEALED DOUBLE BREAK MICROSWITCHES

CROUZET SWITCHES

- IP 67 protection against hydrocarbons and detergents
- Form C SPDT contact
- Double break switching
- Double insulated or Atex flameproof casing
- Choice of actuators

With snap-action double break, the **83139** microswitch provides an even higher degree of safety. Depending on the model, it has double insulation for additional protection against electric shocks. For industrial environments where there is a risk of explosion, there is an ATEX certified flameproof version (EEx d II CT6). With a wide choice of actuators, the **83139** is ideal for safety applications such as the control of valves in industrial environments.

V4 SEALED 8318 SERIES, SNAP-ACTION SWITCHES

RoHS Compliant Available

CROUZET SWITCHES

- Nominal ratings 0.1 A to 10 A / 250 VAC
- Minimum rating 1 mA / 4 VDC
- Operating temperature -40°C to +125°C
- Choice of actuators with 2 possible fixing positions
- IP 67 protection

MICRO SWITCH™ AUXILIARY ACTUATORS FOR SM AND SX STYLE BASIC SWITCHES

RoHS Compliant Available

Honeywell Sensing and Control

SELECTION, SPEED, SERVICE. All Found Here.

Straight Leaf — Roller Lever — Simulated Roller Leaf

Provide basic switches (not included) with an easier means of operation and adjustment. Auxiliary actuators adapt switches to different operating motions by supplying supplemental overtravel. Mounting hardware included.

ACTUATORS FOR SM SERIES

MICRO SWITCH™ PREMIUM SM SERIES SUBMINIATURE BASIC SWITCHES

RoHS Compliant Available

Honeywell Sensing and Control

SELECTION, SPEED, SERVICE. All Found Here.

Features:
- Premium subminiature switch precision applications
- Small size, light weight
- Covered case construction with molded-in terminals
- Applications: Aerospace, valve control

Specifications:
- Circuitry: SPDT
- Operating temperature: -65°F to +250°F
- Wear-resistant phenolic base and cover
- Contacts: Silver, gold
- Mechanical life 10 million cycles

MICRO SWITCH™ PREMIUM SX SERIES SUBMINIATURE BASIC SWITCHES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Premium sub-miniature switch for premium applications
- Small size, light weight
- Covered case construction
- Applications: Aerospace, valve control, medical/dental equipment

Specifications:
- Circuitry: SPDT, SPNO
- Temperature tolerance: -67°F to +250°F standard
- Contacts: silver, gold
- Mechanical life: up to 10 million cycles
- Wear resistant phenolic base and cover
- Elongated mounting hole for easier, more accurate mounting
- Long-life beryllium-copper spring
- Cover securely cemented to base

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Small, Size with Power Duty or Low Energy Power Ratings
- Similar Size and Mounting as SX & SM Series
- Variety of Termination and Lever Options

Applications:
- Vending machines
- Communication equipment
- HVAC equipment

Specifications:
- Termination: Solder or PC mount
- Contact rating: 0.1A or 3A at 125VAC
- Operating temperature: -25°C to +85°C
- ZX contact rating: up to 3A at 125 VAC
- ZM/ZV contact rating: up to 10A at 125 VAC

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Reliability and accuracy
- World wide package acceptance
- 100K operations at full load
- Applications: Appliances, medical/dental equip, test instruments

Specifications:
- Circuitry: SPDT
- Operating temperature: -40°C to 85°C
- Physically interchangeable with V3 series miniature basic switches; on this page
- All existing V3 lever options available
- 0.114″ (2.90mm) mounting holes + 0.122″ (3.1mm) holes
- **D8 suffix** denotes 0.187″ x 0.020″ quick-connect termination
- **E9 suffix** denotes 0.250″ x 0.032″ quick-connect termination
- Also available in high-temperature (to 350°F), high -current (to 25 amps), and ENEC approved and CE compliant versions; *go online or call*

SPECIFICATIONS

A	B	C*	D
5A, 125, 250 or 277VAC; 1/10Hp, 250VAC	11A and 1/3HP, 125, 250 or 277VAC; 1/2A, 125VDC; 1/4A, 250VDC; 4A, 125VAC "L"	15.1A and 1/2HP, 125, 250 or 277VAC; 1/2A, 125VDC; 1/4A, 250VDC; 5A, 120VAC "L"	1A, 125VAC
E	**F**	**S**	**W**
10A and 1/3HP 125 or 250VAC; 1/2A, 125VDC; 1/4A, 250VDC; 4A, 125VAC "L"	3A, 125, 250 or 277VAC 1/10hp, 250VAC	0.1A, 125VAC	15.1A, 125, 250 or 277VAC

*Available only when specifying 150 gram operating force. L denotes lamp load.

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

- Contact configuration: SPDT
- Operating speed:.01mm to 1m/s (at plunger)
- Wide current range: 0.1 A, 5 A, 10 A
- Voltage rating: 125/250VAC, 30 or 48VDC
- Operating force: 200 g
- Temperature rating: -40 °C to 85 °C [-40 °F to 185 °F]
- Insulation resistance: 100MOhm min. at 500VDC
- Terminals: 4,8 mm x 0.8 mm or 4,8 mm x 0.5 mm or 300mm wire
- Meets IP67 standards for sealing (wired versions)

MICRO SWITCH™ V-BASIC STANDARD V15 SERIES SNAP-ACTION

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Most suitable for most applications
- Matches product performance to customer design expectations
- Unique push-in terminal option
- Rating: 16A, 22A and 26A
- Accurate repeatability and long life at great value
- Ideal for use with: HVAC, office business machines, vending machines

Specifications:
- Insulation resistance: less than 100mΩ
- Dielectric strength: 1000VAC (50/60Hz)
- Operating frequency: 30ops per minute
- Electrical rating: 16A at 250VAC; 22A at 250VAC
- Temperature rating: T=125°C, H= 150°C

MICRO SWITCH™ PREMIUM LARGE SNAP ACTION BZ/BA/BM/BE SERIES BASIC SWITCHES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Accepted as the worldwide standard
- Low operating force and differential travel
- Variety of actuator configurations
- Enhanced mechanical life up to 20 million cycles
- Ideal for use in brake assemblies, building controls , door latches, sprinkler systems, elevators, HVAC, industrial kitchen equipment, timing devices and value positions

Mfg. Part No. Suffix Descriptions:
- -A2 = Bottom-Facing Screw Terminals (6-32 Screws)
- -P4 = Side-Facing Screw Terminals
- No Suffix = Solder Terminals
- D5 = Quick connect

Specifications:
- Meet ML-S-8805 standards
- Circuitry: SPDT
- Rated: 125, 250, and 480VAC
- Operating temperature: -55°C to 85°C upt to 200°C

MICRO SWITCH™ ACTION DPDT BASIC SWITCHES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features
- Same size as the MICRO SWITCH™ BZ Series, but with two circuits
- Ideal for HVAC, irrigation systems, manually operated devices, medical/dental equipment, test instruments, timing devices, valves

Specifications
- Current rating: 10A
- Circuitry: DPDT
- Termination: screw
- Voltage: 125VAC, 250VAC, 28 VDC
- Operating temperature: -55 °C to 85 °C [-67 °F to 185 °F]

MICRO SWITCH™ PREMIUM LARGE SNAP-ACTION MN SERIES BASIC SWITCHES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Accepted as the worldwide standard
- Low operating force and differential travel
- Variety of actuator configurations
- Ideal for use in limit or control mechanisms

Specifications:
- DPDT-DB (double-break)
- Rated 15A @ 480VAC
- Pin Plunger Actuator
- Motor Handling Capacity of 1HP @ 240VAC
- Mechanical Life to 10,000,000 Cycles
- Arc Resistant Plastic
- Screw Termination

MICRO SWITCH™ PREMIUM LARGE SNAP-ACTION BASIC SWITCHES DT SERIES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Two independent single-pole double-throw circuits in one housing
- Same size as the MICRO SWITCH™ BZ Series, but with two circuits
- Enhance mechanica life up to 20 million cycles
- Low operating force and differential travel
- Variety actuator configurations
- Ideal for use in HVAC, irrigation systems, manually operated devices, medical/dental equipment, test instruments, timing devices, valves

Specifications:
- Circuitry: DPDT
- Termination: screw
- Voltage: 125VAC, 250VAC, 28 VDC
- Contacts: silver
- Operating temperature: -55 °C to 85 °C

MICRO SWITCH™ PREMIUM LARGE SNAP-ACTION TANDEM BASIC SWITCH ASSEMBLY 6AS SERIES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features
- 6AS Series consists of two large premium BZ/BA/BM/BE snap-action switches ganged together and actuated by a single actuator
- Field adjustable operating point on one or both basic switches
- Solder, A2, and T-type terminations available, along with straight, roller, and leaf levers
- Mounting holes accept pins or screws of 3,53 mm [0.139 in] diameter
- Often used for boiler controls or anywhere two circuits need to be controlled by one actuator

Specifications
- Circuitry: 2 CKT SPDT
- Voltage: 250 VAC
- Switch Terminals: Screw

MICRO SWITCH™ LARGE PREMIUM SNAP-ACTION SWITCHES MT SERIES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features
- Contains a magnet for very high dc loads
- Ideal for dc motors, solenoids
- 100,000 operations

Specifications
- Current rating: 10A
- Circuitry: SPDT
- Termination: solder, screw
- Voltage: 125VDC, 250VDC
- Operating temperature: -55 °C to 82 °C [-67 °F to 180 °F]

MICROSWITCH™ SNAP ACTION SEALED SE/XE SERIES BASIC SWITCHES

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features:
- Epoxy potted in corrosion-resistant aluminum housing to seal precision switch contacts from contamination
- Watertight seal per enclosure design symbol 3
- Pin plunger actuator
- Qualified to MIL-S-8805

Specifications:
- SE switches include an SM basic switch
- XE switches include the smaller SX basic switch
- Mfg. part nos. with "T" suffix have solder terminals
- Mfg. part nos. with out suffix have 1' wire leads
- Contacts: silver gold, bifurcated gold

XC SERIES SUBMINIATURE SNAP-ACTION BASIC SWITCHES

RoHS Compliant Available

JOHNSON ELECTRIC

burgess

Features:
- Wide range of actuating forces
- Long mechanical and electrical life
- Solder, PCB, faston (quick connect) terminals

Specifications:
- Contact rating: 10A at 250V
- Dimensions (mm): 19.9 x 9.5 x 6.4
- Housing Phenolic-Melamine, Thermosetting
- Circuitry: Change-over, NO, NC
- Temperature range: -40°C to +85°C
- Mechanical life: 5–107 cycles
- Protection enclosure IP40
- Actuator material: Stainless steel

Mfg. Part No.	Current (A)	Operating Force (N)	Actuator Style	Termination	Stock No.	Price Each 1-9
XCG3-J1-Z1	5	2.14	Lever	Solder	08P3895	4.56
XCG3-S1Z1	5	2.49	Roller Lever	Solder	12P9466	5.20

(142163)

V3S SERIES MINIATURE SEALED SNAP-ACTION BASIC SWITCHES

RoHS Compliant Available

JOHNSON ELECTRIC

burgess

Features:
- IEC IP67 sealed mechanism
- Industry standard miniature switch mounting hole positions
- Pre-wired - horizontal leads
- Side mounting

Specifications:
- Contact rating: 5A at 250VAC
- Dimensions (mm): 31.7 x 24.2 x 10.5
- Housing: Glass fiber reinforced nylon
- Circuitry: Change-over
- Temperature range: -40°C to +85°C

Mfg. Part No.	Current (A)	Operating Force (N)	Actuator Style	Termination	Stock No.	Price Each 1-24
V3SUL	5	14	Plunger	Wire Leaded	51P3623	27.38
V3SY1UL	5	7.5	Lever	Wire Leaded	51P3624	27.54

D2FD SERIES DUST PROOF ULTRA SUBMINIATURE BASIC SWITCHES

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

- Contact configuration: SPDT
- Sealing by using rubber packing means the switch can be used in dust-proof environments (IEC IP6X).
- Switch rating of 2 A at 125 VAC possible with a single-leaf movable spring. Models for micro loads are also available
- Ambient operating temperature: -20°C to +70°C
- Operating speed: 1 mm to 500 mm/s

D2FS SERIES ULTRA SUBMINIATURE BASIC SWITCH

NEW

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

Features:
- Developed for a few number of operations during a long period of use such as door-detection to avoid sabotage on meters.
- Simple construction with a single-leaf movable spring realizes reasonable cost.
- Self-clinching, right-angled and left-angled PCB terminals are also available.

Specifications:
- Ambient temperature: 20 ± 2°C
- Ambient humidity: 65 ± 5%
- Operating frequency: 20 operations/min
- Rated voltage: 6VDC
- Resistive load: 0.1A

D2F series are subminiature, snap-action switches. SPDT contacts. Suitable for a wide range of applications such as household appliances, office equipment, and audio equipment. High-precision, dual-spring, reverse-action mechanism supports long life. Models shown have PC board terminals. Also available with self-supporting terminals (add suffix **"-T"** to end of mfg. part no.), soldered terminals (suffix **"-D"**), right-angle (suffix **"-A"**), and left-angle (suffix **"-A1"**); *go online or call*.

OMRON. ELECTRONIC COMPONENTS

Short Hinge Roller Lever | Pin Plunger

Long Hinge Lever | Simulated Roller Lever | Hinge Lever | Hinge Roller Lever

High-quality, watertight, high-precision, miniature snap-action switches meet IP67 (IEC529) requirements (for lead wire types) and IP50 (for terminal types). Monoblock construction provides high sealing capability and is ideal for dusty places or where water is sprayed. Operating temperature: –40°C to +90°C.
